Two tragedies were reported in Tokyo on the night of Dec. 27th. One was the case of Y. Inouye, a student of the College of Law, who committed suicide with a revolver at the boarding THE Yorodau reports that fifty field-pieces made at the Osaka Arsenal were sent on Dec. 28 to Hiroshima.

The competition between the Government Railway (Tokaido) and the Kwansei Railway is She was found to have drunk a quantity of sultaneous, 10kyo. All of the crew were house known as Ushu-kwa. Another was that of True (27) wife of K. Yagi, a merchant patronized by the Department of the Imperial Household, reported by the Kohumin to be becoming more phuric acid. In both cases, the cause is believed to have been insanity.

FOREIGN POLITICS.

Friday, December 25.
A London telegram to the fiji Shimpo says that the first-class British cruiser King Alfred-14,100 tons, 23 knots-is to start at once for the Far East.

The British press—according to a despatch to the Jiji—advocates the adoption of a strong policy in order to render the Anglo-Japanese alliance efficacious.

A telegram from Shanghai to the Shogyo Shimpo says that the Peking Government has finally decided to adopt a strong policy towards Russia, and has instructed all the provincial officials to make preparations for war. The trouble is, however, that the situation seems to be entirely beyond China's reach. At sea she is helpless everywhere, and on shore she could not make even a show of effective strength at the scene of operations, namely, Manchuria. Were Russia engaged defending Manchuria against invasion by another Power from the east or the south, China might accomplish something by an irruption across the western frontier, but the idea of the Chinese marching single-handed against the Russians in Manchuria is quite untenable. No Power, so far as we can see, is going to undertake the colossal task of driving Russia out of Manchuria.

We find in the Niroku Shimbun a transcript of a petition said to have been addressed to the Throne of China by Viceroy Yuen and General Tieh advocating an alliance between China and Japan. To be quite frank the Niroku has been responsible for so many transcripts which never materialized that we hesitate to attach any importance to this bit of copy. Probably the only salvation for China would be such an alliance, were it accompanied by a frank determination to place her affairs in Japanese hands and to follow Japanese example. But would Japan undertake the task? That we greatly doubt, But would Japan for the present at all events.

The minor journals of Tokyo publish a statement supplied to them evidently from the same source, to the effect that on the 17th December the Japanese Representative the hopelessness of looking for any change of attitude on Russia's part, in spite of which warning the Japanese Government has asked for precisely such a change. This, that position, then of course war is quite that position, then of course war is quite that position, then of course war is quite that position. of course, is a good peg whereon to hang inevitable. But since it can not yet an attack of the Cabinet's drifting policy. But we have not the least hesitation in saying that we believe Mr. Kurino's alleged warning to be made out of whole cloth.

public service; that such and such a manpublic service; that such and such a man-of-war has taken its full complement of men velling towards an issue. It will be a and proceeded to some unknown place; that reversal of the situation hitherto existing, for a certain arsenal has been ordered to prepare upon Russia will be thrown the onus of proa quantity of ice-shoes for horses, and so test, and, in the last resort, the responsibility on. It is well that folk should have something to quicken their circulation in the cold season. We may take it for granted that that there are dissensions in the Cabinet every conceivable preparation has been made itself, owing to the fact that certain Ministers for a coup at the final moment, if there be a

with having struck out a plan for its comple-tion within the course of this year, while Baron Kodama wants to have it treated as favourable response. a military road and finished by October.

The Asahi Shimbun has a London telegram saying that England and France are taking steps to bring about a pacific settlement of the Far-Eastern question.

The same paper says that, according to news from London, Court Lamsdorf has again assured the French Government of a pacific issue.

The Jiji and the Kokumin concur in declaring that the time has come for Japan to adopt measures of self-defence; that the world will give judgment in her favour and that the whole responsibility rests on Russia.

Monday, December 28. There is no noteworthy change in the situation. Beyond all question the activity in military and naval circles is great, and it officers has been stopped and that all preparations are practically complete for immediate action in the eyent of failure to find a satisfactory diplomatic solution of the problem. But we do not interpret all this to mean war necessarily. interests is Japan need not invade the latter in order to consolidate the former, nor need Japan's measures of consolidation convert Russia into an active enemy. not greatly concern itself about the fate of of any other conceivable hypothesis. Manchuria, provided that Japan's treaty rights in that region were duly guaranteed. But with Russia in Manchuria and refusing to take any measure pointing to definite therefore it is Russia's turn to offer some evacuation, nothing remains for Japan exsharing Manchuria's fate. not have any valid ground to object to such particular. action on Japan's part, unless, indeed, the in St. Petersburg warned his Government of St. Petersburg statesmen are prepared to avow that they have thrown their net over to take place subsequently to a luncheon at pretended, in spite of Yong Am-pho and the lumber incidents, that Russia has clearly ear-marked Korea for her own, she must that forecast prove incorrect, there will be take an exceedingly unreasonable position no further waiting on Russia's convenience. warning to be made out of whole cloth.

Some journals publish statements that this ship or that has been requisitioned for of self-protection there. These are the lines of initiative.

Fusan Railway, and Count Inouye is credited and New York. It seems to be a fact that attempts to float a loan have been made, but that they have not met with a very

Tuesday, December 29. Berlin asserts viā London that Russia is prepared to abandon the strong attitude exhibited by her in her first answer to Japan. It is to be hoped that this rumour will prove correct. But we remember that precisely similar assertions preceded the delivery of the Russian note of the 11th, which contained no concession at all. certainly prepared to make some sacrifices in the cause of peace. She has proved that already by her patient for-bearance. But beyond a certain point she can not go, and unless Russia meet her at that point a hopeless situation is created. The world believes that the Tsar and some, at any rate, of his most trusted councillors are in favour of peace, and understand the appears to be certain that the leave of naval disadvantage of converting the Japanese into permanent enemies. It is for His Majesty and the statesmen of St. Petersburg to furnish now some evidence of their wholesome desires. Japan has not moved a ship or a soldier throughout the whole crisis. She has re-The focus of Japan's vital mained resolutely quiet from first to last, not quite clearly defined and so is even seeking to increase her navy by taking even seeking to increase her navy by taking the area of Russia's immediate aggression. advantage of the legitimate opportunities that presented themselves. Russia on the contrary, has poured troops into Manchuria and has crowded all her available men-of-war It is possible for both into Far-Eastern waters. Against whom Powers to emerge from the situation without have these extensive military and naval any loss of essentials or any impairment of preparations been directed? It can not be prestige. Korea is Japan's care. Were unreasonable on Japan's part to construe there no Korca, the Tokyo Government need them as directed against herself in the absence she has neither protested, asked questions, nor made corresponding preparations. She has not even called out her reserves. evidence of pacific intention, unless, indeed, cept to adopt such practical precautions as she wants war, and unless she totally will secure the Korean peninsula against despises the good opinion of the nations in Russia should general and of the Anglo-Saxon nations in

It was believed yesterday in Tokyo that a discussion in the presence of the Emperor was which the Elder Statesmen, the Cabinet-Ministers, the principal members of the Privy Council and others were to be present.

There is said to be an idea in well-informed circles that Russia's second answer will be received about the 3rd proximo. Should Japan will at once take such steps as seem essential for the preservation of her position in the East. So says rumour.

The Echo de Chine, a journal published in Shanghai, accuses the Japanese of being "an Oriental people who have opened themselves to the entire world in order the better to isolate themselves and render existence within their borders impossible for those who re-side there;" and accuses them also of "aspiring to the regeneration of China in order to become preponderant in Asia at the expense of China and to monopolise all the commerce which the Europeans carry on there." rather a shock to find a Frenchman penning such inartistic silliness. Justice, of course, The Asahi Shimbun publishes a statement, no one expects from the average Occidental publicist when discussing Oriental affairs. But a semblance of sense may not unreason-Our ably be looked for. And so too may some seems to be much talk of the necessity of resignation is owing to failure to effect the picions which should long ago have become hastening the construction of the Seoul- floating of a Russian loan in Paris, Berlin obsolete and which have never found a

shadow of confirmation in facts. In mediœval days one of France's greatest monarchs took a prominent part in endeavouring to "regenerate" China, and in modern times many able Frenchmen have applied themselves to the same task, but we have never heard it hinted that these attempts were inspired by a desire to become predominant in Asia at China's expense and to monopolize all object the expulsion of foreigners from within her borders? Blindly virulent accusations of this kind bring their formulators into extreme contempt, and have ceased to be extreme contempt, and have ceased to be of much injury to the Japanese, who nevertheless can not fail to wonder, sometimes, whether the story of Occidental relations with the Orient really justifies such suspicions.

Reuter's Agents occasionally send very strange items of news to their Far-Eastern subscribers. It is very strange, for example, to be told that Russia is surprised and concerned about the re-organization of the Chinese army, since she construes the undertaking as a proof that she is distrusted by the Middle Kingdom's statesmen. What on earth can she expect except to be distrusted? She certainly has not done much to merit confidence. Obviously the Russians see their own doings in a light which outsiders find difficulty in imagining. Some of them are actually saying, in all seriousness, that Russia should consider whether her duty to the cause of peace and her friendship for China do not require her to check England. China do not require her to check England's advance into Thibet. "Duty to the cause of peace and friendship for China" are not exactly the kind of motive forces to which the onlooking world is likely to attribute Russia's proceedings now-a-days in East Asia. She is suffering from a fever of aggressiveness, which, being a malady that periodically takes hold of all great nations, is not in itself a thing to be ashamed of. But that it should be accompanied by such But that it should be accompanied by such a very naïve conviction of grace and goodnature may justly provoke a smile.

It is curious to find that on the 17th instant a belief prevailed in Hongkong that written intelligence as to the unfavourable nature of the reply presented by Russia to Japan on the 11th. Nothing was known publicly in Tokyo about the contents of the reply until the 12th into But a wine wide with the contents of the reply until the 12th into But a wine wide wide. reply until the 13th inst. But a wire might easily have reached Hongkong from Tokyo or even from London long before the 17th. However, the fact is that on the 17th inst. the Hongkong Daily Press had a leading article in which the supposed settlement was announced, and one of the explanations was that as "neither side saw its way to seriously lurting its adversary," both refrained wisely from fighting.

Thursday, December 31.

The Jiji Shimpo has a telegram from London to the effect that a rumour is prevalent that the British Government has clearly informed France that should the latter join Russia against Japan, England will take Japan's part. It appears to us that such a statement may be dismissed as altogether incredible. Even though England and France were not on exceptionally good terms, as happily they are, the kind of announcement now attributed to the former Thursday, December 31.

would be wantonly hurtful to France's feelings. It would be, in short, a wasteful insult, for France must be supposed to know perfectly well what kind of obligations are imposed on Great Britain by the Anglo-Japanese alliance. What seems to us much more likely is that the Governments of London and Paris are concerting to urge upon Russia, in a friendly spirit, the advisability at China's expense and to monopolize all kussia, in a friendly spirit, the advisability the commerce carried on there by Euro- of making some concession to Japan. All peans. And what proof, what semblance of the signatories of the Hague convention are peans. And what proof, what seminance of the signatones of the riague convention are proof, can be adduced that all Japan's progress and all her appreciative adoption of Occidental sciences and systems have for tains a clause that in the event of complicatains a clause that in the event of complicasignatories in war, any other signatory may, without incurring subsequent responsibility without incurring subsequent responsibility thereby, invite the attention of the parties concerned to the existence of the Hague Tribunal as a means of composing their difficulty. Were this step taken, the Tsar, at whose instance and by whose endeavours the Hague Convention was brought about, might reasonably be expect-did not proceed.

Monday, December 28.

Li Ha-yong, Minister of Foreign Affairs in Seoul, has at length been allowed to consummate his repeated attempt to retire from succeed him. The latter was recently appointed to represent Korea in Tokyo, but ed to entertain the idea of appealing to that tribunal of peace.

> Reuter telegraphs that Russia has ordered 234 million lbs. of mess meat in the United States for delivery at San Francisco in the end of January. Of course there can be no question as to the destination of this foodsupply: it is for Manchuria. But we do not supply: It is for Manchuria. But we do not see that it suggests any thing sinister. The inference we draw is simply that Russia finds she can not fully rely on her railway service for the carriage of bread-stuffs to Far-Eastern Asia in mid-winter. She is therefore under the necessity of transporting supplies over-sea from the Pacific coast via Dalny and Port Arthur. But no such necessity seems to have presented itself last winter. We do not remember to have heard then that any large orders for military supplies were placed in America. It follows plainly that Russia must have a very much greater force in Manchuria now than she had then. A curious commentary on the theory of evacuation.

THE REYNELL-KIRBY CASE.

It may reasonably be hoped that the Reynell-Kirby case is now finally disposed the negotiations between Japan and Russia the strangest on record. For, stated in brief, it amounts to this, that a man having obtained the use of certain property under a lease and having enjoyed the property for many years, then undertakes to prove that he must be allowed to continue in enjoyment of the property because the lease was invalid ab initio. That is That is undoubtedly a unique contention-to claim the continuance of a title on the ground that the title is worthless. If Mr. Reynell obtained the property in question by means of an instrument which had no legal value, his effort to avoid the surrender of the property by establishing the worthlessness of the instrument is one of the quaintest things ever heard of Of course he will say that he did heard of. Of course he will say that he did not seek to retain the property under the

KOREA.

Friday, December 25. At last it would seem that the Lady Om is to be raised to the position of Empress of Korea. The celebration in connexion with the event was to have taken place on the 6th of January, but the illness of the Empress Dowager having become so serious as to threaten that unless the ceremony of coronation were speedily effected it might be coronation were speedily effected it might be interrupted by a period of mourning, the 25th inst. was substituted for the 6th proximo. We learn this from a telegram in the Kokumin.

did not proceed.

Li Kon-thaik, who during the past few months has been a leading figure in the field of Korean politics, and who is credited with being the head of the pro-Russian party in Seoul, appears to have addressed a strong Russo-phil memorial to the Throne. According to a Kokumin telegram he states that although a continued refusal on Korea's part to open Yong Am-pho may lead to the part to open Yong Am-pho may lead to the adoption of military measures by Japan, any such procedure by Japan would inevitably provoke a corresponding movement on Russia's side. In 1894 Korea made the mistake of leaning upon China alone and the consequence was that her country became a battle-field. But Russia and China are very different. Russia, the memorialist alleges, has promised through the mouth of M. Pavlow, that she will assist Korea and M. Pavlow. that she will assist Korea and consequently there is no reason to open Yong Am-pho in deference to Japanese menaces

If Li Kon-thaik has really sent in such a memorial he is an advanced type of the material that is waiting in Seoul to be moulded by foreign intriguers. One must assume that his ultimate purpose is to pre-serve the integrity and independence of his country, which end he apparently thinks can be better served by allowing Russia to enjoy a monopoly of appropriation than by giving free access to all Powers and thus providing against the aggressive predominance of any one. We should have thought that persons of such very shallow intelligence as Li Kon-thaik could scarcely exist in the immediate presence of the object lessons that Russia is offering in Manchuria, but it would seem that there are no limits to imbecility. In 1894 many people undertook to sneer at Japan's protecting Korea's independence. But there is no one, we presume, who, after the experience of the past nine years, will pretend to say that Japan has not lived up to the standard she then set for herself. She has uniformly and persistently refrained from everything favouring of domination or aggression in Korea, and she has thus proved conclusively that not the possession of the peninsula by herself but to preserve it against occupation by a strong aggressive Western Power is her object. There was no hesitation on her part about withdrawing her troops from the peninsula after the stroops from the stroops from the peninsula after the stroops from the nestration on her part about withdrawing her troops from the peninsula after the war of 1894-5, and there never has been any practical disposition to send them there again. If Korea has to see her territory converted once more into a foreign military camp, the responsibility will rest on men like Li Kon-thaik, whose

blindness to the lessons of the time is phenomenal.

The Mokpo incident has been settled and the strikers have resumed work. Some of our Tokyo contemporaries contain a statement of the terms of settlement, but we fail to find them intelligible in view of the fact that the origin of the trouble remains to this moment obscure. The only salient and unmistakable point is that some ten of the strikers were arrested.

Tuesday, December 29.

Following on recently wired rumours as to the renewal of Tonghak disturbances in Korea, news now comes that the distress usually felt by the poorer sections of the population as winter deepens has driven, or is driving, many persons to commit excesses in the nature of burglary and incendiarism. Ex-ceptional measures for restoring order are said to be deemed necessary.

It appears also that business is in a state

of great depression, partly owing to the reserved policy of the banks in view of the unsettled political situation, and partly owing to the depreciation of the nickel coins.

The telegraph says that an heir presumptive to the Korean Crown has been selected in the person of the son of Li Chil-yong, who is now acting Minister of Foreign

ANY ARTHUR TO ANY GUINEVERE.

"We do pray for mercy;
And that same prayer doth teach us all to render
The deeds of mercy,"

earth. He loved her still and wept that she was gone, And smiled upon her gently through the

Enchanting her with magic loveliness.

But day-light broke and 'neath the warm, harsh sun

Her fairness faded and the foot of man Sullied and soiled her virgin purity.

The Moon looked down nor knew his changed Love,

And frown'd upon her from his throne in heaven

Until the little beauty that remained From sin and sorrow melted fast away.

My Snow-cloud, thou hast fallen from thy height, But, having loved thee, I must love thee

Until once more uplifted to the skies, As pure as snow, thy new-born soul shall

M.K.

PRINCE KONOYE.

Prince Konoye's condition inspires much uneasiness. He is in a state of great debility and inflammation of the lungs has set in. Indeed some reports speak of his life being in imminent danger.

We fear that there is little hope of the On the 28th ultimo Prince's recovery. On the 28th ultimo the Emperor raised him to the Second Rank of the First Official Grade, an extraordinary honour seeing that the Prince's present official title is Second of the Second Grade. The Prince's condition is spoken of as extremely critical.

BUDDRISM IN JAPAN.

Alluding to a criticism which recently appeared in these columns, Bishop Awdry quotes the critic as saying:—"If in giving and ashes, solemn and protracted acts of worship, the terrors of an eternity of torture has omitted to dwell at any great length on the extreme pessimism that characterizes its teaching, it is probably because he sees abundant evidence in the lives lived by the Japanese and in their writings that this pesthese sunny isles, whatever it may have done elsewhere." It appears to us that this a place for the occasional deposit of small criticism is perhaps a little erroneous, for in coins in an alms-chest; a place for offering the volumes under review the pessimistic tendency of Buddhism is set forth with distinctness and the fact of its failure to exercise a sensibly pessimistic influence on the Japanese is explained. We quote a few passages to illustrate this :-

"Buddhism placed at the head of its scriptures the instability of everything events, however great the actors, however large the issues, to a track left by a ship upon the wide ocean, and educated a pessimistic mood of indifference to sovereign and parent alike." (Vol. I. p. 1299).

"The music of words, the music of motion and the music of song rank equally in popular appreciation. Of course Buddhist popular appreciation. music is not included in that description. Buddhist music is a wail, a threnody. It makes no appeal to the natural disposition makes no appeal to the natural disposition part, at any rate. But whence did the mind part, at any rate. But whence did the mind of the Japanese, and the vogue it obtained from the Nara epoch onwards contributed largely to the growth of a dangerous form largely to the growth of a dangerous form of pessimism." (Vol. I. p. 154).

"The character of the Japanese under-

went very marked modification during the first sixteen centuries of their history. the time of their arrival as invaders they were hardy, fierce people, fond of fighting and ready to reduce to slavery every one that they overcame by force of arms. by degrees the comparatively genial climate of their new home, its soft scenery, the introduction of Chinese civilization with its endless codes of ceremony and etiquette, and the spread of a literature which occupied itself chiefly with tender sentiments and profligates, and finally into blase pessimists. Buddhism greatly assisted the growth of this last mood." (Vol. I., pp. 183-4.)

became the entrance to actual beatitude. The ascetic selfishness of the contemplative conception of one supreme, all-merciful beof social and political distinctions that yawned so widely between the patrician and the plebeian, and all the other unsightlinesses of the world, became subjective cidola destined to disappear at the first touch of moral light. The Buddha and the people were identified."

(Vol. V., pp. 151-2).

It seems from these passages that the the wild rumours now circulating. pessimistic influence of Buddhism as originally taught is fully recognised, but the theory of the author of "Japan" is that instead of permanently saddening the minds of the

permanently saddening the minds of the thrownsell near and soft into a stagged people, Buddhism itself was gradually bright-ened by the sunshine of their nature. Thus nal, not even excluding such sober newspapers in the lighter second of the last quotation as the Fill Chieves and the Kabumin. Nothing in the immediate sequel of the last quotation as the Jiji Shimpo and the Kokumin. Nothing

made above he goes on to say :- " Religion does not overshadow the daily life of the The gloomy fanatic is unknown. Confession of sins, repentance in sackcloth Japanese. —these things enter scarcely at all into the layman's existence The temple presents layman's existence itself to him as a place where the mortuary tablets of his ancestors are guarded; a place to be visited for the burning of incense at tombs and their adornment with flowers on seem in need of the Buddha's divine influence; a place where the ashes of the worshipper himself will in the end be laid to rest and whither his own friends and relatives will come to honour his memory when he too shall have received from the priests one of those beautiful and benevolent posthumous titles which they know so well

The theory here very distinctly outlined, as it appears to us, is that pessimistic as was the character of Buddhism when it first came to Japan, the creed underwent such modifications by contact with the Japanese mind that after the elaboration of the Shingon tenets in the 9th century and the Jodo in the 12th, it became a comfortable and comforting faith and lost its saddening influence in great

THE JAPANESE PRESS.

Friday, December 25.

The attitude of the leading Japanese journals at this moment is one of uncertainty. They are obviously perplexed what to think which is not surprising when their lack of material for forming a judgment is recalled. The vital point is the language used by Russia in her reply of the 11th instant, and concerning that point no trustworthy intelligence is available. The Nichi Nichi Shimbun confines itself to marshalling the rumours scenic charms, produced enervating effects. that are most persistent and apparently most the rude warriors were transformed, first into votaries of pleasure, then into hysterical the suggestion—not a conclusion of its profigates and finally into black persimients. north of Korea for her own sphere of influence, and while abandoning the south "Thus the colours that Buddhism took in to Japan, stipulated that no fortress should be its transmission through the Japanese mind erected at any point commanding the Korean straits. For our own part, we do not profess be a passage to mere non-existence and to be better informed than the Nichi Nichi, but we can not believe that Russia made any such proposal. Nothing is less likely than disciple was exchanged for a career of active that, while excluding Japan from any voice charity. The endless chain of cause and in the Manchurian question, the St. Peterseffect was shortened to a single link. The burg Government should expect her to accept in Korea a situation inferior to that ing forced itself into prominence. The gulf now actually occupied by her there. Russia has a very large ambition and she satisfies it without much regard for ethical restraints, but she has never shown herself wantonly unreasonable in negotiation, and as it is most unlikely that she wishes to make an active enemy of Japan, the public will not be disposed to attach credence to many of

Digitized by Google

can be more resolute than their tone, though Russo-Japanese negotiations. But has the it is quite free from any sign of bluster. Minister resigned? We (Japan Mail) greatly it is quite free from any sign of bluster. There is a difference of opinion about the degree of action to be taken, some insisting that the lines of Korean defence should be thrown forward into Manchuria, others that they may be kept within the Korean border. But there is no shadow of dissent from the proposition that if Russia's next communication prove unsatisfactory, active measures must at once be taken. We repeat our conviction, however, that such measures need not lead to war.

The fiji Shimpo writes in the strongest possible terms, deprecating all further delay and urging that Japan should forthwith adopt measures of self-defence by despatching a force to Korea. If any Power object, let the now fashionable retort be made that this is a matter which concerns Japan and Korea only. Should Russia plead the Conventions, she may be reminded generally of the kind of respect she herself shows for conventions, and specially of the contempt she has shown for this particular convention

by her free use of troops in the Yalu Valley.
The Kokumin Shimbun declares that the time to strike is while the iron is hot, Much admiration has been felt for the Ministry's forbearance and patience, but now the nation sees that the day has passed for any further display of such qualities. What-ever measure the Cabinet takes will have the support of the people.

Tuesday, December 29.

The Jiji Shimpo recommends that the people should now take steps to show their appreciation for the men of the fleet who are about to go out to battle. At such a time soldiers and sailors, though they have re-conciled their brave minds to never seeing their homes and families again, derive no little comfort and courage from marks of their countrymen's sympathy and apprecia-tion. Even letters addressed to them over the signatures of societies and associations are valuable for such a purpose.

The Yomiuri Shimbun, on the other hand, recommends greater circumspection to the naval men assembled at Saseho, Kure and Hiroshima. It says that by way of final farewell to their country they are indulging in excesses which set an evil example and convey a bad impression. That they should lose something of their self-restraint at a moment when they have determined to sacrifice their lives is not unnatural, but the Yomiuri rightly refuses to bestow the name of true heroism on such conduct.

Of course the Nippon complains of the delay in striking the decisive blow. Its opinion is that the sooner the work is taken in hand, the more quickly can it be achieved.

That has long been the Nippon's contention.

The Chuo renews the familiar accusation that the present Cabinet is composed of mere opportunists and that the country urgently needs men of action and resolution.

In the Kokumin the dominant note is indignation against the unpatriotic plotters who seize an occasion like the present to disturb the public mind by fabricating stories of dissensions among the Ministers of the Crown, and trying to persuade the people that the Cabinet is sufficiently insensible to its duty to lay down the reins in face of a national crisis.

The Asahi Shimbun devotes a leading article to the rumoured resignation of the Russian Minister of Finance. Our contem-

With reference to this resignation the Nichi Nichi Shimbun learns in a responsible quarter that the Minister had been sick for some time and unable to discharge his Probably, therefore, he has gone out of office for a very simple reason. But again we ask, has he?

DOMESTIC POLITICS.

Friday, December 25. The share market continues to be the victim of trepidation. Quotations are falling all round. The stock of the old horse-tram-now the Densha-has suffered

most, its shares having fallen 4.20 yen in one day, and next comes the Street Railway (Shigai) with a fall of 3.80 yen. Rice, on the other hand, shows a tendency to rise. The quotation for January deliveries has gone up from 12.030 to 12.220, and that for February deliveries from 12.180 to

12.425.

Tuesday, December 29. The minor journals of the capital persist in circulating rumours about dissensions among the Cabinet Ministers and about a probable change of Government. Only one fact emerges from the sundry stories and conjectures published by these journals, and that fact is that Marquis Ito remains master of the situation just as completely as he ever was. He is the power behind the Throne, whether he sits in the chair of the Privy Council's President or stands at the head of the Seiyu-kai. Beyond that we gather nothing except that some tattlers are telling tales of more or less imaginary quarrels.

Wednesday, December 30. The smaller newspapers still insist that there is a movement in influential cir-cles to reconstruct the Cabinet, placing it under the presidency of Marquis Ito and bringing in Count Inouye, Marquis Yamagata and Count Matsukata. This project is attributed to an agitation originated and fomented by Satsuma men having for pivot Count Kabayama. These rumours have been so unceasing for the past week that they can not be regarded as altoge-ther baseless, though nothing seems to us less likely than any radical change of Ministry at this moment, especially as the charge against the present Cabinet is one of weakness. We strongly suspect that had the Katsura Ministry possessed an entirely free hand, it would not now be open to such an accusation. It should be noted that the leading journals take no notice of this rumour, except the Nichi Nichi which treats it as an interested canard.

PREPARATIONS.

Reports from all directions indicate great activity in military and naval circles. The usual New-Year's holidays have been dispensed with at Government dock-yards, one day only being allowed. From Tsushima comes news that a squadron of over 20 torpedo boats, all in perfect repair and all under one command, are lying in the har-bour of Takeshiki in Tsushima. It is stated that a new-pattern transport waggon which, on trial, has been found particularly serviceable, is being constructed in large quantities porary does not attempt to explain the cause of the incident. Its main reflection is that parations have been made by the Red ject was submitted by Prince Ching for V fresh delay may thus be produced in the Cross Society also.

CHINA.

Monday, December 28.
Telegrams to the *Jiji Shimpo* from Peking represent the state of officialdom in China as one of great rejoicing over the strong as one of great rejoicing over the strong attitude assumed by Japan towards Russia. The telegrams say that there is now no shadow of a pro-Russian party in the Chinese capital; that Prince Ching and Viceroy Yuan are at the head of the stalwarts, and that many secret councils are grieved. and that many secret councils are going on for the purpose of considering the most

efficient steps to be taken by China.

The Nichi Nichi has a telegram to the effect that Hu Yu-sen, who has just returned from a visit to Port Arthur, speaks of Viceroy Alexieff as uniformly insisting that the Manchurian problem concerns China and Russia only; that no third Power can be allowed to interfere; that Russia is quite willing to make, and indeed desirous of making, a convention which shall provide a pacific solution; and that her preparations are completed for either war or peace:

This official, Hu Yu-fen, has been much en evidence of late. He appears to be one of the rising men of the day. He used to be administrator general of the northern railways of China, and the public may possibly remember him in the capacity of military administrator for the restoration of order in Peking in 1901. He is now, we believe, assistant administrator of northern railways as well as a Vice-president of the Board of Punishments, and it is doubtless in the former capacity that he visits Manchuria.

Tuesday, December 20. Another batch of Chinese students are to leave Peking for Japan on the 11th of January, it is stated. The number is put at thirty-one, and it is added that some symp-toms of opposition are showing themselves with regard to this continued employment of Japan for educational purposes, some of the Middle Kingdom's statesmen being of the opinion that youths sent to this country are apt to imbibe inconvenient doctrines.

Wednesday, December 30. Mr. Hu Yu-feu, Assistant Administrator of Northern Railways, whose recent visit to Port Arthur was supposed to have had some significance, denies that he went on any special mission. The Viceroy had asked for his attendance in order to settle some question relating to railways: that was all. during his conference with Viceroy Alexieff the latter is reported to have stated emphathe latter is reported to have stated empha-tically that though Russia is prepared for war, she desires peace, and that though she intends to withdraw her troops from Man-churia, it is obviously impossible for her to do so at present in view of the winter and of the frequent troubles caused by insurgents.

Without intending any discourtesy we must say that Viceroy Alexieff's declarations of intention to evacuate Manchuria have the sound ascribed by the Japanese proverb to "orisons in the ears of a horse." Yet it is true that there will be a semblance of evacuation some day or other, for certainly Russia will not permanently keep in the Three Provinces the great army she has there at present.

It would appear that a project has been seriously entertained in China for sending a high official to Mukden with the object of coming to some kind of arrangement with Russia. A long telegram from the Asahi's Peking correspondent explains that this proroy Yuan's consideration, but that it failed

to obtain the latter's approval. The Viceroy could not clearly apprehend in what capacity such an envoy should be sent, still less what he might hope to effect. A grave difficulty would also present itself as to the choice of a fitting person. Chang Chih-tung suggested himself to the Viceroy as the only eligible official, but Chang being already occupied with the commercial treaties and other cardinal matters, could not be spared from Peking. On the whole Viceroy Yuan's opinion was that the best plan would be to leave the duty of negotiation in the hands of the Foreign Office and M. Lessar, on the basis of a firm but adroit refusal to entertain Russia's He further thought that whatproposals. ever might be the ontcome of the Russo-Japanese negotiations China should fix her mind upon retaining possession of her three eastern provinces. Concerning the problem of military re-organization, which seems to have been simultaneously submitted to the Viceroy, the gist of his advice was that instructions should be issued to Viceroys and Governors to collect and forward to Peking all available funds.

THE SEOUL-FUSAN RAILWAY.

Monday, December 28. There seems to be no doubt of the Government's intention to expedite the construction of this line by extraordinary means. The undertaking was officially sanctioned in September 1900, the capital being fixed at 25 million yen, and the Treasury undertaking to guarantee interest at the rate of 6 per cent. on paid-up capital and on debentures, pending the opening of the line, and to make good whatever deficit as compared with that figure the earnings subsequently showed. Steps were then taken to float the shares, the first issue being 100,000, on which 10 yen was paid-up. Then followed a second and a third issue, the number of shares respectively being 345,684 and 54,316, and the amounts called in per share, 10 yen and 5 yen. Thus the total paid-up capital stood at 4,778,420 yen. During the course of the current year the company issued debentures to the extent of 4 million yen, and its intention has hitherto been to pen, and its intention has intered been to make, next spring, a second call of 5 year per share, which—the total number of shares issued being 500,000—would produce 2,500,000 year. The entire length of the shares issued being 500,000—would produce 2,500,000 yeu. The entire length of the road is 269 miles and during the present year two sections of 17 miles on the Korean side and 38 miles on the Seoul side were opened to traffic. The idea was to complete the whole in 1906. But it is thought that in view of a spiriture characters that that in view of existing circumstances the work must be pushed with all expedition, and the general belief is that with that object the Government, without waiting for the Diet's next meeting, will issue an urgency ordinance guaranteeing the payment of interest and principal of a loan of ten million yen. This money will be raised at once in England—indeed there are indications that it has already been contracted for,-and when it is supplemented by the call of 21/2 million yen made on the shareholders next spring, there will be funds sufficient to carry on the work rapidly and to complete it within the course of the year 1904. It will be observed that a sum of 3,700,000 yen will still remain to be obtained, in order to bring the capital to 25 million yen, but the plan is to meet this deficiency by

that their attitude is found to be thoroughly favourable.

This step on the part of the Government is strongly approved by all the principal Tokyo journals. Indeed, the only dissentient voice seems to be that of the Yominri Shimbun, which compares the operation to catching a salmon with a sprat, its view being that this activity about the Seoul-Fusan line is merely a device on the part of the Cabinet to cover up its erring tracks in the field of foreign affairs. The Yomiuri clings to the Manchurian problem and insists that no side issue should be given prominence over the main question, namely, the evacuation of the Three Provinces.

Wednesday, December 30.
The Official Gazette of the 28th instant publishes an Imperial Ordinance providing funds for the speedy prosecution of the Seoul-Fusan Railway and for military pur-poses. Our readers are aware that the Treasury holds three funds, known as the Three Capital Funds-namely, 30 million yen for purposes of naval maintenance, 10 millions for famine relief, and 10 millions for lions) is in specie, the remainder in negotiable securities. The Ordinance in questiable securities. The Ordinance in questiable securities the employment of these fifty-yen shares representing the Company's tion of the Seoul-Fusan Railway is a matter of prime importance, ordains that the Trea-sury will guarantee the principal and interest lions, the grand total is only 20,528,420 ym, of a loan of 10 millions of yen, the loan to leaving some 5 millions to be obtained out be raised by the Railway Company and the of the total capital. This residue is not acproceeds applied to expediting the building counted for and to that extent the programme of the railway. As to the terms of the loan, is obscure. Moreover, there appears to be a the rate of interest is to be 6 per cent.; the difference of opinion as to whether the 10 principal will lie unredeemed for 3 years, and millions will be raised at home or abroad redemption will thereafter be effected in 5 Some think that the Government's guarantee years. Further, the Ordinance provides that by way of complement and compensation for pushing on the work, the Treasury shall pay to the Company a sum of 134 million yen, to the Company a sum of 134 million yen, and in the event of that amount proving and in the event of that amount proving the insufficient owing to unforeseen obstacles, a further sum of 450,000 yen shall be paid. With regard to these payments the Govern-will now be taken in hand vigorously so as ment reserves the right of establishing a special system of inspection over the railway and the works. It is further empowered to make a loan on account of the expenditures contemplated in the Ordinance, such loan to already open to traffic; and 55 miles are be paid back within two years, if obtained by any method except the issue of Exchequer Bills, and to be paid back in five years if obtained by Exchequer Bills, the interest in either case not to exceed 6 per cent.

It will be seen that this Ordinance empowers the Treasury, first, to apply the Three Capital Funds to purposes of military preparations; secondly to guarantee a loan for the Seoul-Fusan Railway, which is to be pushed on with all expedition; thirdly, to make payments of at least 134 million yen and at most 2,200,000 yen to the Railway Company by way of aid in the prosecution of the work and compensation for prosecuting it rapidly; and fourthly, to raise loans by the process either of selling Consols or of issuing Exchequer Bills. There is a certain element of vagueness about the amount of these loans.

Another Ordinance makes provision for a system of deferred payments. Telegrams the official inspection of the railway works to the Jiji Shimpo from London suggest that the financiers of England have been approached on the subject of the loan and strict. We may mention that Baron noon.

Shibusawa ceases to be President, being succeeded by Professor Furiichi, a Government nominee, and that two Permanent Directors (Tomu Riji) are appointed, namely, Mr. Anegakoji and Mr. Kawasaki. The Directors are Baron Shibusawa, Baron Mayejima, Mr. Takenouchi and Mr. Min Yon-chiol. Mr. Enquichi mbe her hitherton. Yon-chhol. Mr. Furuichi, who has hitherto been Director of the Railway Bureau, is succeeded in that post by Mr. Hirai. The Directors who cease to hold that office are Baron Ozaki Saburo, Mr. Kusaka Yoshio, Mr. Omiwa Chobei and Mr. Murota Voshihumi

This measure is of course regarded as an evidence that the Government has resolved to take resolute hold of the Korean problem, and not only to extend Japan's interests but also to consolidate her position there. It has become quite clear that nothing except accomplished facts possesses any international value now-a-days. The Tokyo Ministry is obeying that conviction.

Thursday, December 31 It is not easy to follow accurately the accounts of the Seoul-Fusan Railway funds,

educational aids. These monies stand in a or to discover precisely how much is to be special account, and it is understood that raised, how much spent on the line itself, about one half of the total (50 mil- and how much on rolling stock. According funds for military preparations. That is the capital aggregate 4,778,420 yen, and the gist of the first Article. The second Article, sums raised by debentures aggregate having premised that the speedy construc- 4,000,000. If to those totals be added a further loan of 10 milltons, and the the other hand, it would be extremely difficult to obtain money in London to complete the whole by the end of 1904.

There has been a great deal of talk about the methods of the Seoul-Fusan Railway Company, and it is impossible to doubt that some ground exists for the sweeping criticisms published. Even the Nichi Nichi Shimbun says plainly that the "foxes and badgers" must be swept out of the path if any real progress is to be made.

COUNCIL OF STATESMEN.

It does not appear that the expected conference in the presence of the Emperor took place on the 28th ultimo. The Privy Council held a meeting at 9.30 a.m., and when the Council rose at a little after 10, Marquis Ito proceeded to the Palace and reported the result to the Sovereign. The Emperor subsequently met at lunch the members of the Council, the Elder States-

A MILITARY MEASURE.

An Imperial Ordinance issued on the 28th ultimo establishes an office called the Dai-composed not only of these dignitaries but hon-yei, a term which literally translated, also of such other distinguished staff officers signifies " great original camp," and which as the Emperor may select.

would be translated "headquarter staff" These measures seem to have the approval had not that expression been already appropriated as the equivalent of Sambo Hombu. The Dai-hon-yei is to be under the Emperor's immediate direction and in it there is to be a Koto-bu or "high section," which will apparently have for its principal personnel Field Marshal Marquis Oyama (Sambo Hombu-cho, or Chief of the Head Quarter Staff) and Admiral Viscount Ito (Kaigun Constitute the Chief of the Name Staff) Gunreibu-cho, Chief of the Naval Staff).

Gunji Sangi-in, in place of the present Gunji the steps now taken by the Government Sangi-kwan; in other words, instead of will have the hearty approval of the nation Martial Councillors, there is to be an office provided that they be pursued unflinchingly called the Martial Council. This office is to be charged with the discussion of all questions relating to strategy, whether naval or military, and is to consider any matter submitted to it by the Emperor. It will be organized with a President of Council (Gichō) and Councillors (Sangi-kwan). The Councillors will be the Field-Marshals, the Ministers of War and of the Navy, and the Chiefs of the Military and Naval Head Quarter Staffs. They will also include staff officers of distinction nominated by His Majesty. Among the Councillors the senior in rank and service will be appointed Gicho. If men on active service be appointed Councillors, they will return to duty so soon as their functions of Councillor are discharged.

Evidently the prime purpose of this organ-ization is to provide machinery for bringing the Army and the Navy into close coopera-

There is a special provision that in case of emergency, the Chief of Council may give advice to the Throne in response to an inquiry from the Sovereign, without going through the formality of consulting the Council

be admitted to the Emperor's confidence and to receive His Majesty's direct commands with reference to the employment of the two arms of the service. That representative was the Chief of the Head Quarter Staff (SamboHombu-cho), necessarily an army suffice to convict him and he ought to be The Naval Commander-in-Chief (Gunreibu-cho) had competence only to ela-borate measures relating to his branch of the country's armaments, and to report such measures to the Sovereign. He was not entitled to confer with the Emperor about the measures. Under the new arrangement, however, the two officers, namely, the Field Marshal presiding over the Head Quarter Staff and the Admiral Commanding the Navy, will both constitute the High Section (Kolobu) of the Dai-hon-yei (Imperial National Bureau), and will both have equal competence as regards the Sovereign.

Concerning the Martial Council (Gunji Sangi-in), there are only two points calling other hand, was the murder of the Queen in for special notice. One is that whereas Mar- 1896, that it is impossible to repress a sense tial Councillors alone existed hitherto, there of satisfaction when we reflect on the fate will henceforth be a Martial Council—that of her principal murderer, if U Pon-som is to say, an office instead of merely were really that heinous savage. Gladly, officers—, and that whereas the Martial Councillors have hitherto been limited to the Field Marshals, the Ministers of War His crime is not without extenuation.

and of the Navv. the Chief of the Head Quarter Staff, and the Commander-in-Chief of the Navy, the Martial Council will be

These measures seem to have the approval of public opinion. Some critics, however, observe that the arrangements should have been made long ago. Opposition journals infer from the three measures, namely, the re-organization, the financial step, and the expediting of the Seoul-Fusan road, that the Cabinet has abandoned its policy of temporizing and indecision, and is awake to the need of resolution and haste. All regret that there has not been an opportunity to obtain Another Ordinance creates an office called the Diet's approval. The Kokumin says that and thoroughly.

KO AND NO.

Judgment has been delivered in the case of Ko Yong-keun and No Yun-myong, the assassins of U Pon-som. Ko has been sentenced to death and No to imprisonment for life. The judgment has been appealed against. When the Court was about to close on the 20th ultimo prior to pronouncing judgment—which was done on the 26th ultimo-, the prisoners were asked whether they had anything to say in their defence. Ko then declared that he did not in any respect traverse the finding of the tribunal preliminary examination, but that he prelested against the formula used in stat-ing the charge. Instead of "wilful muring the charge. Instead of "wilful mur-der" he desired to have it stated that "in compliance with the behest of his Sovereign he had avenged the murder of the mother of his country." When judgment was delivered he vehemently renewed this plea, declaring that he had received a direct commission from the Prince Imperial of Korea to take vengeance on the murderers of the latter's will probably withhold from Ko the crown of heroism. Were the man a hero in the generally acknowledged sense of the word, he would have suffered the penalty of his crime without attempting to vindicate himself at the expense of his Sovereign or the Crown Prince. It may be, indeed, that a distinction of that kind appeals with little force to the heart of a Korean who has been brought up to believe in the legitimacy of the assassin's dagger. By so much less then, is Ko heroic. So revoltingly cruel, on the

TRANSPORTS.

The President of the Nippon Yusen Kalsha, speaking through the columns of the Jiji Shumpo, has disposed effectually of some thoughtless criticisms to the effect that the Company was seeking to obtain exorbitant freights for such of its vessels as might be chartered for the public service in connexion with the present complications. Incidentally Mr. Kondo's remarks convey some in-teresting information. He says that in November the Company received an intimation that its vessels might have to be requisitioned, in which event it was desired that a rate of 3.10 yen per ton monthly should be agreed to by the Directors, since, on the basis of last year's accounts, that charge would produce a net profit of 4,200,000 yen and thus enable the Company to pay a dividend of 12 per cent. But this calculation was made on the assumption that in time of war the Company would continue to receive from the Treasury the subsidy of over 5 million yen paid to it in time of peace. That subsidy, however, is granted in consideration of performing services fixed by law and regulation, and since such services could not be performed were the ships employed for transport duties, the discontinuance of the subsidy would appear to be inevitable in the latter event. Therefore the Direc-tors, replying to the War Department's intination, pointed out that the subsidy being suspended, a rate of 4.50 yen per ton must be charged in order to secure the same profit as that realized in time of peace. Things remained thus until the 19th of De-cember—8 days after the receipt of Russia's answer—, when the War Department again communicated with the Company, in the sense that although the services for which the subsidy was granted might cease to be performable and although the subsidy might consequently cease to be payable, that problem should be left for consideration when the contingency arose, and the Company ought to agree to the rate of 3.10 yen per ton. It is evidently understood quite clearly by the Japanese public that the changes of organization in the high martial council taking a leading part in the murder, and of Japan have for one of their chief objects the equalization of military and naval authority. Hitherto only one representasisated to him:—"If you are going to Japan, remember vengeance." Counsel for the detroise of the two services was empowered to fence argued that in consideration of the tons, the classification being according to the age, construction and displacement of the age, construction and the age of the should be mitigated by two degrees and the vessels. For the 29 steamers in the punished by imprisonment for 12 years, while as for No Yun-myong, the evidence did not suffice to convict him and he ought to be acquitted. The Court, however, did not additionally the class they asked 5 yen per ton; for the as for No Yun-myong, the evidence did not suffice to convict him and he ought to be acquitted. The Court, however, did not additionally the class the charge would be 3.50 mit the validity of these pleas. And when the pen, the average thus being 4.20 yes. public come to reflect on the incident, they At this rate of charter, assuming that all will probably withhold from Ko the crown the vessels were requisitioned and that the subsidies were suspended, the Company would reap a net profit of 8 per cent., but if only a part of the vesssls were employed, and if the others had to be laid up, a loss would result. It will thus be seen that so far from demanding an excessive rate, the Directors offered the Company's vessels for the public service at a figure which, under the most favourable circumstances, would result in a dividend of only 8 per cent.; that is to say, 4 per cent. less than the dividend now habitually paid. Mr. Kondo added further information. He explained that in 1885 the Government requisitioned the Company's steamers by contract at the rate of 4.50 yen per ton, which rate, approximately, was again adopted in the war of 1894-5, with the exception that a higher price was paid to companies

with which no contract had been made. Morewas asking 30 sen less than the figure fixed by the Government itself 8 years ago, and that too although in the matter of size, of construction, and so forth many of the vessels now in the Company's possession belonged to a far higher class than any possessed by it in 1895. Mr. Kondo points out finally that some confusion between past and present evidently disturbs the judgment of persons who contend that since the Company receives large subsidies in time of peace, it should place its vessels gratis at the country's disposal in time of war. During 15 years commencing with 1885, the system of State aid was that the Government guaranteed a certain minimum interest on the Company's capital, and of course were that still the case, the services of the steamers might be requisitioned at any time without charge. they ceased to earn money in the regular channels of maritime transport, the Treasury would merely have to disburse a propor-tionately larger sum in aid. But now-a-days subsidies are granted for rendering services fixed by law and regulation, and if the services be not rendered, the subsidies necessarily cease, which fact completely differentiates the situation from that formerly existing. The Directors and shareholders of the Nippon Yusen Kaisha are as ready to help their country as any Japanese subjects can be. But they do not take an extreme view of the present situation: they do not endorse the notion that if Japan be beaten in the threatened war the Nippon Yusen Kaisha will be involved in a general ruin, and that if she win, those that help her to win may look for a suitable reward. According to that method of reasoning every recipient of State aid in time of peace should place his services and his property at the disposal of the Government gratis in time of war—a hysterical contention.

THE SENTIMENT OF THE MANCHURIANS.

In the "Notes on Native Affairs" published regularly by the N.-C. Daily News, it is stated that the inhabitants of Manchuria are very hostile to the Russians and would render every possible assistance to the Japanese did the latter take up arms against the former. This is confirmed by indepen-dent testimony, which alleges that the services of the Manchus are requisitioned by the Russians after the manner of forced labour, and that there never has been any serious attempt to conciliate the natives. That is not Russia's usual mode of procedure. At the outset of her rule in a newly acquired Oriental country she some-times shows iron-handed pitilesssness, but lis always succeeded by a reign of liberal tolerance. In Manchuria, too, there are special reasons for winning the goodwill of the natives, since Russia depends on a single line of railway for her communications, and to guard its immense length effectually against a hostile population in time of war would greatly subtract from the forces available for the fighting line. The probability is, however, that Russia cedure. At the outset of her rule in a

does not contemplate such a contingency as little doubt is possible that this fascinating

the North-China Daily News-that the most uncompromisingly pro-Japanese among high Chinese officials are Viceroy Chang Chihtung, Viceroy Yuan Shih-kai, His Excellency Na Tung, President of the Foreign Office, and General Ma Yu-kun, Commander-in-chief in Chili. Apparently a really strong anti-Russian movement is spreading throughout the Chinese empire. Letters from various districts-we still quote from our Shanghai contemporary-show that societies are being established and that the preservation of Manchuria to China is arousing a spirit of patriotism which, from the nation's recent history, might not have been expected. The four officials enumerated above are certainly very powerful, and if the sentiment by which they are said to be animated be translatable into action, the results might be important.

It is a question whether active participation by China in a war between Japan and Russia would be a genuine advantage to the former belligerent. The forces of the Middle Kingdom are not now in a condition to make a fight of any considerable strength, and their appearance in the field would furnish pretexts for an extension of Russian aggressions. Besides, that contingency would presumably draw France into the conflict on the side of her ally, and thus England would become involved. Such a war is terrible to contemplate. On the other hand, can China be expected to stand idle when the fate of an immense area of her territory is at stake? Evidently should the peace be broken, terrible eventualities are

"THE JAPANESE FAIRY BOOK."

(COMPILED BY YEI THEODORA OZAKI.)

The children of English-speaking countries will be made happier by the publication of this delightful book, which they owe to the literary ability and to the knowledge of Japanese possessed by Miss Yei Theodora Ozaki, as well as to the enterprise of Messrs. Archibald Constable and Company of London. Twenty-two tales from the stores of Japanese folk-lore are told by the gifted authoress, and there are 66 picturesthem coloured-from the brush of Fujiyama Kakuzo. Of course the stories are not all new. Many, indeed the majority, are old acquaintances which have already been introduced to the western public by Mrs. T. H. James, Mr. B. H. Chamberlain and others. We meet again Little Peachling, the Old Man with the Wen, the Golden Boy and the Ogre of

over, when the Government handed over to the Nippon Yusen Kaisha and to the Osaka Shosen Kaisha at cost price and on a system of payment by yearly installments, the wrong. No Power is likely to undertake Animals and reptiles, indeed, are depicted as of payment by yearly installments, the steamers—aggregating 40,000 tons—acquired by it during the war, the transaction was accompanied by an agreement that should the vessels be required at any time for the task of driving her out unless the Power goblins or ogres occasionally practise supernatural malignity; but the magistread of the Arabian Nights and the wizard of Chinese mythology are absent, so far as we know. Indeed, there is not one of the purely Japanese legends that does not enshring some graceful idea or illustrate not enshrine some graceful idea or illustrate some pretty sentiment. Even in the aunals of Watanabe and the Monster of the Gate, a story which seems to be nothing more than the record of an encounter between a brave man and a demon, it is through respect for his old nurse's wishes that Watanabe finally opens the chest containing the severed arm and thus unhappily restores to the demon its lost limb. We observe—it may be mentioned in passing-that Miss Ozaki makes anti Russian the demon escape by breaking through the roof, but there is another version which depicts the monster as flying through the opening usually found over the entrance of a Japanese pashiki—the opening called hafu, thereafter never permitted in a Watanabe mansion. The Chinese writers of folk-lore, on the contrary, make free use of the magician and the wizard, as might have been expected by any one familiar with the tenets of Taoism, and as is well shown in that instructive book "Strange Stories from a Chinese Studio." The last story in Miss Ozaki's volume, the story called "Stones of Five Colours and the Empress Jokwa," would scarcely be worthy of the company in which it finds itself were not its rather common-place conceptions redeemed by some touches of unconscious humour, as when the wizard Kokai smashes a mountain by dashing out his brains against it, the result being that one of the pillars of heaven is broken, and a corner of the sky, dropping down, has to be propped up again with the leg of a tortoise. Miss Ozaki has had to pay the penalty of not being able to correct the proof-sheets, some errors, for which she is not responsible, have crept into the spelling of Japanese names. But these spelling of Japanese names. But these blemishes are very few, and for the rest the book is well printed, on good thick paper, capitally illustrated and prettily bound. It is indeed a most welcome addition to the Western world's store of folk-lore literature, and many a home will be brightened by Miss Ozaki's anecdotes at this festive

GERMAN SOUTH-WEST AFRICA.

The Hottentots, who are said to have risen in rebellion against the German authorities in S.W. Africa, are a curious wizened, yellow-faced tribe. As far back as 1794 a native regiment of Hottentots was enrolled in Cape Colony by General Craig, and the present Cape Mounted Rifles is their lineal descendant. The Cape Colony Hottentots were once a cause of anxiety to the British Government, but in 1810 the last of their

FOREIGN PROPERTY AND ENTERPRISE IN JAPAN.

The Nichi Nichi Shimbun publishes, for the second time, statistics showing the money invested by foreigners in undertakings established and conducted by themselves in Japan. The figures are astonishing. Eightynine is the number of the companies, 144 millions of yen the nominal capital, and 137 million of yen the capital paid up. Tabulating the concerns which have a capital of at least fifty thousand yes, these results are

-		Amount Paid up.
	Yen.	Yen.
Breweries	600,000	450,000
Machine Companies	2,290,000	. 229,000
Kerosene	24,000,000	16,500,000
Raw Silk	1,850,000	1,850,000
Carrying Companies (land		
and sea)	32,340,000	130,400,000
Miscellaneous	2,401,000	2,401,000
Agencies (commission)	50,000	50,000
Purveyors	1,500,000	1,300,000
Banks	23,750,000	23,750,000
Commercial Companies	17,245,000	17,245,000
Insurance	5,000,000	3.750,000
Newspaper and Printing	227,000	227,000
Wholesale Dealers	780,000	780,000

There are four thousand Occidentals in Japan, and if the Nichi Nichi be correct in saying that they and the people they repre-sent in the home lands have actually put 137 millions of yen into enterprises established and managed by them in this empire, or connected with this empire, then the average is 3,425 yen per head.

The most careful calculation hitherto made puts the wealth of Japan at 8,273 millions of yen; or 200 yen per head of population, approximately. It has further been calculated that, on a conservative basis of appraisement, the real property held by the 4,000 foreign residents of Japan—independently of the above figures—has a value of 20 millions of yen, or 5,000 per head on the average. It would follow, therefore, that the foreign communities ought to pay 25 times as large an amount in taxes as an equal number of Japanese blocked out of

THE FOREIGN TRADE OF JAPAN.

According to the Nichi Nichi Shimbun, the foreign trade of Japan up to the 21st ultimo aggregated 596 millions of yen against 530 millions in 1902, the increase thus being 66 millions. In this total exports stand for 284 millions, the corresponding figure for 1902 being 27134 millions, and imports, represent 312 millions, the figure for 1902 being 2581/4. It would thus appear that the main part of the increase in the bulk of the trade was on the side of imports—an increase of 531/4 millions, whereas exports grew by 121/4 millions only. The Customs Returns show that rice was largely responsible for swelling the imports. Fortynine and a half million yen worth of the staple was brought to Japan against 14 1/4 millions in 1902. Other staples which showed notable increases were beans, peas and pulse, flour, meal and starches, and sugar. An unfavourable balance of trade amounting to 28 millions of yen suggests a considerable outflow of specie, but it has to be remembered that the price of imports, as appearing in the customs returns, includes freight, insurance and all charges, whereas the price of exports represents the value in Japan. Moreover, the money spent in Japan by foreign travellers must be taken into account.

THE FINANCIAL MEASURES.

It is explained that the financial measures authorized by the Imperial Urgency Ordinance of the 28th ultimo may conveniently be classed under three headings:—First, the Government is empowered, for the purpose of meeting martial outlays, to employ the monies standing in the Special Accounts; secondly, the Government is empowered to make temporary loans repayable in two years; and, thirdly, it is empowered to issue Treasury Bills repayable within five

As to the monies now standing in the Special accounts, they have been roughly understood by the public as the Three Capital Funds, namely, the Naval Maintenance Fund (30 million yen), the Education Aid Fund (10 millions) and the Famine Relief Fund (10 millions). But the Kokumin Shimbun affirms that the monies in question aggregate 101,188,000 yen, and that there is an additional amount of 15,452,000 yen employed as floating capital. Of course a considerable sum in the shape of fixed capital appears in the Special Accounts, but this, not being available, is not included. The gist of the matter is that over 100 million yen is actually at hand for immediate, or approximately immediate, use. Naturally, however, these monies are not kept like current deposits in a bank. Certain arrangements are necessary before employing them directly, and it is with a view to the interval required for such arrangements that the Government is now empowered to issue temporary loans.

PRESS CENSORSHIP IN JAPAN.

When will Japan cease to be the victim of book-makers? Not for many years, we imagine, for her charms and her quaintnesses and above all the Western public's ignorance of her, constitute at once an inspiration and an opportunity. The writer that suggests this reflection is Mr. C. L. Brownell. He has just published a book called "The Heart of Japan "—which title is apparently borrowed from Mr. Lafcadio Hearn's Kokero—and from

On the whole it may be concluded that there is little, if any, drain of specie on account of the country's foreign trade.

Brownell's rendering of the imaginary sendinner.

Brownell's rendering of the imaginary sendinner.

The other speakers of the evening were Baron Kaneko and Prof. Terao.

tion of his own, or, in simple language, a deliberate falsehood. Not necessarily a false-hood of Mr. Brownell's: somebody may have "filled him up." He gives it out on his own authority, however, and must take the consequences. If he had the faintest conception of the kind of language in which sentences of imprisonment are pronounced in Japan, he would be amused by his own absurd version.

THE ORIENTAL ASSOCIATION.

The Oriental Association met in the Nobles' Club on the 25th ultimo. From the columns of the Japan Times we take the following resume of the principal

the following resume of the principal speeches:—

After the health of His Imperial Majesty had been heartily drunk, Mr. Kato, in proposing the toast of the guests of the evening, Count Okuma and Baron Kaneko, said that it was a matter for profound regret to hinself and to the public at large that the Government had not thought fit to take the people into its confidence with regard to the position of affairs. The general public, therefore, had no data for forming an independent judgment on the situation. This reticence on the part of the Government was all the more regrettable, because, if any reliance could be placed on certain rumours and indications, the situation looked to be in the last degree critical. But in the event of war being declared by His Majesty the Enperor, the nation would be solidly united in support of the Government for the furtherance of a common cause. On that point there was not the slightest doubt. But at the same time, the people from whom a great deal was expected had the right to be admitted within certain limits into the confidence of the Government. There being unfortunately no Diet in session, the distinguished speaker had thought that the Government might possibly be looking about for a suitable opportunity to make their views known to the people. It was with the object of affording them such an opportunity that the Association had invited to the present dinner the Prime Minister and the Minister for Foreign Affairs. But neither Count Katsura nor Baron Komura could, to the great disappointment of the Association, see his way to honouring the occasion even with his bare presence. While regretting this exceedingly, it was, continued Mr. Kato very gratifying that the Association had enjoyed the rare fortune of having its invitation accepted by Count Okuma and Baron Kaneko.

Count Okuma frising amidst hearty cheers, thanked those present for the great honour they had done

Count Okuma, rising amidst hearty cheers, thanked those present for the great honour they had done him by including him among the guests of the evening. He shared the Chairman's disappointment Japan "—which title is apparently borrowed from Mr. Lafcadio Hearn's Kokero—and from this book The Literary Digest excerpts the following, regarding it, apparently, as a gem of style and a compendium of truth:—
The censorship over the press in Japan is some thing to make Westerners stare. The result is that writers are obliged in taking pen in hand to keep to themselves seven or eight of every ten opinions they would fain express. When a paper ventures too far and the censor is culled upon to write the order of suspension he is brief, but polite—wonderfully polite. The following is the usual formula, as nearly as English can express it: "Deign honorably to case honorably publishing august paper. Honorable didtor, honorable guiditor, with his honorable chief printer, deign honorably to enter august jail."

"The honorable editor, with his honorable convertes, bow low before the messenger of the censors acknowledging the honor of the august notification, and then accompany him to the honorable jail, chatting the meanwhile of the weather, or of the flower shows, or of the effects of the floods on the rice crop. Centuries of breeding under Japanese ediquette have rendered it impossible for them to show annoyance. They do not know how."

Frankly speaking, is it not undiluted nonsense? And the trouble is that Mr. Brownell's readers must inevitably give him credit for knowing some little thing about what he discusses. The truth is that whatever was the case ten years ago, few countries have a press so entirely free of speech as is the presso of Japan to day. No editor can be imprisoned, no newspaper suspended except by sentence of a court of law, and as for Mr. Brownell's rendering of the imaginary sentence of a court of law, and as for Mr. Brownell's rendering of the imaginary sentence of a court of law, and as for Mr. Brownell's rendering of the imaginary sentence of a court of law, and as for Mr. Brownell's rendering of the imaginary sentence of a court of law, and as for Mr. Brownell's rendering of the imaginary se evening. He shared the Chairman's disappoint at the absence of all members of the Cabinet.

GERMANY'S IMIORTS AND EXPORTS.

The United States heads the list countries which turnish the merchandise imported by Germany, with a grand total for 1902 of \$216,841,800, or 15.7 per cent. of the total importations of the year, against \$243,009,800, or 18.2 per cent. of the total imports of 1901. In respect to destination of German exports in 1902 the United States stands third, with a total of \$126,-877,800, or 9.3 per cent. of the whole, whereas Austria-Hungary took 11.1 per cent. and Great Britain 20.1 per cent. The table of imports for 1902 given below we take from Bradstreet. It should be noted that countries sending less than \$10,000,000 are omitted, though the total of all imports

a Kitch .	,
Whence imported.	Values.
United States\$	216.841,800
Russia and Finland	184,116,800
Austria-Hungary	171,241,000
Great Britain	145,322,800
France & Algiers	86,965,200
British Indies	56,739,200
Netherlands	49,051,800
Argentine Republic	48,018,400
Belgium	46,814,600
Italy	45,815,000
Switzerland	40,150,600
Australasia	28,607,600
Brazil	28,226,800
Chile	26,894,000
Dutch Indies	21,634,200
Roumania	20,039,600
Sweden	19,159,000
Spain	17,820,200
Denmark	17,778,600
China	13,282,800
Fount	10,852,800
British W. Africa	10,234,000
•	

Total 1,381,780,400

In the following are set forth the exports, with destinations, eliminating those countries whose takings amounted to less than \$10,-000,000, though preserving the grand total

of all exports:—	
Whither exported.	Values.
Great Britain	229,789,000
Austria-Hungary	126,877,800
United States	106,909,600
Russia & Finland	88,559,800
Switzerland	67,901,400
Belgium	62,046,600
France & Algeria	60,523,400
Denmark	31,201,800
[taly	30,940,000
Sweden	28,464,800
British East Indies	16,707,600
Hamburg	14,589,400
Norway	14,589,400
Spain	13,280,400
Japan	11,852,400
Roumania	11,781,000
China	11,566,100
Argentine Republic	11,233,600
Australia	10,829,000
Brazil	10,424,400
Turkey	10,305,400

during the calendar year 1902, as compared with the balance of \$156,189,800 in America's favour in 1901. It is to be again remembered that the foregoing total of imports from the United States includes some American goods landed in the free ports of Hamburg and Bremen, but destined for Russia, Scandinavia and Austria-Hungary.

THE MYSTERIOUS RADIUM.

The New York Herald publishes the following cablegram from London under date of November 26th :-

stance, radium, which for two years past has been puzzling men of science. Sir William Ramsay, whose name is associated with that of Lord Rayleigh in the study of argon and helium, said at a meeting of the London Institution that he had observed and definitely ascertained that radium games meeting of the London Institution that he had ob-served and definitely ascertained that radium gave off heavy gas, which slowly changes into helium and then vanishes. The importance of this dis-covery, which has been suspected by scientists for some months past, lies, according to the Daily Mail, in the fact that it appears to revolutionize all old theories about chemistry. Hitherto chemistry has been based on the theory that the elements are con-stant and that one cannot change into another, but now it is seen that radium of its own accord and without external interference turns into a totally different element.

different element.

In his lecture Sir William Ramsay described how, after a long search into the problem of what became of the minute particles with which radium was always parting, he was quite lately rewarded. Besides its other manifestations radium constantly gives off an emanation which seems to behave in all respects like heavy gas. It can be collected in tiny flasks, measured and weighed and used to display the characteristic properties of radium, but it is not permanent. In about a month it entirely disappears. Whatbecomes of it? Sir William Ramsay has caught this emanation in the act of vanishing. He found that after it had been collected for a couple of days its spectrum, which previously was entirely unlike any yet studied, began to display the typical yellow line of helium gas, first known and christened by its constant presence in the sun.

In four or five days the helium lines grew brighter

constant presence in the sun.

In four or five days the helium lines grew brighter and in another week the spectrum of helium was positively blazing in the hermetically sealed tubes that had been filled with the pure emanations, or gaseous output, of radium. In other words, one element had been literally seen to change into another of a quite different nature under the eye of the experimenter. What is this, asked Sir William, but an actual case of that transmutation of one element into another in which ancient alchemists believed when they sought to change lead into gold and incidentally founded the modern science of chemistry?

and incidentary founded the modern science of chemistry?

Commenting on Prof. Ramsay's great discovery, the Daily Mail says:—"It is as though gold were to change into iron of its own accord and completely upset the laws of the old chemistry. No wonder that, with this amazing fact before them, scientists are hopeful of reading the riddle of the universe."

FORMOSA.

An extra of the Official Gazette published on the 30th ultimo contains the following Imperial Ordinance (No. 296):-

In case of necessity an officer may be appointed to command the forces garrisoning Formosa. Such officer shall be a Lieut.-General or a Vice-Admiral and shall be nominated by the Emperor. He shall command the military and naval forces in Formosa under the orders of the Governor-General, and in the event of there being no time to obtain the latter's instructions, the Commander shall have the same official authority as the Governor-General with regard to martial affairs.

NOTES ON CURRENT EVENTS.

It appears from accounts published by What may prove an epoch-making discovery in officers. As evidence of the assault the specting works in the South Persian province the field of chemical research is announced by Sir. Chinese showed their wounds, and the of Kusistan have now been successfully William Ramsay with regard to the mysterious sub-police at once went to the ship and ar-finished, the other requirements complied

rested the master and the officers. finale was that Captain Warneke instituted " a claim for 100,000 yen for damages suffered by himself and officers and for the detention of his ship for two days." It does not appear that the unfortunate Chinamen instituted any claim. The measures taken to prevent them from leaving the ship are sufficiently suggestive of their reason for wishing to leave it. There ought to be a society for the prevention of cruelty to sailors. A very great deal is made of the fact that the cell in which the master was put by the police "was without any apparatus for being warmed and had broken windows." The Chinamen had broken heads, but that is an insignificant detail it would

The benefits that the Shimonoseki Treaty conferred on the nations trading with China were very gudgingly recognised at the time. In fact by some foreign critics they were ignored altogether and by some they were discredited as specious and in-sincere. It is therefore interesting to find that a recent writer in the columns of the N.-C. Daily News says:—"Of the treaties entered into between China and foreign nations within the past decade there are two made with Japan which are special in scope and foresight. Half a century of previous negotiations did not do as much to enlarge commercial intercourse with China as did the treaty of Shimonoseki, and the treaty which was recently negotiated at Shanghai between these two Asiatic Empires touches the very base of China's conservation and would place a formidable barrier in the path of Russia's northward march. with Peking open to foreign trade the citadel there of dense conservatism would be razed, and with the political and commercial interest of Western nations centered in the capital of China there would be an ever watchful sentinel over Russia's aggressions; those nations would not and could not be quiet while one of the number was extending its territorial limits and thus narrowing the tradal areas of the others."

The Congress of the United States is about to consider a bill for extending to the Japanese going from Hawaii to the States the same system of restrictions as that applied to the Chinese. With reference to this a meeting of Japanese has been held in Honolulu, when a resolution was passed declaring the necessity of adopting all possible measures to prevent the passing of Japanese subjects from Hawaii to America, and outlining the principal measures that seem desirable.

Persia seems likely to become a petroleum-curious. At Moji the men wanted to leave started in the Land of the Sun by British the steamer. Their reason is not stated Colonial capital. The Consul states that in but can be divined from the sequel of 1901 a representative of an Australian capita-the story. The master of the vessel object-led but the men having obtained information exclusive right for the exploitation of all through some of their comrades that a persian petroleum deposits, with the exceptertain Chinese compradore would receive tion of those situated in the Caspian prothem, attempted to leave the ship in a body. To this the officers of the vessel objected, concessionaire had to undertake the formation of a company within two years from sharp struggle the Chinese were locked up the date of contract, and at the expiration of in the forecastle." Some of them, however, that time to hand over to the Persian protharge of assault against the master and his ber of shares in the undertaking. All procharge of assault against the master and his ber of shares in the undertaking. All prowith, and the money and shares handed over to the Persian Government. The con-cessionaire now enters into his full legal status. Experts predict a very prosperous future for the praiseworthy enterprise of the Australian capitalist."

We take from an exchange the following item, which will have special interest for some of our readers:—" An interesting sale by auction will take place in St. Petersburg on November 26 (December 9), of the estate of the insolvent debtor, Mr. J. A. Poklevski-Kozell. The estate to be sold comprises about 700,000 acres of land, eight large metallurgical works in the Governments of Perm and Viatka, and about 250 mines in the same Governments. The estate will be put up for sale at 3,500,000 roubles. Full particulars of the estate may be had from the St. Petersburg Okocoujnoi Soud (High

Japanese securities continue to decline in the London market. On the 24th ultimo the five-per-cent, war bonds were quoted at £91 12s. 43/4 d., being a fall of £1 5s. 61/4 d.; the five-per-cent. consols stood at £89 15s., a fall of £1 15s., and the four-per-cent. bonds at £80 5s., a decline of £2.15. All these depreciations are in comparison with the immediately previous quotations, namely, those for the 19th instant in the case of the five-percents, and those for the 16th instant in the case of the four-per-cents.

The annual list of lighthouses, lightships, buoys and beacons, issued by the Lighthouse Bureau in the Department of Communications is to hand. It is a greatly improved publication. There are no fewer than seven charts showing the situation of marks on the main island, in the Inland Sea, on Shikoku, Formosa, Hokkaido, and Kiushiu, with a special sheet bearing light-charts of Naga-saki, Shimonoseki Strait, Osaka and Kobe, Hakodate and Tokyo Gulf. Though the English employed in the explanatory sections does not quite come up to what one might expect from an official work, and while it seems a pity that a list of this kind corrected to April 30th last should only now see the light, the publication shows in an interesting and effective manner the elaborate and extensive system by which Japan lights, beacons and buoys her coasts.

On the 28th ultimo the Tokyo Street Railway ran trial cars over two new sections of its line, namely, the Hongo-Shinjuku and the Kanda-Ryogoku sections. The regular service on these lines is to commence to-day. It appears that there is some uncertainty as to the fares, but we presume that the illogical and unjust system of a three-sen uniform charge will be adhered to.

The line from Hiroshima to Umida has been now extended to Kure, a distance of 12 miles 46 chains.

In his recent remarks before the Bankers Convention at San Francisco, Comptroller of the Currency Ridgely brought out the growth of bank deposits in these remarks: The deposits of all banks in the United States have increased since 1895 from

cent.; in California from \$200,000,000 to tons. The Baltic will be upwards of 3,000 \$406,000,000,or 103 per cent. In Oklahoma tons larger than any craft now affoat, and and Indian Territory, where in 1895 the total will be 4,000 tons in advance of the Kaiser deposits were considerably under \$2,000,000, there are over \$27,000,000 on deposit. Agare to be of about 24,000 tons. With the gregate deposits west of the Mississippi have advent of the Baltic, the White Star Line increased from \$701,000,000 in 1895 to will own three of the largest liners affoat. \$1,700,000,000 in 1903, or 142 per cent. The length of the Baltic is 726ft., her breadth The three states of Minnesota, Iowa and 75ft. 6in., her depth 49ft., while she has a Missouri have more bank deposits now than displacement of 39,800 tons. eleven of the states west of the Mississippi in 1890, and Washington, Oregon and California have \$40,000,000 more deposits than all the other states west of the Mississippi in 1890.

At the annual meeting of the Egypt Exploration Fund, held in London on Nov-ember 13th, over which Sir John Evans presided, and at which Prof. Flinders Petrie spoke, Dr. Granville referred to the new "logia," or sayings of Christ, which have been found in the latest papyri, and which will be published in full in the June of next year. Dr. Granville told his audience in the Royal Society's rooms that after exploring Oxyrhynehus, a new and fruitful necropolis had been found at a place about a hundred miles south of Cairo from which some 25 cases of papyri had been sent home to Oxford by himself and Dr. Hunt to be deciphered. Most of the papyri referred to times situated between the first and sixth centuries of the Christian era, and in examining them they had come upon numerous new logia, or sayings of Jesus—prefaced by the words, "Jesus saith." They were surmised to be the sayings which Jesus spake to Thomas, and perhaps to another disciple. Unfortunately, the ends of lines were most often missing. One of the were most often missing. One of the most striking of the new sayings was:— "Let not him that seeketh cease from his search until he finds, and when he finds he shall wonder; wondering he shall reach the Kingdom of Heaven, and reaching the Kingdom of Heaven he shall have rest." Many of the logia were evidently in answer to questions put to Christ by the disciples, and some of the fragments now discovered were from a different manuscript of the same collection of sayings that were published some time ago. Their enormous interest example, one variant of great value was that of the verse, Luke xi., 32. Woe unto you lawyers, for ye have taken (or ye have hidden) the key of knowledge; ye entered in yourselves, and them that were entering ye hindered." The alternative version altered the last phrase to:—"And to them that were entering in ye did not open." Other logia clearly replied to the well-known questions of the disciples, "How shall we fast; how shall we pray; how shall we give alms.
?" the general tenor of the replies being Christ's great doctrine, " The Kingdom of God is within you." Other papyri related to the Decian persecution in A.D. 250, and a unique document was a form of declaration that Christians had to make in order to show that they had sacrificed to a pagan god.

The Baltic, the latest addition to the White Star fleet, was to be launched by \$4,900,000,000 to \$9,525,000,000, almost Messrs. Harland and Wolff at Belfast at the double. Deposits of all banks in Texas for end of November. The Baltic will create this \$35,000,000 to over \$80,000,000, about 128 be approximately 24,000 tons. She will be per cent. In Iowa the increase was from \$78,000,000 to \$211,000,000, over 170 per cent; in Kansas from \$33,000,000 to \$23,000,000 to \$84,000,000, over 154 per cent.; in Nebraska the Oceanic, of 17,000 tons gross, the Celtic, from \$35,000,000 to \$82,000,000,000 to \$82,000,000 to \$82,000,000,000 to \$82,000,000,000 to \$82,000,000,000 to \$82,000,000,000 to \$82,000,000,000 to \$82,000,000,000 to \$82,000,000 to \$82,000,000,000 to \$82,000,000,000 to \$82,000,000 t a new record, inasmuch as her tonnage will

Sir Francis Burnand tells in his recently published "Reminiscences" of how Sir Arthur Sullivan's mother once, when dining with the late Duke of Edinburgh, startled the Royal Prince by saying, "Sir, your the Royal Prince by saying, "Sir, your family name is Guelph," to which the Duke responded, "Certainly; there's nothing to be ashamed of in the name of Guelph." is it so assured that the name of that portion of the present British Royal Family which descends from Queen Victoria is Guelph? The question was first publicly raised over forty years ago, and more than once since; but it has never been satisfactorily disposed of. If the father's line be followed it would be Wettin, which is the patronymic of the Ernestine line of the House of Saxony, to which the Prince Consort belonged, and which is still borne by the Meiningen family and the King of Saxony. But if the mother's name be taken it would be accepted as Guelph, though here arises a difficulty which is quaintly paradoxical. Some thirty years before the Norman Conquest, according to the older genealogists, Cunegonde Guelph, Duchess of Brunswick, married Alberto Azo d'Este, Duke of Modena; and it is from that august and ancient lady that the Guelph family identified with the reigning House of Hanover has descended. But if Duchess Cunegonde is considered to have transmitted the name of Guelph to her descendants for some 900 years, why may not Queen Victoria be conceded the same privilege? Then comes the dilemma: either the family name of King Edward VII. is not Wettin but Guelph, or his illustrious mother's maiden name was not Guelph but d'Este. And the complication is completed by the fact that the lady whom English neo-Legitimists delight to describe as Mary IV. and III., some time ago. Their enormous interest "of England, Scotland, France, and Ireland, lay in the fact that they often offered alternative versions of existing texts. For from Charles I., was "born" Archduchess example, one variant of great value was that of Austria-Este-Modena, which gives another connexion with the reigning house of Great Britain and Ireland.

Among the most enjoyable celebrations of the festive season in Tokyo this year were the Christmas Trees at the residences of Mr. and Mrs. Takata and Mr. and Mrs. Schaeffer, and at the Imperial Hotel. The two first evoked hearty admiration for beauty of arrangement and tasteful selection of pretty gifts. The tree at the Imperial Hotel seems to have been conceived by the present able Manager, Mr. Flaig, and to have been designed chiefly for the benefit of the Hotel staff and their families. But several other guests were present, notably the visitors at the Hotel, and all agreed that the arrangements deserved high praise. We need scarcely add that the trees were lit on different days, that at the Hotel being on the 24th ultimo, that at Mr. and Mrs. Takata's on Xmas day, and that at Mr. and Mrs. Schaeffer's on the 28th.

the Hochi, the Chuo, the Dempo and the

It is said that the dowry of Miss Goelet (who has just become Duchess of Roxburghe) amounts, when all is calculated, to some £2,000,000. The export of duchesses and their dowries to Europe has raised much misgiving in the American Press. Under the heading "The Drain of the Dowries" the New York World prints a table showing the fortunes which the American brides of foreigners have taken out of the United States. The total amount is \$208,000,000. -roughly speaking, £40,000,000. The following are the British items given by our New York contemporary:

Among the dowries which have gone to the Continent the following are given: Princess Colonna, née Mackay, \$2,500,000; Countess Castellane, née Gould, \$15,000,000; Princess Hatzfeldt, née Huntingdon, \$2,000,000; Countess Festetics, née Haggin, \$2,000,000; and Princess Poniatowski, née Sperry,

Many of our readers will learn with pleasure that the estate of Mr. J. A. Poklevski-Kozell, recently declared bankrupt, is not the property of Mr. S. Poklevski-Kozell, Secretary of the Imperial Russian Legation, who enjoyed such wide popularity during his service in Tokyo.

CHRISTMAS IN YOKOHAMA.

Clear bright, frosty weather prevailed at Yoko-hama all through Christmastide, thus making the holidays all the more enjoyable. The Christmas feast is, among the nations of the Northern hemis-phere, a festival of the home and fire-side pure and simple and in Yokohama in accordance with time-honoured custom among the foreign residents the right hand of good-fellowship was extended far and wide and the sacred rites of hospitality, as understood among Europeans and Americans, were dispensed with lavish thoroughness. The churches all attracted large and reverent congregations at the morning services; a little foot-ball was indulged in during the afternoon by some of the younger and more energetic members some of the younger and more energetic members of the community, and then, as a grand finale, the fire-fiend provided a big blaze in Japanese town to close the day. Boxing Day saw all the foreign stores closed and everyone bent on enjoying the glorious weather.

MIDNIGHT MASS.

The festival of Christmas was ushered in with High Mass at the Catholic Church, Main Street, very large congregation assembling just before midnight to take part in or listen to the stirring music of Merchadante's High Mass in E. Flat. Mr. W. E. Karl Vincent presided at the organ and he was assisted by an augmented choir, the soloists being Mrs. Thos. S. Baker, Miss F. Mendelson, and Mr. Stoltz. Bishop Magadure preached the sermon and the Celebrants were the Fathers belonging to the Church.

CHRIST CHURCH.

Christ Church was lavishly decorated by Mrs. Christ Church was lavishly decorated by Mrs. W. P. G. Field and her assistants with palms, pine-branches, red-berries, bamboo, and holly, and presented a very pretty appearance, carrying one back in thought to years gone by, to many Christmas mornings spent in churches of old England amid similar decorations and surroundings. All the dear old hymns churches of old England amid similar decorations and surroundings. All the dear, old hymns associated with the season—"O, come all ye Faithful"; "Hark, the Herald Angels sing"; "Christians Awake"; "When Shepherds Watched"—were joyously sung, and at the conclusion of Morning Prayer many stayed for the Celebration of Holy Communion. The Preacher was tion of Holy Communion. The Preacher was the Incumbent, the Rev. W. P. G. Field, and the Rev. W. Weston assisted at the Communion

On Sunday evening, after Evensong, several Carols were sung by the choir of Christ Church. These were greatly enjoyed.

THE SEAMEN'S MISSION.

A very bright and happy service was conduct ed on Christmas morning at the Seamen's Mission by the Chaplain, the Rev. W. T. Austen, which was well-attended.

UNION CHURCH.

The Christmas morning service at the Union Church was exceptionally bright. The church was prettily decorated with evergreens and small flags, and there was a fairly large congregation. The service was conducted by the Pastor, the Rev. E. S. Booth, and the sermon was preached by the Rev. Erdman. Mr. W. Karl Vincent presided at the organ, playing Dubois' "Toccata" and Scotson-Clarke's "Festal March," and an and Scotson-Clarke's "Festal March," and an augmented choir sung the usual Christmas hymns. Two anthems were also sung, viz., "Sing, O Heavens" and "While Shepherds Watched," the solo part in the latter being taken by Mr. S. H. Somerton. The musical part of this service was repeated at the Sunday morning

THE " NIKKO MARU."

The new N.Y.K. steamer Nikko Maru, which is on the berth for Australia, to leave on Jan. 16th, is one of the finest, and certainly the most 10th, is one of the linest, and certainly the most up-to-date ship of the Japanese mercantile navy. Her dimensions are—430 ft. long between perpendiculars, 50 ft. beam, 30½ ft. depth. She is very elaborately fitted for the accommodation of 60 first class, 28 second class, 24 intermediate and 108 separate passengers. She has a straight and 108 steerage passengers. She has a straight stem and elliptical stern; she is divided into eight water-tight compartments and is constructed with double bottom right forward and aft. There are two complete decks; upper and main. The bridge deck, which extends for a length of 175 ft. is sheltered by the shade deck and reserved for the first class passengers' promenade, while the poop deck is for the second class.

The decorations of the first class saloon social hail and smoking room are most elaborate and artistic. For example, we read in our Nagasaki contemporary that the chief decorative feature of the saloon is a square-trunk skylight which rises to the height of zr ft. from the saloon floor and The upper part of the skylight d-glass. In the forward end of is to ft. square. is of rich stained-glass. In the forward end of the saloon there are two large wireless-cloisonne panels worked in the wall; one panel representing wild ducks in water, and the other wild ducks in flight; these are by Mr. Namikawa, a member of the Imperial Household artisans, and famous for his wireless-cloisonne ware. Aft of the saloon is the grand stairway, panelled also in white oak and similar finish to the saloon, giving access to the first class cabins on the upper deck. It is lighted overhead by a large skylight of stained glass, as well as from the sides. The centre-panel is a large cut silk velvet, with a magnificent picture of a water-fall in black and white, prepared by Mr. Iida of Kyoto. The malls lined with white oak and finished similar to the saloon; there are three silk panels with classic pictures of Mount Arashi woven in silk gobelin-fabric. The hall is furnished with piano,

writing desks, and a number of easy and occasional writing desks, and a number of easy and occasional chairs. It will not be amiss to add here that this social hall was fitted up at the Osaka Exhibition this year and was used by their Imperial Majesties this year and was used by their Imperial Majesties the Emperor and Empress as a retiring-room during their visit. The furniture is in peacock blue with classic bamboo and flora-pawllownia design in silk damask. All the fabrics are by Mr. Kawashima, a well-known silk-weaver and a member of the Imperial Household artisans, to the buildway design. the builders' design.

The ship is equipped with the very latest appliances in the matter of boat gear, deck machinery, electric lighting (there are no fewer than 500 lamps on board, exclusive of 10 cargo lights each of 250 candle power), heating and cooling, (the Nikko is the second as the Kumano was the first vessel under the Japanese flag to carry Stewart's thermo-tank system), ice making, and refrigeration. The triple expansion engines drove the new craft on her trial at a speed of 17.26 knots. 17.76 knots.

The Nikko Maru, which as we have said, is meant for the Australian line will be in charge by Capt. E. W. Haswell, so that with a genial and obliging commander and a splendid ship intending passengers may confidently look forward to the enjoyment of every comfort and convenience.

THE FORGED CHEQUES.

On December 17th we warned the public of Yokohama to be on their guard against a gang of men who were tampering and altering cheques, and we gave particulars, under reserve, of two instances. We now learn that Mr. Henri of two instances. We now learn that Mr. Henri Fouque, a French citizen, living at Naka-Rokubancho, Kojimachi, Tokyo, was arrested on Dec. 23rd and removed to the Yokohama District Court to undergo preliminary examination. The /iji, repeating our story, states that on Dec. 14th a Japanese presented to the Russo-Chinese Bank a cheque for yen 13,500, demanding payment. Suspicion was aroused on the part of the teller and the cheque, after careful examination, was found to have been altered. The man who attempted to cash the cheque escaped while the attempted to cash the cheque escaped while the examination of the cheque was proceeding, but an accomplice was caught. The Kagacho police were not long in discovering that the cheque had been altered from yen 12, at which figure it was drawn by Messrs. Kuhn and Komor, to yen 13,500. The cheque was in favour of S. Uwosumi (50) a bric-a-brac dealer living at Tobe, Yokohama, and was in payment of a hibachi (fire-box). This Japanese was subsequently arrested and examined in the Yokohama District Court, after which three other Japanese living in Court, after which three other Japanese living in Tokyo were arrested in connexion with the affair. The Frenchman is alleged to be involved in the same charge. It is alleged by the Jiji that he is being prosecuted in Tokyo on another charge but was temporarily enlarged on bail.

MARRIAGE AT CHRIST CHURCH.

There was a pretty wedding at Christ Church on Monday afternoon (Dec. 28th), the contract-ing parties being Mr. Henry Braithwaite Batty and Miss Edith Frances Emmeline Oswin. The and Miss Edith Frances Emmeine Oswin. The Rev. W. P. G. Field officiated. The bride, who looked charming in a costume of white silk, was given away by Mr. G. Syme Thomson; Mr. J. H. Cutcliffe Goodban acted as best man, and the ushers were Messrs. O. M. Poole and B. C. Foster.

MONIALY SUMMARY OF JAPANESE CURRENT LITERATURE.

Jan. 2, 1904.]

To the Kyōiku Kōhō Mr. Kuhota Beisen, the well known artist, contributes a very valuable historical and critical article entitled "Danjuro with a historical and critical article entitled "Danjuro and Art," which gives a history of the development of stage-acting in Japan. We have only space for a very brief outline of the essay, which is of great length. Stage-acting in Japan may be said to have originated with the development of the art of dancing, and this Mr. Kubota traces back to the time when, according to Japanese mythology, Tenshō Daijin was enticed out of the caven to which she had retired by the skilful dancing of Ame-no-Usume-no-Mikoto. In the time of the Emperor Suiko (A. D. 593—628) Chinese and Korean stage-acting became known to the Japanese and was then called Bugaku, or dancing to music. It was at that time very military in character, most of the performers being dancing to music. It was at that that every military in character, most of the performers being clad in armour and bearing shields. But sub-sequently the Ise Daijingū priests, in order to attract the attention of the agricultural classes to religion, instituted a dance connected with riceplanting, which was performed in a ceremonious fashion. This species of dancing was known as tamai (田舞) for some time, but afterwards was called dengahu (田樂). Then the Court instituted a dance called Gosetsu no mai, performed stituted a dance called Goselsu no mai, performed on the 5 festival days known as the go-zekku. On these occasions a stage was erected and in the presence of the Emperor specially selected girls called miko (EEF) went through the various postures prescribed for the occasion.* There were Court performances, too, known as toka, which took place on festival days. Though this term would seem to indicate that chanting accompanied the darging. Mr. Kubota informs us that such was the dancing, Mr. Kubota informs us that such was not the case. But there was music. The Buddhist priests were not to be left behind, and so hist priests were not to be left behind, and so they instituted dancing as an accompaniment of certain ceremonies. This dancing received the title of Ennen-mai (紅年氣). Up to this time there was only dancing, accompanied by music designed to help the performer to keep time. The female dancers known as Shirabyöshi, the geisha of the Kamakura era, were first employed by Buddhist priests. They soon became secularized and were called on to perform at drunken revels. At the beginning of the Kamakura era a young fellow employed in one of the Hieizan temples, called Momoi Köwaka, became the inventor of a new style of dancing which the inventor of a new style of dancing which received the title of Kowaka-mai. From this were developed the forms of dancing followed by Kagura actors and those comedies or farces included under the term Sarugaku (後樂)†. The further development of these stage per-formances into what is now known as Nogaku formances into what is now known as Nogaku or simply No by adding chanting was the work of the Buddhist priests. The early performances usually took place out of doors. Hence the term Shibat (美麗), being on the turf, was adopted as an equivalent for "theatre." When Oda Nobunaga was ill, on one occasion, a woman of great the ship of the ship intelligence called Ono Otsû related an entertaining story to him about a woman of ancient times, to whom she gave the name of Jöruri-hime. This story was set to music by one Torazawa Kengyō and the piece was entrusted to the care of two men called Satsuma-no-Jō and Takemoto Gidayū. Hence the musical drama called jõruri came to be called gidayū. Later on one of the dancing virgins attached to Öyashiro, a shrine situated in Izumo called Okuni, utilized dancing for the raising of subscriptions towards the repair of the Oyashiro shrine. Her performances in Kyöto were very successful. Chanting seems to have been part of the performance, for the term Kabuki (黃葉技) came into use at this time. Subsequently Okuni was married and in conjunction with her husband did much to develop the beginnings of modern stage-acting. In her time

* These performers were virgins attached to shrines, whose office it was to entertain the gods by dancing before them.—(WRITER OF SUMMARY).
† This term is sometimes written with the monkey

were published a number of plays. What is called the ningyō-shibai, or puppet-show, seems to have had a semi-religious origin, that is, it was first employed as a device for getting money for the repair of Nishinomiya, in Settsu, by a priest called Marutayu.

ing soon ceased to be principally the hand-maiden of religion. It was practised by the prostitutes of Kyōio as a means of attracting the attention of the opposite sex. Their dancing, however, was for the most part what is called *te-odori*, or handdancing. Many prostitutes took part in no performances at this time and hence the term $tay\bar{u}$ (大夫) applied to a *joruri* performer, is also used of first-class prostitutes. But the stage having been thus greatly debased by the low character of the performers, the Government interfered and forbade women actors. These actresses were succeeded by the class of youths known as wakashu, who were the forerunners of the modern yakusha. From the Ashikaga days onward the higher class stage performances known as nō were the delight of the upper and middle classes. The shibai was for a long time regarded as very low-class and from the fact that the early performances were given in Shijōgawara, Kyōto, a place associated with the beggars, the actors were designated have as were hard the stage of the stage designated kawaramono and were banished from respectable society. Stage-acting in Japan, then, was very low down when at the beginning of the Meiji era Danjūrō commenced his work. He owed his success principally to assiduous application. From very early years he took great interest in painting and studied pictures with keen insight into the ideas they shadowed forth, and many of his efforts on the stage were attempts to represent by various devices certain ideas that had impressed him. Mr. Kubota furnishes instances of this, for which we have no space here. Danjūrō was throughout his life an idealist, says Mr. Kubota. The representation of things as they actually are was not what he aimed at, the creation of combinations that should together express some beautiful idea. It is both in stageacting and in painting this characteristic that ennobles performances. The photographer can reproduce all natural objects and movements more perfectly than the painter or the actor, but he cannot present such ideal scenes, pictures and movements as proceed from the brains of m real artist or an inventive mime. The significance of Danjuro's career consisted in the fact that he ever championed the ideal, and because this was so my sympathy with him, says Mr. Kubota, was ever of the keenest kind. The bond that binds idealists

together is very strong. A great many magazines contain biographical notices of Danjurō. Mr. Shimada Saburō in the Shinjin observes that it is rare to find a man in modern Japan who has wielded so much power among all classes of society as Danjuro. The learned world, the business world, the professional world will alike miss this striking figure, who formed a kind of connecting link between old and new Japan, says Mr. Shimada. He had no compeers on the stage: no one recognized this more than such actors as Kikugorō.

The following books call for a passing notice in these columns :-

The Shina Jinmei Jisho is a Chinese Biographical Dictionary compiled by Messrs. Namba Tsuneo, Hayakawa Junzaburo and Suzuki Köző. Tsuneo, Hayakawa Junzauturo aini Suzuai Kool. It is to consist of 3 vols. covering in all 2,000 pages. The subscription price for the whole work is 4 yen. It professes to give a short history of every noted man in China during the past 4,000 years from emperors down to highway robbers. The Keibunsha. Ichibanchō, Köjimachi, are the publishers.

The Kokusho Gedai (國書解題) is a Bibliography that has already had a large sale and is now appearing in an enlarged form. sale and is now appearing in an emarged form. It was noticed in these columns in a former Summary. The compiler is Mr. Samura Hachirō, and it is announced that the work has been revised by a number of well known scholars, and as for the preface writers, the list is most formidable, includ-

ing Doctors Katō Hiroyuki, Inoue Tetsujirō, Ueda Mannen, and Nanjö, Mr. Kanö Jigorö, and many others. The first edition of the work was published three years ago, having taken four years to compile. It contains notices of 20,000 Japanese to compile. It contains notices of 20,000 Japanese books and covers 2,500 pages printed in No. 6 type. The work is issued by Voshikawa Hanshichi, and the subscription price is 7 yen.

The Shūko Jisshu (集 古 中) is a reproduction of Matsudaira Rakuō's famous work.

He collected a very large number of rare art specimens, had them painted by Tani Bunchō, and published them in 85 volumes. The work has hitherto been selling at between 50 yen and 100 yen per copy, so rare had the copies become. Yoshikawa Hanshichi now offers it at 8 yen per copy, subscription price. It is said to be a book of priceless value to students of Japanese

Another big book in the press is the Shakai Jirin (事 秩), an encylopædia of knowledge on a variety of subjects. The compilation is said to have been superintended by seven well known scholars, Doctors Hatoyama, Inoue (Tetsujirō), Matsumura, Matsuzaki, Yokoi, Miyake and Onishi. But what this may mean it is hard to say. The subjects are arranged under 15 headings in alphabetical order.

headings in alphabetical order.

Maruya announces that a work on "Anglo-Saxon Influence in Japan" is in course of compilation with a view to its being presented to the managers of the great Exhibition to be held in America next year. The project was started by the Eigaku Jihōsha. The compilation will be under the control of Count Okuma, and the elder statesmen have all promised to conthe elder statesmen have all promised to contribute their quota to this history of the Meijera. The co-operation of Barons Iwasaki, Kanda Naibu and other prominent men has been

The Taiyō sustains its bulk year after year with great regularity. In this respect it has no rival in Japan. The Japanese part of the magazine covers some 250 large-sized pages. There is of course great inequality in the writing. Yet, taking the year through, it commands the services of a better class of writers than are connected with any other periodical of the kind. Its articles on publics, business, advantage and whilescale. on politics, business, education and philosophy are usually penned by specialists in these subjects. Its novelettes are often cleverly written, and judging by the space devoted to them must find a number of eager readers. Under the heading of "Opinions of Prominent Men" it publishes a series of short spicy articles on a variety of topics. Two of these, appearing in the December number of the magazine, we propose to notice here, but before doing so wish to observe that it is a pity that the English part of the Taiyo which covers usually about 25 pages, is not better edited. Many of the articles written by Japanese are good as regards matter, but in most cases the English is most defective. If the revision of each article were entrusted to some competent Englishman or American, the English part of Japan's greatest magazine world make a better show.

The views of prominent men are obtained by interviewers and stated in colloquial language under the title Meika Dangi. This month Dr. Inoue Enryō speaks on the "Short-comings of the Japanese" and Mr. Fukuchi Genichirō on "Our Policy towards China." Here is the gist of the first short article. When travelling in Kyūshū lately, the Director of a Middle School drew my attention to the numerous disturbances that occur in Middle Schools throughout the that occur in Middle Schools throughout the country. He seemed to think that the evil to which he referred was confined principally to Middle Schools, but to me it seemed otherwise. For a long time I have perceived that there are certain defects in Japanese human nature, which if not remedied will prove a great hindrance to national progress. They reveal that pettiness which is said to be one of the characteristics of islanders. I will give a few instances of what I mean. (1) There is a good deal of petly jealousy in Japanese human nature.—When a man rises in rank or becomes wealthy, there are a number of people who take delight in say-† This term is sometimes written with the monkey ideograph #1.—(WRITER OF SUMMARY.)

‡ The marriage of girls who had spent the early Summary).

art of abuse in this country has been developed to an extraordinary extent. People in power are invariably envied and opposed as far as possible. This is the small-mindedness which reveals itself in the business world, the political world and the educational world in a most unmistakable manner, and which ruins enterprise after enterprise. No matter how much progress Japan may make in other respects, if she fails to conquer this tendency to petty jealousy, she can never become really great. (2) The spirit of independence is not sufficiently developed among us.—The readiness with which able-bodied young men consent to receive help anie-bodied young men consent to receive help from persons who are under no obligation to assist them astonishes me. To become an object of charity is considered no disgrace by many young men. To sum up, we find, then, in the young men of to-day insubordination, dislike of discipline combined with small-mindedness-a most undesir-Most of our civilisaable combination. tion has come from the United States, where people are freer than they are in any European country.* In the United States Herbert Spencer's writings are known to everybody. Not so in England, where most people who have read his books regard his doctrines on liberty are accounted. his doctrines on liberty as somewhat dangerous. American notions on liberty as somewhat dangerous. American notions on liberty were too great a contrast to the despotism to which we were accustomed in feudal days. Hence the insubordination complained of. The change was too sudden. Dr. Inouye concludes his article thus:—Sunamachi chimaconui houis to investor so desired. wachi shima-guni konjo to jiyusetsu no denrai to appaku (oppressive government) no naku natta to, kono sansha (3 things) no hōgō (白白) kara kô iu kifu ya dekita no de arimasureba, sunawachi gakkō no tokuyū to nomi ni kagiraremasen. Ni-honjin no tansho wa jitsu ni kono ten ni aru koto

Mr. Fukuchi believes the partition of China to be inevitable and he has, he tells us, held this view for over 20 years. He says that Japanese statesmen fail to understand the real situation of affairs in the neighbouring country. Though China has held together so long, there is not sufficient affinity in the races of which the nation is composed to allow of her doing so against foreign pressure. What Japan needs to adopt, according to Mr. Fukuchi, is a far-sighted policy. The Far Eastern question is not going to be settled by any of the temporary expedients Japan is now proposing. The preservation of China's independence is the wildest of dreams—had Japan far more resources than she possesses, she could not accomplish it. China's disintegration is a foregone conclusion, and the sooner Japan realizes this the better. A falling house is not to be kept upright with one post. As for the talk about dobun, doshu (one-script, one-race), it is all moon-shine.† The attempts now made in the neighbouring continent to reconcile the irreconcilable remind me, says Mr. Fukuchi, of similar attempts in our country when the Bakufu fell. There was a scheme, which I in my ignorance supported, for preserving the old feudal form of government alongside of Imperial authority, but it was soon recognized to be quite impracticable. Our policy towards China must be determined by what is clear as to the fate of that country. All calcula-tions that leave out of consideration the unmistakable signs of China's coming doom are quite

Mr. S. Tsuji writes in the Tairō at great length on Technical Education. The tone of the article is very earnest and the many suggestions it contains are all of a practical type. Mr. Tsuji knows as well as any man living what are the causes of Japan's low rank in the scale of commercial and industrial nations, a rank which he himself observes is far below that of small European countries like Italy. Her people are not educated in sufficient numbers to allow of their competing successfully with Western nations.
What is called business education has been largely

neglected for years in this country, so that Japan's financial resources to-day are not a tenth of what they might have been had she realized her deficiencies 20 years ago. On the principle that it is never too late to mend, Mr. Tsuji comes found with his enhance of adjustical reform foward with his scheme of educational reform.
Current periodicals publish many such schemes.
The present Minister of Education, as was shown in a former Summary, has a plan of his own, but the carrying out of such great changes as are proposed would involve more money than the Mombushō is likely to have entrusted to it in the near future. Hence it is that practical men are not interested in hearing what the numerous theorists have to say on this subject.

Dr. Anezaki contributes to the Taiyo an appreciation, perhaps we ought to say a defence, of the late Dr. Takayama, the purport of which is that Dr. Takayama's many changes of opinion were the result partly of study, but principally of his possession of the courage to adopt whatever views commended themselves to him from time to time. According to Dr. Anezaki, Dr. Takayamadied a sincere follower of Nichiren*, whose career elicited the most intense admiration from a mind that was permeated with seriousness and earnestness. Not a few critics have commented adversely on Dr. Takayama's numerous changes of opinion. They regarded him as an impressionist of a most unreliable type. His life; observes Dr. Anezaki, has been divided up into the Chikamatsu period, when the Japanese drama absorbed the whole attention of his active mind; the Nippon Shugi, when, stimulated by his ardent nature, the late Doctor championed the cause of Nationalism against the apostles of Occidentalism; and the Ethical period, when in-dividualism and national morality were the themes that occupied the pen of this powerful writer. But to Dr. Anezaki Dr. Takayama's life appears to be all of a piece, all part of the regular development of striking traits of character. Dr. Takayama, says Dr. Anezaki, realized before all things that man is born to learn and that he must give his whole attention to each separate teacher. He was of opinion that each man will do well to develop to the full his own original nature, that the best types of men can only be obtained in this way. During the rr years of his literary life many were the transitions he experienced, but they were all the result of the subtle influences of the various lines of study which he took up, working on a very susceptible and a very serious mind. Being a man of decided character himself, it was only to kindred natures that he really became attached. In literature, in politics, in art, it was the men of purpose and will who had reached certain de-

finite conclusions that attracted him.

There is no doubt that among modern writers Japan Dr. Takayama, considering his age, made more impression on young readers than any one. As to his reliableness as a guide in things literary and ethical there is a wide difference of opinion. All are agreed that he wielded a powerful pen, but beyond that he has as many detractors as admirers.

Under the title of "The Lesson to be Learnt from the Proposed Abolition of the Mombusho the Shinjin (New Man) expresses itself thus:— Like many another subject about which the public has excited itself for a time, the proposed aboli-tion of the Department of Education has ceased to attract attention. We ourselves attached no importance to the agitation from the first. Neither the arguments for the abolition nor against it were conclusive. The movement may be regarded as one of those perpetually recurring expressions of dissatisfaction with the system of education now followed. That the Cabinet should abolish the Education Department merely for the sake of economy was a notion that few serious-minded men would entertain. It was not, then, the financial aspect of the question which

* Most of Dr. Takayama's warmest friends deny this, affirming that belief in Buddhism was quite contary to the whole bent of Dr. Takayama's marmest friends deny this, affirming that belief in Buddhism was quite contary to the whole bent of Dr. Takayama's mind. His utterances on this subject were made at a time when his disease was far advanced, when he was no longer himself, and therefore much importance is not to be attached to them.—(Writer of Summary).

swelled the number of the pro-abolitionists, but the feeling that the abolition of the Depart-ment might lead to the cessation of a serious abuse that has clung to all our modern Cabinets, namely, the subordination of educational interests to military and payal interests. As long as the to military and naval interests. As long as this abuse lasts it makes little difference into whose hands the administration of education may fall. The money placed at the disposal of the Department is quite inadequate to the pressing educa-tional needs of the country, and as long as our cabinets are made to bow to the will of military men, it will always be so. We note in passing that Mr. Tsuji in his article in the Taiyō alludes to the same abuse. For our part, continues the Shinjin, we despair of any radical change being brought about as long as education is administered by a set of perfunctory, mercenary under-offi-cials, who fill their posts merely as a means of ob-taining a livelihood. Had the Department been abolished or reduced to a Bureau, these same men would have been appointed to administer its affairs. Perfunctoriness is written on all our administration. And the practice of allowing subordinate officials to administer government affairs in whatever way they please has been and still is the bane of all our modern Governments. It is a new set of men in our official educational world that is needed. Till these are forthcoming, all shiftings of the cards will prove to be of no avail. Therefore to us it appears that the question of retaining or abolishing the Department is not worth serious discussion, because the root of the educational evil is not to be got rid of by changing names, methods, or institutions, but only by the employment of new men The Shinjin has an excellent article entitled Shiritsu Daigakuron (On Privately Endowed Universities), the substance of which we give

below:-Since the Waseda Semmon Gakko be came a University, the six great Law Schools of Tökyö have made arrangements for following suit, and Dr. Inoue Enryo's Tetsugakkan is likely to have granted to it the same privilege. Thus the country will before long be in possession of no less than 10 Universities. This at first sight seems a cause for congratulation. But there are many objections to the existence of so many Law Colleges as we now have. The teaching of Law, though very necessary when it was commenced, has been overdone. Of course there is room for a few such Colleges, but six are too many, and in some respects calculated to do harm. There are some respects calculated to do nam. There are a conceivable reasons for establishing non-Government Universities. (1) They may be needed to fill a gap left open by the existing Government institutions. The Government finds itself unable to cope with the growing educational needs of the country. The nation is waiting for men that the Government has no means of supplying. (2) Their establishment may be rendered necessary as a corrective to the Government Universities; which in the opinion of many have been conducted on mistaken principles. (3) Their establishment may be prompted by a desire to put into practice certain high ideals. How many of the newly established institutions are there that fulfil one or more of these functions? The 6 Law

Colleges were called into existence by a passing wave of public sentiment. A knowledge of law was at the time of their establishment deemed to be the best preparation a man could have who aimed at making a reputation by politics. And so a number of dreamy youths flocked to these schools with the notion that they were on the road to wealth and fame. The schools were in many respects rivals to each other and represented various political parties. They have been attended by a number of poorly educated youths, who have been taught the art of logic-chopping and hair-splitting, who have been encouraged to theorize and to quibble without receiving any of the necessary counter-balancing instruction that such youths so sadly need. . There are those who maintain that these schools are not

^{*} This is of course very questionable,-(WRITER

freedom of thought and independence of judg-ment than is permitted in the two Imperial Uni-versities. To this the simple answer is that the versities. To this the simple answer is that the lecurers at these schools are almost all University professors or post-graduates. It seems to us that the Law Colleges connected with our two Universities, supplemented by the Waseda University Law College, furnish all the instruction on this subject that the country specially needs just at present, and that it is most desirable that the 6 Law Colleges should enlarge the scope of their teaching, adding lectures on Science and Literature to their programme, or that two or more of them should combine and undertake to teach commerce and industry. Too much educational of them should combine and undertake to teach commerce and industry. Too much educational effort has been centred on Law. The weak point about these Law Colleges is the fact that though independent in name, they are not so in reality, being run by means of University professors. They are in every way inferior to the Government Law Colleges. We see no reason for giving them a higher status than they have hitherto enjoyed. For we fail to see what they have done or are likely to do to merit it.

Four years ago, prior to his rehabilitation in office as a school director Mr. Yoshimura Torabince as a school director Mr. Yoshimura Tora-tarō started a Girls' School at Shimonibanchō, Kōjimachi, Tökyō. The school now runs a Woman's Magazine, edited by a Mr. Miyada Shu, called Kono Hana. The title is derived from a very ancient and well known verse said to have been composed by a Korean called Wani which runs thus :-

Naniwa-zu ni

acts as Director of the School, though he has to reside in Kanazawa, and there are some 14 or 15 leachers. The school was founded in November, 1899, by Messrs. Yoshimura Toratarô and Mizutani Chokkō. The name of the school is the Scijo-gakkō.

**

In the Keisai Sekai we find a discerning article entitled "The Chinese Considered as Emigrants," written by Mr. Motoda Toyojirō. After observing that Japan's rapidly increasing After observing that Japan's rapidly increasing population renders emigration one of the most pressing of questions, Mr. Motoda proceeds to discuss the wonderful success which has, during the past 30 years especially, attended Chinese emigration. The cause of this he takes to be the character of the Chinese working man. He is docile, he is patient to a degree, he treats affronts and even insults with stolid indifference, he is industrious and persevering, and, while observing all his own persevering, and, while observing all his own customs most scrupulously, he is never found interfering with or obstructing in any way the observance of the many alien customs with which he comes into contact. When in 1876 a new comes into contact. When in 1876 a new agreement with the United States was entered into by the Chinese Government, no restrictions were placed on the number of Chinese emigrants and the same liberty and rights as were enjoyed by the American labourer were granted to by the American labourer were granted to the Chinese. Encouraged by this liberal treatment, the Chinese for a series of years swarmed across the Pacific and the States were supplied with labour as a wide proposed to proposed a part of the chinese for a series of years swarmed across the Pacific and the States were supplied with labour as a wide proposed to the pacific and the states were supplied with labour as a wide for proposed to the pacific and the states were supplied with labour as a wide for the pacific and the states were supplied with labour as a wide for the pacific and the states were supplied to the states were su with labour at a price prevously unknown. As railway navvies, as miners, as cooks, waiters, washemen and farm-labourers, they invariably did well. People preferred their quiet, docile, contented ways to those of the turbulent Irishman or the German and so it came about that man or the German, and so it came about that

the labour party in America rose against then, the movement culminating in the passing of a prohibitive law known as "The Chinese Exclusion Act." This would have been enough to daunt most nationalities, but the Chinaman to-day is as resolute an emigrant as he was before the Act was passed, and under various guises and in mysterious ways he finds his way into the States from Canada or from Mexico. So that at the present time there is hardly a small village anywhere in the United States where there anywhere in the United States where there will not be found two or three Chinamen. Mr. Motoda then goes on to observe that notwithstanding the wonderful success which has characterized China's invasion of the labour market all over the world, as a rule the Chinaman never rises above a very subordinate position. As a common labourer he does well, but where highclass mechanics or artizans are required, or where skilful superintendence of others is needed, he is nowhere. He labours in a mechanical fashion very much like an animal. The American work-man in the intervals of mechanical work will examine the mechanism of the instrument he is using and has often been known to suggest improve-ments in its construction. But not so the Chinaman. He is a labourer, but no more. In man. He is a labourer, but no more. In competition with other labourers this is a defect. Few are the Chinese labourers that better their position. They live and die as human, passive tools in the hands of their employers. As a consequence of the absence of mental interest in their work, they need far more inspection than European labourers, as is testified by one of the Managers of the Hongkong Dock. by one of the Managers of the Hongkong Dock-Namina su ni

The magazine, which has reached its fourth mumber is tastefully got up and well supplied with suitable matter. Mr. Yoshimura's school seems to be prospering. There are 135 girls now in the school, namely 38 first-year students; 66 second-year students; 19 third-year students and 12 higher class students. Mr. Yoshimura acts as Director of the School, though he has to the Japanese emigrant must seek to play.

IN THE NEW YEAR.

The New Year brings to some a charm, And scenes and thoughts grow brighter; To others it seems naught but harm, Life's struggles grip the tighter.

The former greets so cheerily, The friends he's always passing; The other thinks most wearily Of debts so fast amassing.

Man number one has naught to fear, He has plenty, and to spare Man number two, has little cheer, His mind is filled with care,

And so we're passing every day First one and then the other; How easily 'tis to forget That each one is our brother.

Acquainted with the first one, We are always glad to be; But let us ever aim to treat Them both with equity.

A pleasant word, a cheery smile, "I's naught to us, such giving, But might it not, to him that's down Make life more worth the living?

May we, as down life's path we go, These latter ever seeing, Do all the good we can, or know, For this, God gave us being.

To us, to you and me, I pray The first will e'er be given, And through this life continuing on, Give us a glimpse of heaven.

Toledo Blade.

LIVE AND LEARN.

In a late issue of the American Review of Reviews appears an article written by a certain Mr. Stanhope Sams entitled "Rebirth of the Japanese Language and Literature." One must go to the West to learn new things about Japan. A few months ago an appropriate letter represend in the West to learn new things about Japan. A few months ago an anonymous letter appeared in the Times announcing that the Department of Education had decided to adopt the Romaji and insist on all school-teaching being carried on through this medium. Now we have Mr. Stanhope Sams making false intelligence the basis of an article which is full of silly twaddle on the probable effects of the great change he supposes is about to come over the literature of this country. The article in question opens with a reference to news conveyed to America by some Tökyö newsmonper article in question opens with a reference to news conveyed to America by some Tökyö newsmonger thus: "Recent press dispatches from Tökyö contained a brief announcement that the Government had decided to promote the adoption of the 'Roman letter' as used in the books and newspapers of this country and of western Europe and known in Japan as the Romani for writing and printing the Japanese language" Mr. Sams then proceds to blame the newsmongers for not making their nuessages longer. While pages were filled with partly fanciful narratives of Turkish atrocities, "a few words were deemed an adequate record of an event that crowned with success one of the most important reform movements in the history of civilisation." Then Mr. Sams proceeds to comment on what he ments in the history of civilisation." Then Mr. Sams proceeds to comment on what he conceives to be the significance of the change involved in the adoption of Romaji. (1) "This reform means a complete change in the handwriting and in the type of the newspapers, magazines and books of more than forty million people. (2) It means the sweeping away of the most hideous (1) cumbrous and difficult system of writing ever devised, and the substitution for it of the simplest devised, and the substitution for it of the simplest and clearest system of writing that civilisation and art have evolved, and the consequent simplification art have evolved, and the consequent simplification of the Japanese language. (3) It means the opening of the outside world for Japan and the letting out upon us, through gates long slut and barred, the refining influences of its own beautiful literature and art." These sentences suffice to show how little Mr. Sams knows about Japan and the question which he undertakes to discuss. He speaks as if he admired art, and yet calls the graceful Chinese characters "hideous." What has the adoption of Romaji to do with the understanding of Japanese art? Even were it a fact that within the next two decades Japan proposed to adopt the Romaji in her schools, no Japanese books worth reading on art would be printed in Romaji within Mr. Sams' lifetime, if within 50 years. Mr. Sams' article bristles with inaccuracies and wild statements. He undertakes to enlighten readers as to the present mode of spelling and writing and in the process shows his own ignorance of the subject in a most in excusable manner. Asagao is spelt in little Mr. Sams knows about Japan and the In a most in excusable manner. Aragao is spelt in Japanese $\gamma + \gamma'$ and not $\gamma' + \gamma' + \gamma'$ morai is spelt $\tau_0 \to \tau$ and not $\tau \to \gamma' + \gamma'$ midzu, wrongly, it seems to us, written mizu, is spelt $\tau_0 \to \tau$ and not $\tau_0 \to \tau$. Thus in the spellspelt z y and not z z. Thus in the spelling of five short words on which Mr. Sams ventures, in no less than three of them he is wrong. The introduction of Romaji, according to Mr. Sams, is going to remould the language. According to him the mass of the Japanese have never known their own language, but will henceforth get to do so through the Romaji, and from these heretofore unenlightened folks will spring poets, historians, and what not. Japanese minds will all be transformed by this language-earthquake, the introduction of the Romaji. We close with one more quotation, which will show to what lengths of consummate trash Mr. Sams ventures to go. "After simplifying the language and at the same "After simplifying the language and at the same time, making it more plastic and more pliant, this great reform will restore it as a new gift and inspiration to the rejuvenated minds and hearts of Japan. What may not this exquisitely poetic, imaginative and alert race fashion out of such splendid material as their strong and beautiful language and their marvellous, artistic temperament? We may justly expect the dawning and the early day of a magnificent literature

^{* &}quot;This Osaka flower that is all in bloom, blooms now in the spring time after enduring the winter cold." The meaning is that the endurance of hardships develops beauty of character,—(WRITER OF SUMMARY.)

in Japan. Alphonse Daudet once said, in speaking of Turgueneff 'What a luxury it must be to have a great, big untrodden barbaric language to wade into! The Japanese is a great, big, untrodden though not entirely 'barbaric' language. It is essentially fresh, as fresh as Greek in the time of essentially fresh, as fresh as Greek in the time of Homer, as Italian in the time of Dante, as English in the time of Shakespeare; and its singers under the new inspiration (Romaji) will soon show that like Marlowe, they have in them 'those brave sublunary things that the first poets had.' Why was not this article stuffed into the editor's waste-paper basket? Simply because the editor probably knew less about the subject treated than Mr. Sams. And so it appears in big type and traverses the length and breadth of America as one of the latest and finest utterances on "Things." traverses the length and breach of America as one of the latest and finest utterances on "Things Japanese." If it is true that knowledge is money. So also is ignorance; and the number of people who make a living by trading on the ignorance of the reading public is considerable. As long as an article is spicy and sensational, it will pass. The old motto vigeat veritas, et perat mundus has been replaced in some quarters by vigeat sensatio, el pereat mundus.

FIRES.

A telegram from Takeshiki states that fire broke out in the barracks there, destroying a

On the night of Dec. 24th, fire broke out in the Yokohama District Court damaging only the preliminary examination Court room and its upper floor in which was the office of the Public Procurator. The cause is believed to have been a stove. No documents were injured.

Dec. 25th in the house of Mr. T. Inouye, a well-known Customs broker. Miyazaki-chò, with the result that he sustained severe injuries while escaping from an up-stairs room where he was sleeping. Seven houses were burned down and six injured. The cause is incendiarism.

Nakarokubancho, Kojimachi, Tokyo, destroying the dwellings of Viscount Naito and Major Tamura, and damaging the Sakurai Female School. Incendiarism is believed to have been the cause.

On Dec. 26th, fire occurred at Miyake island, ldzu province, burning down over 40 dwellings and many sheds. The whole of the houses on the island number about 130.

An incendiary outbreak of fire at Noge, Yokohama, on Dec. 28th burned down a shed. It was started by dried leaves and kerosene.

Fire occurred on Dec. 29th at Annaka, near Maebashi, burning down 22 houses. The cause is not known.

LITERARY GOSSIP.

The Morning Post says:—Mr. J. MacLaren Cobban left no unfinished work behind him, his last days of health having been devoted almost exclusively to producing "The Life and Deeds of Lord Roberts"

Mark Twain has, it is stated, been granted a handsome annuity for life by the Harper publishing concern, enough to keep him and his family comfortably, in exchange for first call on everything the humorous philosopher writes. Mark will seek subjects and Mrs. Clemens's health under the sunny skies of Florence, where they will remain for at least a year.

There will shortly be issued by Messrs. Stephen & Poliock, Ayr, a new historical romance by Mr. William Robertson, entitled "The Dule Tree of Cassillis." The tale, one of Mr. Robertson's series of Ayrshire stories, carries the reader back to the days of the notorious "King of Carrick," Earl Gilbert of Cassillis, the same who roasted the Commendator in the Black Vault of Dunure, and whose spouse, according to the tradition handed down in a well-known ballad, was carried off by Johnnie Faa, the gipsy laddie.

The accession to the see of Canterbury of a Scotsman, the second within a generation, is a matter of great interest to all Scots, whether interested in ecclesiastical affairs or not. The Rev. Adam Philip, Longforgan, assumes that this interest is sufficient to warrant the publication of an "Ancestry of Randall Thomas Davidson, D.D., pper floor in which was the office of the Public rocturator. The cause is believed to have been stove. No documents were injured.

Another outbreak occurred on the night of The book, which is ancestors were connected.

From Scotland comes an item of news reminiscent of Burns. The old "Brig" of Ayr has fallen into a state of dilapidation that causes rijured. The cause is incendiarism.

Fire occurred on the night of Dec. 27th at akarokubancho, Kojimachi, Tokyo, destroying e dwellings of Viscount Naito and Major on account of its associations and its usefulness. There is also a spice of humour in the situation. Some dead admirer of Burns left a fund for rebuilding the bridge, and a committee of the Council is now considering whether this money must really lie untouched until the structure has tumbled to pieces for want of repairs!

A remarkable find, and one that has rescued Several fires were reported on Dec. 28th in Tokyo. Two were at Shitaya and in each case the outbreak was subdued before doing serious damage. Another was at the village of Taniyara, Kitatama, destroying seven buildings, including a godown. The last one was at another village in the same district, burning down three dwellings and a godown.

An incendiary outbreak of fire at Noge, Yoko-job lot as rubbish, and that some useful documents might be found among them. Purchasing the lot job lot as rubbish, and that some useful documents might be found among them. Purchasing the lot from the grocer, he carefully sorted them, with the result that he was enriched by finding unpublished letters of Garibaldi, Mazzini, Cavioli, and other leaders of the revolutionary period. The letters throw much light on the stirring events of 1860 and 1861.

"Byron and the Murrays" is the title of a very interesting interview with the famous publisher of Albemarle-street which appears in the November Book Monthly. In one passage a complete denial is given to a well-known story:

complete denial is given to a well-known story:

There is an old story (said Mr. Murray) to the effect that Byron sent my grandfather a Bible in which be had changed a well-known line to read, "Now, Barrahas was a publisher." Here is Byron's Bible, and, as you will see with curiosity, there is no mark whatever on the page where the Barrahas passage occurs, or, indeed, anywhere else. In a word, the story never had a shadow of foundation so far as Byron and the house of Murray were concerned.

If there is in English literary history any incident If there is in English literary history any incident of the sort it would be interesting to learn its

has " reckoned none but shining hours" for three received none but shiring nows to thee centuries, has just been renovated, and now reminds one that the art of dial-making is still practised in England. Perhaps the most remarkable collection of sun-dials is that of Mr. Kent, at Haywards Heath. He has a dozen of them in his gardens and on the walls of his house, and three of them erected over the windows of his bedroom are so arranged that they tell the time on the glass, and one may lie in hed and know the hour. Lord Ilchester has dials similarly on the glass, and one may be in bed and know the hour. Lord Ilchester has dials similarly arranged. Some years ago a very fine modern sun-dial, engraved on a slab of slate, was built into the wall of the house at Sandringham, and the mottoes on it, chosen by the King and Queen, are: "My time is in Thy hand" and "Let others tell of storms and showers, I'll only count your sunny hours.

"One stormy day," writes Mr. Lionel A. Tollemache in the *Guardian*, "Mr. Gladstone walked from his hotel to visit me in the room where I am now writing; and I was amazed to see that he came without an umbrella. On my venturing to remonstrate, he laughingly explained that if the high wind had happened to turn his umbrella inside out a picture of him in that umbrella inside out a picture of him in that forlorn plight would have found its way into half the comic papers!" Mr. Gladstone's extreme good nature is illustrated in another anecdote. "My wife and I invited a Liberal barrister to dinner to meet his political chief, but he was prevented from coming by a broken leg. He was, I think, at that time not personally known to Mr. Cladstone; but although his aroundered. was, I think, at that time not personally known to Mr. Gladstone; but although his room was near the top of our hotel, which then had no lift, the 'grand' octogenarian walked up flight after flight of stairs and talked for some time by his bedside.

In his new work on "Hawthorne and His Circle," Mr. Julian Hawthorne makes a remarkable confession. Some years ago, it seems, he received a letter from Liverpool asking him to identify, from a photograph, the house in Rock Park in which he and his father had lived, with a view to the affixing of a mural tablet. He proceeds as follows:

proceeds as follows:

All the houses in Rock Park had been turned out of the same mould, and I knew no more than my interrogator which was which. But I reflected that the committee had been put to trouble and expense for photographs, postage stamps, and what not, and that all that was really wanted was something to be sentimental over. So rather than disappoint them I resorted to a kind of "Sortes Virgilianæ"; I shut my eyes, turned round thrice, and made a mark at hazard on the line of photographs. The chances against my having hit it right were only four to one; the committee were satisfied, the pilgrims have been made happy, and it is difficult to see where harm has been done.

It will be interesting to see whether Liverpool

It will be interesting to see whether Liverpool takes notice of this startling avowal, and whether the "plaque" will be withdrawn pending in-quiries and verification.

In "Portraits of the Sixties" (published by T. Fisher Unwin) Mr. Justin M'Carthy puts into permanent form many reminiscences of great men he has met in a long and busy journalistic and Parliamentary career, recollections that touch the intimate side of these men's characters and the intimate side of these men's characters and that we would not willingly let die. Mr. M'Carthy has had opportunities that are given to few of seeing and meeting the prominent men of his time. A journalist to the manner born, he has an eye to see and ment open to sympathy and understanding at every point. The recollections and observations he has set down in this large and liberally illustrated volume are, as a consequence, brimful of interest and colour, and will serve as a useful supplement to his "History of Our Own Times," which, though it has so long left his pen, has not yet been superseded in its own particular sphere. Mr. M'Carthy opens his volume with a vivid and racy sketch of the characteristics of the "early sixties" of the past century, then, beginning with Dickens the past century, then, beginning with Dickens and Thackeray, he passes in rapid review a long list of celebrities of his day—Carlyle, Tennyson, Cobden, Bright, Ruskin, and many other men of light and leading in the politics and literature of The old sun-dial in Pump-court, London, which the time. His work, in fact, serves as a graphic

picture of a period which was of extraordinary fertility in all branches of human thought and activity. One of the most valuable features of the book is the numerous portraits of his contemporaries. We doubt, indeed, if there is any other published work which is in this respect so rich and unique.

Lord Wolseley's memoirs published under the title of "The Story of a Soldier's Life," is an exceedingly interesting book, and full of good stories and suggestive reflections. That "war is a horrible thing" is a very nice heading for the page of a schoolgirl's copybook, he says, but I confess candidly that in my heart I always thoroughly enjoyed it. Surely it has a very glorious side to it. You find man at his best and at his worst there. What can be grander than to see men boldly face death for the honour, the glory, and the prosperity of the country they love, and whose interests they put before self and all earthly considerations? It is self-sacrifice of a most pronounced type, the acme of noble excitement, the nounced type, the acme of noble excitement, the apogee of patriotic enthusiasm. What nobler heritage can poor, sinful man leave his children than the fact that he willingly died that England might be renowned and great, and her people safe and prosperous? Lord Wolseley gives a graphic picture of the "Cawnpore House of Blood," the sight of which made the troops of Havelock's force frantic with rage, and inspired them with an all-absorbing craving for ruthless vengeance "No man," we are told, "left those precincts without clenched teeth. told, "left those precincts without clenched teeth, and a longing in his heart for vengeance." "It is easy now, at this distance of time, and in our quiet homes to enlarge upon the 'quality of mercy' and on Christ's holy teaching; but had any English bishop visited that scene of butchery when I saw it, I verily believe that he would have buckled on a sword. As I look back to that time and think of the events I am lost in amazement, mingled with a sort of national pride, at the smallness of the retri-bution we exacted." Lord Wolseley has often thought to himself, before the bullets have begun to whistle near him, whether he would be killed that day, and his one dread has been-a dread mate day, and his one dread has been—a dread which ate into his soul, that if killed he would die without baving made the name he hoped a merciful God might permit him to win. "All through my life—sinner though I have been—I trusted implicitly in God's providence; I believed He watched over me, and intended me for some important work." He tells the story of the uncompliar light pedical who give hafers his mark. popular Irish colonel who, just before his regiment moved into action, called the men together and said—"I understand that you mean to shoot me to-day, but I want you to do me a favour; don't kill me until the battle is well over." It was quite true; they had meant to shoot him, but his daring saved his life—though history tells us he never reformed.

NEWS OF THE WEEK.

A telegram dated Dec. 28th states that the cotton market in Shanghai is very dull and there are no transactions.

We are asked to state that the Tsukiji School for foreign children will not open after the new year's recess until the 5th of January.

Owing to heavy snow, a school in Katakai, Niigata prefecture, was crushed on Dec. 22nd with the result that three pupils were killed and ten injured.

The Tosan Life Insurance Company, Takamatsu, for which a decree of bankruptcy was passed, was ordered on Dec. 29th to wind up its

M. Sugawara, a constable of the Hatogaya station near Urawa, was arrested on Dec. 29th on a charge of having embezzled money belonging to the office.

The Taiping General Hung, whose death and burial at Hongkong we recently announced, was a nephew of the leader of the Taiping Rebellion, Hung Siu-chuan. It was supposed that he was decoyed to Canton last year and there executed, Kenny on behalf of his British conferes. In

Another year and well glows the sexty and twell glows the sexty and the leader of the Taiping Rebellion, Hung Siu-chuan. It was supposed that he was decoyed to Canton last year and there executed, Kenny on behalf of his British conferes. In

L. P. T.

turns out now that the supposed Hung was an unfortunate substitute.

The Osaka Shosen Kaisha steamer Suka Maru has been chartered by the Naval Department. She was expected to leave for Yokosuka after dis-charging her cargo at Kobe.

The Asahi states that the Government intends to purchase the cable between Fusan, Korea, and Tsushima which now belongs to the Great Northern Telegraph Company.

A telegram from Hakodate states that owing to a storm which prevailed there since Dec. 27th some junks capsized. Thirteen sendos were drowned and the body of one was washed ashore

Mr. J. Igarashi, editor of the Chiba Mainichi, Choshi, was arrested on Dec. 22nd. The charge against him is reported by the Yorodzu to be that by menaces be obtained yen 200 from a wealthy

Baron Yamamoto, Minister for the Navy, was promoted on Dec. 26th to the junior grade of the Second Rank. The same day, according to the Official Gazette, 184 officials were promoted in several grades.

Mr. Yoshida, an engineer of the Kure Naval Dockyard, examined on Dec. 28th the steamer Yamaguchi Maru, which is lying at Nagasaki. The Asaki states that she will probably be chartered by the Navy.

K. Hasegawa (22), who on Dec. 28th stole a bicycle belonging to a foreign employee of Messrs. Helm Bros. No. 42, Yokohama, was arrested at Shinagawa the same day. The bicycle was returned to its owner by the police.

Mr. Uchida, Japanese Consul-General at New Vork on Dec. 24th telegraphed that owing to the demands of spinners and though prices for future delivery are advancing, the cotton market is in an unsatisfactory state.

A certain quantity of phosphoric acid exploded on the evening of Dec 23rd at the shop of a drug dealer, Ishikawa machi, Yokohama, while an employee was making it into powder. The man was severely injured.

According to the captain of the Genyo Maru, which arrived on Dec. 26th at Shimonoseki from China, twenty Russian warships and some torpedoboats were lying at Port Arthur, while outside three warships were cruising.

The gross income of the Nippon Railway Company for the last half-year ended Dec. 20th aggregated yen 5,111,498.69. Passenger fares were less by yen 50,497.82 than in the previous year but the freight increased by yen 121,549.47.

While two foreign ladies were going up Shio-kumizaka (School Hill) towards the Bluff on Monday evening not long after dark a coolie who had followed them tried to snatch a chatelaine which one of them carried. She resisted, however, and though the chain broke saved her bag, which contained a considerable sum of money. At this season foreign ladies would do wall to avoid this season foreign ladies would do well to avoid lonely and unlighted places.

An interesting little story is told of the recent visit paid by the German Empress to Ziegenhals, in Silesia, after the terrible inundations which have caused such distress there. Her Majesty was faultlessly dressed, but with great simplicity, and this fact made such an impression on a working-man in the crowd that he said loudly as he turned away, "I'm going straight home to tear the flowers out of my girls' hats."

On the 10th inst. the British community in Manila tendered a banquet at the English Club

and a large reward was paid by the Chinese accepting the address the Governor said "that authorities to the men who decoyed him, but it the Americans have much to learn from the turns out now that the supposed Hung was an British, and blood is thicker than water." The Manila Cablenews says this is " the nearest thing to a compliment that has been heard in a long

> The "Directory of Protestant Missionaries in China, Japan and Korea for the year 1904" is to hand from the Daily Press Office, Hongkong, much earlier than we have been led to expect directories of any kind. It is a very full and, so far as we have been able to ascertain, an exceedingly accurate, list of all persons connected with protestant missionary work in these Far

> The Manila Cablenews publishes the following telegram, dated London, December 8:—Libertad, the battleship bought by Great Britain along with Constitucion, has made a record speed to-day of 22.3 knots an hour over a measured course. This magnificent speed has created a sensation among naval experts. Libertad and Constitution were built in England for Chile. Lately, as they approached the finishing touches, Russia and Japan are said to have tried to buy them. Britain stepped in and took them from Chile for 1,875,000

> The S.P.C.K. has voted the sum of £100 towards a new brick church to be erected at Yokohama, at a cost of £1,000, to seat 150 to 200 people. The present building, which seated about 50 people, was too small, and badly situated. The mass of the population were non-Christian and the Christian and the Christian, and the Christian congregation consisted of people who were not well off—clerks, &c. This paragraph appears in a home paper. We presume this refers to the church which is under the pastoral care of the Rev. Walter Weston.

The presentation of hats to the new Cardinals by Pope Pius X. at his first Consistory recalls the by Pope Pius X. at his first Consistory recalls the circumstance that the red hat was first given to Cardinals by Pope Innocent IV. at the first Council of Lyons, held in 1245, to signify that they should always be ready to shed their blood in defence of the Church. Bayle, however, in his "Pensées sur la Cométe," gives a different reason for the colour. Cardinals wear red, he says, because Rome is the solar or holy city, Sunday belonging to Christianity, and Cardinals. Sunday belonging to Christianity, and Cardinals, therefore, use the colour of the sun!

The property of Mr. Asano Soichiro, President of the Tokyo Kisen Kaisha, was seized on Dec. 23rd by Mr. S. Okazaki, lawyer, representative of Mr. G. Takahashi, owner of the Nishisawa gold mine, Tochigi prefecture, on a claim of yen 23,285. It appears, according to Tokyo papers, that Mr. Asano made a contract on Sept. 5th, 1902, with the mine-owner to invest in the mine the amount claimed, but later he proposed to cancel the contract. Mr. Takahashi there-upon instituted a law suit on Nov. 30th this year in the Tokyo District Court petitioning for the execution of the contract. On Dec. 9th, judgment was delivered in favour of the plaintiff, on which decision, having deposited yen 7,000, he seized the property of defendant.

ANOTHER YEAR!

Another year! Ah! how the years glide on, With some so short and some—Ah! some so long, When every year steals something from delight, And on each little day descends the night. And then, beyond the night, another day; And still, and still the sweet years fade away; And sweetest are the years that farthest lie; And dearest are the dreams that are gone by. So many years, so many years, and yet Throughout their length my heart is set, is set On seeing just the sight I may not see-That dear old home, the home that's not for me. Another year! and wider grows the sea

A CHRISTMAS ENIERTAINMENT.

It has been our privilege to be present at several Christmas Entertainments given by the pupils and friends of the Union Church Sunday School, but the one given on Wednesday afternoon, at the Van Schaick Hall, must be adjudged the best of them all. Happy indeed were the hours, and only too speedily did they fly. Needless to say the capacity of the Hall was taxed to its utmost limits and many could not find room. In the course of the programme, Mr. Clarence In the course of the programme, Mr. Clarence Griffin, the energetic and beloved Superinten-dent, gave a brief description of the work of the gent, gave a brief description of the work of the past year. Starting with 64 scholars, they now registered 87 on the books and still more were asking to be admitted. He hoped next year that the Entertainment would be given in the Public Hall and then they could have a Christmas tree such as Yokohama had never seen before. It would be a hopey thing he said and one greatly would be a happy thing, he said, and one greatly to be desired if the Sunday Schools of Christ to be desired if the Sunday Schools of Christ Church and Union Church could combine in such an affair, and he prayed that it might come off. At the close of the programme of Carols and recitations Father Christmas himself appeared amid a heavy snowstorm (to the huge delight of the youngsters) and proceeded to distribute a multitude of toys from a canacious sack after which games were included. capacious sack, after which games were indulged in for a while, the merry party separating at last with much regret that good things in this world must have an end. We append the programme:-

THE SWEARER-OFF.

Don't speak to him to-day. The year is young And he has sworn, forsooth, that hips nor tongue Of his shall taste vile nicotine at all Throughout the Winter, Summer, Spring and Fall. And he is sad-ay, taciturn and cross. So twit him not to-day about his loss: But when to morrow comes he will be glad, Rejoicing o'er the first cigar he's had Since he reformed; so let him be to-day And call to-morrow when his heart is gay.

YOKOHAMA LITERARY SOCIETY.

The Christmas and New Year's meeting of the Yokohama Literary Society took place in the Public Hall on Wednesday evening and passed off, despite some disappointments at the last moment, very successfully. There was a crowded house and some of the items were very loudly applauded. several encores were given, while others, owing to the lateness of the hour, were declined. The lovely violin playing of Mr. G. Dubraveich was one of the principal features of the evening. At the close the President moved a hearity vote of thanks to all the performers and especially to Mr. W. Karl Vincent, who had arranged the capital

Wilson.

THE LAW COURTS.

T. BATCHELOR v. C. THWAITES.

The hearing of this case, in which plaintiff claimed yen 2,500 and interest at the rate of 5 per cent. per annum from Oct., 1902, till the execution of judgment, began in the Yokohama District Court before Judge Hasegawa on Dec. 24th.

Messrs. Akiyama and Ikeda were present for Mr. T. Batchelor and Mr. Ideura for Mr. Ch.

Plaintiff's counsel stated that Mr. Batchelor made a contract with Mr. Thwaites on Sept. 18th, last year to invest year 3,000 in the magic exhibition promoted by the latter. The parties agreed that plaintiff should have one-third of the profits gained from the performances, and that defendant might obtain the sole rights of the exhibition on payment of yen 4,500 nine months after the contract. In the beginning of October, plaintiff paid pen 2,500 to defendant, at the same time promising that the remaining amount would be paid when necessary. The magic exhibition was to be performed in the Osaka Exhibition, which took performed in the Osaka Exhibition, which took place this year, and before the opening of the Exhibition it was to be shown in Tokyo and any other places. Defendant removed the magic party to Shanghai on Dec. 18th, 1902, without giving the performance at the Osaka Exhibition. No profit was paid to plaintiff. Some profit might have been made had the magic show been introduced in Osaka.

Defendant's counsel asked for further explanations as to the meaning of the complaint, and some discussion followed on the words used in it; after which counsel wished to present to the Court the contract concerned. Defendant did not exactly remember what items were contained in it because of the long time that had elapsed. Defendant's counsel then asked the Court to adjourn the case, as he could not give a reply to plaintiff before having the contract investigated.

The Court rose, adjourning the case.

NOTES FROM VARIOUS SOURCES.

The Kronstadtski Viestnik states that orders have been given to push forward the work on the new Russian battleship *Borodino* so that she shall be ready to leave for the Far East not later than

Mrs. Susanna Spurgeon, of Westwood, Beulahhill, Upper Norwood, who died on Oct. 22, aged 71, widow of the Rev. Charles Haddon Spurgeon, has left estate of the gross value of £10,986, including £4,301 in net personalty.

The Consul-General of the United States at Frankfort says in a recent report that Germany contemplates an extension of her cables by con-structing lines between Alenado and Guam, in the Caroline Islands, and the Pelew Islands and Shanghai.

The St. Petersburg Viedomosti states that it is intended to send to the Far East next year the Russian transport Kamchatka, of 7,200 tons, which has been built at the new Admiralty yards, and is now lying in the Neva. She is designed to supply coal to warships afloat, and has accom-odation for 3,500 tons; also 32 officers, 1,000 men, and 16 horses.

The great and increasing burden of London's municipal debt is shown by the annual report of the London County Council, issued on Nov. 17th On March 31, 1902, it had reached the enormous total of £54,257,005—an increase of £4,346,976 over the debt in 1901. The rateable value of London was £39,768,471, so that the debt was equal to 1.36 years' purchase of its rateable value. rateable value.

During the recent prize-firing by the Channel Fleet at Gibraltar the Majestic, battleship, Captain H. Evan-Thomas, flying the flag of Vice-Admiral Lord Charles Beresford, made an astonishing record with her four 12-in. guns. Until this competition took place the Ocean held the leading position in the Navy with 17 hits, but the Majestic made 23 hits for 37 rounds. There is no previous record of such rapid and accurate firing in the Navy with the 12-in. gun. firing in the Navy with the 12-in. gun.

The death is announced from Northallerton of Mr. John Pile. More than fifty years since he was noted for building beautiful clipper ships which made record passages to the Far East. Mr. Pile was in partnership with his father, brother, and others at Sunderland and lately at West Hartlepool, where, in association with Mr. Joseph Spence, he had one of the largest yards in the kingdom. It is asserted they built the first steamship admitted to trade in Japanese waters.

The fact that rats play an important part in the The fact that rats play an important part in the spread of disease, more especially the plague, has at length awakened the port sanitary authority on the Thames to a sense of the advisability of attempting the extermination of rats in the docks, warehouses, and on board vessels lying in the docks. During October nearly 6,000 rats have been destroyed, and their bodies burned in ships' furnace.

Even the beginning of the very tentor of the part to the furnaces. From the beginning of the year to the end of September nearly 60,000 were killed. The total for last year reached 185,982, and the number destroyed up to Nov. 20th was 249,718.

The St. Petersburg Viedomosti states that the new Russian battleship Oslyabia, on her way from Kronstadt to the Far East, has been compelled to go into dry dock at Spezia, owing to damage received in the Atlantic some time at night. The precise occasion of the damage was unobserved by

the crew, and it was not until water was found to be increasing in the hold and investigations were made as to the cause of this that the damage was discovered. The ship will not be able to proceed on her journey until the beginning of next year. (Our readers will have already noted the Oslyabia's departure for the Far Fast) departure for the Far East).

Colonel G. A. Crawford, speaking at the annual dimer of the China Association on No6. 17th, remarked that during the five years which he passed in China one learned the difference between "olo custom" and modern improvement. He remember going to a Chinese town and having to inspect the Chinese artillery. The guns were there which were left when the place was evacuated by the British in 1860. They were drawn up for inspection, with a Chinaman in charge, and his words of command were given in broad Irish. The explanation was that when the British left the guns they left also an Irish instructor.

The statements of Engineering, already published, with reference to the British Naval programme, require, apparently, to be somewhat modified. A London paper received by the last mail states that a radical change has just been mail states that a radical change has jour made by the Admiralty in the programme of construction for the present year. The three new struction for the present year. The three new battleships, for which money has been voted by Parliament, are to be of the King Edward type, and not, as was originally intended, of a larger and more powerful pattern. Thus the new ships will carry four fewer 9.2 in. guns and steam half a knot less than was originally intended. The change may have been due to the fact that there were not sufficient docks of a size to take the new ships as originally designed, but as the result of it vessels are to be built which are weaker than the new Russian battleships. These are to be of 16,500 tons, steaming nineteen knots, and armed with four 12 in. and twelve 8 in guns. The names of the new British ships will be the Africa, Hibernia, and Britunnia. They will be built at the three dockyards, and not, as was intended, by

A recent publication issued by the German General Staff on experiences in non-European wars in recent times deals with General Buller's campaign to Colenso, and that of General Methuen to Magersfontein. The opinion is ex-pressed that General Buller's failure at Colenso ras due to bad leadership, and that General Buller, although brave, was personally defeated through the disaster which befel two of his batteries, being from that moment haunted with the sole idea of preventing his guns falling into the enemy's hands. The report continues:— General Buller's initiative failed him, and he ordered the retreat because he was unable to see any outlet. His troops, however, were not beaten, and the possibility of victory still existed." The work characterises Lord Methuen's leadership at Magerssontein as dogged. It showed, it is added, that he held persistently to the old notions about frontal attacks, but he proved himself a thoughtful leader, who was prepared for battle, and was not disheartened by minor failures. He rightly decided to continue the fight after the

and all I will try to do is simply to write down a few things which I have learned myself from experience.

Football in becoming such a complicated science now that by the time a man has learned the game

he has lost the power to play it, and that must be my excuse for trying to teach you here what you would learn far better for yourselves on the football field.

It is both logical and convenient to start with training. When training one should either play or run every day, but be very careful not to overdo it. Do not play too long or run too hard; once you are fit very little will suffice to keep you right, and it is far better to be undetrrained than overtrained. if very little will suffice to keep you right, and is far better to be undertrained than overtrained. Training with regard to food is quite absurd. Light exercise every day and heaps of sleep at night is the ideal prescription for those who can afford to take it. When training, punting into touch should be carefully practised. I should advise some twenty kicks with each foot every day, taking great care not to "press"; accuracy in far better than length. If you do not fall into the temptation to try for huge kicks you will develop into a most consistent and useful punter with either foot.

Passing should be practised by the halves and

Passing should be practised by the halves and Passing should be practised by the halves and three-quarters starting close together, about four yards apart, with the line inclined rather more towards the goal line than the touch line. I believe the system of going through and not round the defence is the best, for an elementary knowledge of geometry will allow a wing three-quarter to stand in a position to cut off the opposing wing who tries to run round him. By our method of arranging three-quarters it is easy for the three-quarter nearest the scrummage, after receiving the ball and passing it on to his centre, to cross right over and act as a wing quarters it is easy for the three-quarter nearest the scrummage, after receiving the ball and passing it on to his centre, to cross right over and act as a wing on the far side of the field. If every one runs straight this is comparatively simple, and it is terribly deadly. All this has to be carefully rehearsed before. Only the power to practise daily together allows of the possibility of real back play. Passing should be done low and sharp, and well in front of the receiver, so that he must go at full speed to take the ball. Besides this practice, the halves should practise by themselves passing out from the scrum. It is really best for the same half always to take the base of the scrum, and the other always to stand back and hand on to his three-quarters. With practice it is simply wonderful how quickly this can be done, and quickness is all-important. The half standing back should either pass immediately or not till he has broken right through. To try and draw men and then pass is for him a mistake. If he gets through he should find his three-quarters ready, and if they are all on one side of him (as they generally will be) his fellowhalf should be on the other, so that he has a choice of sides to pass to. The half at the base of the scrum must learn to pick up and pass in one motion. A second's unnecessary delay robs his three-quarters of most of their opportunities. Quickness here is really more important than accuracy. An occasional bad pass is not so harmful as constant, though slight, slowness.

Now the ball has got to the three-quarters and

slowness.

Now the ball has got to the three-quarters, and we must consider the nature of our attack. It is often useful to start by trying to crash through. The wing three-quarter, on getting the ball from his half, should rush between two of the opposing three-quarters. Do not hesitate or pass; go straight and hard. You may get through; most probably you will not. Try once again. Twice is usually enough. Then you observe your opponents backs bunching in near the scrum to make certain you will not get through. This is your opportunity. Throw out your three-quarters right across the field, pass the ball like lightning to the far wing (each three-quarter passing immediately he gets the ball), and he has an easy try. If pressing on your opponents line, it is sometimes useful to take out a heavy forward, pass him the ball, and let him crash head down for the line. If he can only get under way he is a horrid awkward times useful to take out a heavy forward, pass him to the fight after the repulse of the Highlanders, but his methods of execution were faulty. The report maintains that the English frontal attacks, both at Colenso and Magersfontein, might have succeeded if the leaders had not felt that they were physically defeated. The moral drawn is that every new war opens with surprises, rendering a change in offensive methods necessary.

BEHIND THE SCRUM.

Crabbie (the Scottish International three-quarter) and an advanced the fact that they must run straight. And the head the head the head three quarter line, who above all have mastered the fact that they must run straight. And the head three quarter in the base of the sound and well trained three-quarters is no doubt it is not the same opportunity for originality, nor the sound and well trained three-quarter ine, who above all have mastered the fact that they must run straight, which we have should immediately come up to a limit were publish it in the hope that every member of the interport teams will read it carefully:

There is certainly no spac

be able to land the ball off a short kick exactly where you please. If you can only gain and use this power, you will provide your side and yourself with heaps of

be able to land the ball off a short kick exactly where you please. If you can only gain and use this power, you will provide your side and yourself with heaps of chances, and be amply repaid for any trouble you may have spent in practice. There is a very neat drop goal that is sometimes useful. Make one of your centre three-quarters learn to drop goals from straight in front with comparative certainty. When you are pressing near goal, make him stand behind the half standing back. The half at the base of the scrum throws the ball out, not to his fellow-half, but right behind him to the three-quarter. The half who was standing back rushes forward, as he would do were he receiving the pass, and so distracts the attention of his opponents, and allows the three-quarter plenty time to drop his goal.

A wing three-quarter may often get round a man by judiciously varying his pace. I often wonder why nore centre three-quarters, who run up to a man and then pass to their wing, do not realise that their opponent far too frequently has time to tackle the wing. It is usually not very difficult to make a centre pass and then catch his wing, and this surely should not be. The remedy is quite simple, and we find it from watching Arthur Gould, Gwyn Nicolls, or E. M. Baker, but no one else I have seen. The centre when he runs up to the man should turn so as to pass him on the far side from his wing; his opponent turns too, and then the pass is given, and the wing, even though he be slow has time to get away. If a wing be fast of course the ordinary pass is usually enough, but there are many occasions when, for instance, a slow forward might score if the back were properly drawn away from him. Centre three-quarters should under nearly all conditions keep their places. They are the back bone of the defence. It is too dangerous for them to leave their places and open a gap for the opposition. The wing three-quarters should, I am quite sure, not be, as it were, fastened to a touch line as some people seem to imagine. He must rove; remain on his own side of the field and only do the work providence and a kind centre sends him is not playing the game. He must be always ready to take a pass from his centre, and so should not wander so much when his side are attacking. Once the ball is out of the scrum a smart wing should see where he is most needed, and when he can safely leave his post and go and help. To see a wing stand and shiver because he gets no passes, while his centres are working like Trojans in defence, is one of the surest proofs of incompetency. Truly it is sad to see a wing being looked on as a mere sprinter, allowed occasionally to score, and kept entirely for that purpose; there is always heaps of work and only too few men to do it, why not let him try to help?—wing three-quarters have sometimes brains, and can sometimes think like other people.

There is a class of three-quarters who seem to

sometimes think like other people.

There is a class of three-quarters who seem to think it a matter of indifference which line they cross, and make for the touch line as the longer and easier to reach with unfailing regularity. Some of them, I fancy, regard it as a sont of haven of refuge. Backs must learn to go straight, to run across is only wasting time and space; you crowd your men into touch and allow your engogenest time to get ready their defence. time and space; you crowd your men into touch and allow your opponents time to get ready their detence. Yon should always watch when it is your touch and see whether it is worth while to bounce the ball out yourself; this is often of immense service. Stand with both feet in touch, bounce the ball out and catch it with both feet out of touch. It is a little difficult to do at first; perhaps it is easier to run in a semi-circle out from touch and catch the all ugain facing your

In the past the all-important question in Rugby football was to prevent the other side scoring; now we have learned to place more importance on scoring ourselves. And the duties and qualifications of a full-back have changed with the style of play. Formerly if a back was a safe tackle and good kick he was considered to be fully fitted for his position; now we are learning, and our teachers hail from Wales, that a back can be a most aggressive person, and we are constantly being shown how he can win matches for his side instead of only saving a defeat. There is quite a prejudice against Welsh full-back play out of Wales. It is unsound, not safe, too risky, so the critics says. I suppose they will learn in time that the man who regularly kicks into touch whenever and wherever he gets the ball is not a football player.

The first duty of a back is to learn to kick with Tackling is an art that can only be learned by experience. There are so many different ways of tackling that it is impossible to lay down any rule about it; usually, however, the best place is the hips. If you go at a man there hard, you not only bring him down, but stand a very good chance of spoiling any attempt he may make at passing. A back's kicking should not be always into touch; if there be any strength of wind behind it only very seldom finds touch. He must learn to land his kicks where they are of most use to his side. Above all he should run often. He is fresh, and should use his freshness to tire out his opponents. As Arthur Gould showed the football world how to play three-quarter, a full-back will some day come and teach us how a back should play, how his position is infinitely the best for attack as well as defence. He has boundless opportunities feet and to know when and how to tackle.

will some day come and teach us how a back should play, how his position is infinitely the best for attack as well as defence. He has boundless opportunities for originality. There has never yet been a full-back who could use them adequately.

A full-back, along with all the players behind the scrum, should learn and cultivate the art of nursing forwards. I am quie sure this is far too much neglected. It is impossible for forwards to go hard the whole time against anything of an opposition at all. If the backs do not give them opportunities for rest, they will take their rest without the opportunity, and so are matches lost. When you see your forwards tiring, getting bit done up and inclined to easy, then give them a rest; let them heel at once and let the halves punt well into touch, take the line out with the almost inevitable consequence, a scrum, heel, again and punt for touch; after you do this once or twice you will find the fire and dash is out of the opposition, and your refreshed forwards can meet them on equal terms again. All forward sides need nursing occasionally. They do not know it; you will never get their gratitude. An ordinary forward is an unthinking animal who shoves.

You must remember always that what you are playing against is not a machine, but a team of men with like massions to vourselves. If you can only

of methods.

The usual plans of a captain consist in the commands "let it out" or "keep it tight." To do either of these consistently without thought is wrong. Your opponents know what you are trying to do, and that knowledge is a useful asset for them. You must, watch and plan. Think all the time and think quickly. If you are good behind you should certainly heef a lot, and do not have any hard scrums until you have made the opposing forwards chase your backs all over the field; then is your forward's chance; make your effort forward; if you cannot hold them nothing is lost save a yard or two, use your backs again, but if you do beat them, shove them, rush them, they will almost certainly lose heart. Your backs have been running all over the field, your forwards now carry the scrums, your opposition crumples up, and the rest is not football. Remember when playing against a strong forward side who trust in their forwards and keep it consistently tight, your opportunity is bound to come. There is always trust in their forwards and keep it consistently tight, your opportunity is bound to come. There is always a sort of fatal five minutes during which your forwards get possession and heel; then is your chance. This time often comes early in the second half. It comes suddenly but none the less surely. If your forwards will only stick to it and not be routed, you can promise them a score in due time. If you are stronger forward you must be careful not to make stronger forwards do too much; give them intervals during which you let them rest. Do not be too frightened to let your three-quarters try a passing run occasionally; they will never learn unless you let them try, and anything they do always gives the opposition some running about.

I will conclude with the simple advice: Play to

the whistle, and above all play the game. A half may put the ball into the scrum so that his forwards A half nearly always get it; any back may tackle a man when he knew he has passed or has kicked, or hold him when he knows he in dribbling, and do a thou-sand other little acts of unfairness, which no referee sand other little acts of unfarmess, which no recree can stop, and which most unfortunately pay. This possibility of fraud is in one way m safeguard, for it means that Rugby football can never be played as it should be played by those who play it not for sport but for hire. J. E. Crabbin.

CORRESPONDENCE.

BUDDHISM IN JAPAN.

To the Editor of the "Japan Mail."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR.—Perhaps you will allow me to call attention to what I think is an important and very misleading confusion of thought in the exceptionally interesting and valuable review of Vols. V and VI of Captain Brinkley's book published in the Japan Mail of Friday, Dec. 18. The passage on which I wish to comment is the following:—

"If in giving an account of Buddhism Captain Brinkley has omitted to dwell at any great length on the extreme pessimism that characterizes its teaching, it is probably because he sees abundant evidences in the lives lived by the Japanese and in their writings

it is probably because he sees abundant evidences in the lives lived by the Japanese and in their writings that this pessimism has exercised no baneful influence in these sunny isles whatever it may have done elsewhere. The Japanese people are essentially lighthearted. Smiles greet one everywhere. By some Occidentals optimism is said to be the result of Christian teaching. With a Japanese it is part of his original nature. He lives and dies with a light heart." (The italics are mine).

Now this, so far as it describes the character of the Japanese, seems to be very true and well said, though

Japanese, seems to be very true and well said, though there are those who tell us that beneath the joyousness there is a deep strain of melancholy in many of the there is a deep strain of this the long series of suicides at the Regon Fall are an evidence most illustrative of Japanese character. Those young men of promise certainly did not "die with a light heart." They all too carelessly and selfishly threw away lives, the preservation of which would have been valuable to their families and their country, and they did so from their tamilies and their country, and they did so from a pessimistic despair of disentangling themselves from their intellectual and moral puzzles. Had they been Christians of course they would have seen ahead of them a duty to live, and a duty and a hope worth living for. But there certainly was no 'lightheartedness' in their very characteristic Japanese acts and sentiments.

My quarrel with the passage quoted however has special reference to the sentences italicized. Here the 'optimism' as an admired ingredient in Japanese character is pretty and nice so far as it goes, but it has in it nothing more moral or noble or inspiring to worthy deeds than the delightful mirth of little birds. It is of the 'what's the odds so long as you are happy' type, though without its vulgarity; to which it must be added that the desire to be exclusive.

are happy 'type, though without its 'ungarity'; to which it must be added that the desire to be exclusive in enjoyment seems to be absent. They like to be happy in a happy world.

So far so good; but why is Christian optimism dragged in, for what in the world has this natural chirpiness to do with any 'optimism' which 'is the result of Christian teaching.' Christian optimism does not mean that we live in a good world, but in a world fuller of evil than even Buddhist pessimism conceives, for Buddhism has never felt what the depth of evil is when recognised as sin. Yet it is a world in which the evil for a Christian can and shall and will be overcome by good. The belief in a holy and loving as well as infinite God and in His gift of Himself as a Saviour and example and as a source of power to those who will trust and use Him makes Christianity indominably optimistic, for how can the ultimate victory be elsewhere than with God our Father? Christian optimism goes even beyond this, for it recognizes that those (Christian and non-Christian alike, though Christians have the advantage for these leaves the size of their consideracy who lives. tian alike, though Christians have the advantage for tian alike, though Christians have the advantage for they know the reason of their confidence) who live carnest self denying lives in the service of God and man are 'workers with God' in bringing about this final victory. With such a hope as this life is indeed worth living in all strenuousness, and through all consended love and strenus.

leaves room for the free will of a God infinite in leaves room for the free will of a God infinite in holiness, wisdom and power. The Japanese are capable of such inspiring faith and aspiration, though their natural light heartedness too often leads them to play with life; and the Confucian education of centuries with its wonderful matter-of-fact morality. of centuries with its wonderful matter-of-fact morality, and its deliberate damping down of all aspiration and enthusiasm, which has kept China unprogressively alive for some 2,000 years, has not yet quite loosed its hold so as to set the Japanese free for nobler heights of aspiration and achievement than were possible without the ideals and spiritual forces offered them in the religion of Jesus Christ.

WILLIAM AWDRY, Bishop.

Kobe, December 18, 1903.

A SUGGESTION FOR W. E. G.

TO THE EDITOR OF THE "JAPAN MAIL." SIR,—No one can help but be interested in the oc-casional letters from the United States indited by your correspondent W. E. G.

It is certainly remarkable the vogue that his pub-

It is certainly remarkance the vogue that his pour-lications and lectures in regard to this empire enjoy even at the present. Since the "Mikado's Empire" seems foreordained to be widely read, it is a satisfac-tion to learn that it has been brought down to the

tion to learn that it has been brought down to the present, and at least in part re-written.

At the same time one cannot help but regret, that in view of the fact that travel is becoming every year more easy, and the income from book-writing and lecturing, as a side-issue to preaching, cannot be insignificant, that one who seems destined to stand so prominently in the public eye as spokesman for Japan, does not re-visit the country, and investigation at feat hand

lor Japan, does not re-visit the country, and investigate its present conditions at first hand.

No doubt a man can learn much about Japan's
development at long range and from publications.
But it would be a great satisfaction if the man who
makes such positive prophecies as does W.E.G. at
the close of his recent communication (we presume
that it is W.E.G. that answered the editor of the Outook) had more recently been in personal touch with

Japan and its people.

Japan and its people.

And this is said without raising at all the question of the correctness of his prophecy.

SOJOURNER.

Saga, December 26th, 1903.

THE OLD YEAR DIES.

The Old Year dies to-night. One page more turned

In this ill-written transcript called my life. Such a queer book! with syntax all awry And phrases bungled. Scarce a hint of plot, A gleam of purpose! Yet I write the book. But there's the point—am I the author here, Or just Amanuensis, not to blame Save for the blots and faults i' the spelling? But how if there were times I listened ill To the dictating voice, wrote carelessly, And made God's story nonsense by my fault? Well, here's a fresh page—clear for noble words To range themselves in order as God wills. Take pen! square elbows! we'll do better here. It may be God shall whisper poetry. F. E. W.

TELEGRAMS.

Some English newspapers are urging the Government to unhesitatingly draw the sword for Japan if war breaks out, but the majority recommend calm and extreme watchfulness.

(RECEIVED AT THE LEGATION OF FRANCE') FRANCO-ITALIAN ARBITRATION CONVENTION.

Saigon, December 27 M.M. Delcassé and Tornielli (Italian Ambassador in Paris) signed to-day an arbitration convention of which the terms arbitration convention of which the terms Russia is ready to make concessions and to conare absolutely identical with those of the tinue the negotiations. The reports concerning Anglo-French Convention of October 14th.

DREYFUS AFFAIR.

The Revision Commission of the Dreyfus affair have unanimously pronounced in favour of entertaining the demand of ex-Captain Dreyfus.

FRENCH NAVAL EXPENDITURES.

The Senate has voted the naval budget. On the demand of the Minister of Marine, M. Pelletan, the Senate increased certain credits which had been reduced by the Budget Committee, notably those for the

Fleet's points d'appui in Tonkin. FRANCE AND THE FAR EASTERN SITUATION.

Saigon, December 28.

Japan has sent to St. Petersburg an answer couched in friendly terms, which leave the road open for new negotiations. The Senate has voted the budgets of

Finance and of Foreign Affairs.

M. Delcassé celebrates the Franco-Russian Alliance and congratulates himself upon the Arbitration Conventions between France and England and France and Italy. He declares that France desires the independence of Morocco. He declares that France With regard to the Far East he affirms that nothing permits him to believe in the alarmist news published daily by the press.

(From the " Deutsche Japan-Post." A FALSE REPORT.

Berlin, December 24 The statement of the Vienna paper, Neue Freie Presse, that the German Emperor at his interview at Wiesbaden promised the Tsar to help him in a war against Japan, is a mere invention. The German policy continues to be strongly neutral and wisl es nothing else than the maintain-

THE SITUATION.

Berlin, December 25.

According to a telegram from the Russian Commercial Telegraph Bureau, Japan's reply to the Russian Note has arrived in St. Petersburg. It is generally believed that the pending negotia-tions will not be interrupted, both sides observing

a peaceful attitude.

The Cologue Gazette reports that the Grand-duke Alexander Michailowitsch together with

that Russia is meeting Japan in regard to Korea, Russia has ordered one million pounds of safeguards against any seizures by Russia in the

The Government in Berlin does not share the pessimistic views of the Anglo-French press DEATHS OF WELL-KNOWN MEN.

Berlin, December 28th.

The Italian politician, Guiseppe Zanardelli, has died of cancer of the stomach. (He was born in 1829 and on several occasions was Minister, President of the Cabinet, President of the Parliament, etc.)

From Stuttgart comes the news that the political economist Schaeffle has died from a disease of the kidneys. He was 72 years old.

THE SITUATION.

Berlin, December 29.

In contrast to the English press, English states-men continue hoping for a peaceful settlement of the difficulties pending between Russia and Japan. M. Delcassé, the French Minister of Foreign Affairs, has also expressed his views on the situation in a quieting tone, which views are in conformity with those of the German Government. In spite of all alarming reports, the confidence placed in the Japanese Government is unshaken. Russian Ioan in Berlin are untrue. is not following any special policy with Russia in Eastern Asia.

THE TSARINA.

The health of the Tsarina is the best possible, DEATH OF A NOTED GERMAN. His Excellency Perels, Director of the Imperial

Marine Bureau in Berlin, is dead.

(FROM ТИВ " ЈІЛ ЅНІМРО.") THE RUSSIAN ATTITUDE.

London, December 26.
It is believed in Berlin that Russia has decided to recede from the extreme attitude which she adopted in her first reply to Japan.

THE "VETTOR PISANI."

The Italian warship Vettor Pisani has been ordered to remain at Nagasaki.

THE DREYFUS CASE.

The committee revising the case have presented to the Government their recommendation in grant the petition of Dreyfus.

(FROM THE "ASAHI SHIMBUN.") THE MACEDONIAN REFORMS.

London, December 29.
With regard to the proposed Macedonian reforms, the representatives of Russia and Austria have presented an urgent note to the Porte.

YOKOHAMA: SATURDAY, JANUARY 9TH, 1904.

On the 6th January, at No. 64 Bluff, Yokohama, the wife of H. C. PIGOTT, of a Daughter.

SUMMARY OF NEWS.

THE Wakamaisu theatre, Wakamatsu city, has been destroyed.

MR. K. MAKI, an official of the Choshi Tax Bureau, Chiba prefecture, attempted to commit suicide on Jan. 2nd.

Owing to frost a goods train was detailed on Jan. 3rd at a point near Sekiyama station, Nagano prefecture. One coolie was severely injured.

DURING the year 1903, forty-six cases of plague appeared in Yokohama. Seven recovered. The number of rats caught is put at 470,958.

Tokyo papers state that the Japanese Government on Dec. 29th informed the treaty powers that Japan recognizes the independence of the Panama Republic.

capitals of ven 8,849,700. Of this sum, yen 1,170,675 was paid up.

THE directors of the Osaka Shosen Kaisha met on Jan. 6th and decided provisionally to pay an interim dividend for the last half-year at the rate

A TELEGRAM from the King of Belgium with New Year's wishes reached the Japanese Court on January 2nd. The Emperor and Empress replied the same day.

According to the Asahi the Government borrowed yen 3,000,000 from the Bank of Japanduring the week ended Dec. 26th and yen 8,000,000 in the following week.

BARON J. HOSOKAWA has been ordered to take charge temporarily as President of the Peers' School, which post had been filled by the late Prince Konoye.

PRELIMINARIES have been arranged between the French and Spanish Governments relative to a visit of the King of Spain to Paris, to take place probably in the spring.

THE Cotton Spinners' Union of Osaka, received on Jan. 4th a telegram from Bombay to the effect that spinners were reducing their output and some mills have stopped.

THE Emperor on Jan. 4th gave yen 5,000 to the family of the late Prince Konoye toward the funeral expenses. He also sent two pieces of white silk the following day.

THE Japanese Consul at Lyons telegraphed on Dec. 28th that the strike of workmen employed by the weaving factories has been settled, and the people have returned to work.

SEVERAL telegrams dated Jan. 5th report that owing to heavy snow, trains throughout the San-yendo provinces were suspended. At several points on the Gifu railway damage was done.

A MAN named Kunimoto, manager of the Kanazawa branch of the Konoike Bank, Osaka, was arrested on Jan. 2nd on a charge of having obtained yen 1,200 from the Meiji Bank by frand.

THE new warship Niitaka, which was launched on Nov. 15th last year at the Yokohama Dock-yard, and which recently completed her equipment, performed a trial trip on Dec. 28th which proved

THE dwelling of T. Mori, a wealthy farmer living at the village of Okagawa near Ota, Yokohama, was entered by four armed men early on the morning of Dec. 30th. He was robbed of over yen 60 and some articles.

THE death is approunced in Kobe of Mr. H. B. Lucas, who has been connected with the British Consulate there for many years as Shipping Master. Death was due to apoplexy, the end coming on Monday night.

N. Sekimoto, a student of the Formosan Lan-guage School, Tokyo, committed suicide on the night of Dec. 30th by cutting his throat with a knife. The cause is set down to temporary insanity. He was suffering from kakke (beriberi).

cooliz attempted to murder a sendo by stabbing him with a fish-knife in a boat in the canal near Matsukage-cho, Yokohama, on Dec. 31st. The culprit was arrested. The cause is reported to be a gambling dispute.

ing to 902,312, or 15.61 per 1,000, compared with 15.09 in 1901 and 14.63, the average for

The Emperor on Jan. 5th ordered the Minister of State for Foreign Affairs to convey his sympathy to the President of the United States, through Mr. Takahira, the Japanese Minister at Washington, with regard to the Chicago disaster.

THE Japanese Minister at Vienna telegraphs that the Emperor of Austria sustained a slight injury to his face by falling down in his room. The Emperor of Japan sent a telegram on Jan. and to the Austrian Court sympathizing with the

The steamer Manchuria of the East China Railway Company which is now at Nagasaki to undergo repairs, hesitates to enter the dock. The Asahi reports that she will be chartered by the Russian Navy as a transport.

THERE is a growing dissatisfaction in the Transvaal at the extravagance of the Government. As an instance it is pointed out that education costs 12s. 6d. per child, as compared with 5s. in the Orange River Colony and 10d. at Capetown.

THE Asahi states that the steamer Chivoda Maru left Muroran on Dec. 28th for Chemulpo with 22,000 sleepers, to be used in the construc-tion of the Seoul-Fusan milway. The steamer Kithisho Maru is reported to be shipping sleepers for the same purpose

A TELEGRAM from Aomori announces that owing to a snow storm, the steamer 1st Ominato Marn, belonging to the Ominato Torpedo barracks, went ashore on Dec. 31st off Nobechi, causing severe damage to her hull. She is not yet re-

THREE employers of the Matsumoto Shimbun, two of the filsupyo Shimpo, and all in the office of the periodical Nanshin Hyoron, Nagano prefecture, were arrested on Dec. 30th. The charge against them is reported by the fiji to be that of obtaining money by menaces.

Tokyo papers report that the Bank of Japan has sustained a loss of yen 30,000 through the carelessness of the cashiers in paying the proceeds of a cheque drawn by the Shinano Bank on the Bank of Japan in favour of the Asakusa Bank, to a different man to the one who presented it for

FRAU FISCHER, a lion tamer, was torn to pieces in the town of Dessau, on Dec. 7th by four lions in a menagerie cage and in sight of a great crowd. She was trying to make a lion spring through a hoop, and struck him with a whip, whereupon he leaped upon her. There was a panic among the spectators, and many persons were injured.

K. OKADA, a farmer, at the village of Tanidzuka, Saitama Prefecture, beat to death his son aged 26 years on Jan. 2nd with a mallet. The farmer had quarrelled with the son who was of dissolute habits, and on the latter retorting the father, who was greatly excited, struck him, murderer was arrested on the following day,

K. Matsumoro, chief sendo of a ferry steamer plying between Moto-benten, Yokohama, and Kanagawa, was murdered on the night of Jan. 3rd in the house of one of the employees of the Yokohama Ferry Steamer Company, Matsukage-cho, being stabbed on the breast and in other parts with swords by a man named Masuda and three other men employed by the company. The murderer save themselves up to the Kotobuki-Panama Republic.

The growth of the population of Germany in murderers gave themselves up to the KotobukiTokkyo papers announce that 126 mercantile 1202, regarding which statistics have just been cho police. The cause is said to be that the occupanies were established this year with total tabulated, was the greatest ever known, amountvictim had ill-treated Masuda.

FOREIGN POLITICS.

Monday, January 4.
The Nichi Nichi Shimbun's Peking correspondent telegraphs on avowedly good authority that Russia has conveyed an important message to the Chinese Government. Its sense is that since Japan insists on pursuing a policy of unwarrantable interference in the affair of Manchuria, Russia sees no recourse except an appeal to the sword. China, however, may rest assured that her integrity will be respected by Russia, and that even though it should be necessary for the latter to temporarily occupy Peking, or to take momentary possession of other parts of Chinese territory, no apprehension need be felt, since all places thus occupied will be subsequently restored. Therefore China is advised to maintain an attitude of strict neutrality as most conducive to her interests.

We are inclined to suspect that the compiler of this piece of information is some thing of a wag. Certainly he ascribes to Russia statements which sound quite am-using in her mouth. The idea that if China keeps quiet nothing worse will happen to her than the military occupation of her capital by a foreign Power-her capital having no possible or conceivable connexion with the matter in dispute—, and the further idea that Russian occupations of an Oriental State's territories may be regarded as innocent performances, destined to be of the briefest duration and intended for the kindly purpose of preserving the territorial integrity of the State concerned, these two ideas go well in double harness. The Nichi Nichi's Peking correspondent had not previously shown himself in the character of jester.

From the Iiii Shimpo's Peking correspondent comes an account of a report said to have been made by Fu Yu-fen to Prince Ching after the former's return recently from Port Arthur. Fu said that Viceroy Alexieff took him to see the fortifications and the naval squadron at Port Arthur, and showing him 62 war-ships lying in the harbour and to keeping watch outside, insisted on the helplessness of Japan in face of such a force and of the thorough preparedness of Russia. The Viceroy's staff-officers also told Fu that it was quite obvious that Japan dared not encounter Russia at sea. That fact was more than sufficiently established by the attitude of the Tokyo Government towards Russia's explicit rejection of its demands. Instead of vehemently resenting such rejection, as a Power prepared to assert itself by force must surely have done, Japan had humbly asked Russia to reconsider her resolve. After that there could be no doubt that Japan was without heart to fight. Therefore it was plainly to China's interests to join hands with Russia and thus finally to check Japan's injurious presump-tion. It is added that the Viceroy's Chief of Staff assured Fu Yu-fen that if China would send an Imperial Prince, or other duly accredited envoy, to Port Arthur, the Manchurian question could be easily settled. The Viceroy himself explained that so long! satisfactory solution of the situation.

There is a striking difference between the interpretation given of Russia's attitude instincts which now unhappily sway its own towards Japan by publicists friendly to the rulers, is not surprising. But that it should former in St. Petersburg, Berlin and Paris, expect unconcerned onlookers to be deceived and the interpretation given to it by Russian by such shallow pretences is too silly. staff-officers at Port Arthur, according to the lit is worth noting that now for the first fiji's correspondent. The European pubtime the Nichi Nichi Shimbun departs from licists represent Russia as behaving with the its long-continued attitude of studious optiutmost moderation and making concessions mism, and declares positively that the time hundred American marines-

Port Arthur officers represent her as taking a line which Japan, had she any heart for battle, must resent in the most determined manner. Without discussing which version is correct, we note their serious discrepancy. Of course a considerable discount must be allowed on account of the triple transmission of Fu Yu-fen's news.

The same correspondent says that a dis-tinguished English staff-officer who recently arrived in Peking by the Siberian Railway describes the state of the line as most defective. Even in time of peace, he affirms, the line is plainly ill-organized and wanting in many essentials. It would be of compara-tively little use for war purposes. He adds that he found the Russians everywhere convinced of Japan's determination not to fight, and everywhere declaring that to draw the sword would mean ruin for her.

The Peking correspondent of the Nicks Nichi Shimbun, telegraphing under date of the 2nd instant, alleges that Japan has asked China to maintain neutrality in the Japan. His country—so the communica-tion is said to run—wishes to fight its own battles without involving other Powers.

It will be observed that, according to rumour, Russia and Japan have thus adopted the same tone towards China. Both wish her to maintain strict neutrality. There is, how-ever, the difference that Russia accompanies her request with an intimation that China's compliance will secure for her the preservation of her Sovereignty in Liaotung.

Our contemporary's correspondent adds that with the exception of one or two officials who may be called Russia's creatures, no influential member of the Chinese Government places any reliance in Russia's assurances.

Commenting on this news, the Nichi Nichi invites attention to the convincing practical proof thus furnished of the extravagance of the accusation advanced by anti-Japanese publicists that this country aims at becoming the leader of a league of the yellow races There is no question whatever of race in this matter, says our contemporary. simply obeys the dictates of self-protection. She has no aggressive, imperial or racial ambitions. What she thinks of is her own

having noted that a tendency exists in some quarters of France to deny the extensibility of the Franco-Russian alliance to the Far East, goes on to declare that Japan enter-tains aggressive designs against France's Indo-Chinese possessions, and to incite the French to seize Formosa should war break

That is certainly a contemptible conten-tion, not in the least calculated to appeal to French sentiment. Russia and Russia alone is the aggressor in East Asia. It is for the gratification of Russia's ambitious designs that the Orient has been kept for three as China preferred Japan's friendship to that years in a state of suspense not unlikely to of Russia, there could be no such thing as a be now exchanged for one of actual war. That the Novoe Vremya should suspects other countries of being animated by the aggressive

of a markedly conciliatory character. The has come to present an ultimatum to Russia. The Tokyo journal still insists on what must be evident to everyone, namely, that the complication might be resolved peacefully in a moment did Russia show any sincere wish for peace. She is not asked to do anything except what she has repeatedly and publicly pledged herself to do. Even at this moment when her obstinately intractable attitude has brought about a dangerous crisis, she does not hesitate to assure the Chinese Government of her intention to preserve Liaotung for it. That is all she has to do: she need only give effect to that assurance. Instead of doing so, she is hurrying her ships and her troops to the regions which she pretends to be desirous of evacuating. There has seldom been such a flagrant contrast between word and deed. Japan would be justified, amply justified, in going to war at once. But in deference to the courtesies of international intercourse she should address one more remonstrance to Russia. Such is the Nichi Nichi's present view.

It is stated that the Second Division,

whose headquarters are in Sendai, has been placed under orders to hold itself in readiness for a winter campaign, and that its staff are

busily engaged making preparations.

Marquis Ito remains at Oiso, where he is visited from time to time by the leading members of the Cabinet,

Tuesday, January 5. It is evident from the varied nature of the reports in circulation that no one outside the inner circle of statesmen knows what is contemplated. Some say that Russia's reply will not be awaited beyond a certain limit of time; other allege that if it do not arrive soon, a limit of time will be fixed; others again declare that there has already been an ample interval for St. Petersburg to answer, and that Japan is now free to take her own course. But what that course will be even supposing Russia's answer to be unfavourable, there appears to be no definite idea. Naturally the authorities guard the secret. One of two lines is open; namely, either to declare war at once, or merely to take active steps for securing Japan's vital interests in Korea. It is idle to safety.

A telegram from London to the Jiji the Novoe Vrenya. The Russian journal, having noted that a tendency exists in any local partner. Yet a very little consiliration. speculate which of the two routes will be partner. Yet a very little conciliation on her side would probably turn the scale in the direction of peace.

Unpleasant comments are made by Japanese journals on the persistent attempts of the Berlin press to create an impression that the situation is not really critical, to throw doubts on Japan's intention of fighting and to suggest that her military and naval preparations are merely by way of bluff. One Tokyo journal applies to all this a penal-law term indicating "interested fabrication," and observes that Berlin publicists must be quite well aware of the delusive character of their own representa-

On the other hand it is noted with gratitude that the tone of the Italian press is favourable to Japan, and that Italy sympathises with this country's cause.

Wednesday, January 6. From Vladivostock comes news that the Russian war-ships there are busily making preparations for eventualities.

A telegram from Chemulpo says that a

hundred and fifty-have landed at Chemulpo mistake to regard a rupture between Japan Reuter's obviously silly message, no allufor the protection of American life and

The fiji Shimpo has a message from London saying that a party of Japanese sailors who entered the city received a very demonstrative welcome from the populace, and that the Japanese Legation testifies much satisfaction at this unofficial display of sympathy on the part of Japan's ally.

From Odessa it is reported that in view of the extensive preparations carried on there by the military and naval authorities, the people place no reliance in the optimistic statements emanating from St. Petersburg.

The Jiji Shimpo continues to write in a strong strain. It declares that no demon-stration is needed to show that the responsibility for the present situation rests with Russia. Had the same series of events occurred between any two European Powers, severed. But Japan has exercised the greatest possible patience. It is only by her earnest desire to preserve the peace that an open rupture has been hitherto avoided. She can no longer maintain an attitude of waiting on the convenience of a Power which deliberately postpones a friendly settlement the while it makes vigorous preparations for

The Kokumin takes much the same line. It says that there are limits to patience, and that a country can not sacrifice its vital interests on the altar of long-suffering. An interesting assertion is made by this journal, namely, that at the outset Japan approached Russia with reference to the Manchurian problem alone, and that Russia replied by introducing the Korean question. That was little short of an insult. And it became an absolute insult when Russia's manner of treating the Korean question took the form of an equal partition of influence in the peninsula. Japan can bear a great deal in the cause of peace. She bore even that, hoping always for friendly adjustment. But she can not bear to have a sword flourished in her face. It has now become a matter of life and death, and she means to strike for her life. There have been publicists who argued in favour of an exchange between Manchuria and Korea. Such persons forget that Korea is already within the sphere of Japan's question for Japan, the question of Korea. influence, and that no occasion exists to Japan will treat it as a life-and-death quesdiscuss that matter with Russia. The fact tion. As for the "Powers" to whom the settled without serious difficulty, the Korean press has problem is vital, and she can not entertain any proposal for a settlement of it on lines which would threaten her own integrity. Thus Russia, approached by this country with regard to a matter offering an ample margin for amicable adjustment, replied by dragging into the discussion a question which offers no margin at all. Were northern Korea internationally recognised as Russia's sphere of influence, the extension of that sphere to southern Korea also would be merely a question of time. That is as sure as sunrise and sunset. It is Russia then that has deliberately forced Japan into an

and Russia as inevitable

Three acts recently attributed to French Representatives in the Far East seem to have attracted some attention in Japan. They are the attempt of the Minister in Peking to induce China to close with Russia's terms in the matter of Manchuria; the attempt of the Minister in Seoul to induce Korea to place herself under French protection, and the effort by the same official to prevent the Seoul Government from granting the concession of the Seoul-Wiju Railway to a Japanese syndicate. The Asahi comments on these incidents. It does not consider them of cardinal importance, but it says that in so far as they are intended to promote Russia's purpose against Japan, to precisely that extent must they be regarded as unfriendly to this country.

Russo-Japanese complication. Japan, says assurance that her honour would not be compromised by the resulting settlement, tions. ceased making preparations for war. Japan, on the contrary, has exercised the utmost the face of a steady and rapid development of conditions unfavourable to her interests. Japan, in short, has fully furnished proofs. If Russia now really desire peace, and is prepared to enter a conference for securing it, she must furnish some evidence of sincerity. Such of the sailing of her squadron from Bizerta, one. She is merely manœuvering for more time. The device finds Japan unmoved. St. Petersburg has deliberately imported Powers whose sentiments such a press reflects to be appointed arbiters in this matter?

The Kaiser would be amused if he saw the caricature of himself in the Nichi Nichi Shimbun. His Majesty is represented as the god of the wind, who blows over Europe the optimistic rumours of Russia's pacific purposes-that never materialize.

Friday, January 8.

sion is made to it in the columns of the Tokyo journals, their silence being of course attributable to the fact that the telegram did not reach the capital until the evening, when no time remained for editorial comment.

The fiji has I London telegram to the effect that the terms of Japan's proposals have been semi-officially published in Europe, and that their moderation has astonished every one. Our contemporary makes this the text of an article blaming the Government's circuitous ways, and arguing that since foreign nations have been thus taken into Japan's confidence, the Japanese nation has a right to expect equal consideration. Especially is this the case in existing circumstances. For though diplomatic secrecy is unquestionably useful when negotiations are in actual progress, and when the calm of the council chamber must not be disturbed by the clang Thursday, January 7. of public discussion, that argument ceases to The *Jiji Shimpo* writes in a sarcastic strain have any force after affairs have passed out about the news sent by Reuter that the of the realm of diplomacy and reached Berne Peace Bureau has prepared a method confines of the domain of arms; of public discussion, that argument ceases to morandum urging the Powers to offer when, in short, one side has formulated their services for the settlement of the the irreducible minimum from which it Russo-Japanese complication. Japan, says can not possibly recede. It is time, therethe fift, certainly could not agree to such fore, for the Japanese Government to let the intervention unless she had some people know exactly what has been the nature and what the progress of the negotia-

Russia has plainly shown that she has no desire for peace. All the while that she was nominally conducting negotiations, she never plexed to render any effective judgment in plexed to render any effective judgment in such a case as would be submitted to it were it asked to arbitrate the Far-Eastern problem. patience, waiting quietly and hopefully in For, after all, the basis of the whole complication is Russian aggression. Russia herself is no more competent to control the impulses that drive her forward than a man with the ague is able to prevent his teeth from chattering. She wants a drastic febrimust furnish some evidence of sincerity. Such an evidence would be the withdrawal of the medicine of that kind. Thus the Nippon, ships and troops sent out by her to the Far always consistently chauvinistic. But East since the commencement of the complication. As for the alleged postponement of the sailing of her squadron from Bizerta. everlasting nails into the doors of the temple that is mere child's play: it deceives no of Janus. It is only asked to deal with the immediate issues of a particular situation. Therefore it is not Russia's twentiethcentury imperialism that would puzzle the into this complication what is a life-and-death Hague Court. The real difficulty would be to get Russia into the Court at all. For in her heart of hearts she knows that even the discuss that matter with Russia. The fact tion. As for the "Powers" to whom the best packed body of European jurisconsults is that whereas the Manchurian problem is Berne appeal is to be addressed, who are would of necessity decide against her renot vital for Japan, and might therefore be they? The Japanese know how the Berlin tention of the sovereignty of Manchuria, press has persistently endeavoured to and to surrender that she is not yet prepared, represent Russia as the conciliatory party above all to surrender it under pressure. and Japan as the provocative. Are the We must not forget that unless this fuss and commotion thoroughly loosen Russia's hold upon the Three Provinces, the effect will be just the opposite: the effect will be to tighten it. Every shock she survives makes her throw out a new tentacle. But that would not be the consequence of a hostile judgment by the Hague Tribunal.

The Niroku Shimpo has a telegram from Seoul dated the 6th instant, saying that the It is confidently alleged by some Japanese greatest cordiality of friendship exists bethat has deliberately forced Japan into an insufferable situation.

In the course of an article on the relations between China and Russia, the Nichi Nichi Rosen, who is unhappily confined to the Japanese and United States Legations Shimbun resumes its familiar tone of incon-house by an abscess of the ear, sent a secre- are busily concerting measures of precaution Sharoun resumes its faithful fone of incon-house by an abscess of the ear, sent a secre-are busily concerting measures of precaution clusive argument. The gist of its contentary to inform the Foreign Office of the fact, against any emergency. There is no doubt tion is that Russia does not really want to The result was that Baron Komura proceed that the people of the United States are fight; that she is just as peaceably disposed as any other State; that if only China in the afternoon, and had a long conference America has always been Japan's friend, but would adopt a genuinely resolute attitude with the Russian Representative. We be-recent events have deepened and intensified things might easily be settled, and that it is a lieve that all this is a canard. As for the sentiment to a singular degree.

THE POLICE AND THE FOREIGN PRESS.

This is the first occasion on which the foreign local press has been brought practically under the controlling sway of the Japanese police. It is among the statutes of the Empire that the Government, should it deem such a course essential in the public interests, may temporarily veto the publication of any news relating to the foreign affairs of the country, to the movements of troops or war-ships, and to various other matters. The object of such an interdict at the present crisis is to conceal Japan's plan of action from her potential enemy, and while that object would be pretty effectually attained by excluding items of military and naval intelligence from the columns of all the vernacular journals only, it might be partially defeated were no similar restraints imposed upon the foreign local press. visits at the offices of the various local jourvisits at the offices of the various local journals for the purpose of calling their attention. This project, however, was vehemently opto the veto promulgated in the Official formal f under Japanese law, but we receive, at the same time, a reminder of the complete freedom we have hitherto enjoyed under that law. So far, indeed, as liberty of speech is concerned, the transfer of the foreign local press to Japanese jurisdiction did not produce even the most infinitesimally small fraction of difference in liberty of opinion and of its expression.

NEW YEAR'S NUMBERS OF JAPANESE JOURNALS.

Among the New Year's issues of the Tokyo journals the *Jiji Shimpo* heads the list with a forty-page paper. The *Nichi Nichi* and the *Kokumin* stand next with 24 pages each; then follow the Shogyo and the Nippon with 20; then the Asahi and the Yomiuri with 16; then the Hochi and the Miyako with 12; then the Chuo with 10; and finally the Niroku, the fimmin and the his retirement by the perilous nature of the Dempo with 8.

As to the illustrated sheets accompanying these numbers in the case of the leading papers, one of the most interesting is that of the Asahi. It is a facsimile of the words of the national anthem written by Their Imperial Highnesses the Princes and Princesses Komatsu, Fushimi, Kitashirakawa, Kacho, Kanin, Higashi-Fushimiand Kuni and Prince Tokugawa. It appears that all these distinguished personages met at a party given by Prince Tokugawa in May, 1900, and that some one suggested the idea of making a memento of the occasion in the form of a scroll having the words of the anthem engrossed by all the Princes and Princesses in combination. Such a scroll has immense value in Japanese eyes.

Of the other pictures not much need be said, except that the Nippon's group of flowers is a fine example of delicate colour-The Jiji Shimpo, however, has made a not very happy departure. It reproduce a drawing of "Echo" by Mr. Eisaku Wada, who seems to have painted it in Paris. Probably our contemporary intends that this picture shall serve as a protest against the prejudice with which the Japanese regard the nude as an art subject. We need only the nude as an art subject. We need only remark that, in our opinion, the picture will help to confirm the prejudice rather than to soften it.

CHINA.

Japanese and American Representatives are Urga where they have a garrison of 3,500 pressing for ratification of the recently con- Cossaeks and 3,000 Mongolian troops. pressing for ratincation of the recently con-cluded commercial treaties, but the Chinese late they have denied access in toto to Court hesitates, the pressure of Russian Chinese subjects and have forbidden Chinese influence being against such a step. Ratiinfluence being against such a step. fication would mean the opening of Mukden place. Urga is a town in Mongolia on the and Antung, for which measures Russia is high road from Kiatka and Mainachin to by no means prepared. Her position is reking. It is by this rotte that reason has unfortunate, from a moral point of view, been supposed to be contemplating the consince alike in China and in Korea she figures struction of a line to bring her Trans-Asian as the one obstructor of commercial expressions. Railway into direct communication with by no means prepared. pansion and extended intercourse. She is more conservative just now than the Chinese and Koreans themselves, and yet, in point Peking will tell him to preserve a masterly of fact, her Asiatic record shows immense results in the cause of civilized progress.

Tuesday, January 5. The Asahi has a Peking telegram saying that the Court proposed to raise a sum of Therefore the police have paid ten million taels from the various provinces, to meet the expense of military expansion, payments, which already overtaxed the people's financial competence, something like a revolt must be expected. The same line was taken by Chang Peh-hi, President of the Board of Education, and these two views are said to have greatly perplexed the Court.

A censor has memorialized the Throne advising that the present Commander-in-Chief in Shing-king should be handed over to the Board of Punishments and a competent successor be appointed. As to this successor, the present Governor of Hunan was suggested, but the Court held that no Chinese official could be expected to discharge his duties satisfactorily in Manchuria in the face of Russia's interference, and that the first thing to be done was to consult the latter's wishes.

It is alleged that at the suggestion of Wang Wen-shao, who has been drawn from crisis, the Viceroys and Governors of the various districts have been asked to submit to the Throne a statement of their views. The message calling for these statements was conveyed through Ku Hung-ki. import was that according to telegrams from the Chinese Representatives in St. Petersburg and Tokyo, a rupture between Japan and Russia was imminent. In such an event, if China observed neutrality her conduct would be unfriendly to Japan, whereas her military strength did not suffice to take part in the struggle. The Viceroys and Governors were therefore exhorted to review the whole situation, and convey their counsels telegraphically to Peking. In other words, the local satraps are asked to decide whether, in their opinion, China's military and financial resources qualify her to enter the arena, and if she enter it, how long she would be in a position to keep up the struggle.

The Asalu's Tientsin telegrams say that re-inforcements are constantly arriving at Port Arthur, where over twenty thousand men are now in garrison. There are 15 men-of-war in the harbour and 3 outside, and there are some 20 torpedo craft. Every day witnesses the strengthening of the fortifications.

that the Governor of Urga has sought instructions how to deal with a somewhat Friday, January 1. perplexing situation. It appears that the Russians have built and armed a fort at Her position is Peking. It is by this route that Russia has The Governor wants to know Peking. The Governor wants to know what he is to do in the premises. Probably inactivity.

> Viceroy Yuan is said to have raised an objection to the Nippon Yusen Kaisha's sole ownership of the landing stage at Chin-wan-tao. His Excellency considers that anything savouring of a monopoly at this place would be opposed to the intention of its opening to foreign trade, and he also con-siders that the sale to the Japanese company tion proving valid. The Nippon Yusen Kaisha employed perfectly legitimate means to acquire any rights it enjoys at Chinwan-tao.

Thursday, January 7.
Viceroy Alexieff, it is stated, has addressed to the Wai-wu-pu in Peking, through M.
Lessar, a request that China should send a special envoy to consult with him at Port Arthur with reference to the settlement of the Manchurian question. But the Chinese Government is naturally unwilling to take any such step pending the outcome of the Russo-Japanese negotiations. There is, of course, much satisfaction in Peking on account of the strong front recently adopted by Japan, and this is not the moment for China to give away the situation by concluding an independent settlement with Russia. China's position is morally very strong. She confronts Russia with an unanswered and unanswerable accusation of broken promises and she declines to take any step tending to condone that breach. The trouble is that her case rests on moral grounds alone and is not supported by any appreciable force; a rather poor outlook in these civilized times.

The Jiji's Peking correspondent wires that in the event of war between Japan and Russia, China will maintain neutrality. That decision may now be regarded as final. It is, we imagine, quite unprecedented and certainly it is very quaint, that a great empire should sit with folded hands while two foreign Powers are disputing about the fate of a large slice of its territory. If China can sink to any profounder depths of impo-tence than that, we should like to know how the descent is to be accomplished.

On the other hand, the Nichi Nichi's correspondent says that whereas China has hitherto displayed marked timidity in the face of Russian menaces, she is now showing a very strong front. Thus it has been decided that a large portion of the Chili troops shall be sent to Shan-hai-kwan, and that efficient measures shall be taken for action from that direction. Such a measure, however, would not be in any degree inconsistent with the preservation of strict neutrality. Indeed the Asala's correspon-Wednesday, January 6. dent wires that telegraphic instructions have been despatched from Peking to the comdent wires that telegraphic instructions have

mander-in-chief in Manchuria, requiring days and that the exchange of ratifications convenient. She is herself largely to blame.

event of war between Japan and Russia.

Meanwhile Viceroy Yuan is said to be vigorously pushing his schemes of military reform. Apparently his main idea is to have a really national army now for the first time, instead of a congeries of local militias without any uniformity of system or organization. The Viceroy's plan is to have twenty divisions of troops in the unbank. ganization. The Viceroy's plan is to have twenty divisions of troops in the whole empire, four of them to be in the metrop-olitan province. Each division is to consist of 25 battalions, and as the strength of a battalion—the old Chinese unit—is 500 men, the total strength of the 20 divisions men, the total strength of the 20 divisions will be 250,000 men, not a large army for an empire of 350 millions of people China having 18 provinces, independently of Manchuria, it is plain that if the metropolitan province absorbs four out of the twenty divisions, some one of the remaining seventeen provinces will have to go without a division. The Viceroy is further credited a division. The Viceroy is further credited with the intention of eliminating from the army the element of weakness proverbial in Chinese battalions, namely, the presence of superannuated men, who though quite unfit for campaigning purposes, remain in the ranks as a bread-earning profession.

According to a letter from the Jiji Shimpo's Peking correspondent, it would appear that Taotai Yuan, nephew of the great Viceroy, was the real cause of the re-occupation of Mukden by the Russians. Among all the Chinese officials in Manchuria he alone is said to have stood undaunted in the face of Russian aggression and menace; to have opposed the invader at every turn, and to have punished local bandits unflinchingly whether they enjoyed or did not enjoy Russian protection. His presence at Antung as Taotai of the Eastern Marches constituted a perpetual source of inconvenience to Russia, and led finally to the seizure of Mukden and to a demand for Yuan's capital punishment. Yuan became known to the Japanese by the extremely cordial reception he gave to Major Sakanishi when the latter was travelling in Manchuria. He not only did everything possible to promote the objects of the Major's journey, but he also urged in the strongest terms that unless some decisive step were at once taken to check Russian aggression in Manchuria, it would inevitably extend to Korea, and thence even to Japan, while China's security would be a thing of the past. Yuan's idea was that Japan should not lose a moment, but should strike forthwith while Russia's forces were still at a distance from the scene of opera-He seems to have advocated a repetition of the plan of campaign adopted in 1894-5; namely, the despatch of three arnies, one marching from the Yalu on Mukden; one from Antung towards Liaoyang, and one from Takushan or Pitsewo towards the lettern of the Parast's Sword for supplying the troops with provisions. Undoubtedly had such a plan been put into operation last June or July, Russia would have found herself in a highly embarrassed position. But it is easy to be wise after the

The Kokumin's Peking correspondent wires that in view of the imminent outbreak of hostilities between Japan and Russia, the city is much excited, and that the Hongkong and Shanghai Bank and the Specie Bank have begun to buy up silver dollars. wonder to how wide an area of Peking this alleged excitement extends. Perhaps, indeed, the nerves of the sleepy old city are more tensely strung now than they used to be in ante-Boxer days,

A telegram from Chefoo says that the sea is frozen through a distance of some seven or eight hundred yards from the shore. There has not been anything of the kind since the war between China and Japan.

KOREA.

Friday, January 1.

The *Jiji Shimpo* and the *Nichi Nichi*Shimbun both publish intelligence from Seoul to the effect that the Russian Representative is endeavouring to obtain a lease of Masampo and Chinhai-wan for the purpose of converting them into naval bases. M. Pavlow has not yet made any definite application for these places, but is preparing the way through the medium of Li Kon-thaik. Masampo is probably the finest port in Korea. Its possession would give Russia what may be supposed to be an object of her constant ambition. Chinhai lies a little to the westward and southward of Masampo. It is not an ideal place for a naval station, being too much exposed. Our readers may remember that Russia made preparations to establish herself there some years ago, but for reasons which were supposed to be connected with the place and were supplemented by Japan's procedure with regard to Masampo, the project was abandoned. The Nip-pon's correspondent goes beyond his col-leagues of the Jiji and the Nichi Nichi. He says that M. Pavlow is employing the most po, the project was abandoned. persuasive measures to secure his end, and arnies, one marching from the Yalu on Mukden; one from Antung towards Liaoyang, and one from Takushan or Pitsewo towards the isthmus of the Regent's Sword, this last to work in cooperation with a naval attack upon Port Arthur. He promised that if these measures were adopted, the Chinese would make themselves responsible for supplying the troops with provisions. Undoubtedly had such a plan been put into much fuller information before placing credence in this rumour.

Reports from Seoul indicate a state of Telegrams to the Jiji from Peking say that owing to the persistent efforts of Mr. Conger and Mr. Uchida, the new commercial treaties—namely, those of America and Japan with China—will be ratified in a few prominent part than she will find altogether to the persistent efforts of Mr. Unless Russia make good that the French Representative in Korea has secretly advised the Emperor to place the country under French protection as the prominent part than she will find altogether only secure refuge, and that the Russian in the country under French protection as the prominent part than she will find altogether only secure refuge, and that the Russian in the country under French protection as the prominent part than she will find altogether only secure refuge, and that the Russian in the country under French protection as the prominent part than she will find altogether.

may thereafter be looked for immediately. The vacillation and timidity shown by Mukden, Tatung and Antung will then be open to foreign trade, and a very interesting Valley and her hesitation to comply with proposals submitted by Japan, America and England, proposals pointing plainly to her own security and to the solution of existing difficalties, are not likely to escape the fate that always attends such a policy. Korea must be singularly blind if she does not perceive that the only hope of salvation for Japan. Her independence would prove a very illusory business were she to pass under the shelter of Russia's wing, though in many material respects that refuge would make appreciably for her welfare.

> The United States Representative in Seoul is reported to have intimated his intention not to attend the Korean Emperor's levee at the New Year. Dr. Allen's reason for this abstention is that he has failed to obtain audience of the Sovereign for the purpose of discussing the opening of Yong Am-pho, and he therefore declines to make act of presence at the Court for any purposes of ordinary etiquette. It appears to us that this is a wise and warrantable attitude. If the Emperor of Korea declines to give audience to the Representative of a foreign Power in connexion with important international questions, His Majesty can not reasonably expect the slighted Representative to attend purely conventional Court receptions.

The Nippon reports that seven thousand koku of barley having been imported into Chemulpo—or Seoul, the telegram is not quite clear which—by the Mitsui Bussan Kaisha, nominally for sale, many surmises have been suggested. It is known that the rations of Japanese soldiers are 7 parts rice to 3 of barley, the admixture of barley being found very beneficial in preventing kakke. Hence the arrival of such a large quantity of barley naturally causes conjunctures. jectures.

Monday, January 4.
From Seoul comes news that in view of the United States Representative having declared his resolve not to attend the New Year's levee on account of the Emperor having refused to receive him when he desired to make a representation about Yong Am-pho, an Imperial Chamberlain was despatched to the Representative, begging him to reconsider his resolve and promising that Yong Am-pho should be opened early in 1904. In these circumstances the Representative agreed to attend, but there was no levee after all in consequence of the illness of the Empress Dowager.

The lumber question at Wiju remains unsettled. The Japanese Foreign Office official, Mr. Okabe, who is charged with the conduct of the negotiations, is reported to have visited Yong Am-pho in search of some arrangement, but to have returned to Wiju unsuccessful.

The latest telegram from Seoul-announces

the death of the Empress-Dowager at 10 a.m. on the 2nd instant.

Mr. Cho Min-ki (?), Korean Representa-tive in the United States, has been appointed to represent his country at the Court of

Wednesday, January 6.

There is a runnour published by the Nichi Nichi Shimbun, which seems to regard it with some credence, that the Russians have landed a force at Mokpo. Our contemporary justly observes that there is no conceivable reason for such a step and that, consequently, the rumour requires much confirmation. Mokpo is outside the arena of practical politics in every sense. It is not a serviceable harbour; its possession by Russia would not threaten the Seoul-Fusan Railway, and it could not endow its holder with any advantages as regards the passage of the Korean Sea. In our opinion the story may be regarded as a pure canard.

Thursday, January 7 The Korean Government is said to have refused to allow the entry into Seoul of the American marines whose landing at Chemulpo, to the number of a hundred, was announced on the 5th by telegram. Korea takes the line that if American life and property be threatened, she will herself adopt proper measures for their protection. That is a very natural attitude, for if the troops of any one Power be admitted on such a pretext, other Powers may insist on following the precedent. The question is, however, can Korea be trusted to make good these assurances. There is said to be a very large force of Korean soldiers at Chemulpo, but their presence is not regarded by the foreign residents as in any sense a guarantee of safety.

The Asahi and the Nippon both allege, however, that 44 men, of all ranks, have actually entered Seoul, and that over a port at Chemulpo. Korea's remonstrance, therefore, does not appear to have been

It is stated that the British Representative

protection of his nationals.

Several Japanese journals publish a telegram said to have been received in Seoul from Chefoo to the effect that two companies of Russian troops embarked, a few days ago, at Port Arthur, their supposed destination being Chin-hai-wan. It will be fresh in the memory of our readers that much talk was recently heard about a renewal of Russia's ambitious projects concerning Chin-hai-wan -- a bay lying westward of Masampo. Hut it is quite incredible that she should proceed to land a handful of troops there at this par-ticular juncture. That would be at once ticular juncture. precipitating trouble and courting disaster. In company with this new item of intelli-gence comes a contradiction of the previous story that Russian soldiers had made their appearance at Mokpo.

Friday, January 8.

The obvious contingency is causing much anxiety in Korea, the contingency that as American marines have been summoned to Seoul for the protection of the life and property of United States citizens, the marines of other Powers may receive a similar mandate. Indeed Great Britain has already followed suit. A body of British marines arrived at Chemulpo on the 6th instant, and their landing was expected to take place on the 7th.

very likely to be garrisoned by Japanese troops without much delay, unless a pacific settlement of the Far-Eastern complication be speedily effected, but these detachments of United States and English marines are frankly intended for their declared purpose, namely, the protection of life and property.

What the incident ultimately suggests is

the anomalous and dangerous condition of Korea itself. The moment that a crisis of any kind arises, all the Powers lay aside any shred of confidence they may have in the little empire's competence to discharge imperial duties. If there is ever to be a stable condition of affairs in the regions within Japan's sphere of influence, she should see to it that this source of peril is removed, and it can only be removed, so far as we can see by Japan herself assuming the duties which Korea's incompetence to discharge has been fully demonstrated.

There is a rumour that 27 Russian soldiers marched from Chemulpo—or proceeded hither by train—before daybreak on the morning of the 6th. This is treated only as a rumour, and one seems to detect in it the hand of the notorious news agency. Another report relates to the travels of three persons who, under the guise of Englishmen, are believed to be Russians, and who have disappeared on landing in Korea. Three persons! To what a pass are the newsmongers reduced, and to what a pitch is public excitement raised.

It appears that Li Kon-thaik and his friends have been somewhat discredited by the arrival of American and English marines for the protection of life and property in Seoul. These politicians had been assuring hundred are still waiting on board the trans-the Court that not the least chance existed of Japan drawing the sword in defence of her claims as to Manchuria and Korea, but their assurances have been rudely contradicted by these very palpable evidences that also is about to take practical steps for the British and American statesmen take British and American statesmen take a different view. The Korean Court, having relied on Li's forecasts, is proportionately perturbed, and altogether Seoul is much demoralized. There will come a time of peace and rest for the Land of the Morning Calm one of these days, if only the present complication do not result in converting the Korean peninsula into the Balkan Peninsula of the Far East.

> The funeral of the Empress Dowager of Korea is to cost six hundred thousand yen, an outlay which will probably impoverish the Court for some years to come. News from Seoul says that, under ordinary circumstances, the troops constituting the Imperial Guard would not be placed on duty perial Guard would not be placed on duty around the palace until the day of the funeral, but that in view of "eventualities"—the proverbial "one in ten thousand" of Chinese phraseology—they have already taken up their stations. The funeral is to be on the oth instant.

The Japanese Court has announced official mourning for 2 days, commencing from the 7th instant.

THE ARGENTINE CRUISERS.

The Emperor, at the suggestion of the Minister of State for the Navy, has agreed In short, Seoul seems not unlikely to become a second Shanghai, namely, a camping ground for the troops of the Occident. Some sensationalists whisper that, in effect Korea has now been garrisoned by names are not new. When in 1870 the Orders for the East, and she has also the

Representative is conducting various secret American, British and Japanese troops. Various fiefs handed over to the Central Government all the foreign built ships in their schemes. in a vessel called the Nisshin and the chief of Saga one called the Kasuga. The two of Saga one called the Kasuga. ships may be said to have formed the nucleus of the Japanese Navy. They performed the first naval duty discharged by Japan after the Restoration; the duty of enforcing the neutrality proclaimed by the Government during the Franco-Prussian war. The ships have not yet been supplied with their full armament, but they are virtually ready to take their place in the line of battle. It is stated that they will be sent out direct from Genoa without waiting for Japanese crews, and that making the voyage in 35 days, they will reach Japan early in February. Tokyo journals relate that the Government's resolve to purchase the ships was taken quite suddenly, and that on the 30th of December a telegram was sent to Viscount Hayashi, directing him to complete the transaction at once with Messrs. Gibbs & Co., who had the ships in hand on account of the Argentine Government. They are sister-ships, with the exception of a slight difference in armament. Their displacement is 7,700 tons; length, 344 feet; beam 59 feet; draught 24 feet; horse-power 13,500; and speed 20 knots. They have a 13.500; and speed 20 knots. They have a belt of 6-inches. The *Nisshin's* armament consists of four 8-inch guns, fourteen 6-inch; ten 3-inch; and six 1.8-inch. The Kasuga belt of 6-inches. has one 10-inch, and two 8-inch, the rest of her armament being the same. The crew complement is 500 men as that of the Nisshin. The acquisition of these vessels brings the Japanese fleet of first-class cruisers to 8 ships, namely :-

Simp, mamor,		
Isumo	9,906 tons.	
Imale	9,906 "	
Tokiwa	9,855 "	
Asama	9,800 ,,	
Yakumo	9,800 11	
Аяина	9,456	
Kasuga	7,700 11	
Nisshin	7,700 11	

It will be seen that the Genoa vessels are somewhat unworthy of their associates, but experts say that in power of armament they may fairly take their place in the above rank. The price paid for the vessels was 15,300,000 yen.

It will be observed that there is a discrepancy of dates. Reuter's telegram told us on the 29th December that the ships had been sold, whereas the Japanese papers allege that instructions to buy were for-

warded on the 30th.

The Hochi Shimbun gives a comparative statement of the Russian and Japanese naval forces which are ready to take their place in the fighting line. The list stands

thus :

DEATH OF PRINCE KONOYE.

Prince Konoye expired at 8.30 a.m. on the and instant, the immediate cause of death being paralysis of the heart. The Prince was lying in his suburban villa at Ochiai-He was in his forty-second year, so that under ordinary circumstances a long spell of activity should have lain long spell of activity should have lain before him. Last summer he underwent an operation in the University Hospital, but success did not attend the treatment and he never recovered his normal health. Up to the last, however, he retained a large measure of vigour. On the morning of his decease he rose from his couch and, seating himself in a chair, drank a considerable quantity of beef-tea. Thereafter he called for his Japanese costume, but when about to don it he was seized with paralysis of the heart and expired in a few minutes still seated on his chair. The Prince belonged to the oldest of the princely families in death.

Many telegrams of condolence were received by the Prince's family from China, notably from Prince Su and Prince Ching, Prince Su and Prince Ching, Prince Su and Prince Ching, Prince Su and Prince Ching Kwo. The Foochow Officers School, the Dobin Of Seoul, the Mokpo branch of the Nankin Officers School, the Dobin Of Seoul, the Mokpo branch of the To-A Dobun-kai and other institutions forwarded messages of sympathy. Japanese costume, but when about to don it he was seized with paralysis of the heart and expired in a few minutes still seated on his chair. The Prince belonged to the oldest of the princely families in death.

Many telegrams of condolence were received by the Prince's family from China, notably from China, notab Japan, his remote ancestor having been the celebrated Kamatari, founder of the Fujiwara clan. Seventeenth in descent from Kamatari was the notorious Regent Tadamitsu, whose son, the Prime Minister Motozane, is regarded as the direct founder of the Konoye House. Some generations after Motozane's time the Konoye family found itself without heir, and the deficiency was supplied by adopting a son of the Emperor Go-yazei. That was in the time of the Taiko, the last half of the 16th century. The deceased Prince was the ninth in descent from this adopted son. At eleven years of age he succeeded to the head of the family, and in 1884 he proceeded to Austria, whence he subsequently went to the Leipsig University, obtaining a degree of law in 1890 and returning to Japan the same year. Marquis Ito was the first President of the House of connection with the National Union, which the commonest motives of Japanese artists.

cruiser Orora (6,731 tons). When these received from the Prince. It is a singular said our readers will understand what a mona total tonnage of 196,008 tons. These figures are said to be from the latest and most trustworthy returns.

The purchase of these two Argentine conquest never abated except when opportunity lacked and that those who hesitated. A wide audience means many believers. tunity lacked, and that those who hesitated to beat back this wave of aggression before and for one person reached by Dr. Baelz's vessels is regarded as the influentate out to beat back this wave of aggression before the 28th of December, authorizing the it gathered force, must look to be over-Cabinet to employ the special-account funds whelmed by it. The National Union ceased for making good any deficiencies in the Japanese alliance, its President and its mem-It is stated that Russia was endeavouring bers fondly hoping that their aims were now to buy these vessels, but that she failed achieved. Thereafter Prince Konoye devoted a repetition, apparently, of the story of the Chilian war-ships. And were the two latter now in Japan's possession, her position would be immensely strengthened. We can well appreciate, however, the reasons which determed her from rushing into the resolute. Thereafter Prince Konoye devoted much energy to fostering the To-a Dôbun-kai (East-Asian Common-Script Association), which had for main purposes the cementing of close relations between Japan and China and the leading of the latter into the paths of modern progress. Undoubtedly his contractions are resolved. Thereafter Prince Konoye devoted much energy to fostering the To-a Dôbun-kai (East-Asian Common-Script Association), which had for main purposes the cementing of close relations between Japan and China and the leading of the latter into the paths appreciate, however, the reasons which determed her from rushing into the market. demise must be called a heavy loss to his country

Prince Konoye's obsequies were performed on Wednesday. Previous to the funeral the Emperor sent a message together with a present of five thousand yen. The message said that His Majesty had looked forward to utilizing the services of this great representative of an ancient house, and that he profoundly regretted the Prince's untimely decease.

A DUTCH VIEW OF JAPANESE ART.

We translate elsewhere from the Deutsche We translate elsewhere from the Deutsche Japan Post: an interesting criticism by 5000-6000 2 10,899 ... 2 10,899 ... 2 10,899 Dutch author, Mr. C. H. Stratz. The volume, being in the German language, may easily be mistaken for the work of a German, Mr. Kondo, referring to these figures, says that whereas in 1804st Ignan had to Ito was the first President of the Flouse of Persident 1891, and Prince Konoye was elected Chairman of Committee of the Whole. In practical joke. That is the most charitable conclusion we think possible. To put the matter briefly, he has come into possession of a number of pornographic pictures and last, when illness compelled him to resign in favour of Prince Tokugawa. At the time of several disgusting photographs, and has been deluded into imagining that such things form the staple of Japanese art and connection with the National Union subject the commonest motives of Japanese artists.

condemnations in the Deutsche there will be hundreds of credulous readers of the book itself. Yet the thesis of Stratz is about as correct as would be an assertion that European high art is faithfully represented by the drawings in the New York Police Gazette. Truly such silliness is not worth one serious paragraph.

THE JAPANESE MERCANTILE MARINE.

The President of the Nippon Yusen Kaisha has given to a newspaper reporter some interesting figures with reference to the growth of the Japanese mercantile marine. He says that in 1896 the country possessed only 95 vessels of and above 500 tons, the total tonnage being 128,367 tons. The detail

Ships. Tons. Ships. Tons. Ships. Tons. 500-1000 -6 4.571 64 33,761 63 40,933 89 825 115,736 70 45,504 84 123,586 66 164,964 17 59,175 4 17,961 2 10,899 000-2000 21 2000-3000 19 2000-4000 8 49,228 47 27,781 9 13,833 1 31,394 4,128 4000-5000 5000-6000 6000 and

but it is, on the contrary, from the hands of that whereas in 1894-5 Japan had to an eminent German that Mr. Stratz receives the flagellation he richly merits. Dr. Baelz at short notice for transport purposes, she is specially concerned, because Stratz makes has now an abundant fleet of her own, which numerous allusions to the celebrated Doctor's its owners are willing to place at her service writings, and thus indirectly involves the latter on the cheapest possible terms. That is a whence he in his own blunders. We have had an opporg Univertunity of seeing Stratz'sbook, and having seen
1890 and
Marquis the moderation he observes in trouncing
House of this singularly mistaken exponent of Japanthat to augment the country's armaments without developing the mercantile marine would be like manufacturing a bird without wings. He also calls attention to the curiously low rates at which the Government can obtain these ships. During the South African war Great Britain employed from 800,000 to 1,200,000 tons of transports and resident of the Nobles Club. The Prince's connection with the National Union, which the founded and over which, for several years, he presided is fresh in the memory of the public. From first to last he was an uncompromising opponent of Russia, in whose aggressions he detected a source of the gravest peril for his country. One of the salient features of his character was the liberalism that tempered his aristocratic traditions. No one, however humble or however exalted, detected any difference in the reception he is the deduction into imagining that such things a spranese art and the commonest motives of Japanese art and the commonest motives of Japanese art shad to pay from 15 to 25 shillings a ton. She wanted to engage the steamers of the Nippon Yusen Kaisha's European line at cribes a predominance not merely of the nude deprived of all the graces that save it, under the manipulation of clever Occidental artists, from lapsing into the business-men of Japan are naturally antient of clever Occidental artists, from lapsing into the business-men of Japan are naturally antient of clever Occidental artists, from lapsing into the frankly obscene. Our own unqualified author, publisher and printer of Stratz's book detected any difference in the reception he is the dock in a police court, and when that is enterprises.

DOMESTIC POLITICS.

Monday, January 4

The fiji Shimpo asks for a newly organized abinet. There are two Cabinets now: the Cabinet of the Genro and the Cabinet of the Ministers. It may be considered a bad thing to change Cabinets at such a juncture but the country wants the strongest Mini-stry it can command, and there would in effect be no change, since the Elder States-men would merely assume the practical direction of affairs which they have in reality controlled. The great desideratum is to place the reins of State in the hands of the men who possess the fullest share of public confidence. We (Japan Mail) fail to see any valid reason for a change.

Tuesday, January 5 Some of the minor journals of the capital continue to insist that there is an undercurrent of discontent in official circles and that unless some definite step be soon taken by the Cabinet, its own down-The Satsuma party fall is inevitable. are represented as the motive force in this movement, and they are credited with desire to see at the helm of State Marquis Ito, Marquis Yamagata, Count Matsukata, and, in short, the Elder Statesmen. It is not improbable, we should think, that should arise in domestic politics.

Thursday, January 7 The *Jiji Shimpo* has a very strong article urging the necessity of a change of the Minister of State for Finance. Our contemporary's line of argument is that if war commences with Russia it will be a protracted affair demanding heavy expenditures, whereas the present Minister of Finance has neither the ability to devise ways and means nor the confidence of the commercial and industrial magnates whose cooperation is essential. It is seldom that the Jiji Shimpo writes so strongly with reference to any official, and we must assume that there are valid reasons for its criticism.

JAPANESE SECURITIES.

The opening of the share market on the 4th instant, after the New Year's recess, witnessed a sharp depreciation of all securities. Something very like war-levels were touched. Of course many brokers are heavily hit. It is apprehended that there will be not a few bankrupts, and there are fears even of a panic and the compulsory closing of the Exchange. The following are the principal quotations:

principal	quotations		Fall sin	ce date	of		
	Sell	ing Price	. last q	uotatio	n.

that in Tokyo, but there also a very heavy							
depreciation is reported.							
uepreci	ation is report						

A further fall in the market price of Japanese securities is telegraphed from London. The 5-per-cent War Bonds have dropped £1 5s. 61/4 and are now quoted at £90 6s. 101/2; the 4-per-cents, have fallen £5.5s, and are quoted at £75. British Consols also have

fallen to £87.15s., and Chinese 5-per-cents are quoted at £90.5s.

As for Japanese bonds and stocks Japan they continue to be in an extremely depressed condition, and many brokers are said to be much perplexed in finding funds to cover their margins.

FAMILIES OF OFFICERS AND SOLDIERS KILLED IN WAR.

It may be remembered by some of our readers that after the war of 1894-5 an attempt was made by some charitable Japanese ladies and gentlemen to raise subscrip-tions in aid of the families of officers and soldiers killed or disabled during the cam-Considerable sums were collected among the Japanese themselves, but some of the foreign local journals raised the cry that matters of this kind lay entirely within the province of the authorities—a proposition by no means altogether true—the appeal met with little sympathy among the foreign residents, noted as they usually are for generous charity. In 1902 the law relating to this question was amended in the sense of increasing the grants in aid of families deprived of their breadwinners, and the liji Shimpo has now an interesting article on the subject. From this we learn that for the purposes of the receiving a dividend to put into one pocket ed much longer, some complication will law military men are divided into three classes. The first class comprises all those killed in battle and those that die from the effects of wounds received in battle. allowances granted by the State in such

cases are	:	yen annually.
To the fan	ily of	neivate soldier 36 to 87
11	17	officer 60 to 150
78	28	Second Lieutenant 100 Jen.
9.9	29	First Lieutenant225 " Captain300 "
10		Major
30	**	LL-Colonel
11	10	Colonel750 "

These allowances are given during the life of the widow, and are discontinued if she marries again; and there are special regulations relating to motherless children.

The second class includes persons wounded in the discharge of their duties, or dying on an official journey and so on, but this second class, as well as the third are not discussed by the fiji Shimpo since they have no immediate interest. Roughly speaking the above allowances are one-third of the pay received by the officer or soldier during life. The *Iii* argues that from the rank of captain downwards the allowances are quite insufficient to support a family, and that greater generosity on the part of the State is essential. How much more forcibly this argument could be advanced in 1895, before the increased scale of allowances had been enacted, our readers can easily judge. As things now stand, the widow and children of a soldier killed in battle may find themselves condemned to support life on a miserable pittance of 1/6 a week. The the verge of a terrible struggle; a fight with one of the greatest Powers of the Occident she will have to throw herself body and soul into the contest, and it is not right to send out her sons to battle with hearts inexpressibly saddened by the thought that their own death for their country will condemn their widows and children to a life of almost hopeless penury and distress.

MERCANTILE INVESTMENT IN JAPAN.

Under the above heading we find the following in Commercial Intelligence:

following in Commercial Intelligence:

A responsible critic writing in the Japan Weekly Chronicle quoted the following incident, which throws some light on the present benighted methods of Japanese trading firms. A joint-stock company, whose subscribed capital was only partly paid up, and who had been fortunate enough to make a profit, instead of paying a dividend, passed a resolution to make a further call upon capital, the amount of profit intended for dividends being appropriated for the payment of such further call. Now should the company sustain a loss, there will be another call for capital. When profits are made, no dividend is declared, and when there is a loss shareholders have to make it good, thus realising no actual return for their investments. Such cases, remarks the writer, are by no means uncommon, and explain to some degree why direct trade has hitherto been found of such great difficulty by the Japanese and of such little practical benefit.

This strikes us as being quite delightful non-

This strikes us as being quite delightful nonsense. In the first place it is very far from true that cases such as the Kobe journal describes are common in Japan. If fault is to be found with Japanese companies in this context, it is that they are too ready to pay dividends before their business has been placed on a really sound footing. But even supposing that the shareholders of a company, confronted with the necessity of paying, in the immediate future, a call upon their shares, and having to choose between even supposing that they selected the rational and prudent method of devoting the dividend to the call, how would such proce-dure merit the epithet "benighted?" It would, on the contrary, be praiseworthy procedure. If it is to be condemned, then by parity of reasoning we must condemn compa-nies like the Mitsu Bishi and Nippon Yusen Kaisha which, instead of appropriating nearly all their earnings to the payment of dividends, appropriate a great part to reserves. There really is no essential difference between the two methods of procedure. Something might be said if the directors of a Company, on their own authority, took a step of the nature in question without consulting the characteristics. sulting the shareholders, but where the latter, as is shown by the writer of the above paragraph, deliberately agreed to appropriate the dividend in the manner indicated, the criticism becomes mere persiflage. We are astonished that an excellent journal like Commercial Intelligence should lend its columns for the ventilation of such silliness.

THE INFLUENCE OF KINGS.

The Spectator thinks that future historians will note with some surprise mingled perhaps with perplexity that while in the beginning of the twentieth century the Kings of Europe lived lives of painful precaution against assassins, this very period, on the whole, will have to be considered in it political aspects as wery good time for Kings. In elaborating its argument our contemporary points out that the hatred which two generations before concentrated itself upon European thrones has apparently died away; in particular, the ridicule of kingship as a theory has passed out of literature and out of the popular mouth.
Kings are accepted as part of the scheme of things, and the tendency of popular thought is to exalt their prominence in the community. Their personalities are watched with eager and not unsympathetic eyes, their movements are recorded with unceasing care, and there is a visible tendency to attribute to them most of the successes in administration. The older world talked

of their virtues, the newer one speaks of but nations are wise when they rely for act upon sun and earth always in the same adulation, not so reverential as of old, but, so to speak, more liquid, has fallen upon them from all quarters, and their whole lives are observed with a minuteness of which the previous century afforded few examples. To judge by all appearances, the philosophers who predicted the decay of Royal whole the selections are the content of the selections. authority as sure to follow the enlightenment of mankind have been entirely mistaken, and the Kings of the Continent have become the leaders as well as the rulers of their nations. The Emperor of Russia remains as absolute as ever; the Emperor of Austria has become the supreme referee of his many peoples; the German Emperor is practically the sole living politician within his dominions; the King of Italy, though obeying a rather strict Constitutional law, really selects and to a great extent guides, the Ministers, who in theory are chosen only by Parlia-ment. Even the little Kings have been in a curious way accepted by their subjects, and in Holland, Denmark, Sweden, and Greece no one objects to a certain leadership or right of veto in the Sovereign. It seems in places as if men were tired of gover-

permanent guidance upon committees.

MAGNETIC DISTURBANCES AND SUNSPOTS.

In Knowledge for December, Mr. E. W. Maunder gives some interesting details of the Greenwich records with regard to the mag-Greenwich records with regard to the magnetic storms recently experienced in Engandiand, the Western countries of Europe and United States Legation to welcome His the United States, to which we recently drew attention in the columns of the Japan Mani. He further alludes to their connection with Sunspots. The paper is illustrated with sunspots of the sunspots, and of the records of the Greenwich magnetic register. Mr. Maunder writes: "In a few Oyama, the Minister of State Legation to welcome His Excellency Mr. Taft, who is on his way home from the Philippines to assume the Secretaryship for War in the U.S. Cabinet. His Imperial Highness Prince Kanin was present, as were the Prime Minister, the Minister of State for War, short months we have passed from a period of extreme quiet on the sun to a period in which great spots have begun to show themselves. I should wish to use this term of the whole American community of Tokyo sense. For in every sunspot cycle there are a few groups which stand out, beyond all others, by their pre-eminent size, the giants of their kind.

The appearance at the sunary other notables. It is scarcely necessary to say that nearly the whole American community of Tokyo and Yokohama attended. The grounds of the Legation were finely illuminated and the others, by their pre-eminent size, the giants of their kind.

The appearance at this Excellence. of their kind. The appearance at the east limb on October 4 of a regular spot, cannot do much for democracies, and so our contemporary concludes:—"Sand lifts frequency, indeed, for a considerably longer after 4 o'clock.

The great object of the masses, who must but, as a rule, not in size. If this precedent be followed, then the greatest "DRAWING-ROOM TEA" AT THE BELGIAN great object of the masses, who must ultimately settle the question, is now an increase in the comfort which they see to be attainable, but do not attain; and it is hard to see how the Kings can do much for them in this regard. A financial genius on the throne is a figure not found in history, for though many Kings have piled up treasure, few, even if we include Henri IV., have made their people rich. It was his Hebrew Chancellor of the Exchequer, not Pharaoh, who kept the people in corn. The Kings ing of October 35. Its passage across the themselves see this, and throughout Europe not even the most conservative of it had entirely passed by November 1, 4 capacity of Doyenne of the Carps Diplowho kept the people in corn. The Kings themselves see this, and throughout the service of the consensation of the matter of the corner of the corner

proportion. But, in any case, whether the connection be direct or indirect, whether it be immediate or only secondary, there can be no doubt that it is real, actual, and effective."

GOVERNOR TAFT.

in places as if men were tired of governing places as if men were tired of governing places as if men were tired of governing themselves, or of finding among themselves, or of finding among themselves, or of finding among themselves leaders who could lead. And so it has worked about that the Kings of Europe have come into their own again as leaders of their people in political as well as social life. But the Spectator thinks that their influence is reaching high water mark, judging by two or three tendencies in modern thought which may now be discovered by the discerning. To begin with, the social influence of the Kings of their really great spot, that the largest with the social influence of the Kings of the present size, the giants of their kind. The appearance at the east limb on October 4 of a regular spot, the first member of a group which was fully instant, the presentation being by the United States Representative. Subsequently the Governor and Mrs. Taft were presented to that in previous cycles the increase in activity has followed so rapidly after the appearance of the Emperor in audience on the 6th instant, the presentation being by the United States Representative. Subsequently the Emperor and Mrs. Taft were presented to that in previous cycles the increase in activity has followed so rapidly after the appearance of the instant, the presentation being by the United by the Emperor in audience on the 6th instant, the presentation being by the United States Representative. Subsequently the Emperor in audience on the 6th instant, the presentation being by the United by the Emperor in audience on the 6th instant, the presentation being by the United by the Emperor in audience on the 6th instant, the presentation being by the United by the Emperor in audience on the 6th instant, the presentation being by the United by the Emperor in audience on the 6th instant, the presentation being by the United by the Emperor in audience on the 6th the first member of a group which was fully instant, the presentation be His Excellency Governor Taft was received by the Emperor in audience on the 6th

was made after the fashion of the Russian Court-dress, and with it was worn the begenerally, and are now to a considerable becoming national Court head-dress, in this case of grey velvet, matching the dress, outlined with pearls, with white tulle hanging from the back. Madame de Freitas wore a very becoming gown of pink chiffon, while Mrs. Marsh's dress was of pink chiffon covered with lace made in Japan, the train being of embroidered chiffon. We should like to describe many of the other dresses, but lack of space forbids.

The Belgian Legation has recently been considerably enlarged and improved, and in the tastefully arranged salons there was ample room for all invited—both for ad-

mirers and admired.

A photograph was taken of the Diplomats and their wives. It should prove a charming memento of yet one more occasion for which Tokyo is indebted to the graceful hospitality of H.E. the Belgian Minister and Madame la Baronne d'Anethan.

NOTES ON CURRENT EVENTS.

There is still a great deal of talk about the question of rates in hiring trans-ports for the public service. The Senshu Domei-kai (Association of Ship-owners) has offered its 90 steamers, aggregating 150,000 tons, at any rate convenient to the Government, and this offer, contrasted with the 4.20 yen asked by the Nippon Yusen Kaisha, supplies material for severe comment in some quarters. Evidently it is out of the question to form any just judgment without fuller information. The Nippon Yusen Kaisha has an immense staff and extensive machinery in various foreign countries, and the whole of this staff and machinery must be supported unproductively if the ships are chartered for public service. The President of the Company has shown that at the rate he asks, the Company could not obtain a dividend larger than 8 per cent. It would, in fact, be making a very serious sacrifice. We wonder whether the proposal of the Senshi Domei-kai-a proposal really based on 21/2 yen per ton-involves an equal sacrifice.

The annual report of the United States Secretary for War, Mr. Elihu Root, regarding the present condition of the U.S. Army, makes interesting reading. We learn from this document that at the date of the last reports received from the military departments on Oct. 15, 1903, the actual strength of the regular army was 3,681 officers and 55,500 enlisted men. Of this number there were in the United States 41,832, and in the Philippines 15,510. "On the 15th of October, 1903," says Mr. Root, "the American troops in the Philippines consisted of 848 officers and 14,657 enlisted men. General George W. Davis, the division commander until the 25th of July, has reported that the number can be still further reduced, and I agree with that opinion. It is not desirable, however, to make any further reduction until the construction of barracks and quarters in the United States has made further progress. There are are also 99 officers and 4,805 enlisted men of the Philippine Scouts. There is not at present much occasion for the use of American troops outside of the Moro country, but the moral effect of their a curious manner. On the 28th instant a presence is undoubtedly salutary. We man presented a cheque for 30,000 yen. The cheque was in order, and after the together in the comparatively few large usual examination the amount arrived at the

sobe and train were of blue-grey velvet posts, which are in course of construction, where their discipline, health, and opportunities for instruction will be improved, after the fashion of the Durgian and the cost of maintaining and the cost of maintaini

Mr. Elihu Root, the U. S. Secretary for War, in the course of his annual report to Congress, makes the following suggestions regarding the building of railways in the

Philippines:—

The War Department procured for the Philippine Government the services of two experienced engineers familiar with the work of locating railroads in the tropics, and these engineers have personally examined and located a line of railroad from Manila up the easterly side of the great plain of central Luzon, over the mountains near Carranglan, down the valley of the Cagayan to the north coast of Luzon at Appara: another line from the termination of the present railroad on the Gulf of Lingayen up the west coast to Laoag, and a third line from Manila southerly through Cavite and Batangas to the south coast at the city of Batangas.

The estimated cost of constructing these roads is \$11,140,095. I am satisfied that the Philippine Government could afford to pay the entire interest on the cost of construction in return for the benefit which the Government will receive in greater efficiency and reduced cost of administration. The increase in the taxable value of property and the benefits to the people of the island of Luzon will of course be very great. It is probable that private capital cannot be obtained for investment at the risk of this enterprise without some state aid or a loan of credit by means of a guaranty or otherwise. I strongly recommend that should the powers of the Philippine Government be deemed insufficient for this purpose such legislation as may be necessary to confer the power be enacted by Congress.

The King of Italy, on the occasion of his recent visit to London, made all his public speeches in English, and we read that "the singular purity of his English accent was noticeable." His speech at the Guildhall in response to the Lord Mayor's toast, was as follows :-

response to the Lord Mayor's toast, was as follows:—

"My Lord Mayor,—I thank you most heartily also on behalf of the Queen. for your address, which still further enhances the value of the splendid hospitality extended to us in this ancient hall, and It also thank their Royal Highnesses the Prince of Wales and Princess of Wales as well as the members of the Corporation and the ladies and gentlemen who are honouring us by their presence at this banquet. (Cheers.) You thus give me the opportunity of expressing our grateful acknowledgement of the cordial reception bestowed upon us by the inhabitants of London, who understand the message of sincere affection of which I am the bearer to your beloved Sovereign and to the people of England. (Cheer.) These are sentiments of old standing between us. You have recalled, my Lord Mayor, the words pronounced in this very place by my august grandfather half a century ago. (Cheers.) Those were times of war, when the Italian nation was entering into her struggle for unity and independence. The sympathetic support lent to her by this free people in those days of trial has created a tradition of mutual trust, which has never ceased to enliven the relations of the two countries. (Cheers.) But we are now living in a fortunate condition of international peace, of which Italy, as well as England, has become herself a willing and active factor. I trust that the two nations will always proceed united in the path of progress and civilization. (Cheers.) With these feelings I raise my glass to you, my Lord Mayor, and to the distinguished representatives of the City of London." (Loud and prolonged cheers.)

In his speech on the occasion of the luncheon on board the Mongolia, Sir Thomas Sutherland said that during the time he had been connected with the Peninsular and Oriental Company, vessels representing a tonnage of 400,000 had been built at a cost of nearly 10 millions sterling." That is indeed a record for one company.

The llank of Japan has been victimised in

There the incident paying-out counter. occurred. By some unexplained process the money never reached the hands of the presenter of the cheque. After long waiting he became surprised at the delay and inquired the cause, whereupon it transpired that some unknown individual had interposed, received the thirty thousand yen and taken himself away. The precincts of the Bank were at once placed under police guard and a strict search was instituted. But of course it proved fruitless. The mystery is still unexplained. Meanwhile Mr. Nakayama, head of the Tellers Bureau (Suito Kyoku) and 5 or 6 other officials of the Bank have been removed from their positions.

The Paris correspondent of The Times telegraphs to that journal as follows:-"With a view to testing the new Trans-Siberian postal service between Paris and Peking, the Matin, on September 27th last, addressed a letter to one of its subscribers, M. Dubail, the French Minister to China. To-day the Matin publishes his reply, which is dated October 20th. The Minister acknowledges the receipt of the letter from the Matin, which reached Peking on October 19th at 6.30 p.m., and was delivered an hour later at the Legation through the French Post Office. M. Dubail's answer left Peking on October 20th by the Trans-Siberian route. On the same day he sent a postcard to the Matin by the transoceanic route, so as to show the difference between the two services. The letter reached the Matin on the 15th of this month. Thus from Paris to Peking the post covered the distance in 22 days, whereas from Peking to Paris it took 26, the difference being accounted for by the missing of the connexion at Irkutsk. The postcard sent by M. Dubail has not yet arrived, as communications from Peking forwarded by the trans-oceanic route take about 35 days." These figures afford tolerably accurate measures of the new postal facilities between Japan and the Occident, as well as between Peking and Paris. Letters posted in Tokyo and Yokohama on Sunday afternoon may be expected to be delivered in London or Paris the third Sunday follow-

We have been asked to explain the term special accounts" used in the recently issued Imperial Ordinance which provided funds for maintaining the national arma-ments. "Special Accounts" is a somewhat comprehensive expression. It covers all funds that are treated independently of the general budget. There are twenty-three of these funds; those relating to State industries, those connected with Government Schools and the Imperial Library, those relating to State railways and telegraphs, those relating to dockyards and arsenals, those relating to the Hiroshima Mine and to forests, and notably the Three Capital Funds, namely, 30 millions for naval maintenance and 10 millions each for aiding education and for relieving famine. The total amount of these funds is 113 million yen, approximately, of which 111/4 millions represent the working capital of enterprises. Of course all monies taken from these sources will have to be ultimately restored.

The 4th inst. being the day when official business re-commences after the New Year's recess, all the Ministers of State returned to the capital by the evening of the 3rd. There is of course much activity in official circles, as might be expected at such a time.

There has been a heavy fall of snow in

Nagoya. It commenced on the 3rd and crease \$300,000; naval establishment, increase continued throughout that day and the following. People say that there has been no such fall during the past 34 years.

The Official Casette on Tuesday promulations increase \$1,000,000.

The Official Casette on Tuesday promulations increase \$21,000,000.

The Official Gazette on Tuesday promulgates an order which strictly forbids the journalistic publication of any matter relating to Japanese naval or military movements.

An able essay on the subject of Race Susceptibility to Infection was read at the recent meeting of the British Medical Association by Dr. R. J. M. Buchanan. The great value of his communication, says the Medical Press, lies in the bird's-eye view it gives of race susceptibility throughout the pations of the world. To tuberculosis, for instance, the Gaelic and Cymric race are considered more susceptible than the Saxon and Scandinavian. Negroes are very susceptible to tuberculosis, especially in countries not native to them. Cancer is said to be rife in China, while it is rare in Egypt, uncommon among negroes, but prevalent among the blonde inhabitants of Norway. It is a well-known fact that small-pox is excessively fatal to people among whom it is introduced for the first time, as shown among the North American Indians, where the Mandan nation was entirely destroyed by it; and in Iceland, where in the earliest epidemic eighteen thousand out of fifty-two thousand perished. Negroes are very sus-ceptible to sleeping sickness; other races are not so. Jews are believed to be prone to diabetes and nervous diseases; Chinese are exempt from chorea; the negro is almost exempt from yellow fever, in which the order of susceptibility runs: Scandinavian, Englishman, Southern European, creole, mulatto, negro. The unravelling of all these various conditions, apart from their general interest, is likely to have a most valuable application in modern therapeuties.

Mr. Shaw, Secretary of the U.S Treasury, transmitted to Congress on December 7th, the estimates of appropriations required by the Government for the fiscal year ending on June 30th, 1905. The appropriations aggregate \$624,502,146, as against \$589,189,112 asked for in the year 1904 and \$605,286,990 the amount of the approprations for that year. The present esti-mates and the appropriations under each head for 1904 are recapitulated as follows:

Estimat	es Appropria'ns
for 190	
Legislative\$11,687,2	25 \$12,962,806
Executive	00 363,008
State Department 3,133,9	60 3,835,146
Treasury Department 168,659,0	64 174,643,189
War Department	33 132,763,515
Navy Department 105,825,4	10 87,284,137
Interior Department163,093.3	86 165,708,855
Postoffice Dapartment 10,824.7	59 12,201,513
Department of Agriculture. 6,729,8	80 6,741,256
Dept. of Com. and Labor 14,033.9	9,858,305
Department of Justice 8,035,4	

Grand totals624,502,146 605,286,990 Following are the principal items in the several Departments, in which there are important increases or decreases as compared with the appropriations for 1904:-

Legislative, salaries and expenses, increase, \$145,000. Public printing, decrease, \$155,000. Executive proper, salaries and expenses, increase,

increase \$751,000.

Department of Commerce and Labour—Salaries and expenses, increase, \$1,125,000; public works, increase, \$3,675,000; miscellaneous, increase \$1, 295,000.
Department of Justice-Public works, increase

\$175,000.

The wonted inauguration of the official New Year took place at the Palace on the 5th instant. We learn from the Jiji Shimpo that the number of those present at the banquet was 589. The Emperor's speech of welcome, the Prime Minister's reply on behalf of the nation, and Baron d'Anethan's address as Doyen of the Foreign Corps Diplomatique were all of the usual form, that is to say, purely conventional.

THE SUGIMOTO KWANNON-DU.

By J. E. DE BECKER.

Situated in a quiet, sequestered spot on a hill-side at the left of the Kanazawa road, only a little way removed from the Utano-hashi (bridge), and almost unknown to foreigners, stands, amidst a grove of magnificent cedar trees, a temple of the Tendai sect known as the Sugimolo Kavannon-Dô, which was first established in the sixth (6th) year of Tempei (734) by Gyogi Bosatsu, the celebrated Korean-born Buddhist Abbot and Saint.

Passing up a steep flight of ancient, well-worn, and lichen-covered stone steps, we come to the sammon (the principal gate) of the temple, which bears a tablet on which are inscribed the three Chinese characteas Dai 20-2an (mountain of the Great Cache). On either side of the gateway are the usual images of the Ni-o (the two Dêva Kings) apparently very old, and certainly very dilapi-

Then up another flight of steps we arrive at the temple and, entering the hall of the main building, we find on the left side of the nave the seated image of *Binzuru* (*Pindola*), the helper of seated image of Binzuru (Pindola), the helper of the sick, and on the right a statue of Michibiki-fizo (Kshitigarbha), the compassinate patron and guide of travellers. Also in the nave, and close to the figure of Jizō, stands a figure of Shōmu Tennō, a generous Imperial patron of Buddhism and the founder the Tōdaiji temple at Nara. It was this Emperor who caused the colossal figure of the great Buddha at Nara to be constructed.

Within the chancel is a gilded figure of the

Within the chancel is a gilded figure of the furthinen Kwannon (eleven-faced Kwannon) said to have been carved by Unkei. On the left side stands an image of Chishiki Jisō (the Wise Jisō) holding his jewel and staff, but the sculptor is unknown. On the left is a figure of Bishaman Tay Walingmann steer and threatening cled is unknown. On the left is a figure of Bisnamon Ten(Vāisramana) stern and threatening, clad in full armour and bearing a formidable spear. He stands upon a rock triumphing over a fallen ama-no-jaku (devil) who lies writhing at his feet. This image, which is a remarkable specimen of the sculptor's art, and which strongly impresses the visitors by the tirguit and holdness of its out. the sculptor's art, and which strongly impresses the visitors by the vigour and boldness of its outlines and the naturalness of its pose, is said to have been carved by Takuma Högen. In a shine at the back of the chancel—which is opened very reverently by an attendant, who with bated breath and great solemnity repeats the formula Namu Amida Butsu (We adore thee, oh Eternal Buddha!) and then sinks upon his knees and commences to recite the saltra of the sect—are three figures of the Iti-chi-men Kwannon (eleven-faced Kwannon) **Executive proper, salaries and expenses, increase, \$155,000.

nunciation Dai-zo-zan) where he was met by an eleven-faced Kwannon, the Goddess whose an eleven-faced Kwannon, the Goddess whose mercy and compassion was so great and profound that hell itself had once changed to Paradise when in ancient days she descended to the Kingdom of Yama. Prostrating himself in lowly reverence before the revealed Goddess—before the Sovereign Regarder of Prayer, the Pitier of World, the Controller and Light of the Universe—he besought her blessing. And she, smiling upon him in the fullness of her ravishing and eternal beauty, sweet and fresh as the bedewed lotus bud at the dawn of a summer's day, showed him a holy tree, and, instructing him to carve an him a holy tree, and, instructing him to carve an image of herself that men might see and worship, she vanished from his sight. Thereupon, the godly man, burning with holy zeal and filled with a sense of unbounded gratitude, cut down the tree which had been indicated to him and sculptured the image on the left. As recorded to the tree which had been indicated to him and sculptured the image on the left. As regards the figure in the centre, Jikaku Daishi once tarried in the temple over night, and from its commanding eminence espied in the sea, towards the South, a glorious refulgence of light. Curious to know the portent of the manifestation, he proceeded to the spot and found the trunk of a tree floating in the water surrounded by a flood of celestial light. Reverently repeating the mystic formula, he drew the log from the water and to his infinite surprise observed that around the top of one end were eleven facets, on each of the top of one end were eleven facets, on each of which was a sacred Sanscrit character. Much which was a sacred Sauscrit character. Amon struck by the circumstance, the saintly man carved the central image. With regard to the image on the left, tradition says that Eshin carved it in accordance with the order of the Emperor Kwanna (985 to 987). On each side of the shrine at the back of the chancel are on the shiftle at the back of the chancer are a number of images representing the three-and-thirty terrestrial embodiments of *Kroannon*, and on the right of the shrine is a figure of *Benten* (one of the Seven Deities of Luck) and another of Fudo (Achala).

With regard to the name "Sugimoto Kwan-With regard to the name "Sugimoto Kwannon,"* a highly veracious tradition says that on
the night of the 23rd day of the 11th month of
the 5th year of Bunji (December 1189) a fire
occurred in the temple, but that the various
images were rescued by the guardian of the place
(Jodaibo) and that after they were taken out
from the building by him they stood up of their
own accord under the protecting branches of a
great cedar tree!

WANDERING THINGS.

Birds that fly home when shadows fall,
Wishes that beat their wings in vain—
When shall the Maker of the tired world call All wandering things to Him again?

A DIFFICULT DECISION.

IN the Broad Arrow it is written :-" One of the ablest soldiers of the day lays down the principle that 'he who has decided on war, or is convinced that his adversary has done so, must forthwith open hostilities if it be to his advantage from a military point of view. No political doubt, no moral scruple, should keeep him from it." This comment relates to the South-African war, and we believe that the able soldier alluded to is Baron von DER GOLTZ. How curiously opposite the axiom is to the case of Japan and Russia to-day! There must be very few Japanese who, inspired by the wisdom that succeeds the event, do not bitterly regret the patience exercised by their statesmen during the past few months. When it first became unmistakably evident-namely, on the 8th of last April-that Russia had no intention of carrying out her promises to evacuate Manchuria, she was not ready to justify her breach of agreement by force. She was not even approximately ready. Her fleet in these waters was palpably weaker than the Japanese fleet: she had in Manchuria a force numerically small and almost insignificant when compared with would have been entitled four months ago within their power to make or to mar any the extent of territory to be defended; to set a narrow limit of time for her op- loan that the Government of this Empire she had no stores of coal and provisions. THE INSURANCE QUESTION.

ACCORDING to present appearances the great foreign life-insurance companies a success of esteem and a success of achieve- doing business in Japan will, with one exception, cease to issue policies in this counwith sight profound enough to appreciate try after the 31st of January, which is the good intentions, there are a dozen that date of operation of the Orders promulgated applaud fine results. She has been playing to in June last with respect to deposits. It will too small a gallery. We have not the least be a serious disaster for Japan should such thought of suggesting that she should have a result occur. The companies in question drawn the sword ere now or that she occupy the strongest position in the world's should draw it even now. But surely she financial circles. They have it virtually ponent's reply, if only on the ground that may hereafter desire to float abroad. That and brought great disadvantage for Japan, companies find intolerable will surely be road to peace. For Russia's extensive, her ing to face foreign competition, have persuadfeverishly strenuous, preparations, do not and ed the authorities to enact prohibitive laws. can not mean that when they are completed We do not intend to suggest that either of she will abate her pretensions. They mean, these arguments is conclusive. If the Japanas has often been said in these columns, that ese Government deem it necessary to adopt she looks to transform herself from a nego- certain measures for the protection of Japanis. Why should not that be her aim? tion nor the danger of financial inconvenience There can not be much question that Condemn her aggressions as much as we should be deterrent. We are compelled to may, denounce her breaches of promise as say, however, that the necessity for the legisloudly as we please, the practical methods lation referred to has not yet been made she is now adopting are legitimate and clear to public intelligence. Nay, more, appropriate. But it is certain that Japan though six months have passed since the can not endure to be dictated to. She promulgation of the Orders, and though the would not be exacting for purposes of com- most sincere and patient efforts have been promise but she is not endowed with the made by foreign experts to comprehend their spirit of humble obedience. If Russia wait practical significance, the matter remains still until she can speak from behind a display of enigmatical. The Orders require that a foreign conspicuously good facilities for saving the Japan wait until Russla feels ready so to in Japanshall do two things; namely, deposit a speak, there will be war. Therefore we sum of 100,000 yen in the Treasury, and subwelcome the resolve Japan appears to have sequently deposit whateveramount represents destruction rather than move until Europe's at length taken; the resolve to secure the difference between that sum and the what she considers absolutely vital, leaving company's legal reserves. Now a Japanese live down a stigma which disfigures all her There will not, we imagine, be any inten-at all. Thus a discrimination, invidious at acts in Occidental eyes, the stigma of Orient- tional interference with interests which first sight, is established against foreigners. Should she by any chance yield Russia has undoubtedly acquired in Man-Some trouble has been taken to justify such promptly to instincts which Western States churia or with the position she assumes to discrimination. It has not been fruitless never long resist, and should she have rapid guard them. Japan will merely take prac- trouble. For there is a discrimination in recourse to measures which another Power tical steps to assert and preserve her own prime conditions. The assets of a foreign in her place would adopt without hesitation, interests in Korea. It would have been company are entirely beyond Japanese judishe must count on seeing the worst motives much more conducive to the quiet of the cial reach, and the Japanese policy-holder is read into her acts and the most discreditable East could these ends have been compass- thus at an obvious disadvantage. The best, aims ascribed to her efforts. Thus the first ed within the four walls of the negotia- indeed the sole, way to protect him is to easily accessible; in other words, that method of legislators: if they impose a Imperial Ordinance with detailed regulations there shall be a deposit lodged in official certain precaution, then they necessarily for operative guidance. These very Orders hands. On that ground there is no question, define the terms of fulfillment. But the are themselves supplementary to an Imneither is any question raised, that to call for such a deposit is a proper measure of the kind. While professing to restrain We do not see any reason why an explanatory Thus far none of the foreign insurance companies is understood to object. Indeed most of them would probably be willing to deposit a considerably larger sum than that fixed by the Orders were the step final. It "legal according to Japanese law," but sible security proportionate to the volume fixed by the Orders were the step final. It is not final, however. There is the further requirement that the deposit must be perpetually kept up to the total of the Company's provide no kind of control. Thus the sounder amount be left to the Company to fix. If legal reserves against policies written in Japan. Now it is a matter of simple arith-larger the reserves it accumulates for the as they stand, not alone will the reputation metic that a company whose business security of its policy-holders, the more of Japanese legislators be greatly injured, progresses at the rate of a million yen an- heavily is it penalized by these Orders. In but their good faith will also be impaired. nually and whose statutes require it to short, the Orders, so far from deterring set aside a yearly reserve equal to 3 unsound enterprise, encourage it. per cent. of the policies written by it, In the context of such an anomaly it is would, at the end of 10 years, find itself perhaps superfluous to point out that foreign with over 18 millions of yen deposited in the companies, as a general rule, can not obey hands of the Japanese Treasury were the the Orders without breaking faith with their above order obeyed. That is a very policy-holders. They pledge themselves to moderate estimate. Probably twice the accommodate the latter with loans represum would be nearer the truth in the case senting a certain fraction of the present value of a great company like the "Equitable" of the policies. But if the whole of a comfor example. The Japanese Authorities, pany's legal reserves are of necessity lying responsible for the framing of the Orders, in the Japanese Treasury, loans can not are understood to deny that any such great possibly be made to the policy-holders. deposits need be anticipated. They claim, so This is a secondary but none the less infar as we know, that these huge amounts superable difficulty. are not in contemplation at all. But they offer no intelligible explanation as to what is lators with sincere motives in this matter really in contemplation. That is the strange, and we do credit them. It is within their the unaccountable feature of the affair. The unquestionable right, and it is also their insurance companies are confronted with an duty, to afford all possible protection to their order requiring them to take certain steps nationals against the manœuvres of irreson peril of forfeiting their licenses. They ponsible foreign companies. But there is point out that to take such steps would lead something to be said for the foreigner also; to such and such results as a matter of above all for foreign companies which comunequivocal arithmetic. They are answered that no such results are contemplated Having been allowed to come to Japan and by the framers of the Order. They ask, to carry on their business here for a considerthen, what is contemplated and they can able time, they are now required to comply obtain no definite reply. RUSSIAN IDEAS.

FROM the writings of Russian publicists as translated in the columns of The Times we obtain some idea of the light in which the Far Eastern problem presents itself to Russian eyes. Prominently appears the notion that when Japan interests herself diplomatically in Manchuria's fate she is meddling with matters which have no legitimate concern for her, and that the question should be left entirely for settlement by China and Russia. Manchuria, these publicists say in effect, is China's business and China's business only: all interference by Japan is mere impertinence. Surprising as it may seem that such a contention should be seriously advanced in St. Petersburg; it certainly is advanced, and assuming it to be sincere, as we are bound to do, we can appreciate its influence on the situation. The answer is very simple. In the first place, Japan has at least the same right to a voice in the settlement of Manchuria's destiny that Russia had in 1895. In 1895 a large part of Manchuria was in Japan's possession. Her troops had conquered it and China had definitely ceded it to her by treaty. Russia thereupon formulated the proposition that the tenure of Manchuria by any foreign State would be a constant menace to the integrity of the Chinese empire and to the peace of the East. On the strength of that proposition, and with the aid of Germany and France, she compelled Japan to evacuate the region and restore it to China. But now Russia herself holds Manchuria. She has not acquired it by a war of conquest. She has not obtained any treaty title to it. Her right to be there does not compare with the right Japan had in 1895. Moreover, in 1902 she pledged herself solemnly to evacuate the place, and in 1903 she openly violated the

This is not by any means the only argu-

previous. The Tartars would make in her hands splendid military material, and with an army of them numbering, say, half a million, well disciplined, well equipped and led by Russian officers, the whole Chinese empire would lie virtually in the hollow of the Northern Power's hand. Nothing could resist her. Is that a prospect to be contemplated with indifference by Japan?

Further, supposing that Russia establishes her dominion throughout the whole northern part of China, it is difficult to see what barriers would keep back her wave of empire from inundating Korea. Certainly Korea itself has no competence to avert such a result, and not only must we assume that the normal momentum of Russia's unceasing advance would be felt in a southerly as well as a westerly direction, but also there are the additional considerations that the secure passage of the Korean Strait is essential to a Power holding Liaotung and Vladivostock, and that for the purposes of any movement from Manchuria into the Valley of the Yellow River a potentially hostile Korea would be intolerable on Russia's flank. If then Japan sit with folded hands at this juncture, if without any kind of protest she allow Russia to obtain a stand-point for further imperial extensions of almost illimitable magnitude on the East-Asiatic continent, then the plain result for the Japanese nation is a petty and restricted future, together with the perpetual propinquity of an unceasingly aggressive Power. If the instincts of selfdefence and the promptings of self-interest have ever, in the history of nations, constituted any justification for interfering in the fate of a neighbouring State, Japan seems to have that justification in the case of Manhave that justification in the case of Man-churia and Korea. Russia actually claims that I gave originally, which is not reproduced, for herself the same justification with regard The figures given by Stratz are only in parts well for herself the same justification with regard to Thibet the while she denies it altogether to Japan with regard to the adjacent continent of Asia. It is quite certain that were the roles of Russia and Japan interchanged, St. Petersburg would to-day be demanding various things of Tokyo in the most impera-

"THE HUMAN FORM IN JAPANESE ART AND LIFE"

By Dr. E. BAELZ.

(TRANSLATED FROM THE Deutsche Japan Post FOR THE Japan Mail.)

In No. 23 of the Deutsche Japan Post reference is made to the book of the above name, published by C. H. Stratz. As doubtless this work is not only widely spread among the Germans in Japan, but is also seen by many Japanese, it is not only justifiable, but actually a duty, to draw attention to the authority of the authority with reference to the life.

clearly that did Manchuria belong to her, it join myself closely to the excellent works of Baelz, would form the stepping stone for a fresh and make them the basis of my observations."

Even the motto by Confucius on the title page is advance more comprehensive than anything taken from my writings; for it was I that condensed the utterance of the great Chinese into this short

> Unfortunately, the fact that I published my studies in the Communications of the German Asiatic Society in Tokyo, which are but little known to the public, has been made use of by many authors, in order to bring parts of them on the market as their own productions. Thus the parts on Japan, the most frequently quoted and praised in Selenka's "Sunny Worlds," are copied word for word out of my writings and without

> acknowledgement even.
>
> But this is only by way of preface. Let us pas on to Stratz. Throughout the whole of Stratz's book a distinction is made between the Choshu and the Satsuma types. This requires explanation.

Besides the Aino type, which resembles the European, and which is represented in some degree only in the north and in the extreme south, there are to be found among the Japanese people two special types: one, the refined, people two special types: one, the refined aristocratic type, with slender delicate figure, a long narrow face and finely formed nose, is identical with the prevailing Korean type and pre-ponderates in those provinces on the west crast of the main island which lie opposite to Korea. Japanese history relating to the mythical and semi-mythical age commences in fact in Izumo, the province on whose coast, as well as on the coasts of Iwami and Choshu, to this day Korean ships are often driven by storms and currents. As Choshu is the best known of these parts, on account of its great influence in modern Japanese history, I gave the name Choshu-type to the formation of body most nearly approaching the Korean, in my Bodily Dualities of the Japanese," Tokyo, 1882. For the same reason, the southern Malay-Mongolian type, most purely represented in Kyushu, was named after Satsuma.

That was all very fine as long as it was a ques-on of the Japanese only. With the extension tion of the Japanese only. With the extension of the racial relations to other nations of the yellow race, however, wider points of view had to be considered, so that, agreeable to nature, out of the Choshu-type came a Korean Manchu-rian type (north Mongolian), and out of the rian type (north Mongonan), and out of the Satsuma-type, a Malay-Mongolian type (south-Mongolian). It is a pity that Stratz did not accept these divisions, but held to the old ones which are too one-sided—all the more a pity, as Choshu and Satsuma are quite unreal conceptions chosen and well drawn, as racial types. Long residence in Japan and close study, as well as frequent opportunities are necessary, in order to photograph pronounced types when they come As these means were at my bidding, I succeeded, in the course of years, in obtain ing a large number of really typical pictures, and in later works of Stratz these will be made use of, as I have sent him a selection for further editions of his book "The Racial Beauty of Woman." That he was working at a special book on the Japanese, I did not know, otherwise many errors might have been avoided in it. Thus, then, the really refined type of Japanese woman, as well as the typical ordinary Mongolian, is hardly re-presented. Especially it is to be regretted that the eye has not the expression and observation which without doubt belongs to it as an interpreta-tion of the racial distinction. The typica The typical features of the fine Japanese eagle nose are also not emphasized. Nevertheless I acknowledge without reserve, that Stratz's book familiarises Europeans better pictorially with the bodily forms of the Japanese, than any other work that

work as obscene literature which ought to be confiscated by the police. the partially or totally nude female figures in the authropological part, and out of daily life, are entirely, without exception, photographed to tickle the senses of the European. It would never occur to a Japanese to picture such situations, even if he were not to trouble himself with the fact that the taking and selling of such photographs is punishable. How the Japanese women regard exposure of the body even before artists is evident by the difficulty experienced by the modern Art School in Tokyo in finding models. modern Art School in Tokyo in finding models. A Japanese acquaintance told me that, on his telling a handmaid of Venus that with her Beautiful figure she would make a good living as model in the School of Art, the otherwise-far-fromprudish lady spurned the proposal indignantly. One sees often enough in the summer ugly elderly women working with partially uncovered bodies, but girls of the age in which atratz pictures them, only rarely. It is only prostitutes who when well paid, put themselves at the disposal of the photographer for that purpose. This I have heard direct from photographers.

Stratz speaks repeatedly of the "Djonkina-dance," a game of forfeits, in which the losing danseuse must each time put aside an article of clothing, until she is left with nothing on. This dance, which also plays a great part in the narratives of clobe-tratters, who visit lange has been tives of globe-trotters who visit Japan, has been invented in the open ports especially for Europeans, and is quite unknown to the Japanese themselves. At least, I have not been able to find even one in Tokyo who knew it. Anyone performing such a dance before guests would be looked on by a Japanese as one of the inmares of the Yoshiwara-moreover, to dance the Djonkina even in the ports is now punishable by imprisonment.

Therefore Stratz is the victim of deceit when he relates that, through his guide, he had an opportunity of seeing this dance performed." in opportunity of seeing time dance performed in the house of a discreet official" by his "delightful daughter" and her three friends. The idea that any Japanese woman, even of the lowest class—to say nothing of the daughter of an official—would dance before a travelling stranger with nothing on, in her house, in the presence of her parents and relatives, is so absurd that one can really only laugh at it. Such a thing would not happen in Japan; that is not only my convic-tion, but that of all the Japanese of whom I asked an opinion on the subject. The father, the "discreet official" was some scamp or other with whom the artful guide associated himself in a speculation on the purse of the stranger—a successful speculation, as the result shows (Stratz himself declares that he had to give money and presents). The "delightful daughter of the presents). The "delightful daughter of the house" and her friends were poor, ruined beings who had been hired, and who probably only received a small part of the spoil. But the affair has its serious side. Truly

enough nonsense has been told out in the world as well as written by young men whose acquaintas we'll as wither by young men whose acquaint-ance with Japanese women has been confined to unclean localities in and near the open ports, about the morality or immorality of the Japanese girl. This is to be regretted, but not to be taken seriously. But when in a book appearing in scientific garb, which, on account of its illustrations finds an uncommon circulation, the author pictures the above scene (and only that one) con amore and in detail as something highly interesting and characteristic, and adds that he has already described it elsewhere, it is time to speak an earnest word, and to interfere with the calumniation (however unmeant) of a people whose conceptions of morality and immorality are quite as real and developed as they are

and intuitions of the Japanese, contained in it.

I think, without being presumptious, that I have a special right to criticism, for the matter in Strazz's book is so completely built up from my own works, that without them it could not have been written at all. This the author himself says on page 10: "It is only from Raels appeared so fat.

The second part of the book, which treats of conceptions of beauty, and of the nude in nature and in art, would have been better left unwritten; to work at a street clean," what one cannot say of any large Western town. Whoever wishes to see vice in Japan must look for it. If the content of the second part of the book, which treats of conceptions of beauty, and of the nude in nature and in art, would have been better left unwritten; to work a street-clean," what one cannot say of any large Western town. Whoever wishes to see vice in Japan must look for it. If the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the book, which treats of the second part of the second part of the book, which treats of the second part of the se Straight book is so completely built up from any own works, that without them it could not have been written at all. This the author him from direct pornography and bears its stamp so does not lay hold of him as in the finest and most self says on page 10: "It is only from Baelz that we have detailed observations on the bodily who see the book are beside themselves with What must a Japanese or a Chinaman think of qualities of the Japanese. With Ranke I can only indignation, and disposed to look upon the whole European morality when, on first arriving in Europe, he sees the nightly doings in those streets; what when he visits the infamous quarters of the large sea-ports which about correspond with the "tea-houses" in the neighbourhood of the Japan-ese ports, frequented by travellers, over the threshold of which no decent Japanese would step? What, when he sees how in respectable inns and restaurants, patronised even by ladies, in Munich, for example, the young men lay hold of the waitresses and use foul language to them? One should think of this and not throw stones when one is living in a glass house.

And when, as evidence of the lower morality of the Japanese, the institution of concubinage is pointed to—a bad institution, but one which social development makes comprehensible,—it should be remembered that King Solomon, according to the Bible, the wisest and most pleasing to God of all mortals, could give the Japanese many points in this respect.

So much for "the nude in daily life." With reference to the representation of "the nude in art," Stratz has been badly advised. In the first place he has taken all his examples from the socalled vulgar or Ukioe School, in which not a single painter is acknowledged by the Japanese themselves to be a real artist. It is that school that has produced the wood-cuts and coloured prints so much thought of in Europe, to which the attention of cultured Japanese was really first drawn by Europeans. The following tends to show how they had been regarded previously. When I commenced, more than 20 years ago, to collect such prints as pictures of Kyosai, I was reproached by Japanese friends, as well as by Fenollosa, the great foreign authority on Japanese painting, on my bad taste. My assertion that these coloured prints were really beautiful, and that Kyosai's pictures were distinguished by ingenious strength, was in those days worth nothing. And to the present day no refined Japanese bangs a picture of present day no renned Japanese nangs a picture of this vulgar school in his house. Now Stratz has given out of this school chiefly pictures by the most modern artists, ones far inferior to the older artists—Toyokuni (Stratz always spells it Toyo-kumi), Kunisada, Kuniyoshi, whose female figures are in every respect lamentably inferior to the graceful, delightful, and anatomically correct figures and the charming faces in the pictures of Sukenobu, Kyonaga, Korinsai, Harunobu; the few specimens given of the latter only serve to illustrate this satisfactorily. Stratz emphasises repeatedly that a few faults and incorrectnesses in drawing must be overlooked in Japanese pictures; one should look at the pictures the right way as the Japanese does, namely, only contemplate the test ensemble, and not trouble about details. That is easily said; the Japanese unfortunately does that because his taste has been so trained from childhood; the European, however forms his total impression at first through more or less unspecious comprehancing of many details. less unconscious comprehension of many details, and it is specially peculiar of Stratz that he will and it is specially peculiar of Stratz that he will defend drawings by Japanese painters that scorn all anatomy, and that he even finds them beautiful, as, for example, the parody of a toot on picture S. 168, which is described as "elegant." Even for the badly drawn figures of the awabi fish by Toyokuni he has only words of commendation; he praises these and other similar ones as proofs of the understanding of art possessed by the Japanese. It must therefore be emphatically accentuated that these pictures are regarded by educated Japanese—who, even according to Stratz. educated Japanese—who, even according to Stratz, children have not awakened "!) And then the must know best how such things are judged—is a not entering the category of "art"; for them these pictures are on the same level as for the German artist, or educated man, the New-Ruppin sight of her helpless nakedness"! It is a pity that the girl's speech printed on the picture (in style, with which they also fully correspond as style, with which they also fully correspond as regards their aim and meaning. The coloured words that cannot be given here) shows that she prints were principally intended for children's play-things, and for the peasants and the little people from the interior who took them to their intruder if he will only come in the evening! relations as travelling-presents (o miage), and as souvenirs of the capital. Twenty-five years ago nothing was more common than to see the walls of poor huts in the country pasted over with such pictures. It was the European who first such pictures are only painted over with such pictures. It was the European who first such pictures are only painted over with such pictures. It was the European who first such pictures are only painted over with such pictures. It was the European who first such pictures are only painted over with such pictures. discovered what ingenious painters and chro-among them two women with octopuses and an In conclusion I wish to emphasize the fact that moxylographers had participated in those despised Okame (Uzume). Of the last he says: "It is the pictures given by Stratz as proofs of the high productions, and I can remember very well a master-piece of fine-art in ivory. Here Okame grade of excellence of Japanese painting, do not

the surprise, almost amounting to horror, that the praise of Gonse, Goncourt and other en-thusiasts for the drawings, and coloured prints of Hokusai, Utamaro, &c., raised in the art circles of Japan. What was thought of these things is shown by the fact that even in my time 25 sen for an excellent Utamaro and ro sen for a very good Hiroshige were considered high prices—pictures for which to-day the art-dealer asks at least a hundred times as much: and only because Europeans, and not Japanese are taken by these things.

Thus all the beautiful psychological contem-

plations through which Stratz wishes to explain the inner nature of Japanese "art" by means of

these pictures, fall to pieces.

Any one unprejudiced can but say that the painters of the vulgar, or let us say, popular school understand very well how to represent outlines of figure and the expression of feelings, although they are mostly somewhat exaggerated or cari-catured, but that all attempts to render the human figure as God has created it, are quite pitiful. In this respect Japanese painting is not to be named in the same breath as European painting. Japanese painters have never taken the trouble to study the human form accurately; for according to the Japanese idea, the naked human form is not at all an object of art. Even Stratz admits this indirectly, when he mentions how the exhibition in Kyoto of pictures of nude female figures by a Japanese educated in Paris roused general indignation. Last year the same painter exhibited in Tokyo several pictures of the nude which were at once wound round with little violet girdles by at once wother round with fittle violet grotees by the police. As I write this, the annual exhibition of works by painters of the European School is being held in Tokyo. The few nude figures are placed in a special, curtained-off room, like certain Pompeiian discoveries in the Museum in Naples. In front of the door stands a watchman who only admits adults. This shows clearly that the representation of the naked body is considered indecent, and that such pictures are looked upon as not belonging to the Temple of Japanese Art. On that account Stratz, who would have intuitive of the pulse was obliged to make the contract. pictures of the nude, was obliged to make use of obscene representations, or parts of such. This he has done in a way painful to the connoisseur of Japan, and frequently not even the perfidious inscriptions have been left out. His Japanese advisers deserve for this the sharpest blame; he could not read the inscriptions himself. It thus happens that the pictures contradict in a comical manner even the meaning given to them. There is (Fig. 94) "a girl in neglige, who enters the room in which her parents sit together engaged in eager conversation." In reality the scene is laid in a brothel and in the room sit, not the parents, but a devoted couple in conversation. The girl evidently expected a more piquant situation for she says, according to the inscription: "Oh, that is nothing peculiar"!

Moreover, for a girl in Japan entering her parents' room in such attire, is just as likely as that a young lady in Europe would go to her parents in the drawing-room dressed in a chemise, and bare-footed. The old man [Fig. 90] who applies himself to pious exercises or exorcisms and is disturbed in his devotions by a sound " is an old sinner, who wandering along wicked ways is startled by a noise (inscription:
"What sound is that? It is to be hoped that the
ichildren have not awakened"!) And then the
"Susanna in the bath." "A young girl surprised
by a man, who, in spite of her opposition makes that the girl's speech printed on the picture words that cannot be given here) shows that she is just the opposite of a chaste Susanna, and that

The four pictures = plunder of noble women

is represented after the decisive gambol (what is meant is probably the dance before the hell of the hidden sun-goddess. E. B.): her garment has slipped down, she presses her knees together and rubs the left fore-arm with the right hand —with the Japanese a sign of great embarras-ment. At the same time her mouth is opened as if in ringing laughter, and the disproportionately large face expresses joy, fright and agitation at the same time. The upper part of the body is treated with great tenderness, is well-rounded and of Rubenesque fullness," etc. And with what does it deal in reality? With a yauming Okame; hideously ugly, for Okame is for the Japanese the type of the most vulgar, sensual woman.

As a matter of fact this figure, as well as the figures with the octopuses are obscene, as every-one knows who has looked at such things from all sides. Certainly, according to Stratz, the artist has accomplished something for which Phidias and Michael Angelo would have envied him: a woman in the greatest embarrassment, her mouth opened as if for ringing laughter, with a face that expresses joy, fright and agitation at the same time. Whoever can understand this is welcome time. Whoever can understand this is welcome to do so! I see only, as I say, a yawning caricature of a woman. In order to make sure I asked a Japanese scholar, a student, a workman and a maid-servant what the figure represents: without a moment's hesitation they all said a yawning Okame.

As moreover, such nelsuks (tobacco-pouch holders) are the only objects for which Japanese applied nude female figures, it is not without interest to notice, that these date back to Chinese influence at the commencement of the 18th century, and that they are imitations of common Chinese seals. They were used quite exclusively by the lowest classes, for a Japanese with any self-respect would have been ashamed to have had such a common ugly thing-according to his

idea-on his person.

On page 163 we find a Hokusai figure, marked: "Embarrassed old age; the seated figure of a half naked old man who, rubs the left fore-arm a half naked old man who, rubs the left fore-arm with the right hand, a sign of the greatest embarrassment with the Japanese, as we have already learnt through the representation of Uzume. All is thin and meagre in the atrophied body of the old man, with the exception of the stomach which is swelled by rice; the whole seems like a Japanese translation of the unhappy Hiob." In reality this "embarrassed old man," this "unhappy Hiob" is an old man who stretches himself most comfortably after a nank Whoever can have Hob" is an old man who stretches himself most comfortably after a nap! Whoever can have suggested to Stratz the strange idea about the "gesture showing the greatest embarrassment among the Japanese," which in truth is only an unmistakable gesture of comfort both in the case of the ivory Okame and in that of the painted old

Figures 60 and 61 " are instances of the delightful way in which Hokusai so often makes fun of what European painters consider indispensable out-lines." In reality the pretended parody is just what Hokusai recommends to his Japanese scholars as indispensable. So that here too we have the exact opposite of what Stratz believes he sees.

When one surveys this long list of misinterpre-tations of pretended typical pictures, one must ask oneself whether Stratz's Japanese helpers and interpreters did not get the best of him.

At all events the products of Japanese art re-produced in the book seem to possess in a very small degree what is said in their praise; namely, that they are highly characteristic in expression; if such grotesque delusions are possible.

The only figures really true to life are the wood-carvings, which are made expressly for Europeans, They are, however, not at all according to Japanese taste, and after the conversations I had with Kyosai—whom Stratz rightly esteems highly—on European and Japanese art, I can imagine the flood of abusive words that he would have vented on a countryman, at any rate, who should represent figures so slavishly true to life. They show us, however, what the Japanese can accomplish when they really study the body.

In conclusion I wish to emphasize the fact that

enter the realm of art, according to the Japanese point of view, but represent a low form of artistic handicraft, which was originally really intended for children and uneducated peasants. Kyosai, however, a real artist, is throughout a caricaturist, and is on that account unsympathetic to the educated Japanese, who looks upon art as some thing very serious.

If anyone should find the above criticism too

severe, I should like to remark that it is far milder than it would have been if a Japanese had written it, or either of the two Europeans to whom, as approved connoisseurs of Japan, I

showed the book.

PROPOSED NEW MINING LEGISLATION.

TRANSLATED BY J. E. DE BECKER, AND

REVISED BY A. R. WEIGALL, M.INST.M.E.

The following is the draft of the new Mining Law which was submitted to the Diet in March last year; and as it is likely to become law in its present, or a slightly modified, form, it should be of interest to foreign investors.

CHAPTER I.—GENERAL PROVISIONS

Art. I .- The expression Mining in this law means prospecting and mining for mineral ores including the ancillary operations of reducing

The expression mineral ore in this law means:— Ores of Gold, Silver, Copper, Lead, Bismuth, Tin, Antimony, Mercury, Zinc, Iron, Iron Pyrites, Chromite, Manganese, Arsenic, Phosphates, Graphite, Coal, Lignite, Petroleum Oil, Asphalt, and Sulphur. It does not, however, include mineral dust (alluvial or sedimentary deposits).

Art. II.—All unmined minerals are the perty of the State.

Art. II .- The term mining right in this law includes both the right of prospecting and the

right of mining.

Persons entitled to a mining right have a right of mining and acquiring, within the limit of their mining areas, the mineral ores in respect to which they have obtained permission: provided that in case of coincident mining areas, persons entitled to mining rights are mutually limited to the exercise of their respective rights.

Art. IV.—No persons other than subjects of the Empire, or companies duly formed in accordance with the laws thereof, are entitled to acquire

mining rights.

Art. V.—Rights and obligations determined by this law as appertaining to persons entitled to mining rights are transferred and pass with the mining rights.

Proceedings taken and acts performed in ac-accordance with the provisions of this law are valid as against the successors of persons entitled to mining rights, landowners, and persons con-

The provisions of this Article are applicable mutatis mutantis both to persons intending to apply, and to persons who have applied, for mining, as well as to their successors.

Art. VI.—When two or more persons jointly

of mining, one of them is to be selected as their representative, and this must be notified to the cannot be changed on account of any correction, When no such notification is under the control of Mines. Increase or decrease or revision of the control of Mines. When no such notification is made, the Chief of area. the Office for the Control of Mines shall designate the representative.

The representative represents, vis-à-vis the

State, persons jointly applying for mining and the persons jointly possessed of mining rights.

Except in cases specially provided for in this law, persons jointly possessed of mining rights shall be considered as having entered into a constant of according to tract of association.

Art. VII.—The expression mine laborer in this law means a laborer employed in mining.

lines descending perpendicularly. The extent of one mining area shall be from 50,000 tsubos (about 42 acres) upwards for coal, and from 5,000 tsubos (about 4 acres) upwards for other minerals, and shall not in either case exceed 600,000 tsubos (about 500 acres); provided, however, that in cases where it is actually necessary for the protection of mining interests, or the division of mining areas, the limit of 600,000 tsubos may be exceeded.

Two, or more than two, mining rights may not be created in respect to the same mining area, except when such rights are created in respect to different kinds of minerals, and in the case contemplated in Article 34.

Art. IX.—No place within 300 ken (600 yards) in every direction from Imperial Palaces, Imperial Detached Palaces, Imperial Shrines and Imperial Mausolea may be made mining areas.

No places within 300 ken (600 yards) in all

directions from fortresses under military or naval jurisdiction, naval ports, ports of strategic im-portance, gunpowder factories, gunpowder magazines, and ammunition store houses, may be made mining areas unless the permission of the competent authorities has been obtained.

No places mentioned in the preceding two paragraphs may be used for mining purposes unless the permission of the respective competent

authorities has been obtained.

Art. X.—No mining operation may be carried on in places within 30 ken (50 yards) in all directions (whether at the surface or in the interior of the earth) from railways, tracks, public roats, canals, rivers and lakes, marshes and ponds, embankments, the precincts of temples and shrines, cemeteries, public gardens, and all other constructions and buildings; nor may such places be used for mining purposes unless the permission of the competent authorities, or the consent of the owner or persons concerned, has been obtained.

Art. XI.—The provisions relating to applica tions for mining are applicable *mutaits* mutandis to applications for the correction, increase or decrease, and revision of land in respect to which application has been made for mining, and to

Art. XII .- The expression mining tax in this law means taxes imposed on mining areas and

on mining production.

Art. XIII.—The provisions of Chapters VI and VIII are not applicable to the mining under-takings of the State.

CHAPTER II.-MINING RIGHTS.

Art. XIV .- Mining rights are to be classed as rights in rem, and the provisions relating to im-movables (with the exception of the provisions of Par. I of Article 179 of the Civil Code) are applicable mutatis mutandis thereto.*

Art. XV.—Mining rights shall be undivisible.

Art. XVI.—Mining rights may not be made the subject of rights other than those of successions. sion, transfer, measures adopted in connection with non-payment of national taxes, and distraint (compulsory execution); but rights of mining may be made the subject of a right of mortgage.

Art. XVII.—The term of a right of prospecting is two years, calculated from the date of record-

Art. XVIII.-The creation, alteration, transfer, extinction, attachment, provisional seizure and provisional disposition of mining rights and rights of mortgage shall be recorded in the Mining

The same applies to the withdrawal of a person jointly entitled to a mining right.

The record mentioned in the preceding para graph shall take the place of registration.

Rules relating to recond will be determined by

Art, XIX.—With the exception of the cases of succession, and of auetion specified in Articles 40 and 41, the matters mentioned in Par, 1 of the preceding article shall not be of valid effect unless recorded.

Art. XX.—Persons wishing to engage in min-ing shall apply to the Chief of the Office for the Control of Mines in respect to prospecting, and to the Minister of Agriculture and Commerce in respect to mining.

Art. XXI.—Persons applying for mining may effect a change in the name of the applicant. In this case, such change shall not be of valid effect unless a notification has been made to the Chief of the Office for the Control of Mines in respect

to prospecting, and to the Minister of Agriculture and Commerce in respect to mining. Art. XXII.—Should the Chief of the Office for the Control of Mines deem land in respect to which application is made for prospecting, suitable for mining, he shall order an application for min-

for mining, he shall order an application for mining to be made.

In the case contemplated in the preceding paragraph, should no application for mining be made within 60 days from the date of service of the order, the application for prospecting shall not be granted.

Art. XXIII.--When it is deemed that the position and shape of land in respect to which application is made for mining differs from the position and shape of mineral formations and that consequently they will be injurious to mining interests, the Minister of Agriculture and Commerce shall order an application to be made for amendment thereof.

In the case contemplated in the preceding paragraph, should no application for amendment be made within 60 days from the day of service of the order, the application for mining shall not be

Art, XXIV.—When it is deemed that the position and shape of land in respect to which appli-cation is made for mining differ from the position and shape of the mineral formations, and that consequently they will be injurious to mining interests, the applicant for mining may apply for an amendment thereof.

Art, XXV.—Mining applicants may apply for an increase or decrease of the area of land in respect to which application has been made.

Art. XXVI .-- In case land, in respect to which an application for prospecting has been made, falls within a mining area belonging to another person at the time of making such application, should it be made for the same kind of mineral, permission shall not be granted in respect to such portion of the land as is coincident with the

mining area.

Art. XXVII.—In case land, in respect to which an application for mining has been made, falls within a mining area belonging to another person at the time when such application is made, should it be made for the same kind of minerals, permission shall not be granted in respect to such portion of the land as is coincident with the mining area. The case contemplated in Article 34 is, however, excepted.

Art. XXVIII.—In case land, in respect to which an application for mining has been made, falls within land under application for prospecting, or a prospecting area belonging to another person, should it be made for the same kind of mineral, the provisions of Par. I, of Article 22 shall be applied mutatis mutandis to the coincident portion of the land.

In the case contemplated in the preceding paragraph, should no application for mining be made within 60 days from the date of service of the order, the Chief of the Office for the Control of Mines shall either grant no permission for prospecting, or cancel the permission for prospecting.

pecting. Art. VII.—The expression mining area in this law means a laborer employed in mining.

Art. VIII.—The expression mining area in this law means an area of land in respect to which mining rights have been registered.

The boundaries of mining areas are determined by straight lines and are limited under these to the same measurement as the surface, the boundary place of registration in a Court.

*When the right of ownership and some other in the same thing are vested an application for mining has been made, is in the same person, the right in rem, is subject to the right of a third person, should it be made for a different kind of mineral, the Chief of the Office for the Control of Mines shall notify the person possessed of the mining right to that effect.

The person possessed of the mining right may himself apply within 30 days from the date of service of the order mentioned in the preceding paragraph, for permission to mine such minerals

The provisions of the preceding two articles do not apply to the case contemplated in Art. 34., or to cases where the previous consent of the person entitled to the mining right has been obtained.

The application mentioned in Par. 1 shall not be granted, if it obstructs the mining operations

of other persons.

Art. XXX.—Applications for mining shall not be granted should they be deemed injurious to the public welfare or unworthy of the undertaking.

Art. XXXI.—In the case of coincident pros-pecting areas, or of coincident mining areas in respect to which application has been made, the person whose application has been despatched earliest shall have the preferential right relative to such coincident portion. When the dates of despatch of applications are identical, the Chief of the Office for the Control of Mines shall notify each applicant to that effect. In this case, the applicants shall arrange the matter between themselves and make a report to that effect within 60

days from the date of sending such order.

In case applicants do not make the report specified in the preceding paragraph, the person entitled to the preferential right shall be determined by means of drawing lots.

The provisions of this article are not applicable to cases contemplated in Arts. 23 and 24, Par. 2 of Art. 29 and Art. 34.

of Art. 29 and Art. 34.

Art. XXXII.—In case a person applying for permission to prospect makes a further application for permission to mine the same kind of mineral, should the land under application be coincident, the application for mining shall be considered to take the place of the application for prospecting on the date of sending the latter application with regard to such coincident portion of the land under application.

The provisions of the preceding paragraph are applicable mutatis mutantis to cases where an application for mining makes a further application.

application for mining makes a further application for prospecting relative to the same kind of

The provisions of the preceding two paragraphs do not apply to applications made after the ex-piration of the term in cases contemplated in Arts, 22 and 23.

Art. XXXIII.-Persons entitled to a right of mining may make application to the Minister of Agriculture and Commerce for the amalgamation or partition of mining areas. The same applies to cases where a portion of a mining area is to be amalgamated with another mining area.

When a right of mortgage has been created should it be desired to make the application mentioned in the preceding paragraph, the con-ment of the mortgagee shall be obtained and ar-rangements made respecting the rank of the right of mortgage

Art. XXXIV.—Should it be necessary, on account of the position and shape of mineral formations, to dig into a mining area belonging to another person, an amendment of the mining area

may be applied for.

Art. XXXV.—The provisions of Par. 1 of Art. XXII., Par. 1 of Art. XXIII., Art. XXIV. and XXV., and Par. 3 of Art. XXXI. are applicable mutatis mutandis to mining areas.

In cases corresponding to Par. 1 of Art. XXII. and Par. 1 of Art. XXIII., should no application be made within 60 days from the date of service of the order, cancellation shall be made by the Chief of the Office for the Control of Mines in

Chief of the Office for the Control of Mines in respect to rights of prospecting and by the Minister of Agriculture and Commerce in respect to rights of mining.

When a right of mortgage has been created, should it be desired to make application for a decrease of a mining area according to Art. XXV., the consent of the mortgagee shall be previously obtained.

in respect to rights of prospecting, and by the Minister of Agriculture and Commerce in respect to rights of mining.

With regard to the revision mentioned in the preceding paragraph the provisions of Par. 2 of the preceding article are applicable mutatis

Art. XXXVII.—When mining operations are deemed injurious to the public welfare, the Office for the Control of Mines shall cancel the right of prospecting and the Minister of Agriculture and

Commerce shall cancel the right of mining.

Art. XXXVIII.—If, without any valid reason, a person entitled to a mining right does not commence operations within one year from the date of the record in the Mining Register, or if he has suspended operations for more than one year, or if he has not mined in accordance with the scheme of work, the Chief of the Office for the Control of Mines may cancel the right of pro-specting and the Minister of Agriculture and

Commerce may cancel the right of mining.

Art. XXXIX.—In case a person entitled to a mining right fails to comply with the order specified in Art. 70, the Chief of the Office for the Control of Mines may cancel the right of prospecting, and the Minister of Agriculture and Commerce may cancel the right of mining. Art. XL.--When a right of mining has been

cancelled the Chief of the Office for the Control of Mines shall give immediate notice to any mortgagee thereof.

The mortgagee may, within 30 days from the date of receipt of the notice mentioned in the preceding paragraph, demand that the right of mortgage be put up to and sold at public auction. Cases where cancellation of a right of mining is

of Art. 36 and Art. 37 are, however, excepted.

Rights of mining shall continue to be valid, until the time mentioned in the preceding paragraph, or the day on which the auction procedure has been completed, so far as the object of the public auction is concerned.

The proceeds of the auction shall be applied to the expenses of the auction and to the repay-

ment of monies owing to the mortgagee; the balance shall revert to the Treasury. Purchasers by auction shall be deemed to have had the right of mining transferred to them at the

ime of the cancellation thereof.

Art. XLL.—The provisions of the preceding article are applicable mulatis mulandis to cases where a person possessed of a right of mining has

relinquished his business.

Art. XLII.—Persons possessed of mining rights shall hand in a scheme of intended operations to the Chief of the Office for the Control of Mines as determined by Order. The same is applicable to cases where a change has been made in the programme.

Persons possessed of mining rights may engage in mining unless in accordance with a regular scheme of operations.

Art. XLIII .- The Chief of the Office for the Control of Mines may point out his reasons and order alterations to be made to schemes of work.

The schemes altered in accordance with the provisions of the preceding paragraph shall not be changed unless the permission of the Chief of the Office for the Control of Mines has been obtained.

Art. XLIV.—Persons having rights of mining shall keep a plan of the interior of the mine and a mining book at their mining offices, as determined by Order; and duplicate copies of the same shall be handed in to the Chief of the Office for

the Control of Mines.

Art. XLV.—Persons having rights of mining shall hand in, to the Chief of the Office for the Control of Mines, a statement of particulars relating to their mining operations as determined by

Art. XLVI.—Mining products acquired in the course of prospecting may not be disposed of unless the permission of the Chief of the Office for the Control of Mines has been obtained.

Art. XXXVI.—In case an application for mining has been granted in mistake or error, revision of the mining area shall be ordered or cancellation of the mining right shall be made by the Chief of the Office for the Control of Mines is been granted.

Art. XXXVI.—In case an application for mining has been granted in mistake or error, rights, or persons interested, may apply to the land cannot be employed for the purpose for cancellation of the mining right shall be made by actual investigation to be made in respect to adtenuate the land, the remaining portion of the land cannot be employed for the purpose for cancellation of the mining right shall be made by actual investigation to be made in respect to adtenuate the land, the remaining portion of the land cannot be employed for the purpose for which it was used in the past, the land-owner may demand the purchase of the whole land.

Art. LVII.—When land is to be employed for the purpose for the Control of Mines is a control of Mines in the land in the land, the remaining portion of the land, the remaini

Applicants must furnish labour and materials sary for the investigation mentioned in the preceding paragraph.

CHAPTER III.—EMPLOYMENT OF LAND.

Art. XLVIII.-The expression "persons concerned" in this chapter includes persons posses ing rights relative to land which may be employed or acquired prior to the service of the notice mentioned in Articles 50 to 52 and Article 54; also those who have succeeded, subsequent to the service of the notice, to rights which existed prior

to the service of such notice.

Art. XLIX.—The expression "compensation" in this chapter includes consideration, land-rents, and all other compensation for loss generally

accruing to land-owners or persons concerned.

Art. L.—When it is necessary for the purpose of making an application to be allowed to mine, or when it is necessary for mining purposes, persons intending to apply to be allowed to mine, mining applicants, and persons entitled to mining rights, may, upon receiving permission from the Chief of the Office for the Control of Mines, enter upon land belonging to other persons to make

when persons who have obtained the permission

When persons who have obtained the permission-mentioned in the preceding paragraph intend to enter upon land belonging to others, they shall previously notify the possessors of such land. Art. Li.—If necessary to the survey or investi-gation which is to be made according to the provisions of the preceding article, any object forming an obstacle may be removed after obtain-ing the permission of the Chief of the Office for the Control of Mines. the Control of Mines.

In case persons who have obtained the permission specified in the preceding paragraph intend to remove any object forming an obstacle, they shall previously notify the owner or possessor thereof.

Art. LII .- If necessary to avert imminent danger relative to mining, persons entitled to mining rights may, upon receiving permission from the Chief of the Office for the Control of Mines, immediately enter upon or use land belonging to other persons.

In the case contemplated in the preceding paragraph, persons entitled to mining rights shall, without delay, notify the possessor of the land.

Art. LIII.—With regard to loss sustained by land-owners or persons concerned in accordance with the preceding three articles, compensation for same must be paid when demanded.

Art. I. W. Person entitled to mining rights

Art. LIV.—Persons entitled to mining rights

Art. LIV.—Persons entitled to mining rights may use lands belonging to other persons when necessary for the following purposes:—

1. Boring, opening shafts or tunnels;
2. Providing depôts or store-places for ores, earth and stones, explosive compounds, lumber, fire wood and could relay or appearance. fire-wood and coals, slag or ashes;
3. Constructing reducing plants

3. Constructing reducing plants;
4. Laying or constructing railways, tracks, roads, canals, drains, flumes, ponds, and wells, wire rope-ways or electric wires;
5. Building and constructing other works or constructions necessary to mining.
When persons entitled to mining rights intend to use land belonging to other persons in accordance with the provisions of the preceding paragraph, the permission of the Chief of the Office for the Control of Mines shall be obtained.
When the Chief of the Office for the Control

When the Chief of the Office for the Control of Mines has given the permission mentioned in the preceding paragraph, notice to that effect shall be given to the land-owners and persons concerned.

Subsequent to giving the notice mentioued in the preceding paragraph, persons entitled to mining rights shall confer with the land-owners and persons concerned with a view to the acquisi-

tion of rights relating to the land.

Art. LV.—When land has been used for a period exceeding three years, or the shape or nature of the land is altered, the owner may de-mand the purchase of the land,

Art. LVI.-If owing to the purchase of a por-

cerned.

Art. LVIII.—If, owing to the employment of a portion of land employed (hired) or purchased, the value of the remaining portion of the land is reduced, or any loss sustained relative to such remaining portion, compensation for same shall be

Art. LIX.—If, owing to the employment of land on lease or purchase, necessity arises to build, rebuild, enlarge or repair, passages, drains, fences and other constructions, compensation shall be

Art. LX.—If, subsequent to the service of the notice mentioned in Article LIV, it is intended to change the shape and nature of the land, or to build, rebuild, enlarge, or extensively repair any constructions, or to affix or add any objects, the land-owner or persons concerned shall obtain permission of the Chief of the Office for the Control of Mines. Persons who have done the above acts without obtaining such permission are pre-cluded from demanding compensation relative thereto.

Art. LXI.-Persons entitled to mining rights shall pay compensation in respect of any loss sustained by the land-owner or persons concerned on account of abandonment or alteration of enterprises subsequent to the service of the notice specified in Article LIV.

Art. LXII.-Land-owners and persons concerned may require persons entitled to mining rights to

furnish proper security relative to compensation.

Art. LXIII.—When an arrangement has been made, a decision become conclusive, or a judicial judgment rendered regarding the employment or purchase of land, even though a decision relative to the amount of such compensation or security has not become conclusive, a person entitled to a mining right may employ or purchase the land by depositing (in a Public Deposit Office) compensa-tion, or by furnishing security in accordance with the said decision.

Art. LXIV.—In case a person entitled to a mining right has made neither payment nor deposit of compensation, nor tendered security, landowners and persons concerned may refuse to permit the employment of land.

Art. LXV.-In case land is employed by pur chase, the ownership of the land shall be acquired by the person entitled to the mining right, and other rights over the land shall be extinguished

from the time of the employment.

In case of land employed (on lease), the right of employment shall be acquired by the person entitled to the mining right from the time of employment, and the exercise of other rights over the said land shall, with the exception of rights which do not obstruct its use, be suspended during

the term of employment. Art. LXVI.-When the employment of land has ceased, the person entitled to the mining rights shall return the land and restore it to its original state, or pay compensation for any loss arising on account of not restoring it to its original

Art. LXVII.—Preferential rights, rights of pledge, or rights of mortgage, may be executed in respect to any compensation payable to a debtor on account of employment or purchase of the matter forming the subject of such right; but attachment must be made before the payment of

Art. LXVIII .- The provisions of this chapter are applicable mutatis mutandis to rights relative to the use of water.

CHAPTER IV .- MINING POLICE.

Art. LXIX.—Police affairs relating to mining shall be conducted by the Minister of Agriculture and Commerce and the Chief of the Office for the Control of Mines, as determined by Order.

Art. LXX,-When danger is apprehended in respect to mining works, or when they are deemon mining productions shall be one per cent, of
the value thereof.

Agriculture and Commerce shall order persons

With regard to the value of mining productions,

With regard to the value of mining productions,

agriculture and Commerce shall order persons

With regard to the value of mining productions,

The property of the principal markets shall

Art. LXXI.—The Chief of the Office for the Control of Mines may order persons entitled to the right of mining to appoint or make a change in the appointment of managers to be in charge of technical matters.

Rules relating to the qualification and functions of managers shall be determined by Order.

Art. LXXII.-Even subsequent to the termina-Art. LEARLY—Even subsequent to the termina-tion of a mining right, the Minister of Agricul-ture and Commerce, and the Chief of the Office for the Control of Mines may, within a period of one year from such termination, order a person entitled to such mining right to take precaution ary measures against danger in accordance with

the provisions of Art. 70.

A person who has received the order mention ed in the preceding paragraph shall be considered to be a person entitled to mining rights so far as the object of taking precautionary measures

against danger is concerned.

mining shall establish regulations relating to the hire and employment of mine labourers, and obtain official permission re same from the Chief of the Office for the Control of Mines.

Art. LXXIV .- A person entitled to mining rights shall, in accordance with the terms of Orders in that behalf, provide and keep a Mine

Labourers Register at his mining office.

Art. LXXV.—When a person entitled to equal to towns or villages. mining rights has discharged a mine labourer, he shall, upon demand, give to the labourer a certificate showing the period of his engagement, the class of work in which he has been employed, his ability, his wages, and the cause of his dis-

Art. LXXVI.-A person entitled to mining rights shall determine two or more than two dates in each month and pay to the mine labourers, in cash, their wages at such specified times.

Art. LXXVII.-The Minister of Agriculture and Commerce may limit the age of mine labour-ers, working hours, and limit the class of female and child labour.

Art. LXXVIII.--In case a mine labourer has been wounded, lallen ill or died owing to mining operations on account of no gross fault of his own, the person entitled to mining rights shall grant relief to the labourer or his surviving relatives.

CHAPTER VL-MINING TAXES

Art. LXXIX.--Mining Taxes will be imposed upon persons entitled to mining rights. No taxes on mining areas will be imposed on persons entitled to the right of prospecting.

With regard to iron ores, no tax on the mining production will be imposed.

Art. LXXX.—With regard to mining, no business tax will be imposed upon persons entitled to mining rights.

Art. LXXXI.-The tax imposed upon mining Art. LXXXI.—The tax imposed upon mining areas shall be 40 sen per year for each and every 1,000 tsubo (4/5ths of an acre), and any fraction of 1,000 tsubo (4/5ths of an acre) shall be considered as 1,000 tsubo (4/5ths of an acre).

Art. LXXXII.—During December in each year, the tax imposed upon mining areas for the following year shall be paid in advance.

With the exception of the case contemplated in Paragraph 1 of Article 23, taxes on mining areas

Paragraph 1 of Article 33, taxes on mining areas which become payable or difficient owing to recording the creation or alteration of a right of mining, and which are for the year of the record, shall be paid immediately.

Amount of taxes imposed upon mining areas payable in accordance with the preceding paragraph, will be calculated at the monthly rate. The same is applicable to taxes for the last year of the term of a right of mining.

Art. LXXXIII.—The amount of tax imposed

on mining productions shall be one per cent, of

(hired) or purchased, compensation for same shall Mines may take the measures mentioned in the be paid to the land-owner and to the person conpreceding paragraph. each case

Art, LXXXIV.—Taxes on mining productions for the previous year stall be paid during March in each year, provided, however, that they shall be paid immediately in case of the disposal of mining productions obtained in the course of prospecting and in the case of transfer or extinc

tion of rights of mining.

Art. LXXXV.—Persons jointly entitled to mining rights shall be jointly and severally responsible for the payment of taxes.

Art. LXXXVI.—Tax collectors may inspect

and examine documents and objects relative to

and examine documents and objecting operations.

Art. LXXXVII.—Hokkaido, Urban, and ordinary Prefectures, as well as Cities, Towns and Villages may levy an additional tax on the mining taxes not exceeding fifteen (15) per cent. of the original tax.

c ainst danger is concerned.

CHAPTER V.—MINE LABOURERS.

Art. LXXIII.—Persons entitled to rights of ining shall establish regulations relating to the mining operations nor taxes specially based upon mining operations nor taxes specially based upon mine labourers, mining productions, mining areas, constructions, instruments, or machinery.

The provisions of the two preceding paragraphs are applicable mutatis mutandis to "Ku" (administrative divisions), "Magiri," (divisions of a county) and islands in Hokkaido and Okinawa Prefecture, and to those places considered

CHALTER VIII .-- PETITIONS, SUITS AND DECISIONS.

Art. LXXXVIII.—A person dissatisfied with a permission given, or refusal of application made, relative to mining may lodge a petition, and, if he consider his rights unlawfully injured, may bring an administrative suit.

Art. LXXXIX.—A person who has been re-fused the consent mentioned in Article 10, or who is unable to obtain such consent, may apply to the Chief of the Office for the Control of Mines for a decision.

A person dissatisfied with the decision mentioned in the preceding paragraph may lodge a petition, and if he consider his rights unlawfully

injured, may bring an administrative suit.

Art. XC.—Persons dissatisfied with the cancellation of a mining right may lodge a petition, and if they consider their rights unlawfully injured,

they may bring an administrative suit.

Art. XCI.—In case no arrangement has been made, or an arrangement cannot be made as to the employment of land on lease or purchase, compensation, or security, persons entitled to mining rights may apply for the decision of the Chief of the Office for the Control of Mines.

Persons dissatisfied with the decision mentioned in the preceding paragraph may lodge a petition, and, if they consider their rights unlawfully in-

jured, may bring an administrative suit.

Art. XCII.—Neither petition nor administrative suit in accordance with this law may be brought after the expiration of thirty days from the date of service of the notice of disposition or decision.

With regard to persons who have not received notice of disposition or decision, the term mentioned in the preceding paragraph shall be calculated from the date of public notification.

CHAPTER XIII.-PENAL PROVISIONS.

Art. XCIII.-Persons who have mined minerals without possessing mining rights, or who have obtained mining rights by fraudulent acts, shall be punished by a fine not exceeding yen 500.

Persons who, through error or mistake, have mined minerals without possessing mining rights shall be punished by a fine not exceeding yen

100.

Art. XCIV.-In the case contemplated in the preceding Article, minerals mined shall be confiscated; and in case they have been either trans-ferred or consumed, the price thereof shall be collected.

Agriculture and Commerce shall order persons with regard to the value of mining productions, entitled to mining rights to take precautionary measures or to suspend mining operations.

When necessary in order to avert imminent danger, the Chief of the Office for the Control of Commerce. With regard to productions relative orders mentioned in Art. XCV.—Persons who have engaged in mining or used land for the purpose of mining contrary to the provisions of Par. 3 of Article 9 and Article 10, or who do not comply with the danger, the Chief of the Office for the Control of Commerce. With regard to productions relative

Art. XCVI.—Persons who have infringed the provisions of Article 42 or Par. 2 of Article 43, or who do not comply with the orders mentioned in Paragraph 1 of Article 43 or par. 1 of Article 71, or who have infringed the provisions of orders issued in accordance with Arts. 77 or 78, shall

be punished by a fine not exceeding yen 150.

Art. XCVII.—Persons who have infringed the provisions of Arts 44 to 46, 74 and 76, shall be punished by a fine not exceeding yen 100.

Art. XCVIII.—Persons who have removed any

obstruction without having obtained the permission mentioned in Par. 1 of Article 51, or who have infringed the provisions of Article 73, shall be punished by a fine not exceeding yen 50.

The same penalty shall be imposed on persons

who have refused to allow competent officials to inspect writings or objects relative to mining or obstructed such inspection. Should, however, express provisions governing the case exist in the Penal Code, punishment shall be inflicted in accordance with that Code.

Art. XCIX.—Persons who have infringed the provisions of Art. LXXV, shall be punished by a fine not exceeding yen 20

Art. C.—Persons who have, by fraud or any other dishonest acts, evaded, or attempted to

Art. CI.—Acts of the agents of a person entitled to mining rights, of the head or members of his family, persons residing with him, employees, mine-labourers, and of other persons employed by and serving under him, shall be considered as his acts, and the penal provisions of this law shall be applied to him.

The same holds good with regard to the penal provisions of any order which may be issued by virtue of this law, except when any special pro-

visions to the contrary are included in the order.

Art, CII.—In case a person entitled to mining rights, is a juridical person, a minor, or a person interdicted from the management of his property, the penal provisions applicable to him by virtue of this law, or the provisions of any order which may be issued in accordance with this law, shall be applied to the representative of the juridical person or to the legal representatives. Provided, however, that minors who have obtained permission to engage in mining in accordance with Article 6 of the Civil Code shall not come under

Art. CIII.-With regard to persons who have Art. CIII.—With regard to persons who have infringed either the provisions of this law or those of any order issued by virtue of this law, the provisions aggravating penalties on account of offences, and the provisions governing the case of several offences being committed by the same person, shall be applied.

SUPPLEMENTARY PROVISIONS.

Art. CIV .-- This law shall be enforced from the

art. Ctv.—Instaw shart be enforced from the 1st of July of the 35th year of Meiji (1902).

The Mining Regulations are hereby abolished.

Art. CV.—Permission for prospecting given under the Mining Regulations shall be considered as the record of the right of prospecting.

Art. CVI.—Grants of leases given in accordance with the Japanese Mining Law, and mining privileges granted in accordance with the Mining Regulations shall be considered as records of rights of mining. Provided, however, that those privileges which have been granted for a limited time in respect to mining areas containing less than the minimum extent determined by Par. 2 of Art. 4x of the Mining Regulations shall become extinct at the expiration of such limited term.

Art. CVII.—Mining lands belonging to various authorities prior to the enforcement of this law shall be classed as mining areas, and they shall be considered to have been duly recorded on the

the Mining Regulations shall be considered as a

Art. 72, shall be punished by a fine not exceed-term of one year will be calculated from the date of extinction of such permission or privilege.

Art. CX.—Persons who have obtained permission of lease according to the Japanese Mining Law, and who have obtained mining privileges according to the Mining Regulations, shall pay in the balance of the taxes imposed on their mining areas for the 35th year of Meiji (1902) within 60 days from the date of the enforcement of this law, such tax being calculated at the monthly rate.

Art. CXI.—Taxes imposed on mining productions for the 35th year of Meiji (1902) shall be levied on minerals produced previous to the enforcement of this law.

Art. CXII .- The provisions of Article 87 will not be applied to taxes for the 35th year of Meiji (1902).

Art. CXIII .- In case an act to which the enal provisions of the Mining Regulations are applicable has been committed previous to the enforcement of this law, such penal provisions of the Regulations shall be applied even subsequent to the enforcement of this law.

Art. CXIV.—With regard to any disposition, procedure, or other acts made in accordance with the Mining Regulations, they shall be conevade, the payment of mining taxes, shall be sidered as made in accordance with this law if punished by a fine equal to three times the corresponding provisions exist in this law.

Art. CXV.—With regard to the extent of a

Art. CXV.—With regard to the extent of a mining area in respect to which application has been made for prospecting or mining according to the Mining Regulations, the provisions of Par. 2 of Article 41 of the Mining Regulations shall be

Art. CXVI.—In cases where a petition is to be lodged or an administrative suit filed in accordance with this law, relative to a matter in respect to which petition or administrative litigation is permitted in the Mining Regulations, the period thereof shall be determined in accordance with the provisions of those regulations.

FIRES.

Fire broke out on Jan, 3rd at 9.30 p.m. at Fujieda-machi, near Shidzuoka. As a strong westerly wind prevailed at the time, the flames spread, burning down 252 buildings including the Fujieda theatre, the branch of the Kyosei Bank, the Buddhist temple, Renshoji, and a police station, and injuring 113. Two men were killed and two or three are missing. When the fire began the theatre was open and a performance going on at which about a thousand persons were present. All are reported to have escaped after a scene of great confusion. The fire was due to a charcoal fire left carelessly in the bath-room of a rice dealer, K. Kobayashi. The loss is estimated at yen 300,000.

On the afternoon of Dec. 30th, fire occurred at the old fort off Minami, Shinagawa, destroying a shed and three junks. Some children, it is said, lighted a fire to warm themselves, and this accidentally led to the outbreak.

Aoyama, proprietor of the Aoyama Printing Office, Aioicho, Yokohama, was arrested on Dec. 31st. The charge is reported to be attempted incendiarism.

Fire broke out on the night of Jan. 7th in a godown belonging to Messrs Berrick Bros. on lot No. 75, Yokohama, behind the offices of the firm The alarm was promptly given and in a few minutes many streams of water were playing on the burning building. The night was, fortunately, calm, and the fire was confined to the structure in which it started, though for some time adjacent places, date of putting this law into operation.

Art. CVIII.—A record of pledge of a right of mining which has been made in accordance with the neighbourhood.

the mining regulations shall be considered as a record of a right of mortgage.

On the evening of Jan. 6th, fire broke out in the Art. CIX.—The provisions of Art. 72 shall be applied in cases where permission for prospecting or mining privileges has become extinct prior to four. The cause was a charcoal fire in a hibachi.

Alews says:—

A more convincing judgment has seldom been divined in a convincing judgment has seldom been divined in a delivered yesterday afternoon by Sir Hicam Wilkinson in the case of the four. The cause was a charcoal fire in a hibachi.

THE "EMPRESS-QUANGTAI" COLLISION.

We are indebted to the N. C. Daily News for the following summary of the finding delivered by Sir Hiram Wilkinson, Chief Judge of H. B. M's Supreme Court at Shanghai, in the action brought by the Imperial Chinese Government, owners of the Chinese cruiser Quangtai against the C.P.R., owners of the British steamship Empress of India.

The finding took over three-quarters of an hour to read and occupies many columns in our Shanghai contemporaries. His Lordship first held that the vessels came within the rule that any vessel overtaking another shall get out of the way of the other, and that the burden of proof was on the defendants to show an excuse for the collision. This burden the defendants had endeavoured to discharge by alleging that the mail steamer would have passed the cruiser at a dis-tance of about a quarter of a mile had not the cruiser starboarded her helm in order to get out of the way of a junk, which was slightly on her (the cruiser's) port bow. This statement was put at issue by the plaintiffs and the evidence was very conflicting. The naval assessors were, howvery conflicting. The naval assessors were, how-ever, clearly of opinion that the cruiser did not starboard and after carefully considering their reasons and the evidence his Lordship concurred. This conclusion was supported by the plans put in and also by the record of times, from which his Lordship deduced that the collision could not have occurred in the way suggested by the defendants, and that the distance between the two vessels at the time the cruiser was alleged to have starboarded must have been considerably less than those on the Empress of India supposed. The evidence in regard to the junk was analysed closely and the Assessors came to the conclusion that there was no junk at all, but that what was seen from the Empress was the loom of the fore part of the cruiser with the topmast housed. As to the widening out of the stern light of the cruiser on the mail steamer's starboard, which was another argument in favour of the theory that the cruiser had starboarded, the Court held that the first widening out to one point was explained by the two vessels being on parallel or almost parallel courses, while, as to the second widening, its cause was that the mail steamer was overhauling the cruiser on a course that was converging with that of the cruiser, the two vessels being much nearer than was realised on the mail steamer. The statement entered in the *Empress's* log book by a passenger represented in the Court's opinion what would present itself to a spectator in the over-taking vessel when she arrived in the position he described with regard to the overtaken vessel, the two vessels being on convergent courses. It was, however, no proof that the *Quangtas* starboarded. His Lordship found that the collision was brought about by the alteration of the course of the mail steamer at 11.38 so as to cross the course of the cruiser, and a failure thereafter to keep a proper look-out. The responsibility for this failure was on the officer of the watch on the bridge, on whom it was the more incumbent to keep a good look out in that he was hauling in his own vessel more closely to the course of the cruiser. His Lordship was satisfied that he did not keep a good look out and that the collision took place in consequence. The Court was further satisfied that the collision could not have taken place as stated in the preliminary act of the cruiser and there were also divergences in the statements of the cruiser's witnesses, but these were accounted for by the different positions in which the men were placed and there was no need to doubt their bona fides. His Lordship was sorry to hear the suggestion made that the commander of the cruiser went down dethe commander of the cruiser went down de-liberately, and held that the statement had been distinctly disproved. His Lordship found that the Empress of India was alone to blame and made the usual decree against the owners for damages and costs, with the usual reference to the Registrar and merchants.

Commenting on the finding, the N.-C. Daily News says :-

M. S. Empress of India. Admiralty Courts have a weakness in cases of this kind for finding both ships to blame and dividing the loss, and a clear, fully-reasoned decision like that delivered yesterday, in which both Assessors concur, is admirable in itself, unpleasant as it must necessarily be to the Canadian Pacific Railway Company. The Chief Justice found for the Chinese cruiser on every point, and it will be seen with satisfaction that His Lordship was careful to absolve the captain of the cruiser from the charge that he committed suicide. It speaks well for the officers and men of the cruiser, and especially well for the councel, that they have surmounted so well the disadvantages under which, in the absence through death of their captain who was in charge of the navigation at the time, they laboured in having their evidence pitted against that of a number of highly-trained British officers. Great sympathy must be felt with Captain Marshall, who was only called to the bridge of his steamer at the last moment but there can be no question that substantial justice has been done, in a collision which, occurring as it did in the open sea, was so easily avoidable and so entirely unnecessary.

INTERPORT FOOTBALL.

Yokohama still retains its preeminence in Rugby football, defeating Kobe for the second time by two tries to nil in the Interport Rugby match on Saturday. The game was keenly contested all through and aroused a good deal of the second took place.

tested all through and aroused a good deal of excitement in Kobe, where the event took place.

Commenting on the Interport Rugby Match playded at Kobe on Saturday, the Kobe Herald says:—
It was a fast and exciting game but rather ragged at times. The visitors showed better combination and their passing was superior to Kobe's. Their forwards were not only a heavier let although and their passing was soperar to be a more forwards were not only a heavier lot, although they did not give so much proof of this in the scrums as might have been expected, but they had the knack of feeding their three-quarters better than the Kobe men did. The Kobe three-quarters line did not figure so well as their friends predicted, nor did they play anything like such a fast game as the Yokohama three-quarters. There was some good tackling on both sides and most of the were rendered fruitless by the clean and tive work of the backs. That the best team effective work of the backs. That the best team won there is no doubt, and Kobe deserves praise for her plucky defensive game.

THE LAW COURTS.

CLAIM FOR FUNERAL EXPENSES.

The hearing of this case, instituted by the representative of Mr. Chris. Holgate, undertaker, No. 81, Bluff, Yokohama, against Mr. S. Goorman, staying in an hotel at No. 119, claiming yen 75 and costs, began in the Yokohama Local Court before Judge Nagatsuka on Jan. 6th. Plaintiff's complaint was presented by Mr.

Plaintiff's counsel asked the Court to make an order for the payment of yen 75 and costs. He stated that defendant is a Jew and calls himself a Russian subject but counsel after making inquiry at all the consulates in Yokohama found that he was not a subject or citizen of any of the treaty Powers. On Nov. 5th last, Mr. D. H. Harman died, and defendant, who was a relative of the deceased, asked plaintiff to defray the expenses of the funeral—yen 60 for coffin, etc., and yen 15 for coolie bire. Defendant later refused to pay

Miss Goorman said that her father never asked plaintiff to defray the money expended as fune-ral expenses. When Mr. Harman died his wife came to the house of defendant and simply asked him to be present at the funeral rites. This was This was all that defendant had do with the obsequies.

The Japanese interpreter reminded the Court that defendant was a Russian and could not understand English very well.

Plaintiff's counsel asked the Court for leave to examine Mr. Samuel Brandenstein, No. 124, Yokohama, as a witness who knew of the pro-

CUSTOMS DECISION.

The Director of the Yokohama Customs delivered on Dec. 30th a decision on a protest filed by the American Trading Company, No. 28, Yokohama. The firm imported porcelain jars Vokohama. which were intended to be re-exported after filling them with iodide, on which goods the appraisers imposed 20 per cent ad valorem duty in accordance with No. 468 of the general statutory tariff.

The importers protested that the jars should be The protest was rejected.

The same official rendered on Dec. 16th a decision on a protest instituted by Messrs Singleton, Benda & Co. L'td. No. 96, Yokohama. The firm imported mirror glass, silvered, both concave and convex, on which the appraisers imposed 20 per cent ad valorem duty under No. 172 of the tariff The importers contended that the goods should be dealt with under No. 168 of the same tariff. The protest was sustained on the ground that though the glass in dispute was made concave and con-

vex yet it was plate glass in nature.

On the same day, the Director of Customs gave another decision on a protest brought by the China and Japan Trading Company, Ltd, No. 89, Yokohama. The foreign firm imported a certain number of pencil holders on which the appraisers imposed ao per cent. ad valorem duty in accordance with No. 27. of the tariff, but the vex yet it was plate glass in nature. appraisers imposed 20 per cent. au valoren duty in accordance with No. 271 of the tariff, but the importers held that the goods should be subject to duty under No. 298 as stationery at 15 per cent. ad valoren duty. The protest was rejected on the ground that the article in dispute was a kind of stationery made of metal to carry people. kind of stationery made of metal, to carry pencils in the pocket.

in the pocket.

Mr. H. Minakami, Director of the Yokohama Customs, gave a decision on Dec. 16th on a protest instituted by Messrs Gysin and Schoeninger, No. 93, Yokohama. The firm imported steel bars, not exceeding a quarter of an inch, with certificate of origin, on which the appraisers imposed received duty of the rate of year \$8.2 per 100. specific duty at the rate of yen 1.81,0 per 100 specific duty at the rate of year 1.01, he took in accordance with the conventional tariff between Japan and Germany. The firm contended that the duty should be ad valorem 1½ per cent, under the same tariff. The protest 71/2 per cent, under the same tariff. rejected on the ground that steel bars exwas rejected on the ground that steet bars ex-cepting those that exceed a quarter of an inch are all to be comprised in the rate of yen 1.81% per 100 kin under the stipulation of the tariff, which rate is also provided in the conventional tariff between Japan and Great Britain.

NEWS OF THE WEEK.

Princesses Fumi and Yasu (daughters of the Emperor) will leave on Jan. 7th for Kamakura, where they will stay during the cold season.

T. Batchelor, for whom Mr. Amano, lawyer, appeared. Defendant was represented by his second daughter, Miss T. Goorman, who was companied by a Japanese interpreter.

Club, Mr. H. C. Austen, is an old Yokohama boy.

The Yorodau announces that a Russian attired in Japanese costume was arrested on Dec. 26th at the village of Iwane, Kimitsu, Chiba prefecture, by the Kisaradzu police on suspicion of being a spy. The paper adds that the foreigner had a very detailed map of Japan.

Glasgow telegrams of Dec. 6th say that the speed trials of the battleship Libertad, which, with her sister ship, the Constitution, has been sold to Great Britain by the Chilean Government, have resulted in an average of 20.3 knots per hour, thus showing that she is the fastest battleship afloat.

The American Board of Foreign Missions has issued a statement concerning the ravages of the strange epidemic known as the "sleeping sick-ness," now prevalent in certain parts of Africa. Notwithstanding all efforts on the part of the British authorities there is no abatement in the ravages of the disease in Uganda. No less than 68,000 persons have died of it, 10,000 within the last five months.

mise between the parties with regard to the funeral expenses. The Court granted consent at Burnley, as a protest against what they call with leisure to explore the by-ways of the history and adjourned the case till Jan. 18th at 10 a.m. "the Americanisation of the weaving industry." of science would compile a sympathetic account

The employers proposed a reduction in the weavers, in consideration of relieving them of certain duties, which would, in future, be attended to by extra hands, thus enabling the weavers to give their entire attention to their specialty. The strike is the first of the kind in the cotton districts of England.

A Montreal telegram dated Nov. 25th says:— The tender of the Allan Line for the fast Atlantic mail service is now pratically accepted, and an official announcement may shortly be expected. The contract will date from August 1st, 1904, and will run for two years. Two new vessels are being built with turbine engines, and of 17 knot speed, which will cut the trip short by almost a day. They contract also provides for carrying British mails to Canada.

The Westminster Abbey authorities declined to allow the body of Herbert Spencer to be sepultured in the British Valhalla. They were informally approached, but expressed regret that it was impossible. The question of religion could not have entered into the decision, as Darwin is buried there. Mr. A. J. Balfour, the Prime Minister, who had many controversial bouts with the dead philosopher, expressed himself favourably to buried The Westminster Abbey authorities declined to philosopher, expressed himself favourably to burial in the Abbey, but the Dean and Chapter proved

A Moscow dispatch of Dec. 6th reads:-Maxim Gorki is now a marked man under the Russian censorship. Mr. Skirmunt, a wealthy admirer of the tramp novelist, who published his works in Moscow, has been sent to Siberia for five years. Skirmunt is not a regular publisher, but he thought to benefit the Russian people by devoting a large sum to circulating Gorkii's works.
These are now being subjected to careful reexamination by the censorship, and several have been suppressed, though formerly they were allowed to circulate freely.

An Ottawa telegram of Nov. 26th said: Mr. Alexander McLean, of Ottawa, has been ap-pointed Commercial Agent for Canada to Japan, Mr. McLean is best known as the St. Noir member of the firm of McLean & Roger, which published the Ottawa Times in the early seventies, and afterwards became contractors for the Parliamentary and departmental printing. Later on the firm was for a short time at the head of the Montreal Herald. Mr. McLean is an able writer, and has a thorough knowledge of the trade of the Dominion. He will make a good business representative.

A wonderful case of anæsthesia under terrible injuries has just occurred in Paris. A young married lady, Mdme. Deplats, fell in her room in a fit of giddiness, upsetting a lamp, from which her clothing caught fire. The lady's husband found has a proposition, and suffering from year. found her unconscious, and suffering from very severe burns about the lower limbs. At the sound of his voice she recovered consciousness, but seemed to suffer no pain, and to be quite unaware of her condition. She merely urged him to "see that the soup does not boil over" At the hospital she displayed similar freedom from discomfort, to the utter bewilderment of the doctors, considering the extent of her injuries. Death took place within a few hours.

Some interesting facts are given by the Rev. W. R. Mounsey, secretary to the Bishop of New Guinea, concerning a tribe of Papuan cannibals, who are supposed to have exterminated all the males of the newly-discovered marsh-dwellers in British New Guinea. He says they are known as the Agaumba, and live in houses erected on piles in a lake. They are remarkable for the shortness of their legs, these from the knee downwards being less than a foot in length. When they walk, which is but rarely, they do so on the sides of their stunted feet, producing a waddle like that of a duck. In the water they are like ducks, and pass an amphibious existence, living on sago, fish, and the roots of water-lilies

of those women who have been content to give the work of brain and hands with the sole desire to help on the scientific investigations of husband, brother, or father, he might make a very interestbrother, or father, he might make a very interesting book. If it is ever written, not one of the least striking chapters will describe the share of Mrs. Bruce in the work which Lieut.-Col. David Bruce has done to elucidate the part played by the typanosomes in the production of disease in animals and man. Mrs. Bruce worked as sole laboratory assistant throughout the inquiry. Mrs. Bruce, again accompanied her husband to Uganda to study sleeping sickness, and again gave invaluable assistance in the laboratory.

T. Ishike (28) and his younger brother, sake brewers, living at the village of Heiwa, Shimososa, Chiba prefecture, murdered on Dec. 27th M. Tasuka (54) and N. Goto (28), officials of the Choshi Tax office, in the brewery godown. The murderers were arrested on Dec. The cause is not yet known, but the Jiji states that the officials were examining the sake casks on the day of the crime in the godown as there was a suspicion that the brewers had illicitly manufactured liquor in such a way as illicitly manufactured liquor in such a way as to escape the imposition of the tax. The following day, the police were acquainted with the event when they went to the godown and found that several parts of the building were stained with blood. The bodies of the victims are missing and it is suspected that the murderers have packed the remains in casks.

At a meeting of medical men in Vienna the other days, Dr. Ullmann presented a woman of sixty-two years whose entire stomach had been sixty-two years whose entire stomach had been removed in an operation for cancer. Neverthe-less, she digests all her food and has gained weight since the operation. The doctor statey that the operation of removing the stomach had now been successfully performed over twentd times. The stomach really plays only a small part in the complex act of digestion, its principal part in the complex act of digestion, its principal use being that of a reservoir. Hence it is that without this organ meals have to be taken inconveniently often and unusually small. There are several little organs, of complex chemical function, far more indispensable than the stomach, which are seldom leard of. We could not exist, for instance, without the supra-renal capsules and the pancreas.—Harper's Wiekly.

On the authority of the Bank of Japan, Tokyo papers give tables showing the amount of money required during the month of January to meet various calls:—

To Be PAID.

Indian papers of recent date report that the Board of Trade has received a dispatch through the India Office from the British Officiating Political Resident in the Persian Gulf throwing some light on the extent to which Russia is subsidising the steamboat service to the Gulf. This docu-ment states that the Russian Government not only pays an annual subsidy for twelve years of £,21,000 to the Russian Steam Navigation and Trading Company but also reimburses the dues paid for passage through the Suez Canal. The effect of this will be realised when it is mentioned that the Russian line has undertaken to carry

mother-of-pearl shells from Luigal to Hamburg, including transhipment at Port Said, at 40s, per ton of 20 cwt., free of collecting commission as against the Anglo-Arabian and Persian Steamship Company's rate of 62s. 6d., plus 2½ per cent collecting commission.

We learn from Hongkong papers that a Japanese, Aizo Shimizu, went into Cheung Wo's shop in Wanchai Road on December 13th and shop in Wanchai Road on December 13th and selected a box, for which he offered \$1. After the usual bargaining the box was sold, and the Japanese tendered \$5 note in payment. As the shopkeeper had no change Shimizu left the shop, taking the key of the box with him, and saying he would call for the box and his change later on. The note was sent to a money changer's, who said that it was bad, and refused to change it. Cheung Wo took the note to No. 2 Police Station, and returned to wait for Shimizu. About nine p.m. Shimizu ed to wait for Shimizu. About nine p.m. Shimizu went back to the shop and asked for the box and four dollars change. As he entered, Cheung Wo sent for the police, but Shimizu dashed out of the shop and sped down the street. He was followed by Cheung Wo's fokis, who shou'ed as they ran. Sergt. Cushman heard the noise, and joined in Sergt. Cushman heard the hoise, and joined in the hunt, catching the Japanese a few streets further on. The man was charged at the Magistracy, and—after his solicitor had withdrawn from the case—was committed for trial. At the Court of Criminal Sessions on the 18th ult. the jury returned a verdict of "guilty." The Chief Justice sentenced the prisoner to two years' imprisonment with head hour. ment with hard labour.

AMERICAN TOPICS.

Hunting in Wisconsin is evidently quite as dangerous as deer-stalking in the woods of Maine, for the present open season is said to be responsible already for twenty-five deaths and twenty-one persons seriously injured through mistaking human beings for game.

The world's consumption of raw cotton was estimated at 13,698,000 bales of 500 pounds in 1902-03. Of this quantity the United States used 4,015,000 bales, Great Britain 3,185,000 bales. The former now consumes more raw cotton than any other on the globe.

Sixty-two years ago a man named Jones moved from Kentucky to Dade country, Mo., taking with him a family of ten children. At a recent reunion him a family of ten children. At a recent reunion of his descendants, held at Everton, nearly all of his 1019 descendants were present. Evidently, the charge of race suicide will not hold against that family.

Professor Alexander H. Phillips of Princeton University says that radium exists in the United States. Professor Phillips has been experimenting with western minerals to learn if any traces of this element were on the America continent. He has at last discovered it to exist beyond all question in carnolite, an ore from Utah.

President Roosevelt was riding to Kock Creek Park, Washington, on the afternoon of Dec. 5th when he witnessed an accident to Mrs. William Petts, of Washington and gallantly went to her assistance. Mrs. Petts was thrown from her horse and lay for a moment unconscious in the road-way until the President dashed up and dismount-ed. President Roosevelt assisted Mrs. Petts to her feet while his orderly went in pursuit of the horse. Mrs. Petts was only slightly hurt.

President Eliot of Harvard University has the correct notion regarding the use and value of athletics in college life when he says girls and young women should be moderate in athletic exercise and should not try to compete with roung men in the more exacting forms. The young men in the more exacting forms. The only thing that is lacking in this sensible advice, says San Francisco contemporary, is that it does not go far enough. It ought to be applied to the male students also, and a reasonable limit should be established beyond which no student in the university should be permitted to go; and, in its definition, the line of safety to life and limb should be so clearly drawn that no one would be able to mistake it.

The Boston Herald has some judicious remarks on the misleading effect of percentage in discus-ing trade relations. It refers particularly to the assumption that Canadian trade is growing faster than that of the United States because it increased than that of the United States because it increased to 3 per cent in the last ten years, while that of this country increased less than 68 per cent. The actual gain in ten years for Canada was \$100,000,000, while the United States gained \$561,000,000. The Herald might have instanced the remarkable efforts of the rivals of New York to demonstrate by the percentage method that they were passing the metropolis of the country in an easy canter, but somehow or other the port on New York bay retains its pre-eminence.

Albert A. Honey of Chicago, inventor of the underground trolley, is dead from a stroke of paralysis, in the Chicago Union Hospital. Honey was an old-time telegraph operator, beginning when 12 years old with the old Illinois Telegraph Company. He was one of the three operators first employed by the Associated Press of Chicago I have been proposed. in Chicago. Later he entered into the employ of the Union Pacific Railway Company, and later superintended the construction of the lines of the Union Pacific from Bismarck to the Pacific Coast. Honey located in Chicago in 1891, and until within the last six months, when illness necessitated his resignation, he was president of the Magnetic Equipment Company. He was one of the organizers of the Old Time Telegraph-

No change will be made in the name of the

Protestant Episcopal church in the immediate to make it as difficult as possible for divorced SOLK SURVIVOR OF THE "FINSBURY" the next triennial council of that church will take no action whatsoever on the movement which has been on foot for a change of name of the church to the Catholic church of America. The statistics in regard to the vote on change of name were collected by the Living Church, an Episcopal order of Milwaukee, and are as follows: The vote which favoured a change at once is: Bishops 22, clergy 940, laity 64,883. The vote against change was: Bishops 21, clergy 384, laity 92,655. The vote which favoured an ultimate change, but did not desire it at this time, was: Bishops 12, clergy 598, laity 92,342. The largest vote did not pass at all on the question of nange, but considered it unwise to act on the question at this time.

A New York telegram of December 5th says: After a highly prosperous year in the New York subway on railroad construction and in the Western mines, Italians resident in the United States are hastening to sunny Italy, some to remain, others to return after the hard American winter ends. Vast crowds of these Italians, who belong mainly to the pick and shovel profession, are pouring into New York to take passage on steamers. Five steamers that sailed to-day carried 5000 Italians. Fully 16,000 sailed this week. Each one took with him earnings of from \$300 to \$500, so a conservative estimate is that \$5,000,000 in American coin, not mentioned in the bank statement, went abroad. The exodus will continue all next week. The gathering of so many uneducated and unsophisticated Italians here has afforded a rare opportunity for the bunker men, and some American money has thus been kept from going abroad.

In her official trial over the Cape Ann course December 5th the cruiser Des Moines exceeded her contract speed requirements of 16.5 knots an not contract speed requirements of 10.5 knots an hour, making an average of 16.633 knots an hour. It is thought that the tidal correction will not materially change these figures. Next to speed the noticeable feature of the trial was the remarkable steadiness of the ship. The condi-tions of the trial were favorable, on the whole The sea was moderately smooth, and the wind which struck the war ship abeam on the north and almost ahead on the run home served to make good draft for the boilers. On the other hand, the atmosphere was hazy dur-ing the greater part of the run, so the stake boats could not be made out with any great certainty. The northerly run was covered in three seconds over two hours, a speed of 16.49 knots, or .o. of a knot under the contract. It was on the run back that the Des Moines showed her on the run back that the Der Monts showed her true worth. One by one the number of the revolutions of ber engines were increased until on the second leg they reached 191 per minute. The machinery worked in fine form and a speed of 16.77 was attained on the return.

A writer of a calculating turn of mind has figured out that the wool product alone of the "Louisiana purchase" in 1902 would more than "Louisiana purchase" in 1902 would more than pay the original cost of the vast tract of land embraced in the deal made by us with France in 1803, when the Louisiana purchase was consumnated; while the corn crop of lowa in the same year would have settled the bill six times over. In 1900 the value of the wheat corn cotton outs true heatley have wheat, corn, colton, cats, rye, barley, hay and potatoes raised within the limits of the purchase was \$750,000,000. Since the purchase Colorado, one of the twelve states of the tract, has produced \$800,000,000 of gold, silver, copper and lead, and Montana has yielded a billion dollars' worth of the four metals named. Taking it all in all, Uncle Sam may be set down as a judicious land speculator to get such results out of a \$15,000,000 disbursement.

Representative clergymen of Rhode Island, headed by the Right Rev. W. W. McVickar, Episcopal Bishop, who have been endeavouring for years to have the State divorce law amended, have entered into an agreement regarding the matter of marrying divorced persons. Out of 650 clergymen in the State more than 200 have agreed

persons to remarry and to treat all questions of marriage and divorce in such a way as to advance interdenominational comity. Of the number signing the agreement, sixty-three ministers will refuse to marry a person of another denomination than their own, who has been divorced, and who could not marry again according to the ecclesiastical laws of that denomination; eighteen agree not to marry a person who has been divorced for any cause. In cases where divorce has been granted for unfaithfulness, 115 ministers declare they will only solemnize the marriage of the innocent party. Nearly all the denominations in the State are represented,

CORKESPONDENCE.

A LETTER OF THANKS.

To the Editor of the "Japan Mail."

Sir.—The parents and friends of the Scholars of the Union Church Sunday School, who, like myself had the privilege of being present at the Christmas Entertainment held yesterday afternoon, cannot help but join with me in thanking Mr. Clarence Griffin, the Superinteedent, for the admirable programme the children went through. How thoroughly each child did his or her part could only be known by the appreciative audience, who, one and all, must feel grateful to Mr. Griffin for all the time and trouble (he would call it great pleasure) he has taken to train the children. the children.

the children.

Hearty thanks are also due to all the teachers and especially to Mrs. Moore, who gave so much of her time in being present at all the reheassals and presided at the plano.

I trust Mr. Griffin may long be spared to this community, and may he continue to have greater success in the coming years than even in the past.

Trusting that this letter may be allowed a space in

Trusting that this letter may be allowed a space in Yokohama, 31st Dec., 1903.

AN INACCURATE EXPRESSION.

TO THE EDITOR OF THE "JAPAN MAIL." SIR,—Your correspondent Will Pattillo, who in the Dec. 26th number of the Japan Weekly Mail, p. 712, complains of the inaccurate expression, "The Ame-Dec. 26th number of the Japan Weekly Mail, p. 712, complains of the inaccurate expression, "The American Church," is quite right. The only proper expression is "The Church in the United States." It is pure ignorance for the part to claim to be the whole. Canada is in America, so is Mexico. There is also a South America as well as a North America. As teachers we should especially strive to be accurate. Many of my native friends have shown by their questions that they thought the war for the Union was a war between the governments of North America and of South America. A prominent merchant of Sendai, whom I met at Aone some summers since in the dog days, red from the bath, on sitting down to play go with me, remarked in a casual way that he supposed that Grant Napoleon was the King of North and South America now.

Another was very indignant with me because I said that my country was the United States. He wanted to know the exact state and was with difficulty pacified when I told him. He had his opinion about a man who was ashamed of his native state, etc. So you see we should be very careful to state the exact geographical location of our bodily mental and spiritual states. Of course if there be only one God, there cannot possibly be more than one church.

one church.

"One army of the Living God Part of the host have crossed the flood And part are crossing now.

Even the distinction between the visible church militant here on earth, and the invisible church triumphant, may exist only in our own imaginations, triumphant, may exist only in our own imaginations, and may fade into insignificance, when from that side our eyes are opened to see the horses and chariots of fire and the ministering spirits sent forth to aid the heirs of salvation. But pro tempore we should be careful about the geographical distinctions that exist for purposes of registration and government. For one thing we can be thankful. No boundaries or divisions of any kind that we can set up can stand for a moment against the greenvious. up can stand for a moment against the gregarious instinct of the Lord's flock in this land. They are one, and they follow lovingly the One Bishop and Shepherd of our souls.

Wishing your correspondent et id omne genus. A Merry X mas and a Happy New Year, I am as ever yours,

HENRY SCOTT JEFFERYS,

ARRIVES IN HONGKONG.

The loss of the steamer Finsbury is still fresh in the minds of many people in the Far East. All that was known about the matter was that the vessel was lost, while on a voyage from Hongkong to Japan, during that terrific typhoon which raged in the China Sea about the 20th September. We now learn that one man survived after undergoing fearful privations and hardships. That man arrived at Hongkong from

hardships. That man arrived at Hongkong from Shanghai yesterday morning, says the Hongkong Duily Prezs of the 22nd December.

The Finsbury arrived at Hongkong from Hamburg in September. On the voyage out, it appears, some of the crew did not "hit it off" with the skipper; some of the men asked to be paid off at Hongkong. The captain paid off five Europeans and one Chinese. The Europeans having been only on the vessel for five weeks or so, and having drawn an advance in Hamburg when they shipped, had not enongh money coming to them to pay a month's board at the Sailors' Home. Chinese were shipped in their place. The steamer left Hongkong on the 11th September, On the morning of the 21st the vessel was badly caught in the typhoon. The wind blew with terrific force, and tremendous mountains of water washed caught in the typhoon. The wind blew with terrific force, and tremendous mountains of water washed over the vessel. No vessel could stand such usage. First of all the boats were smashed up and washed out of the davits; the deck fittings were swept overboard. The engines could avail nothing; the vessel, lay helpless, completely at the mercy of the elements. After some time, an enormous volume of water, much heavier than the seas which had preceded it, came down with full force over the forward cargo hatches; they gave way and water found its way into the ship's hold. The vessel was doomed, and the crew had no means at hand wherewith to save themselves from a watery grave. The steamer gradually filled, and, suddenly, with a gulp, sank beneath the dark waters. Those aboard were sucked down with the vessel, except, of course, gulp, sank beneath the dark waters. Those aboard were sucked down with the vessel, except, of course, the Chinaman who was the sole survivor. He managed to cling to the fore-and-aft bridge which, when the vessel disappeared from view, was left floating on the surface. After nine days—too bitter to contemplate—clinging to this wreckage, ne was picked up by the crew of a Japanese schooner which had also been lost in the typhoon. This crew, however, more fortunate than the poor men on the Finsbury, had been able to take to the boats, After three days in the boat, the men landed on one of the small islands of the Japanese group. After some time on the island, the sole survivor of the Finsbury was conveyed in a steamer to one of the Finshury was conveyed in a steamer to one of the Japanese ports, from whence the Chinese Consul had him sent to Shanghai. Atterthree weeks in hospital at Shanghai he returned to Hongkong, arriving vesterday.

THE INSURANCE ORDER.

The following circular has been sent to us:-TO POLICY-HOLDERS OF THE EQUITABLE LIFE ASSURANCE SOCIETY OF THE UNITED STATES.

LADIES AND GENTLEMEN.

On the 24th June, 1903, an order was issued by the Imperial Government of Japan calling upon foreign insurance companies to deposit a sum of year 100,000, and, in the case of life assurance companies,

nonco, and, in the case of life assurance companies, a further sum equivalent to the annual reserve set aside by each company for the benefit and protection of policy-holders. The Society has always been willing to make a deposit for the security of policy-holders in Japan, as a condition to the continuance of the business; the order is not, however, limited to a deposit but requires the entire legal reserve on all policies issued in Japan to be placed under the control of the Government. This order in its entirety has been most carefully considered by this Society; and it is with great regret I have to inform you that the Directors have decided that compliance with it is not consistent with the principles upon which the Society conducts its business, and the guarantees given to policy-holders. The Society has, therefore, decided to suspend the acceptance of all further proposals for life assurance made in Japan.

in Japan.

Care will be taken to protect the interests of existing policy-holders, who are requested to continue the payment of their premiums as heretofore. Effective arrangements will be made to settle claims, make loans, and fulfil all the conditions of the policies durable their premiums.

ing their currency.

By order of the Board of Directors

J. T. HAMILTON, Representative for Japan. Yokohama, 31st December, 1903.

RUSSIAN PAPERS ON JAPAN.

(From Our Correspondent.)

Port Arthur, December 17.

As I remarked in my last letter, the Russian papers are devoting a good deal of attention at present to Japan; not only political papers like the Rashy Victionnostic (which is now publishing a series of fine articles on Japan by the foremost of Russian of fine articles on Japan by the foremost of Russian journalists), but even comic and society papers. The well-edited Aira has, in one of its last issues, a a short, moderate account of the present trouble with Japan, accompanied by good photographs of General Katsura, Minister President, and of General Kodama, "Commander-in-Chief of the Japanese army," these photographs being taken specially, it is stated, for the Aira. army," these photog stated, for the Niva

stated, for the Niral.

The Streknoa (Dragon-flag) devotes the front page of its issue for 2nd November to a coloured picture of a cock wearing the cap of a Japanese soldier and labelled "Japan." Korea is represented as a hen sitting on an egg, but Russia does not seem to come into the picture, which seems to me to be rather pointless. The cock is represented as in the act of crowing and below the picture is the motto "peremyena budet" (there will be a change), and a short poem on that motto, which runs as follows:—

People not seldom
Are accustomed to say, When the cock crow When the cock crows
That a change there will be.
The Japanese cock
Now splits our tympana
With its fearful outcry
About something or other.
It is dreadfully roused,
And sings out of time,
And all we can ack is And all we can ask is, When will it stop?

FOREIGN MERCHANTS IN SIBERIA AND MANCHURIA.

MANCHURIA.

It is surprising to what an extent the Americans have got hold of the trade in Eastern Siberia and Manchuria, although this surprise will probably lessen gradually. What will make it lessen will be the disappearance of the Americans, one by one. The American Trading Company has closed its branches here and in Vladivostock, and I suppose by and by only one American firm will be left,—indeed I am not sure but only one is left now. Thus will be closed that chapter of Siberian history which tells of American enterprise exerted in the opening up of the American enterprise exerted in the opening up of the

A very interesting volume could, by the way, be A very interesting volume could, by the way, be made out of the experiences of American merchants in Siberia from the days of the old Russian-American Company until the present time. During the first attack on-Petropaulofsk in 1854 by an Anglo-French squadron, two American residents of that town gave important information about the land approaches to Petropaulofsk to the English who did not, however, profit much from it; and on the occasion of the second attack in the following year the allted fleet found that all the Russians had cleared out and that the American flag was the only one flying in the town.

In spite of the rapidity with which the Americans here generally learn the Russian language and of all the talk about the "traditional friendship," it cannot the talk about the "traditional friendship," it cannot be demied that the action of the two American residents of Petropaulofsk is typical of the feelings of Americans in the Russian Far East. They feel that they are in the same boat as the English, and that the Russians are rather afraid of their commercial ability, so that the sight of the Union Jack is almost as welcome to them therefore from a commercial point of view that of Old Glory itself.

The principal American firms in the Russian Far East are Messrs. Clarkson & Co. and the American Trading Company. As I have just remarked, however, the American Trading Company has closed its branches here.

eatures of Vladivostock, Habarovsk, Port Arthur, and even Mukden, seem to be gradually becoming Russian, for one of their partners is a naturalised Russian and others connected with the firm seem, for business reasons (the right to buy land being one of them), to be gradually following the same path; while the number of German names one meets with here among patriotic Russians, some of whom do not speak a word of German, is a proof that Germany is giving good men to Russia as well as to England and America. For you generally find these men with German names at the top of the tree. At the head of the Navy you find Vice-Admirals Stark and Stackelberg: at the head of the Army Staff you find General Pflug. Germans seem to leaven the whole mass of the population in this part of the world as in shown by the extent to which the German language it spoken. About 20 per cent of the Russians seem to speak it more or less, and one is constantly finding eatures of Vladivostock, Habarovsk, Port Arthur, to speak it more or less, and one is constantly finding it come in handy in the most unexpected quarters. I once had an interesting conversation, for instance,

to speak it more or less, and one is constantly finding it come in handy in the most unexpected quarters. I once had an interesting conversation, for instance, with a private soldier who, being a Lett, spoke German,—but a strange German it was,—monat (month) being pronounced as if written Monheit and various other old forms being used.

On my way to Port Arthur from Korea some time ago, I met a German who belonged to the German Colony on the Volga, which numbers nearly half a million people, and of which the members are descended from immigrants who went to that region in the eighteenth century in response to the invitation of the Empress Catherine. It seems that this colony was promised the perpetual right of self-government, complete religious liberty, and freedom from liability to military service, but that, of late years, these privileges have been one by one withdrawn. The members of this colony are still, however, more German than Russian, remaining in language, in religion, in their domestic habits and social customs, the same as when they first came to Russia over a century ago. They still wear the old German costume, they are closely shaved, and in many respects form an indigestible morset, like the French settlers in Canada.

This is an exceptional case, however, for the Germans seem as a rule to adapt themselves quickly to Russian ways. I am afraid, however, that until the process of adaption is completed, they are cordially hated by the common people. A Russian was once prosecuted for assault. "Why, he called me a German, your Worship," said the defendant, whereupon the judge dismissed the case, holding that such provocation was intolerable.

This degree of disilke, very surprising when met with in the kindly-hearted Russian peasant, is put down, I believe, to the effect of the operation of unscrupulous German-speaking Jews of a low class but powerful organisation. What truth there is in this charge I cannot tell; but this old prejudice, like many others, is like anti-clericalism in France, not an a

an article of exportation. At least I do not find it in Port Arthur.

THE "TANSAN" TRADE MARK CASE AT SINGAPORE.

In the course of his judgment in the case of Clifford Wilkinson v. McAlister & Co. at Singapore, Sir Lionel Cox, the Chief Justice, said the question to be decided was whether plaintiff was entitled in Singapore to the exclusive use of the word "tansan" in connection with a mineral water imported by him from Japan. Plaintiff was the owner of a spring at a place called Takaradzuka in the vicinity of Kobe, the water of which he has sold since 1890. He first used the label produced (and marked F) describing the water simply as a mineral water. He first used the label produced (and marked F) describing the water simply as a mineral water. Later, in consequence of representations regarding the name, he altered the label, and instead of "Takaradzuka mineral water" he had a label printed in 1893 on which the word "tansan" in white on a blue ground was printed across the other writing. Plaintiff stated that he did not know till some five years later the meaning of the word "tansan," which he states is a scientific term not in common use. From that time he advertised his water as tansan, and to a large extent since 1895 he had spent between \$800 and \$1,000 a month in advertisements. One striking mode of advertising was referred to by a witness who had spent some time in Japan, and who told the Court that on the slope of a mountain at Moji, the word "tansan" was written so large that it could be read by ships at sea off the coast. He registered his label in Japan in 1897, in America in 1900, and in Java, India, and Australia. The water was first introduced into Singapore under the name "tansan" in 1898, and in 1897 the defendants became agents. The water was ordered, invoiced, advertised and sold under the name "tansan." In April. Trading Company. As I have just remarked, however, the American Trading Company has closed its branches here.

The English are not as a rule prominent in Siberian trade. By the way, the head of a flourishing Danish Company in Port Arthur bears the name of C'Reilly which does not strike one as being Danish or Muscovite, although Gospoden O'Reilly speaks both Danish and Russian with great fluency. Mr. O'Reilly, who is now in Japan, is shortly going to open business here on his own account.

The Germans, I think, take the foremost place among the foreign residents both as linguists and in the extent of their commercial operations. The proximity of the German and Slavonic races in place and in blood, and the well-known enterprise of the Germans, explain this; but, while Russia certainly gains by the exertions of these Germans, it is not quite certain that the Fatherland itself benefits, for Germans seem to become Russified in Russia almost as quickly as they are Anglicised in England. The firm of Messrs. Kunst and Albers, the great bankers and storekeepers of Eastern Siberia, and whose splendid premises are among the most prominent that the had appointed the Borneo Company splendid premises are among the most prominent that he had appointed the Borneo Company splendid premises are among the most prominent

The Borneo Company seem in fact to as agents. The Borneo Company seem in have acted in this capacity in January of the year, and Mr. F. Hilton says that the sales have been considerable, and that he had not heard of any the water being sold under the same name, till have acted in this capacity in January of the year, and Mr. F. Hilton says that the sales have been considerable, and that he had not heard of any other water being sold under the same name, till Mr. Stephens of McAlister's notified him of their intention to run a rival water. Plaintiff also heard that Messrs. Hasegawa and Co. were shipping "Funagoya tansan" to Singapore, and instructed his agents to take proceedings, and eventually the suit was started towards the end of 1901. On these facts, which he, the Judge, could not take otherwise than as proved, plaintiff sought an injunction entitling him to restrain defendant from using the word "tansan" or any word in which it was a part, and defendant's reply was that the word was a common word in Japanese, used to denote a mineral water collected from a carbonic acid spring. It was clear that in trade mark law the mark must be distinctive, and if plaintiff had taken the name simply as descriptive of mineral water his claim could not be supported, unless it had acquired a secondary meaning, and become associated with his name. His Lordship reviewed the evidence and said he thought from the evidence produced that the word "tansan" had come to mean in Singapore Wilkinson's mineral water; it could mean nothing else because there was no other water of the kind on the market until the defendant brought in the "Funagoya tansan." Whilst many people might be ignorant of the plaintiff's personal name, yet people who ordered "tansan," though not knowing Wilkinson's name, wanted the "tansan" to which they had been accustomed, and that was no doubt plaintiff's mineral water. It was also contended that the defendant's label was so different from the plaintiff's that they could not be mistaken. There was no doubt that anyone looking at the bottles could not help distinguishing them, but that was not doubt plaintiff's mineral water. It was also contended that the defendant's label was so different from the plaintiff's that they could not be mistaken. There was no doubt that anyon

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

BUYING WAR MATERIAL.

London, December 31.

Russia and Japan are buying quantities of beef in Chicago.

100,000 barrels of flour have been sold at St. Paul for export to Japan.

150,000 tons of coal are loading at Norfolk, Virginia, for Japan.

JAPAN BUYS WARSHIPS.

Japan has purchased the Argentine war-vessels Moreno and Rivadavia, whose sale was reported on the 29th ult.

RUSSIAN TORPEDO-BOATS.

Five Russian torpedo-boats from Tunis have arrived at Malta, where they are to be docked.

THE FRANCO-RUSSIAN ALLIANCE.

'His Excellency M. Nelidoff, the new Russian Ambassador, has presented his credentials to the French President. In the speeches that were exchanged on the occasion the sentiment was emphasized that the Franco-Russian Alliance constituted a valuable guarantee of the peace of the world.

A TERRIBLE DISASTER PANIC IN A THEATRE. HUNDREDS OF LIVES LOST.

London, January 1.

During a matinee performance on Wednesday of the Drury Lane pantomime "Blue Beard," the audience fell into a panic and rushed to the exits, fighting desperately through the corridors.

One hundred persons were burned to

to 600. The occupants of the gallery were accords him a salute of 12 guns. caught in a death-trap and many were burned alive or suffocated. Some leaped in a frenzied state to the stalls below where the flames swallowed them up. Many bodies reports from Peking are extraordinarily were afterwards found wedged upright be-pessimistic. tween the seats. The greatest mortality occurred at the foot of the gallery stairs, where the bodies were afterwards found piled up twelve deep

Many of the victims were young women

and children.

THE CHICAGO HOLOCAUST. FURTHER DETAILS.

The theatre fire was not at Drury Lane, London, but at the Iroquois Theatre, Chicago. It broke out during a matinee perform ance of the Drury Lane pantomime "Blue

The final computation is that 564 people were killed; 157 were removed injured, of whom about one-third received fatal wounds; and many are reported as missing.

The audience numbered 1,300.

REASON FOR THE BIG DEATH ROLL.

It seems that the asbestos curtain which shuts off the stage from the body of the house was lowered halfway when the fire broke out and then stuck, thus forming a flue through which the flames poured all over the house in less than ten minutes.

[The above telegrams were issued as an extra on Saturday morning.

A GLOOMIER FEELING.

London, January 2. The views of the Japanese Legation in London yesterday were distinctly gloomier upon unofficial advices from Paris indicating that Russia's reply was unfavourable.

[This telegram does not seem worthy of credence. It is understood that Russia's reply has not yet been formulated.—En. f.M.]

MORE RUSSIAN TROOPS

The Russian steamer Kazan, with upwards of a thousand picked men, artillery and stores, has passed the Suez Canal for the Far East. This makes 4,000 picked troops similarly despatched during the present month.

RUSSIA'S COAL SUPPLIES.

It is estimated at Cardiff that Russia has ordered 250,000 tons of coal since October.

THE SITUATION.

London, January 3. The absence of news from Japan has increased the pessimistic feeling here. London papers suggest that despatches are being purposely delayed.

Underwriters are demanding an additional premium to cover the war risk on vessels proceeding east of Singapore.

The five Russian destroyers left Malta hurriedly without completing their repairs.

FUNERAL OF THE CHICAGO VICTIMS.

The funeral of a part of the victims of the Chicago disaster took place yesterday. The numbers are so great that the funeral continues till to-day (Monday). The city is turned into universal mourning; all public institutions and shops being closed.

Many of the victines are still unidentified MEXICO AND A GOLD STANDARD.

The Mexican Monetary Commission has reported in tayour of a gradual adoption of disaster at Chicago is 600 killed and 300 the gold standard.

VICEROY ALEXEIFF. A new ukase issued by the Czar grants to

death and the loss of life is estimated at 400 Viceroy Alexeiff a special vice-regal flag and accepted the basis of a complementary

RUSSIAN SILENCE.

Lencal London, Jan. 4. St. Petersburg maintains silence.

THE FRANCO-RUSSIAN ALLIANCE.

The officers of the Russian squadron at Bizerta, which is en route for the Far East, gave a brilliant reception on Saturday. most cordial toasts were exchanged, the French residents expressing the unchanging affection of France for Russia.

The squadron leaves to-day.

RUSSIAN SQUADRON DETAINED AT BIZERTA.

PEACE BUREAU OF BERNE

PETITIONS THE POWERS.

London, January 5. The Russian squadron at Bizerta has postponed its departure for the Far East for some days in consequence of telegraphic instructions. The Peace Bureau at Berne has drafted a memorandum in support of a petition to the Powers, calling upon them, under the Hague Convention, to offer to Russia and Japan their services with a view to a peaceful settlement.

RUSSIA'S REPLY CONCILIATORY.

Russia's reply, according to various in-spired reports from St. Petersburg, is quite conciliatory. Even if it does not concede everything that Japan has asked for, it will certainly pave the way for future negotiations.

A PEACEFUL FEELING.

It is noteworthy that the Continental press always represents Russia's replies as pacific and Japan's attitude as provocative. At any rate the prevailing feeling to-day is peaceful.

THE RUSSIAN REPLY.

London, January 6. According to information from an official source in St. Petersburg the Russian reply is most conciliatory. Some of the Japanese proposals have been accepted. Others are made the subject of extended observations, and are met by counter proposals. It is

London, January 7.

Telegrams from St. Petersburg mention the holding of m grand council presided over by the Czar, at which several Grand Dukes, M. de Witte, and the leading ministers were present.

It is supposed that a reply to Japan was drafted at this Council.

JAPAN'S NEW WARSHIPS

One hundred and fifty Japanese officers and sailors left London on the 6th of January for Genoa

THE U.S. AND MANCHURIA.

Mr. Shaw, the U.S. Secretary for the Treasury, has recommended to the House of Representatives at Washington, the establishment of a consulate-general at Mukden and a consulate at Antung.

(RECEIVED AT THE LEGATION OF FRANCE.) THE CHICAGO DISASTER.

Saigon, January 4.
The number of victims at the theatre wounded.

FRANCE AND SIAM.

agreement, as proposed by France, the Convention of the 7th of October, 1902, is postponed till the 15th February, 1904.

THE FAR EASTERN SITUATION.

According to reports from London, from Japanese sources, the negotiations between Russia and Japan continue.

There are still hopes of a peaceful settlement of the dispute.

FRICTION DIMINISHING.

Saigon, January 5.

The Cologne Gazette announces that the friction between Japan and Russia is diminishing.

The preparations for war continue on both sides, but these notwithstanding, the negotiations have a chance of succeeding.

ALEXIEFF RECEIVES INSTRUC-TIONS.

Saigon, January 6. It is announced from St. Petersburg that Viceroy Alexieff has received instructions with respect to Russia's answer to Japan's

(From the " Deutsche Japan-Post.") THE SITUATION CLEARING.

Berlin, December 31.

In consequence of a report coming from Tokyo that Japan has not sent an ultimatum to Russia. and that such is not intended, a feeling of quiet-ness has set in in Europe. The Russian Govern-ment is especially pleased at the conciliatory attitude maintained in the latest Japanese note. The Russian press has also become more peaceful. No European Powers are now considering war unavoidable.

THE BALKANS

FRANCE AND SIAM.

The Franco-Siamese conflict has been settled. ACCIDENT TO EMPEROR FRANCIS JOSEPH.

Kaiser Francis Joseph of Austria fell down in one of his apartments and slightly injured one of his eyes. His health is otherwise good.

THE SITUATION.

made the subject of extended observations, and are met by counter proposals. It is hoped in official circles that the Tzar will be quiet and fair discussion of Japan's latest demands. The European press still considers the warlike preparations of Japan to be merely by way of diplomatic pressure. No disquieting news of an official character has arrived here.

THE CHIGAGO CATASTROPHE.

In Chicago at a matinee performance, the froquois Theatre, a magnificent building, was burnt down. The theatre was crowded, principally with women and children. The occupants of the second and third galleries could not get or the second and third galleries could not get out and a panic set in. Some sprang down from the dress circle upon the people in the stalls. Ten minutes after the first cry of fire, six hundred persons were suffocated. More than a thousand are dead. During the afternoon 736 bodies were recovered. Several prominent actors are missing. The cause of the fire was a short circuit of an electric wire. The asbestos curtain refused to act,

RUSSIA AND JAPAN.

Berlin, January 3.
Russia has not yet replied to the last note from Japan. Consequently the pessimistic reports of the London press are unfounded. Count Lamsdorff, the Russian Minister of Foreign Affairs, at the New Year's reception expressed himself in

favour of a peaceful settlement of the pending difficulties, should no hitch occur.

THE CHICAGO FIRE. At the fire of the Iroquois Theatre at Chicago 690 dead bodies have been recovered up to now, about 300 are still said to be missing, and 170 wounded are in the hospitals. Some of the Some of the The Minister of Siam at Paris, having theatre employees have been arrested.

THE CHICAGO FIRE.

At Chicago 587 victims were recognized. All theatres are closed in order to examine their safety appliances.

The German Emperor has ordered that to increase safety against fire, the stage of the Royal Opera House in Eerlin be rebuilt; some new entrances are also to be made. Until these alterations are finished, the galleries will remain closed. Later on perhaps a new building on another site will be erected. The stages of the Royal theatre, the Schauspielhaus, are also to be reconstructed.

MEXICAN CURRENCY.

The Mexican monetary commission has rendered its report, in which it is recommended to gradually introduce the gold standard.

BERLIN NEWS OF THE SITUATION.

Berlin, January 5.

The hopes entertained in Berlin that in the Far East extreme steps will be averted, are becoming Last extreme steps will be averted, are becoming stronger. The energetic war preparations by the Japanese have made an impression in St. Petersburg, which is proved by the conciliatory remarks made by the Russian Government and press. The Navore Vrensya writes: The Manchurian question must not divert Russia's attention from her traditional intentions in the East. The German press is also certain that, owing to the firmness shown by Japan the conflict can only be avoided by Russia climbing down the ladder.

Reuter's telegram from Peking that Russia is being supported by Germany and France, is strongly denied from Berlin and Paris. The Japanese Minister to Berlin, Viscount Inouye, maintaining the best relations with the German

The Cologne Gazette has received quieting news from reliable sources in St. Petersburg.

In the last few days the negotiations have taken a turn for the better with such good prospects that a complete settlement of the pending difficulties is expected very shortly.

The Governor of the Far East, Admiral Alexieff, will depart for St. Petersburg in February next.

RUSSIA'S ANSWER.

Berlin, January 6. The Russian Government sent its answer to the last Japanese Note to Admiral Alexieff, with instructions that he hand the same to Baron Rosen in Tokyo. As reported by the Russian Com-mercial Telegraphic Agency, Viceroy Alexieff sent this answer to the Russian Minister, Baron Rosen, in Tokyo, who will probably hand the same to-morrow to the Japanese Government.

In the best-informed circles in St. Petersburg the conviction prevails that Russia will not break the peace. It is stated that Russia has agreed to the last demands of Korea concerning that land, but on the other hand has made some new demands and has proposed to negotiate with regard to these fresh points in St. Petersburg.

In diplomatic circles in Paris the idea is that no action taken by Japan in South Korea will constitute a casus beili for Russia. If the Russian note is favorably received in Tokyo, Viceroy Alexieff will depart for St. Petersburg.

THE CHICAGO FIRE.

On account of the great theatre fire at Chicago, Kaiser Wilhelm and President Roosevelt have exchanged friendly telegrams.

DEATH OF PROF. JOLLY.

The celebrated professor of Neurolgy, Friedrich Jolly (born 1844) has died at Berlin.

THE SITUATION IN KOREA

Berlin, january 7th.

It is expected that no Power will resist the Japanese action taken in South Korea. The English and Americans are each sending a manof war to Chemulpo, to strengthen, if necessary the guards of their respective legations in Seoul.

KAISER AND KING.

King Edward and Kaiser Wilhelm have ex-changed the most cordial New Year's congratula-Probably King Edward will pay a visit to Berlin in May next.

EXPORTS.

RAW SILK.

The state of the market is somewhat mixed. The decline in exchange has assisted holders in putting up yen prices, while the demand is fifful and Irregular. News from consuming markets is bad, but the opinion of buyers here is evidently divided, some operating freely while others abstain altogether. Prospects are not bright and it is difficult to see how profits are to be made at present.

THE Nippon Industries Encouragement Bank intends to declare an interim dividend for the last half-year of 5 per cent. The general meeting will be held on January 25th.

A TELEGRAM from Nagano reports that Kesa Shimidzu and her grandson, living at the village of Inouye, Takai district, were found murdered on the morning of Jan. 9th.

THE Crown Princess is reported to be suffering from slight indisposition. The Crown Prince, who was suffering from cold, is stated by the Nichi Nichi to have recovered.

In consequence of a broken axle a car of a train coming from Kobe was derailed on the night of Jan. 8th at point near Oi river, Shidzuoka prefecture, causing damage to the line.

Marquis Nabeshima, President of the Italian Society, Tokyo, on January 11th conveyed a message of condolence to the widow of the late

issue again 1 yen convertible notes to the amount of several million yen,

THE Italian Court replied cordially on the night of Jan. 9th by telegram to the Japanese Empress, who had previously sent a congratulatory telegram on the birthday of Queen Elena.

THE Naigai Cotton Company, Osaka, has received a telegram from Bombay to the effect that the insurance companies in the latter city have agreed to suspend insurance on cargo to

THE Kokumin states that the branch of the Nippon Yusen Kaisha at Vladivostock has been suka Naval Station, committed suicide on January closed. Many of the staff returned to Kobe on January closed. Many of the staff returned to Kobe on January closed. Many of the staff returned to Kobe on January closed. Tokyo. The cause is reported. to be insanity.

> THE N. Y. K. have suspended their European, American, and Australian services temporarily, while the T. K. K. have also suspended their San Francisco-Hongkong service in view of the present situation.

> According to the Asahi, the Nippon Shossin Kaisha has purchased the British steamer Gleagory through Messrs. Jardine, Matheson & Co., Yokohama, for yen 150,000, and renamed it Kolo Maru. The gross tonnage is 3,035 tons.

> It is announced by the Asahi that three Chinamen of Hongkong intend to purchase three gun-boats constructed at the Uraga Shipbuilding Yard. The price asked is yen 200,000 for the three. The ships are not completed,

> THE wife of Okado, the chief priest of the Buddhist temple Choshoji, in the village Asase, near Tokyo, committed suicide on the evening of Jan. 9th, hanging herself with a cord from a tree in the garden. Jealousy is reported to be the cause.

> Accomping to Tokyo papers, it is officially reported that the warships Nissain and Kasuga left Genoa on Jan. 9th. They were expected to pass the Suez Canal on the afternoon of the rath, and arrive in Japan about February 10th.

> THE Hakata Railway Company has commenced the construction, under instructions from the Government, of a branch line between Suye and Niiharu. It is two miles in length and is expected to be completed before the end of March.

> Tokyo papers state that the President of the French Republic has conferred a decoration on Kawamura Moto, a nurse of the Red Cross Society, for having attended French wounded soldiers who were brought from China to the Hiroshima military hospital at the time of the Boxer dis-

TWENTY-ONE Japanese stowaways were found on Jan. 9th on board the steamer Victoria. They were removed by the Harbour police to the Court. It is said that they left Kobe on the 7th by the same steamer, paying the proper passage money to Japanese men who declared themselves to be members of an emigration company.

A JINRIKISHA coolie ran into a canal on the night of Jan. 7th at a point near the Bizen-bashi, Odawaracho, Tsukiji, Tokyo, with his vehicle, in which was an American missionary lady. She had entered the vehicle at the Shimbashi station. Both were saved without injury by three Japanese passthat the victim died.

Society, Tokyo, on January 11th conveyed a message of condolence to the widow of the late of saxe. Meiningen, a sister of Emperor William, who has been ill for some time, is suffering from cancer and that the verdict of that the Government intends to recall 50 sem through the office to the men who rescued her.

FOREIGN POLITICS.

January 8.

All the Tokyo journals write as though Russia's second reply had been actually received, and the Kokumin Shimbun goes as far as to give publicity to a rumour that the Cabinet held a meeting on the 7th instant, and passed a resolution in favour of refusing to be satisfied with the reply, which resolution was at once conveyed to the Imperial Russian Legation by Baron Komura. These statements are somewhat bewildering in view of equally positive assertions in other quarters that the reply has not yet reached the Foreign Office in Tokyo. Possibly the explanation is that some intimation of the contents of the reply has been made by way of preliminary, and that there has been a consequent interchange of That would be not unnatural, and might be regarded as an indication on Russia's side of a sincere desire to reach a pacific solution. But we do not pretend to speak with any certainty. Secrecy is admirably guarded. The troublesome interjection of public opinion has been most successfully averted by the Tokyo Foreign Office. When the right moment question. In the meanwhile a kind of appeal appears to have been made to the opinion of Western nations by an expose of the day of greatest depression, and nearly Japan's proposals. That seems to us to all the best securities show an upward have been an eminently wise move. Indeed no other effective method offered of discoultry. the false impression produced in many parts of Europe by the inspired writings of newspapers which persistently represented Russia as conciliatory and Japan as provocative. Japan, in reply, lays her case before the world and says, "Here is what we have been asking for. Judge for yourselves whether it is moderate or excessive." The verdict of the world has evidently been what she hoped. In the meanwhile there is some not unnatural discontent in Japan since equal frankness is not displayed toward the people of this country, but the same cause for frankness does not exist, and we can not but say that in view of the war of criticism and the clash of political wrangling which would surely be excited in Japan by any revelation, whatever its nature, the reticent policy of the Cabinet appears to be the most prudent.

As for Japanese newspapers of all complexions they are virtually a unit in condemning further delay and in declaring that they have no desire for a peace of procras-tination. If Russia can not control the arbitrary procedure of her officials at the front, and if she allow them to continue their disturbance of international amity, then it is for Japan to lose no time in adopting decisive measures. The Jiji Shimpo declares that Japan wants nothing from Russia now except a plain answer "yes," or "no." The Japanese nation is weary of fruitless colloquies and diplomatic finessing: it wants something solid and trustworthy.

January 9 It is reported that the four Russian ships which left Vladivostock a few days ago for Port Arthur, have returned to the former

To-day (Saturday, 9th) all kinds of rumours are circulating in Tokyo. Some allege that Mr. Kurino has actually been ordered to haul down his flag in St. Petersburg. Others say that an ultimatum has been sent. Yet

has taken place. And finally there are folks has not yet been any meeting of states-who affirm that hopes of a peaceful settlemen in the Palace, as was anticipated, nor ment have not been entirely abandoned does it appear that anything like an ultima-The fact is that outside the inner circle of turn has yet been handed to the Russian Re-

It is known to our readers that on the eve of Mr. Taft's departure from Yokohama, Marquis Ito came up from Oiso, and had an interview with the Secretary for War at the United States Consulate General in Yoko-States would observe strict neutrality, and if Japan had occasion to employ American vessels for transport purposes, the matter would be treated with all lawful leniency by the Washington Government.

Japanese four-per-cents have fallen to £74 and Japanese five-per-cents to £86 15s. 5d. on the London market. On the other hand, the Tokyo Stock Exchange seems to have recovered its tone in some slight degree. Quotations are still very slight degree. existence of hope as to a pacific settlement. What has probably happened is merely that brokers and speculators have appreciated the folly of the panic into which they were thrown by the first prospect of war and have made the discovery that business affairs need not be interrupted seriously because international peace is disturbed. That is especially true of such affairs as railways, whether steam or electric, and indeed all forms of transport enterprises.

Apparently the leading English journals are taking a very strong line with reference to the situation. In Reuter's telegrams, published elsewhere, will be found the ex-tremely emphatic views of *The Times*, and from intelligence published by the Jiji Shimpo we learn that the Standard insists on the danger of Japan losing her opportunity if she continues to brook Russia's procrastination, while the Morning Post insists that the Anglo-Japanese alliance must have a strong the middle of this month but great extension. influence on England's position throughout the whole of Asia, and that the Government should at once abandon its luke-warm to attitude.

It is stated that with the exception of nine vessels the whole of the Russian Far-Eastern squadron is collected at Port Arthur. These nine are distributed thus—4 at Vladivostock, 1 at Talien, 1 at Chemulpo, 2 at Shanghai and 1 at Newchwang. The squadron at Port Arthur totals 20, exclusive of torpedo vessels; namely, 8 line-of-battle ships, 5 cruisers and 7 gun-boats. Preparations for action are in busy progress. The vessels are all painted black, and the greatest haste is exercised in fitting and repairing. About 80,000 tons of coal are stored and additional supplies are arriving. It is added that a great number of oxen have been obtained from the district about Chin-wan-tao, and that they are wandering about the hills at Port Arthur, there being no shelter for them.

others allege that no conclusive step will be situation. Things remain quite uncertain so the situation. Some rumours allege that taken until a meeting of the Elder Statesmen far as public knowledge is concerned. There the 20th will prove a momentous date,

writer may be assumed, however, is that sort of pourpariers are still going on, and Russia's answer, whenever it arrived, did on Saturday evening a feeling existed that not prove satisfactory to Japan. We can not tell, however, whether it suggested any whether there was any valid ground for margin for fresh negotiations. What may be regarded as certain is that the margin of peace has dwindled to very petty dimensions.

The Asahi Shimbun comments on the United States Consulate General in Yoko-effects of the Anglo-Japanese alliance. After hama. According to the Nichi Nichi Mr. Taft noting that at first the alliance seemed disassured the Marquis that in the event of appointing to some people inasmuch as it war between Japan and Russia, the United had no influence in restraining Russia's aggressions in Manchuria, our contemporary asks whether the eyes of those that took that view are now opened. Could Japan venture to enter the arena against Russia to-day unless England were keeping the lists? A Japanese success would mean the certain intervention of Russia's European friends, and a Japanese disaster would signify the absence of all succour to save her from the worst. But with England for ally this nation can boldly take the field, knowing that no third party will ven-ture to raise a hand against it. The Asahi then cites the many evidences of sincere friendship recently furnished by England, as the desire of her people to volunteer for service with the Japanese colours, the offer of nurses, and the employment of retired English naval officers and men to bring out the Nisshin and the Kasuga. Our contemporary concludes that England has done more than her part, and that Japan owes her a debt of profound gratitude.

It will interest our Japanese and foreign readers to know that Australia also has made offer of at least a thousand men to fight Japan's battles, and also has proffered the services of a band of trained nurses. Japan has not accepted the offer inasmuch as her military regulations do not sanction the services of aliens in her ranks.

Telegrams from London to the Asaki and the Jiji say that there are grave suspicions as to the purpose of the Russian Government in delaying the departure of the Bizerta squadron, that purpose being to intercept the eastward voyage of the two cruisers Nisshin and Kasuga. The ertions having been made to expedite their preparation, it was thought that they might The Bizerta squadron start by the 9th. could then catch them somewhere in the Mediterranean, supposing that a state of war existed, and to that end the squadron has been kept in European waters. It certainly seems not improbable that the Bizerta squadron would be employed in that way if war broke out, or even that its departure might be timed so as to threaten the Nisslin and the Kasuga throughout the whole of their outward trip whether a state of hostilities existed or did not exist. On the whole, however, it would seem that Russia's wisest plan would be to get out her own ships as quickly as possible. It would be a difficult matter to intercept the two cruisers between Genoa and the Canal, and once they were through the Canal, the stern chase would be almost hopeless.

Nothing can be stated about the general tuation. Things remain quite uncertain so the situation. Some rumours allege that

whereas others have it that nothing decisive need be expected for some time. All observers agree that Japan is greatly strengthened by the unequivocal evidences lately furnished of other Powers' sympathy. Then again there is evident uncertainty as to whether she would draw the sword were not Korea endangered, or whether she would regard Manchuria alone as a sufficient reason for fighting. The only solid point in this morass of conjectures is that no final step will be taken without another conference in the presence of the Sovereign. Count Katsura is laid up with influenza and could not attend such a conference. The question then is whether it would be held without him, or whether it would be preceded by a meeting of the Elder Statesmen at his residence. At any rate there is a moment of delay, during which we may be confident that those directly responsible are sparing no pains to find a pacific exit. It is noticeable that Marquis Ito does not come to the capital. He has been gra vitating between Oiso and Hakone. There was talk of his arrival in Tokyo yesterday, and of Marquis Yamagata's coming at the same time.

The vernacular newspapers abound with statements as to who has been where, what Ministers have met what colleagues, what interchanges of letters and telegrams have taken place and so on. It is plainly believed that Barons Komura and Rosen are in the closest relations, and are exhausting their ingenuity to avert a warlike ending. Some papers allege that M. Arsenieff was to leave for Nagasaki on the 11th instant, carrying important documents for transmission to Viceroy Alexieff, and that a man-of-war would convey him to

Meanwhile there are fresh rumours of a change of Cabinet, but it is impossible to its countrymen that they must be prepared place any reliance on such talk. The figures of Count Kabayama and Viscount Takashima, however, are much en evidence.

Since the above was in type we learn from Tokyo that a conference of statesmen took place yesterday afternoon at the Premier's

Tanuary 12. The meeting of statesmen at the Premier's residence on the 11th instant was exceptionally large. It included the four Elder Statesmen, the Minister of Foreign Affairs, of War, of the Navy and of Finance, Field Marshal Marquis Oyama, Lieut.-General Baron Kodama, Admiral Viscount Ito and Real-Admiral Ijuin. This is the fullest meeting hitherto assembled. It came together at half past one and broke up between 6 and 7. It need scarcely be said that the exact results of the meeting on the 11th are not published, but what seems certain is that the nature of Russia's reply, though not satisfactory in substance, was of a sufficiently conciliatory tone to invite further negotiation, and that the meeting of statesmen recent date, Russia doubted Japan's earnestdid not go beyond determining what answer ness, and believed that very trifling conshould be returned. We may fairly ascessions would suffice to avert all danger sume that it was not a reply in the nature of of war. She knows now, we may be quite ton that no obstacle should be placed in the an ultimatum, and that *pourparlers* may sure, that such is not the case, and since on path of American trade in Manchuria. therefore be regarded as still progressing. her own side the absence of any desire to question is will Russia observe that progressing.

ly to stir the spirit of the nation on behalf strongly disposed to make concessions suf- a foundation of legal right is given to one of which they are issued; but civilization has ficient to satisfy Japan. We sincerely hope part of her demands, gone beyond that method. What Japan that the Vienna correspondent who sends has to do is to set herself right in the eyes this intelligence is well informed, but it is to Several Tokyo jour

submit to the nations not a proclamation of war so much as a manifesto of reasons.

The Asahi urges the Japanese Government to lose no time in appointing consuls to Mukden, Antung and Tatung, which are now open to foreign trade by the terms of the new commercial treaty with China. The United States will probably proceed with all expedition to exercise the privilege thus obtained, and a very interesting situation will arise, for certainly Russia must find it exceedingly inconvenient to have foreign consuls entering Mukden and Autung at this juncture. Of course under the most favoured nation clause all the Treaty Powers acquire the same right.

Before going to press we learn that the meeting of Elder Statesmen in the presence of the Sovereign took place yesterday, but the result is not expected to materially influence the situation.

January 13.

The Asaki declares that everything was settled at the conference in the Emperor's presence on the 12th instant, and that the Japanese nation has now merely to await the result quietly. In fact, without distinctly saying so, our contemporary constructively asserts that the conference decided on war. Very likely it did, in certain eventualities. But our own opinion is that the conference merely resulted, and was only intended to result, in formal sanction of the resolution previously adopted at a Cabinet Council. Everything appears to indicate that events have not yet emerged from the negotiation stage, and truly if some road to peace can not be found on the basis of such very moderate proposals as Japan has formulated, it will be a pitiful business. However, the Asahi evidently looks forward to war, and reminds to give not only their lives but also their treasure. There has been some talk of getting financial aid from a third Power. That kind of expectation had better be abandoned at once, says our contemporary.

Nagasaki transmits news that whereas the Russian Legation in Tokyo has been sending messengers to Nagasaki for the purpose of more direct communication with Port Arthur, Port Arthur has now sent a messenger to Nagasaki, who, with a suite of two, reached that place on the evening of the 12th, and after despatching a telegram to Port Arthur, proceeded at once to Tokyo

January 14.
A telegram to the Osaka Mainichi Shimbun from Vienna suggests that the Russian Government is somewhat surprised and even alarmed to find Japan in an unequivocally fighting mood. All news of this kind must be received, we think, with great reserve, an ultimatum, and that pourparlers may sure, that such is not the case, and since on therefore be regarded as still progressing.

The Jiji Shimpo deems it necessary and fight in circumstances unfavourable alike timely to advise that the declaration of war, should such a document become necessary, view may fairly be assumed, there ought to be couched in the fullest and minutest to be no serious difficulty in coming to an terms. Hitherto the custom has been to frame understanding. The Osaka journal's news such proclamations in terms calculated maintenance in Manchuria. The question is will Russia observe that promise, and if she does agree that the United States should such a document become necessary, view may fairly be assumed, there ought to be couched in the fullest and minutest to be no serious difficulty in coming to an inate against Japan? Thus Japan's position represents the St. Petersburg statesmen as exchange of ratifications. For by this event a foundation of leval right is given to one

of Europe, and to that end she should be feared that unless the situation be saved soon it will prove to be beyond salvation. War exercises a grim magnetism of its Nations that approach too close to it lose their power of free volition and are drawn beyond recourse. That unhappy condition is on the verge of being realized in the East. Very soon it will be impossible for either of the disputants to step back without incurring the reproach from which above all others human nature shrinks, the reproach of cowardice. That would certainly

be a miserable ending.

The fiji's London telegrams say that Mr. Balfour, speaking at Manchester on the 11th instant, said that England was determined to discharge all her treaty obligations and duties towards her Far-Eastern ally and that no occasion exists for outsiders to discuss the matter vehemently or to interfere in any way. Side by side with this news comes another item, namely, that the leading English journals continue their insistent suggestions that Great Britain should materially assist Japan at this juncture. It is doubtless in reply to such counsels that Mr. Balfour spoke at Manchester. Englishmen appear to be looking beyond the questions immediately under discussion, and to be sensible that should Russia emerge victorious from her struggle with this empire, her position and influence in the Orient would be so enormously strengthened as virtually to overshadow every other Power. Evidently the fate of Manchuria is in the scales. Russia would go into battle with the determina-tion that if she won, the compensation coming to her for her large expenditure of blood and treasure would be Manchuria. In the sequel of a successful war, any assurances previously given by her to China would become as evanescent as bubbles in water. Korea also would lie at her mercy, and that she would grasp it is beyond all question. For if England stood aloof when she might have availed herself of Japan's strong assistance to save Eastern Asia from Russia's domination, she will scarcely enter the lists after Japan is crippled. What is now at stake therefore, is large effacement for Great Britain as well as for Japan, and to that outlook English publicists have evidently awaked.

The Japanese Representative in Berlin, telegraphing under date of the 12th instant, gives the gist of an article appearing in the Vossische Zeitung. That journal says that the fact of Japan continuing the negotiations is a proof of her earnest desire to preserve peace. Nevertheless an event has now occurred which must still further complicate the situation; namely, the exchangs of rati-fications of the new commercial treaties between China and the United States as well as Japan. These treaties provide that imtion that Russia will object to the carrying out of that provision. Last summer the St.

Several Tokyo journals publish a telegram

to the effect that M. Bezobrazoff and the St. Petersburg's thoughts are now bent upon peace. We sincerely hope that this may be at least a shadow of coming events, but underlying the item we seem to trace the hand of the untrustworthy news agency which so often misleads the Japanese public. A French journal recently stated that leave had been granted to Bezobrazoff. That is probably the proverbial grain of truth.

THE NEW TREATY MARTS.

The Svet is stated to have declared that attempts to open Mukden, Antung and Ta-tung without Russia's permission are merely incentives to Russia's indignation. Naturally a Russian journal, without any responsibility, takes that line. But the Russian Government is reported to have officially signified its willingness to see foreign consulates es-tablished at the new treaty marts. It objects, however, to the formation of settlements, and as settlements have always been counted an essential element of commercial equipment, an interesting question may here arise. The impression is that Russia would not be averse to American settlements, but she regards with extreme aversion the prospect of seeing a number of Japanese locate themselves at important points in Manchuria. No discrimination of that kind being possible, however, she must either allow all or none, and there would seem to be here a problem capable of causing some trouble. But, after all, the elasticity of the international conscience is perpetually sur-prising the world. Neither China nor prising the world. Neither China nor the Powers combined have been able to recover from Russia's hands the administration of Newchwang, where she has even less title to exercise such functions than she would have at Mukden were the new treaties put into actual operation. If rights already possessed can not be guarded, what hope is there for rights not yet practically asserted? The United States may take a strong line about Mukden, Tatung and Antung and unless England be greatly wedded to her modern policy of self-effacement, she too should put a strong shoulder to the wheel on this occasion, for here and now, if anywhere or ever, stands the question of the much proclaimed and acclaimed open-door policy waiting to be carried into effect. We do not see a very solid prospect, all the

THE LATEST FROM EUROPE.

It certainly excites our admiration as well It certainly excites our admiration as well share in the spoils of the post-bellum division as our indignation to observe with what of Chinese territory when Russia, Germany, splendid courage some European news. England and France all profited by China's exposed decrepitude. The Chevalier was Japan are acting. Every month, that passes, declared by Rome to have exceeded his nay every week, adds to Russia's belligeness transpose the Par East, whereas it public were inclined to conclude that he was brings no access of strength whatever to sacrificed to diplomatic expediency. At all Japan's fighting capacity. Yet Europe has events he left Peking and remained for some time assurance to tell us that Japan time and distantially until a rost worthy of Japan's fighting capacity. Yet Europe has now the fine assurance to tell us that Japan is prolonging the negotiations in order to gain time for getting ready. For a long while the not d'ortre was that Russia should be represented as conciliatory and Japan as provocative; but there is now a change of provocative; but there is now a change of method and we are to believe that Japan is decrease. The Cheva-presential of the instant, did not really reach that town until the afternoon of the 8th. The detachment consisted of 22 or 23 men under the ment consisted of 22 or 23 men under the command of an officer, and had been furnished by the Cressy. It is intended to act as a Legation Guard.

Speaking generally the summoning of many friends and admirers in Japan will the afternoon of the 8th. The detachment the action of the stant town until the afternoon of the 8th. The detachment that town until the afternoon of the 8th. The detachment of an officer, and had been furnished by the Cressy. It is intended to act activity in the service of his country. Very provocative; but there is now a change of many friends and admirers in Japan will the afternoon of the 8th. The detachment that the ment consisted of 22 or 23 ment until the afternoon of the 8th. The detachment of an officer, and had been furnished by the Cressy. It is intended to act activity in the service of his country. Very provocative; but there is now a change of many friends and admirers in Japan will the afternoon of the 8th. The detachment that the ment consisted of 22 or 23 ment until the afternoon of the 8th. The detachment that the ment consisted of 22 or 23 ment until the afternoon of the 8th. The detachment that the ment consisted of 22 or 23 ment until the afternoon of the 8th. The detachment that the ment consisted of 22 or 23 ment until the afternoon of the 8th. The detachment that the afternoon of the 8th. The detachment that the ment consisted of 22 or 23 ment until the afternoon of the 8th. The detachment that the afternoon of the 8th. The detachme method, and we are to believe that Japan sincerely mourn his decease. The Chevais simulating pacific intentions for the lier's son is in the Italian Diplomatic service sake of completing her warlike equip-ment. These versions are too incon-sistent to be artistic. Besides, a simple com-man Legation in Tokyo during the last few

visited Port Arthur, and in the beginning of other leaders of the War party in Russia October he returned, bringing with him have been completely discredited, and that materials for a series of negotiations which St. Petersburg's thoughts are now bent upon are understood to have culminated in a very tolerable basis of agreement. An ad referendum basis, it was forwarded to St. Petersburg from the Russian Legation on the 30th or the 31st of October. Russia replied on the 11th of December, an interval of 42 days. On the 21st of December, that is to say 10 days subsequently, Japan handed in a request that Russia should reconsider her reply. Russia's answer came on the 7th of January, an interval of 17 days. On the 11th of January a meeting of Japanese statesmen was held in Tokyo to consider what answer should be made to this second note. Up to the present time, therefore, Russia's reflections have occupied 16 days. Yet we are asked to believe that Japan is prolonging the negotiations in order to have time for completing It is very her preparations for war. thoughtless and very silly. Whatever de-lay is taking place now may be safely attri-Whatever debuted to the earnest desire of Japan's statesmen to find a peaceful exit through which the nation will be willing to follow them. In saying this we do not desire to be understood as alleging that Russia shows herself unyieldingly obdurate. Unless general re-port be much mistaken Russia's last reply undoubtedly made some concessions; concessions which, though not enough to satisfy Japan, may at all events be accepted as evidence that St. Petersburg also is not bent upon fighting. It should be permissible to hope that, in such circumstances, bloodshed may be avoided.

THE CHEVALIER DE MARTINO.

The death is announced of the Chevalier de Martino, who represented Italy for many years at the Court of Japan. The Chevalier was only in his sixty-second year when the final summons came. During the latter period of his residence in Tokyo he complained frequently of heart trouble, and, the strong probability is that death resulted from that cause. A man of exceptional ability and a keen lover of literature and art, he took the liveliest interest in everything relating to Japan and the Japanese, always seizing every opportunity of displaying sympathy with the aspirations of this country and furthering its legitimate aims. From Tokyo he proceeded to Peking as Italian Representative. There he became intimate-Representative. There he became intimately associated with Italy's attempt to obtain a share in the spoils of the post-bellum division

KOREA.

January 8.
A telegram to the Nichi Nichi Shimbun says that on the evening of the 6th instant a detachment of 20 Russian soldiers with 2 officers entered Seoul and proceeded to the Russian Legation, where they will be quartered for the present. We have not heard that the despatch of these troops was pre-ceded by any communication with Japan, nor indeed was there any conventional necessity for such communication.

The Korean Government appears to have

adopted extraordinary precautions in connexion with the obsequies of the late Empress Dowager. Not only were the Imperial Guards posted at every place in the immediate vicinity of the Palace, but numbers of policemen and gendarmes were also employed, and all the Legations were

carefully watched.

It is stated that numbers of Korean soldiers and ordinary residents have fled from Seoul to the provinces, in anticipation of war, and that others are preparing to follow their example.

Li Keun-thaik and his fellow-thinkers, including Li Yong-ik, are said to have advised the Emperor that the situation does not present any elements of danger for Korea, inasmuch as Japan's bellicose attitude is assumed merely for the purpose of deceiving Russia, whom she has no intention what-ever of fighting. These statesmen are alleged to have explained the arrival of American marines to a plot between the Legations of Japan and of the United States, the object being to lend colour to Japan's bluff. His Majesty, who had previously regarded the outlook with much perturbation, and who had even been advised to prepare for flight to the French Legation in case of emergency, is said to have been reassured by these assertions.

It must have taxed the ingenuity Li Kenn-thaik and his friends to explain the arrival of British and Russian marines in rapid succession after the American. Evidently if there be any truth in these stories they indicate that M. Pavlow, who doubtless constitutes Li Keun-thaik's source of inspiration, still labours under the delusion entertained by many Russians, the delusion that Japan will not fight. There never was a greater mistake. Japan means business: means it with all her might. Those that know anything of her character know what that signifies.

The disturbances in the southern provinces of Korea do not seem to have been quelled. It is a question of taxation, and the people are said to be particularly incensed against Li Yong-ik. Petitions for his capital punish-

ment have been presented.

It appears that the detachment of British marines said to have entered Seoul on the 6th instant, did not really reach that town

precaution. Should Korea become the scene of any operations, or even of a mere demon-stration on Japan's part, internal commotions may easily break out, not merely because there appears to be an evilly disposed eleparison of dates shatters this new theory. years of the Chevalier de Martino's resi-At the close of September Baron Rosen dence there. take advantage of any occasion for rioting, but also because the rivalries and dissensions between political cliques seldom fail to develop violent proportions in the face of anything like a national crisis. But if it be true that Russia is sending a regiment of rifles, as a Saigon telegram published yester-day says, that would be an act bearing an entirely different complexion. A regiment of tiralleurs is not wanted to guard the Russian Legation in Seoul. The detachment already landed from the Russian Squadron can easily discharge that duty.

A telegram to the Asahi Shimbun from

Seoul says that some 2,000 men of the Imperial Guards and the city's garrison have made themselves scarce, in view of a possible conflict between Japan and Korea, and that many of the citizens are preparing to remove to the provinces, or have already

Further reports indicate that the so-called insurrection in the southern provinces of Korea is nothing more than a protest against excessive taxation, and that the movement has not assumed anything like an organized

form, or been productive of serious disorder. The Nichi Nichi's correspondent in Seoul says that Ming Yong-Iwan recently appealed to the United States Legation for protection in the event of troubles. This statement assumes larger dimensions in the hands of the Kokumin's correspondent, who speaks of two or three Ministers of State as having taken the same course. Whatever the number was, however, Dr. Allen seems to have given the same answer; namely, that it is not the duty of statesmen to think only of their own personal safety in moments of national crisis, and that he trusted there would be no repetition of the escapade of 1896, when the Sovereign took refuge under a foreign flag.

Another detachment of Russian troops seems to have entered Seoul on the 9th instant. They numbered 47, and it is added that there are signs of further landing. The first Russian detachment totalled 22, so that there are now 69 or 70 Russian soldiers to guard the Seoul Legation. That is probably twice as large a force as any other Power possesses, but then it must be admitted that Russia has more reason to apprehend enter-prises at her expense. An extra published by the Chino on the evening of the 10th said that another force of 100 Russians was to enter the city on the 11th. That is probably

an exaggeration.

On the 9th instant a detachment of 21 Italian troops with one officer arrived in the Korean capital to guard the Italian Legation. Thus the Legations of the United States, of Great Britain, of Russia and of Italy are all provided with garrisons. Germany will not be long before she makes similar provision for the protection of her nationals.

January 11.

It is reported from Seoul that another detachment of Russian marines, numbering 100, is about to enter the city. some uncertainty about the Russian force already in the Korean capital, but apparently official information puts the total at about official information puts the total at about stated that the unhappy Emperor of Korea 70 of all ranks. Rumours are persistent, however, that this force will quickly receive a considerable addition. Some Yong-ik, Li Keun-thaik and another official telegrams speak of 20 may entering on the Kranch Loration to the Kranch Loration. ceive a considerable addition. Some telegrams speak of 20 men entering on the 11th and 100 more on the 12th, the idea being to bring the force up to the same strength as that of the Japanese. The Nichi has it that several hundreds were to have been moved up from the coast, but that owing to some unexplained cause this large programme has been abandoned, and the dimensions of the so-called Legation are the legation, to make arrangemented to Korea an attitude of the utmost caution, since any false step might now event of trouble, and also to make preparatively serious consequences. The same journal's correspondent alleges that Li Keun-thaik and his partizans are now excluded from the Councils of State, the did decline, he certainly can not have and the dimensions of the so-called Legation.

apanese establishment.

It may be well to recall here the terms of the Komura-Waeber Convention, which is the only agreement regulating the forces of of the arrival of a Legation Guard-as did Japan and Russia in Korea. The 4th Article also the other Representatives, no doubtof that Convention runs thus:-

IV. For the protection of the Japanese Settlements at Seoul and the open ports against possible attacks by the Korean populace, two companies of Japanese troops may be stationed at Seoul, one company at Fusan and one at Gensan, each company not to exceed 200 men. These troops will be quartered near the Settlements and shall be withdrawn as soon as no apprehensions of such attacks can be

For the protection of the Russian Legation and Consulates the Russian Government may also keep guards not exceeding the number of Japanese troops at these places, and which will be withdrawn as soon as tranquility in the interior is completely restored.

Russia is therefore strictly within her conventional rights in bringing her force up to the Japanese standard. It must be confessed indeed, that such procedure accords ill with the pacific intentions attributed to her by her continental European friends. Japan remains in precisely the same military position as that occupied by her before these complications began, whereas Russia is plainly evincing her determination to re-gard Japan as a dangerous rival. The provocation is wholly on one side, it seems to us. That Russia should send a force to guard her Legation in view of possible eventualities would be natural enough, but did she care to avoid adding fuel to the fire she would be content with a guard of about the same size as the guards of England, America and other Powers, instead of seizing the occasion to show that her precautions are adopted against Japan rather than against the Korean populace. However, it would be unjust, perhaps, to elaborate this point.

Meanwhile it is stated that these arrivals of Russian troops contrasted with the absence of any such steps on Japan's part, are tending to sway Korean sentiment in the direction of Russia. That is natural.

France also is about to send a Legation Guard to Seoul, but we do not hear that Germany has yet taken any such step. She will do so, doubtless.

There are various rumours about Yong Am-pho. The Jiji's correspondent says that the place will soon be opened; the Nichi Nichi's that it has already been opened.

It appears also that the Korean Government has been prompted by the situation to contemplate various administrative, legal and financial reforms. Some of our Tokyo contemporaries are disposed to ridicule this move, but it also invites pity. Korea must be thinking sadly how much better it had been for her to put her house in order long ago. If she had done so, she would not now find herself in the position of a no-man's-land, not unlikely to be converted once more into the battle-field of nations contending for the right to dispose of her goods and chattels.

guards will be limited to those of the must have been in previous possession of instructions how to proceed.

明治廿五年三月曾日第三世際便物際

The British Representative is said to have officially informed the Korean Government and to have accompanied the notice with an assurance that the troops might be relied on to behave in an orderly and considerate manner. No one seems to have consulted the Korean Government beforehand, and their remonstrances in the face of accomplished facts would have been useless.

Three Ministers of the Crown are said to have represented to the Emperor that unless steps were taken to punish Li Yong-ik and Li Keun-thaik the domestic commotion now threatening could not The two Li were listening be averted. from an adjoining chamber to this impeach ment-so the story runs-and they doubtless took immediate steps to obliterate the impression produced upon their Sovereign's mind. On the other hand it is predicted that the two Li will presently be at daggers drawn. Seoul is not big enough for two Richmonds. Li Yong-ik's star is in the ascendant, and he is said to have secretly warned the Emperor that nothing can save the State except the speedy decapitation of it Li Keun-thaik and the latter's brother.

The business of guarding the palace on a scale of exceptional magnitude, a business nominally undertaken on account of the obsequies of the Empress Dowager, but said to have been really suggested by the Emperor's fears for his own safety, has resulted in extensive desertions on the part of the Seoul troops. It appears that the guards consisted in part of the Scoul garrison and in part of troops from Pyong-yang.
The latter were treated much better than the former, and the consequence was that many of the metropolitan braves threw away their weapons and absconded.

The Chuo's correspondent sends a mes-sage to the effect that the two Li are endeavouring to induce the French Representative to undertake the duty of mediating between Japan and Russia.

January 12. Another detachment of Russian troops, numbering 28 of all ranks, entered Seoul on the 11th instant. As far as can be ascer-tained the number of foreign troops in the Korean capital now is as follows:—

America 36entered on the 6th instant.
Russia 97namely, 22 on the 6th, 47 on the 8th, and 28 on the 11th. British 22entered on the 8th. Italy 21entered on the 9th.

There is talk in Seoul of a change of Cabinet in view of the gravity of the situa-tion. The new Ministry would have Ming Yong-hwan for pivot but would apparently be under the premiership of Pak Chong-

It is reported by the Kokumin Shimbun's correspondent that the Emperor of Korea having asked M. Pavlow to state his views of the situation, the Russian Minister replied that Japan desired nothing more than the opening of Yong Am-pho and that there was little apprehension of her entering into a struggle with Russia. M. Pavlow recommended to Korea an attitude of the utmost

spoke of growing jealousy between the two men and the probability of a rupture. The relations of these politicians are difficult to understand. Li Yong-ik's complexion used to be very doubtful. At one time he was regarded as strongly pro-Russian, and that estimate received marked confirmation when, at a moment of loss of office and even personal peril, he was transported to Port Arthur in a Russian warship. But there-after good authorities spoke of him as being inclined to Japan rather than to Russia, and some tangible evidences of that mood were said to have been given. On the one hand it can not be forgotten that Li Yong-ik was interpreter at the Russian Legation in 1896, when the King took re-fuge there, and on the other we have the unquestionable fact that he has of late been by no means a persona grata—in appearance at all events—at that Legation, his place in M. Pavlow's good graces being usurped by Li Keun-thaik. Some shrewd observers estimate that Li Yong-ik's colour in foreign politics is taken solely from whatever conjucture seems best adapted to his own interests, and that he has no settled principles of any kind. At any rate the present situation seems to be that Li Keun-thaik represents the Russo-phil party and that his star is sinking below the horizon. Perhaps it will rise again by the route of some catastrophe.

On the 11th instant the Korean authorities signed at Seoul a concession granting to the Kawakita whaling company the pri-vilege of establishing boiling and curing stations at three places on the south-eastern and eastern coast, of which Ulsang is one. This matter had long been under discussion. The concession is for 12 years.

There are rumours of a Russian force crossing the Tumen into Korean territory. It has not actually crossed. The newsmongers are exceptionally circumspect in this instance.

The Chuo's Seoul correspondent wires that the Korean Government, greatly perturbed by the prospect, inclines to take shelter under Russia's wing, and that, consequently, the opening of Yong Am-pho is likely to be deferred.

January 13. There is some confusion about the number of troops sent by Russia to Seoul. Whether she has withdrawn one of her detachments and replaced it by another, or whether she has merely added another Nichi's correspondent says that making allowance for everything in the way of exchanges, Russia has now 120 men at the Legation. There is nothing to be excited about in that, and indeed, to do the Japanese papers justice they do not appear to be at all excited.

It is stated that the Korean troops have been deprived of their ammunition lest they should fail to observe, in case of disputes between foreign nationals, the attitude of strict non-interference enjoined by

Japan suffering any reverse, would be likely to turn their arms against the Japanese settlement, and to include Occidentals in their onslaught. On the other hand, if a Japanese reverse brought about a Russian landing at Chemulpo, the European inhabilanding at Chemulpo, the European inhabitants are said to be apprehending worse things even than the contingencies of a Korean attack. Apparently they think that

or in the preservation of peace.

Some correspondents of Tokyo journals continue to report a growing tendency in Seoul to lean upon Russia, the impression being that Japan has no stomach for fighting and is merely making a demonstration.

Since writing the above official news has been received of the withdrawal of one small Russian detachment from Seoul and its replacement by a larger body of men.

It is now stated that the total number of Legation guards sent by Russia to Seoul does not exceed 55 of all ranks, to whatever figure it may subsequently be raised. The /jj; however, says that if the recent re-inforcements be added to the guards already on duty at the Legation, the total becomes nearly 80. Some importance appears to be attached to this arithmetical question by our contemporaries in Tokyo, but truly one can not see what serious difference would result from fifty or sixty men on the plus or minus side.

An interesting point connected with these estimates of Russia's forces in sight is that Korea is represented in the light of a veritable weathercock moving at the impulse of the most trivial breeze. When the Legation guards of the great Northern Power seemed to be growing into the region of a hundred, the Korean disposition was stated to be all for Russia, but now that a score or two have been taken off the total, the fickle vane has revolved back again, and is moreover said to be in a very tremulous condition. It would add very much to the actualities and the prospects of Far-Eastern peace were the Korean Empire swallowed up by some

strong Power.

The lumber question in the Yalu Valley is still unsettled. News published by Tokyo journals is to the effect that M. Stroniloff, who represented the Russian interest, recently returned an explicitly negative reply to the demands preferred by the Japanese commissioner, Mr. Okabe, and then took his departure for Port Arthur, leaving in his place an official ignorant of any language but Russian. This remplacant's linguistic equipment is said to be proving a successful barrier to further negotiations, which diffi-culty suggests that the negotiators can not be in very grim earnest.

CHINA.

January 8.

General Ma seems to be actively engaged making preparations to move his troops to the north-eastern frontier of the Eighteen provinces. Orders have been given for the delivery of five millions of rifle cartridges from Wuchang and Nankin. It is stated that China is embarrassed by lack of ammu-

The Asahi's Peking correspondent wires that His Excellency Na Tung has the field practically to himself in Chinese councils at present, the pro-Russian party being alto-gether in the descendant. This does not mean, however, that China has definitely There are said to be ten thousand Korean made up her mind to act one way or the soldiers at Chemulpo, who, in the event of other. She is still in a vacillating state.

There is again talk in Peking of a secret convention being on the tapis between Russia and China. This rumour crops up

safety lies for them only in Japan's success China's best plan would be to conclude an agreement at once with Russia on the subject of Manchuria. M. Dubail being an eminently prudent and tactful diplomatist, the various proceedings recently attributed to him by the newsmongers have to be discounted.

Mr. Uchida, Japanese Representative in Peking, is said to have called on Prince Ching on the 8th instant, and to have conveyed to him the contents of Russia's second reply to Japan as well as the latter's re-joinder. The Japanese Minister further urged the vital importance, in China's own interests, of losing no time in effecting the exchange of ratifications in the case of the China-Japan revised commercial treaty.

There is a report from Tientsin to the Jiji that some six thousand Cossacks recently arrived from Odessa in Manchuria, and were distributed at the various points of strategi-cal importance between Chita and Mukden.

From the same source comes a statement that the Russian force garrisoning Mukden now numbers twenty thousand, and that there is great activity in building barracks. The total Russian army now in Manchuria is put by this authority at a hundred thous-and men of all arms, and he adds that there is an obvious intention of stationing a large force at Liao-yang as extensive quarters are in course of construction. In all directions there are signs of military activity, and special efforts are being made to establish defensive works along the Liao River.

The Asahi Shimbun has a telegram from Chesoo saying that the Russian ships at Port Arthur have landed all their superfluous gear and are hastening to get into fighting trim. It is added that every effort is being made to raise a warlike spirit among the men, but that little success attends these endeavours. The correspondent gives some trivial parti-culars in support of this alleged failure, but we do not think them worth quoting, for it is absurd to suppose that Russian soldiers or sailors need any special incitement to prepare them for fighting what they regard as their country's battles.

The Chinese, on their side, are said to be busily making warlike preparations, and the Viceroy of Canton is reported to have memorialized the Throne in favour of drawing the sword. But the eventuality against which the Chinese may be supposed to be getting ready is still in a distant future.

A telegram to the Jiji Shimpo from Peking dated the 9th inst. confirms the statement that on the 7th Mr. Uchida called on Prince Ching and informed him that Russia's second answer having been received in Tokyo and found as inconclusive and unsatisfactory as the first, Japan could see nothing for it but to appeal to the ultima ratio. He desired therefore to be informed of the attitude that China intended to take. Prince Ching is said to have thanked Mr. Uchida for the information, and to have intimated that in the event of hostilities China would maintain strict neutrality. The same infor-mation is said to have been conveyed to Viceroy Yuan.

Latest news indicates that the exchange of ratifications is likely to take place immeperiodically when nothing more exciting diality in the case of the new commercial occupies public attention.

The Japanese of the ratifications of the American treaty will be in Washington.

On the exchange of ratifications the question of opening the new marts will imme-diality come on the tapis. The United States Government is not likely to waste much time in giving practical effect to this part of the treaty, but at the quickest some two or three months must elapse before con-

sulates are opened at Mukden and Antung.
The Governor of Sinkiang, in Kansu, is said to have telegraphed to Peking that
Russian soldiers are entering Ili in constantly increasing numbers, and that there is much alarm among the inhabitants. He adds that if things be left in their present condition, some serious complication can scarcely fail to occur.

It is conceivable that Russia may be seeking to create a diversion in the direc-tion of Ili. That would be shrewd policy, for in the presence of a new danger looming on the north-western horizon, China might and probably would look on her north-eastern troubles with more tolerant eyes. It is better to bear the ills we know than to fly to those we know not. For the sake of averting a wave of Russian aggression on one frontier, the Peking statesmen might be willing to endorse facts which are virtually accomplished in the Three Eastern Provinces.

The telegraph says that there are two Russian men-of-war lying in the river at Shanghai and that some apprehension is felt as to their possible action against Japanese merchant ships in the event of war between this country and Russia. The Japanese residents of Shanghai are naturally anxious to have a ship of their own nationality by way

January 11.
The Chinese Government's conception of the limits within which China has strength; to discharge the duties of neutrality appears to be the district westward of the Liao River. Such is the idea we gather from a telegram to the Asaki. It is certain that Russia has never troubled herself much about the portion of Manchuria lying westward of the Liao, and she might possibly acquiesce in the theory that this region is beyond her sphere of influence. At any rate Viceroy Yuan is said to have received instructions to make whatever military preparations and dispositions are required for the above end.

3 Japanese subjects and the wounding of and Empress to let him resume his former two others near the Golden Hill at Port vicereral post, but they replied that at the Arthur. One report attributes the outrage to Manchurian banditti; another says that the bloody deed was done by Russians who objected to the continued employment of these men at Port Arthur. According to this latter version it is not safe for Japanese subjects to be abroad in the Liaotung peninsula. If that be true it indicates a of francs lodger very savage mood among the Russians, but we prefer to think that rumour is as usual an exaggerator. -

January 12.

As anticipated, the exchange of ratifications of the new China-Japan commercial treaty took place in Peking on the 11th instant, Japan being represented by Mr. Uchida and China by Mr. Na Tang. The exchange in the case of the China-America treaty was to take place in Washington at the same time.

He Bank to the Viceroy at Port Arthur.

A telegram from the Chinase commander-in-chief in Manchuria says that in view of the imminence of war, the Russian authorities are not allowing the people to make any changes of abode, and are interdicting all movements of Chinese troops.

There is a report that the Russian Authorities at Newchwang recently exceeded. the same time.

not hesitate to draw the sword. He further explained that Russia's original reply to Japan's proposals had been a categorical refusal of one and all, but that subsequently for the sake of peace some slight concession had been made. It was not probable that Japan, conscious as she is of her own comparative weakness, would resort to war.

Reports of this nature come to us through a very doubtful medium. It is in the interest of the Chinese who convey them to impart to them provocative colour, since, in existing circumstances, though China might gain by war between Japan and Russia, she thinks she can hardly lose. Perhaps too Colonel Wogack's successor is one of the typical "men at the front." At any rate such rumours are at once mischievous and untrustworthy.

Prince Su is said to have reported to the Throne that China having been requested by both Russia and Japan to observe strict neutrality in the event of war, all pre-parations should be made to enforce that policy throughout Manchuria as well as throughout the eighteen Provinces. Strict neutrality in Manchuria would mean that, in the first place, Russia should be required to evacuate the territory. No conception of neutrality can be reconciled with the fact that Russia would be using an immense tract of the neutral Power's domain as a basis of belligerent operations. Prince Ching's programme, as described in our last issue, is much more rational. The Prince would limit China's neutrality to the districts westward of the Liao River. Very likely even that procedure

It is alleged by the Nichi Nichi's correspondent that Russia is making arrangements

to increase her Legation Guards in Peking. A number of Chinese students for Japan were to embark at Chin-wan-tao on the 12th instant.

congenial work than in Peking. There are two stories about the death of count alleges that he asked the Emperor viceregal post, but they replied that at the present crisis his services were more urgently needed in Peking. Another story says that he has informed the Japanese Legation of the probability of his speedy departure

The Asahi Shimbun's Peking corres pondent wires that out of a fund of 40 millions of francs lodged with the Russo-Chinese Bank for the purposes of the Paoting-Ching-ting Railway, 10 millions have been sent by the Bank to the Viceroy at Port Arthur.

A telegram from the Chinese commander-

There is a report that the Russian Authorities at Newchwang recently proposed The Russian officer who has replaced Colonel Wogack is reported by the Jiji Shimpo's correspondent to have called on Viceroy Yuan and informed him like = Alexieff Street," "Consular Street" taken to the Osaka Mint.

that Russia has no desire whatever to and so on. But the Consuls objected that fight, but that should the Japanese fail such a measure would bear a character of to appreciate her pacific intentions, she will permanency which did not properly belong to Russia's administration.

> Now that China is considering what shall be the limits of her neutrality in the event of war between Japan and Russia, it is in-teresting to recall the following, which ap-peared in *The Times* on December 1st, having been sent by its Peking correspondent on Nov. 30th:-

> dent on Nov. 30th:—
>
> Small bodies of Russian troops are patrolling the country round Hsin-min-tun, the termination of the branch line from the railway between the Great Wall and Niu-chwang, on the pretest of the alleged necessity of suppressing brigands in the country west of the Liau River, a region which, since the Russian troops were withdrawn on October 8, 1902, has been perfectly quiet and peaceful. Hsin-min-tun is only one day's ride from Mukden city, where the Russians wecently largely increased their garrison. The Chinese expect any day to learn that the Russians have occupied the rail head at Hsin-min-tun and resumed the military occupation of the country down to the Great Wall.
>
> It appears to us not unlikely that if Chines It appears to us not unlikely that if China attempted to extend the neutral zone as far as the western bank of the Liau River, she would be apt to come into collision with Russia

REVENUE.

The Government of Japan will soon find itself confronted by the problem of how to raise an increased revenue, since the expenditures made out of the special funds during the present crisis must be repaid, according to law. This question is taken up by the Shogyo Shimpo which suggests the following

Liao River. Very likely even that procedure might prove too great a tax on China's strength. Certainly Russia would not regard the river as a boundary if it suited her convenience to ignore it.

It is alleged by the Nich Nich Correct

This is an extensive order, but we presume that should the country see itself confronted by war, the Diet will not raise any difficulty about increased taxes. One remarks, namely, that unless a different system be adopted in selling loan-bonds, they will find few buyers. The experience furnished by the China-Japan war-loans is fresh in the recollection of Japanese capitalists. When they purchased bonds in 1894 and 1895, they did so in full confidence that after the war was over measures recolled. thing is certain, as our contemporary justly after the war was over measures would be adopted to redeem the bonds at par. But that expectation proved fallacious. only did the Treasury leave the bonds un-redeemed but also, instead of adhering to the old system of redemption by lot at par, permission was sought and obtained from the Diet to effect redemption by pur-chases in the open market at the ruling price of the day. In other words, the Treasury instead of assisting to strengthen the market for the bonds, became a purchaser at lowest figures, thus discrediting the securities issued by itself. It resulted that capitalists who had bought bonds at par to assist the Government in a time of national embarrassment, had to sell at a heavy discount or be content to leave their money in comparatively unprofitable investment. Some assurance must be given that no such methods will be pursued in the case of bonds to be issued hereafter.

THE PARTY OF THE P

Times:-

THE CHINA-AMERICAN TREATY.

The Government of the United States is evidently in deadly earnest about the new commercial treaty. Previous information commercial treaty. saidthat the exchange of ratifications was to follow the ordinary course, which would have meant that a month must clapse before the operation could be entirely completed. But according to telegrams just received the exchange is to be effected by telegraph. We do not clearly understand the distinction, but

manufacture has been kindled in the distance, but that its rays must be projected uselessly into the darkness so long as a third Power blocks the path, weapons in hand. Japan must not suffer this treaty to become vileges thus legitimately won, and assert home translations of important Japanese dodead letter. She must assert the pri-Nichi Nichi Shimbun observes that while Japan does not ask any third Power to in-Japan does not ask any time Tower to in-thing at once true to the original and worthy terfere between her and Russia, she may of it. Here, for example, are the renderings treasonably welcome any incident which of the Emperor of Japan's speech at the brings the States of the Occident into opening of the Diet and of the reply of the brings the States of the line with her. Such an incident is this line with her so line with her tung, so that the treaty may not become a dead letter. That is the only route to peace. Other newspapers speak in the same strain. The Yomiuri, for example, insists that Russia should be at once required to withdraw her troops from Mukden, and that if she refuse, the sword must be drawn.

THE ACTION OF THE JAPANESE DIET.

We are beginning now to receive the newspaper comments of the Occident with reference to the procedure of the Japanese House of Representatives in impeaching the Cabinet. Already in the middle of December, doubtless owing to statements appearing in the London Times and to telegrams published in its columns, it was beginning to be thought that Russia's "prime object was to force upon Japan the responsibility of beginning a war," by which manoeuvre Russia would have figured before the world as the injured party. That is the way the journal from which In other words, the House of Representa-tives signified that it objected to a policy of children.

patience. "Even traditional subservience to the Throne could not compel them to abate their demand that their country should show to Russia a bold, unyielding front."

The most sensible criticism we find in American journals is that of the New York Tribune, though it is evidently the criticism of one writing at a long distance :-

It would probably be a serious mistake to interpret this action of the house of representatives as either a manifestation of hostility toward the emperor or a portent of war with Russia. So far as it is a reflection when consequently policy is in reflection. exchange is to be effected by telegraph. We do not clearly understand the distinction, but apparently the difficulty of the former method is that the ratifications themselves have not yet reached the respective capitals. At all events the fact seems to be that on the 12th instant the Chinese Minister in Washington received the President's ratification and the United States Minister in Peking received the Chinese Emperor's ratification, and each having telegraphically communicated the receipt to the other, the exchange was held to the other, the exchange of the ministers, and not upon the ministers, and not upon the sovereign. The rection won the ministers are adopting the heritage of the heritage of the heritage of the brainster, the ministers are adopting the paperson of the

ENGLISHED.

It is strange that when correspondents of Western journals take the trouble to send choose, among the versions that offer, something at once true to the original and worthy Such an incident is this House of Representatives as published in

Your majesty has been gracious enough to open parliament personally to-day, delivering a cordial message, which has been received with great gratitude by this house. The empire of Japan is now at its zenith. Its position is one that has not been paralleled in the last thousand years.

The members of your majesty's house of representatives profoundly regret that at a juncture so critical, involving the fate of the nation, the course pursued by the cabinet is ill adapted to the needs of the situation and is not consistent with the enhancement of patients influences. ment of national influences.

ment of national influences.

The policy of the ministry has been shown to be inconsistent with the progress of the empire, being purely domestic and temporizing. Their diplomacy is a failure, and we humbly appeal to your majesty to review the situation. Solicitude for the progress of the empire dictates this reply, which represents the mational expectations. national expectations.

We do not recognise the provenance of this translation, and will therefore be acquitted of all intention to attach blame in any particular quarter when we say that, in-dependently of containing matter which did not exist in the original, the above renderings are at once ungrammatical and hideously we quote puts the matter. And then it goes on to say that in this policy the Japanese Representatives gave aid to Russia by proclaiming their dissatisfaction with the Government's conservative policy. In other words the House of Representatives and the Representatives talk like illegited to the report of the representatives and the Representatives talk like illegited to the report of the report of the representatives and the Representatives talk like illegited to the report of the representatives talk like illegited to the report of the representatives talk like illegited to the representatives the like illegited to the report of the representatives the representatives the representatives the like illegited to the representative the representatives the representative the representa

"THE TIMES" ON THE SITUATION.

Exceptionally keen attention seems to have been attracted in Tokyo by a recent communication from the Tokyo correspondent of The Times and by the resulting comments of the latter journal. The communication is not indeed very recent, since it is dated the 12th of October and it appeared in The Times on the 24th of November, followed by a leading article on the 25th. We reproduce the communication and also

the editorial comments of The Times:

As a matter of historical accuracy it is well to correct an error which seems very prevalent in Europe. By several publicists the statement has been made that, if when, in 1895, she was required to retrocede Liao-tong Japan had exacted a Chinese engagement against the future cession of any part of Manchuria to a foreign Power, all subsequent complications might have been avoided. In point of fact, that is precisely what Japan did endeavour to exact. She stipulated that not only should China give such a promise, but also that Mukden and Taku-shan—a port on the Bay of Korea westward of the mouth of the Yalu—should be opened to foreign trade. Russia objected. She said that the stipulation was apparently directed against herself, whereas she entertained no ambition whatever with regard to Manchuria. Further, the French representative in Peking espoused Russia's cause. He offered to Japan friendly advice in the sense that by pressing her demand she would offend Russia. Of course, Japan was not in a position to offend Russia, or, single-handed, to insist upon anything. Had it been possible for her to impose her will in any way on the three Powers confronting her, retrocession of Liao-tong would not have been inevitable. Inasmuch, however, as Russia, Germany, and France were ranged against her, while, on the other hand, neither England nor the United States showed any disposition to assist her, she had to abandon her demand of a guarantee. In short, it was not that Japan show any practical appreciation of the foresight she actually displayed. This page of history is not known to the bulk of the Japanese people. Were it known, they would have additional reason to chafe against Russia's present action.

Another misconception which appears to be current among the publicists of Continental Europe is that Japan's objection to Russia's remans the current among the publicists of Continental Europe is that Japan's objection to Russia's remans the current among the publicists of Continenta

against Russia's present action.

Another misconception which appears to be current among the publicists of Continental Europe is that Japan's objection to Russia's permanent presence in Manchuria has its origin solely in disappointed ambition. The Japanese, these publicists say, wanting Manchuria for themselves, cannot bear to see it fall into other hands. Evidently no one is in a position to deny that allegation completely, It is not possible to vouch for the sentiment of every section of a nation numbering 45 millions. It may be affirmed, however, that never has a hint of any such ambition found expression in the Press or on, the platform in Japan. The Japanese do, indeed, frankly claim that Manchuria offers an important field for their surplus population and for their such ambition found expression in the Press or on, the platform in Japan. The Japanese do, indeed, frankly claim that Manchuria offers an important field for their surplus population and for their commercial expansion. But not one of them argues that the attainment of these objects is incompatible with the maintence of Chinese sovereignty in the "Three Provinces." They say that it would probably be incompatible with the establishment of Russian sway, but they give no indication whatever of deeming it dependent on the establishment of their own sway. Two facts are brought out clearly by the writing that this crisis has inspired in Japan, newspapers writing, pamphlet writing, and manifesto writing. They are, first, that Japan fears for Korea, and, secondly that she fears for China, should Manchuria be absorbed by Russia. The first of these apprehensions is based on conditions apparent to all—namely, that Korea is necessary, not only strategically, but also economically, to the Power which holds Vladivostock and Port Arthur. It is in the ports of Southern Korea, and if her line of communication from the Usuri to Port Arthur is to be secure she cannot have it menaced from Korea. This proposition needs no elaboration, but it has never been fully stated by Japanese publicists until the present time. As for the dangers to China, that is the Yellow Peril seen through Japanese eyes. It would be difficult to say whether the idea of welding the Chinese masses into an instrument for defending the East against the West has ever been entertained in Japan. During 35 years of close association with the educated classes in this country I have never detected any indication of such a thought, and Jan even more ominous ambition with regard to East Asia's millions is read into the mind of Japan by European pessimists the Japanese themselves have always ridiculed it.

Yet the Yellow Peril has reality in their foresight.

it would certainly materialize into a vast menace were Russia settled in Manchuria. For she would were Russia settled in Manchuria. For she would then find it as easy to organize and equip an army of half a million Tartars as England has found a simitar task in India, and the Yellow Peril would thus be launched, not against the Occident by Oriental leaders, but against China by Russian generals. This child of time may be still in the lap of a very distant future, but who dare dismiss it as a mere chimera? The wave of Russian aggression has been rolling steadily over the face of Asia for cycles, and certainly at this moment, when it threatens to engulf Manchuria, there are no indications that its impetus is likely to be checked. Suppose its momentum certainly at this moment, when it threatens to engulf Manchuria, there are no indications that its impetus is likely to be checked. Suppose its momentum reinforced by huge legions of well-drilled, well-armed, and well-led Tartars, is there any power that could withstand it? Would not China lie completely at its mercy? The arms of the Tartars would not be unnerved by any feeling of patriotic reluctance to invade China. They would follow an Alexieff

— Peking as readily as their forefathers followed Tai-tsung, and just as Tai-tsung prefaced his advance against the Chinese capital by overrunning Korea, so the Russian leader would find it necessary to protect his flank by a similar conquest. Russian journals in St. Petersburg and Port Arthur lately sought to convince themselves and to persuade their readers that the great northern Power's presence in Manchurin is necessitated by Japan's aggressive ambition. The existence of such ambition remained undiscovered until its detection by these publicits. They have also endeavoured to prove that the desire of Japan to add the Korean peninsula to her own dominions is her sole reason for objecting to its absorption into Russia's. Probably, if the heart of Japan could be dissected, some such desire would be found engrained in its fibre. But it may safely be affirmed that her thoughts do not run upon forceful conquest. She would be altogether content to trust to the slowly her thoughts do not run upon forceful conquest. She would be altogether content to trust to the slowly working instruments of commercial and industrial working instruments of commercial and industrial development, since her ambition is, not to annex for the sake of empire, but to preserve for the sake of protection. Russia in Korea would stand at the very gates of Japan, and Russia in Manchuria and Korea, with her shadow projected over China, would mean a sentence of perpetual restriction and shrinkage for Japan. for Japan.

Extracts from an Editorial in

Delay puts, as we very well know, a considerable strain on the patience of the Japanese people. That might conceivably be a salutary national discipline, though as a matter of fact Japan has, for a young Empire, given such indubitable proof of her self-control that she cannot fairly be said to stand in need of a lesson from the school of experience. A more serious point is that the prolongation of the crisis may have an embarrassing effect upon her economically, temporarily impairing to some extent her commercial enterprise. Even this, we believe, she could bear so long as she felt it was putting no intolerable strain on the national prosperity, and did not pass the limit at which no powerful and self-respecting State could submit to it with honour. The horizon is heavily clouded, but the Japanese, with all their keen patriotism, are so essentially practical that they are much more likely to accept a reasonable compromise than to wreck themselves in the pursuit of vaulting ambition.

Such, at any rate, is, we believe, the view held

wheck themselves in the pursuit of vaulting ambition.

Such, at any rate, is, we believe, the view held by all well-informed people in this country who have got beyond the elementary idea of Japan as an upstart State, and have made some effort to understand the modern history of the Far East and the true nature of the forces at work within and around the moribund Empire of China. It was expressed with compactness and felicity at the Guildhall banquet by the Prime Minister. Our Japanese allies, he said, are as certain to show moderation, discretion, and judgment in the demands they make as firmness in carrying those demands into effect. This gives in a sentence a very just appreciation of Japan's political virtues, * * * Essentially moderate as we believe our ally to be, we do not expect, or desire, to see her backing down before Russian demands or making concessions in an infinite series. We realize perfectly well how vital to her permanent interests is the problem she has to consider, and we recognize that there is a point beyond which she will find it expedient not to go. She will not, we presume, relinquish the firm front she is at present maintaining on any terms short of the guarantee of her legitimate interests in Korea. But this is not a point on which there is really any necessity for us to educate the Japanese. They have the problem at their very doors, in the forefront of their external policy, as it has always been in recent days, and they know it as we cannot expect to do. But we know enough about it to be satisfied that Japan is doing nothing hastily or rashly when she lays her finger on the border of Korea as the limit to Russia's agressive expansion.

of the Tokyo correspondent's letter, but apparently the leading article in The Times has escaped our local contemporary's observation. Emphatically, however, the Kokumin insists that the real danger for the East
is a conquering Colossus with a Russian
head and an Asiatic—or, to put, it more
accurately, a Tartar—body, and that such
a peril menaces not the Orient alone
but perhaps also the Occident. Further
the weekly head about the description of the strong advocates
of naval expansion, but they do not touch
the organic development of the fleet under
the scheme of the Navy Act. Provision is the world should understand clearly, says made for two new battleships, M and N, the Tokyo journal, that when Russia infor a large cruiser designated as Ersatz trudes into Korea her conduct is as that of Deutschland, the small cruisers M and a man who enters a neighbour's house and purloins his sword,

Essatz Merkur and a division of torpedo boats or destroyers. The plan of trans-

NAVAL PROGRESS IN GERMANY.

The launch of certain German warships within recent weeks, and particulars published concerning the naval progress that is being made in Germany, have attracted interest, and evoked comment in England. The Army and Navy Gazette says, for instance:—"It is impossible for us not to regard the rise of Germany and the expansion of her fleet without a great deal of curiosity and some concern. The Emperor has declared that the future of the Fatherland 'lies upon the water,' and last December, at the new Palace, Potsdam, he said that every day showed more plainly a sound development of the country without the co-operation of sea power to be impossible with doublest was the phrase impossible-*nicht denkbar* was the phrase he used. In the year-book of the German 'Nauticus,' a chapter upon World Politics and Sea Power expresses the ideas of those who are doing great things to extend German influence at sea. Within the last thirty years the population has increased from 41,000,000 to 58,000,000, and where four men lived there are now six, while one man out of five is dependent upon food from little illogical to talk of Russia being farther abroad. Germans are found extending the away from Japan than Japan is from Russia? commerce of their country in every market We are reminded of the tiger that measured and emporium of the world, and the 13 feet from the top of his tail to the end of foreign commerce of the country has his nose and 18 feet back from his nose to his increased by leaps and bounds until it tail. The Asian wastes and Siberian deserts has reached a volume whose magnitude are just as great a barrier to Russia's advance

For Russia in Korea, as our Tokyo Correspondent told us in the very interesting article from his pen which we published vesterday, would stand at the very gates of Japan, and Russia in Manchoria and Korea, with her shadow projected over China, would mean a sentence of perpetual restriction and shrinkage for the young empire. It would take the hardiness of that bellicose Russian print the Novy Krati, which the other day affirmed that all that could be tolerated in the matter was the immigration of Japanese into Korea under control, seriously to traverse this assertion. Nobody can look at the map of the Far East without seeing that Japan has the best of reasons for objecting to the armed presence of Russian in the Hermit Kingdom; and nobody who knows anything of the close economic and industrial interdependence of Korea and Japan will deny that the Japanese have every justification for scrutinizing with a jealeous eye attempts by the Russians to exploit the mainland country. Japan has seen, like the rest of the world, the vast political consequences of a railway concession in the valley of the Palu and making the most of their very dubious position at Yongampia, a situation was obviously created which Japan could not afford to neglect. She did her best in 1890 to exact an engagement from China not to cede any of Manchuria to a foreign Power, but conformed with the facts. If there is a yellow peril, it is, as dreamed of Asiatic aggrandisement which have their birth in the brains of Europeans who are either was naturally debarred from pressig that claim with a feficive results. She knows nothing of those vast dreams of Asiatic aggrandisement which have their birth in the brains of Europeans who are either was naturally debarred from pressig that claim with the facts. If there is a yellow peril, it is, as dreamed the fact of the progress will be retarded. A river gunboat to the progress will be retarded. A river gunboat to the Tokyo correspondent's letter, but of the Polyon correspondent's letter, but of the Polyon and a storeship will not be put in hand, and the reconstruction of the Kaiserin Augusta and Irene will not be begun. ferring the men from the old hulks to barracks on shore is in hand, and torpedo stations are being established, while improvements are going forward in the ports, in-cluding Danzig, which is to undertake a larger share of work, and is to be provided

with a floating crane and a floating dock.

Turning to the personnel of the German fleet, we find expansion going on commensurate with the growth of the navy."

THE OUTCOME OF WAR.

An article in Harper's Magazine on the results of a war between Russia and Japan has been somewhat widely quoted and appears to command credence in civilian circles. There are reasons, however, for doubting the correctness of the writer's conclusions. He alleges, for example, that defeat would mean annihilation for Japan, as she is much more vulnerable than Russia, since the real Russia lies thousands of miles away with Asian deserts and Siberian wastes between, whereas "Japan is open on all sides to attack by the Russian fleet and invasion would mean for her the end of the game." Surely it is a

四日 江京即南北 以原出司

against Japan as they are to Japan's advance against Russia. It is unquestionably true that Japan can not reach a vital part of Russia's immense frame, but it is not true that "all Japan's 45 million children, her cities and resources are open on all sides to attack by the Russian fleet." Very few places indeed are open to such at-tack. Any hostile squadron attempting to reach an important city in Japan would have to run the gauntlet of powerful forts. The writer in *Harper* appears to forget that the Japanese islands are fortified perhaps as strongly as any region in the world is now or ever was. Concerning invasion, again, that chimera scarcely merits a moment's serious attention. To invade Japan would serious attention. To invace Japanese a task far beyond the strength of any be a task far beyond Russia. People that Power, not excluding Russia. People that have no knowledge of military affairs talk of carrying an army of two or three hundred thousand men over the sea and landing them on foreign soil as though such performances were within the range of every-day doings. It is just conceivable that England, did she strain her capacities to the very utmost, might be able to transport to Japan from India a force of a hundred and fifty or two hundred thousand troops; but she would require ample time and entire freedom from molestation en route. And when she did get her army to Japan it could not effect anything permanent. But for Russia the whole feat from beginning to end would be impossible. She is not in any way equipped for over-sea We do not mean to suggest any superiority for Japanese troops over Russian or English. Nothing is further from our thoughts. The simple fact is that the invasion of a far distant over-sea country which possesses a fine army and ample means of defence is a task not to be contemplated by any modern State.

10 CORRESPONDENTS.

Many complaints are reaching us about the late delivery of the Japan Mail, more particularly in towns to the north of Tokyo. We have made enquiries and find that the fault does not lie with the Yokohama Post Office, but with the authorities in Tokyo. To give three instances of the delays in the Tokyo Post Office, we may mention that a letter posted at the Netherlands Legation on January 2nd reached us on Sunday, January 10th at 9.30 o'clock; a letter, enclosing a postal order, sent from Azabu on Dec. 31st reached us at 11 o'clock on Sunday, January 15th at 1 reached us at 11 o'clock on Sunday, January 10th; another letter posted in Tsukiji on the evening of December 31 addressed to this office was delivered on Saturday, January 9.

We hope that the Tokyo Postal Officials

having now distributed the accumulated mails of the New Year will endeavour to

The Tokyo Post Office has not yet caught up with its daily business. By the 10 o'clock delivery on Wednesday (Jan. 13) we received in Yokohama a postcard which had been posted on the morning of January 7th! This note will, we hope, explain to some of our correspondents in Tokyo why it was that the usual announcements of church services in the capital failed to appear last Saturday—their postcards did not reach as till Monday, Tuesday and Wednesday.

DR. BAELZ' CRITICISM OF STRATZ.

Dr. Baelz asks us to correct two inaccuracies in our recently published translation of his interesting criticism on the work of Our translator made Dr. Baelz say :-" I think, without being pre-Mr. C. H. Stratz. sumptuous, that I have a special right to criticism for the matter in Stratz's book is so completely built up from my own works, that without them it could not have been written at all." Instead of "the matter in Stratz's book," the translation should run, "as far as actual facts are concerned, Stratz's book, etc." Dr. Baclz says:—"In German I used the expression das sachtiche and put it in italics to show the sharp distinction I it in italics to show the sharp distinction I it in italics to show the sharp distinction I it in italics to show the sharp distinction I it wanted to draw between actual data, which he borrowed from me (as the average height, the proportions of the body and other anthropological facts) and what he gives on his ropological facts are material than I actually have, for if the 'matter' of the book is entirely built up on my own works, then people might suppose that by me also were suggested the thoughts and ideas on art which I afterwards repudiate. I of course take the responsibility for the actual data borrowed from me, but I refuse to have anything to do with the windy structure lateral rates and putting to do with the windy structure lateral rates and putting to do with the windy structure lateral rates and putting to do with the windy structure lateral rates and putting to do with the windy structure lateral rates and pictures of Kyosai," whereas he really said borrowed from me, but I refuse to have anything to do with the windy structure lateral rates and pottures of Kyosai," whereas he really said borrowed from me, but I refuse to have anything to do with the windy structure lateral rates and putters of Kyosai," whereas he really said borrowed from me, but I refuse to have anything to do with the windy structure lateral rates and putters of Kyosai, "But this is merely of the form the tone of the Russian Press, and pictures of Kyosai," But this is merely lateral rates and conditions, of Japanese emigration of a man whom a spoilt child asks for the moon."

Are semantal and the written at all. Instead of the matter in Stratz's book," the translation should run,

A REMARKABLE STORY.

On December 8th The Times published the following from its Paris correspondent:—

gostal order, sent from Azabu on Dec. 31st dated November 14, giving particulars of the Japanese of postal order, sent from Azabu on Dec. 31st dated November 14, giving particulars of the Japanese of Control of the Japanese of Control of Cont

have attacked Port Arthur. It is not without interest to note that the correspondent and, presumably, his Russian informants attribute the conception of the Japannese scheme to the discovery of a serious defect in the defences of Port Arthur. He says that during the Russian naval manœuvres a section of the squadron which represented the invaders succeeded in landing a large body of troops a little north of Ta-lien-wan owing to an unaccountable break in the land defences. Six regiments penetrated into the fortress and captured it. The news of the defect in the fortifications is supposed to have reached the Japanese Government by telegraph from Chifu. As the defect in the defences of Port Arthur could not be made good for weeks, the Japanese, it is said, were bent on taking advantage of the opportunity. have attacked Port Arthur. It is not without interest

ber, arriving there on the 29th of that month, and remaining a few days. But all the embroidery about the decoy transports and the scheme of betraying Russia into warlike action is pure invention. It might have occurred to the Port Arthur correspondent that Russia is not the guardian of southern Korea, and she would be arrogating a singular position did she undertake to expel by force of arms everyone agressing there.

THE UNITED STATES OF EUROPE.

Mrs. Emily Crawford writing in the December Fortnightly Review, says :- Edgar Quinet, and Charles Lemonnier, then a French advocate and counsel for the Northern railway company, "proclaimed" at a peace congress at Geneva, in the sixties, the United States of Europe. echoed the proclamation, which called forth enthusiasın among French Republicans. But the 1870 war and its consequences quenched for some time the sacred fire. I am sure it is but smouldering and not extinct. A few months ago, the Italian statesman Luzzatti declared his sympathy for the abolition of frontiers in Europe, and I am aware that in other countries not only poets, but very matter-of-fact statesmen, accustomed to responsibility, are of the same way of thinking. ports appear to have had but a handful of men on loard.

Whatever the intention of the Japanese may have been, the construction put upon it by the Herafit's informant, which is possibly that of the Russian authorities at Port Arthur, is that the Japanese idea was to prove that their squadron had been wantonly attacked by Russia while engaged in mere naval was to prove that their squadron had been wantonly attacked by Russia while engaged in mere naval university training. Their different patriotism annextures consisting of a trial transport of men to Korea. They would have been able to prove that there was only a small number of men on the sunken the received an almost identical high-school and university training.

Their different prove that their squadron that the received an almost identical high-school and university training.

The deal made was the real again the school and the received an almost identical high-school and university training.

The received

and the commercial competition of the United States bid Europe to federate. Submarine destroyers will work in this direction. Russia destroyers will work in this direction. Russia wants quietly to digest her more recent acquisitions. A universal impulse in favour of peace may be felt everywhere on this continent. The action of three monarchical states in sending squadrons to Algiers to vided for mutual tariff concessions with states in sending squadrons to Algiers to salute President Loubet is a hopeful sign. Europe has been lopsided since 1871; firstly, under the diplomatic supremacy of Bismarck; and, secondly, under the effect of the Russian-French alliance, which has been more or less of a mystification for the French. Europe is manifestly recovering her balance. France sees that she has drawn too many chestnuts out of the fire for Russia, and is sick of militarism. She would gladly revert to her eighteenth-century status, when she had an intellectual sway and was supreme Tagus. She does not ask better than to refer troublesome international questions to The Hague conference. Nothing short of a revolution has taken place since the death of President Faure in French ideas about military prowess and glory. The French begin to feel that they are too good for the rough colonial work of the world, and that, in addicting themselves to art and science chiefly, they can hold an enviable primacy in the world. Americans should not imagine that Europeans are their render Americans free of all these fetters. When a European can follow a vocation without any let or hindrance, he does as well as the best American, and may do better, on the very high peaks of intellect, whether in science or in literature. Berthelot has no parallel anywhere. Marconi and Hertz equal Edison—to put it very mildly—and Lord Kelvin is illustrious as an inventor. The emancipation of Europe from the military incubus would free her genius, give it wings, and enable it to soar to heights yet undreamt of. Hope and joy could not but stimulate the sense of beauty, so strong in most European races, and better material conditions give scope to warm-hearted, generous sentiment. The European man or woman values happiness more than great wealth—a state of mind that helps the artist, author, or scientist, and is the beginning of wisdom. The French and the Germans enjoy more than the British, save the Scotch, the use of their higher intellectual faculties. The Spaniard is happy in feeling he has a highly wrought soul and in feeling he has a highly wrought soul, and Italy is a country of great mental and esthetic capabilities. The neutral states are forward in the production of middling people and a decent working class population, but are not distinguished for high thought. A small country breeds small minds. Ibsen, however, relieves Norway from this reproach, and Maeterlinck Belgium. Denmark boasts of a great critic, Brandes. Nobel, whose peace prizes have rewarded the efforts of Frédéric Passy and Ducommun, was a Swede. He looked forward to a federated Though Europe, but never hoped to see it. Though asked to speak of war dangers, I feel bound rather to descant on peace prospects, and on the good time for Europe which I see

NOTES ON CURRENT EVENTS.

The Additional Convention concluded beregard to imports from the territories of one of the contracting parties to those of the

We read in the Kokumin that the Asiatic Society of Washington has telegraphed a message to the Yokohama branch, in the sense that Japan is fighting for civilization if she engages Russia; that she has the sympathy of the American people, and that she need not fear anything.

It is reported that the personnel of the in art and fashion from the Neva to the Military Council recently instituted by Imperial Ordinance will be as follows:-

Tield-Marshal Marquis Yamagata.
Field-Marshal Marquis Oyama.
Admiral Yamamoto, Minister of the Navy.
Lieut-General Terauchi, Minister of War.
Admiral Viscount Ito,
Admiral Viscount Ko,
Admiral Baron Inouye.
General Count Nozu.
General Baron Kuroki.
General Baron Kuroki.
General Baron Kuroki. Lieut-General Baron Kodama, Rear-Admiral Ijuin,

terdict at this juncture the publication of all confession. But he obstinately refuses to newspaper items about the movements of implicate any accomplices and there is a ships and troops. It is better that the public should not be kept in a fever of involved. excitement by stories of which the vast majority have no grain of truth. Be that as it may, however, we desire to correct a misapprehension into which a local contemporary has fallen in saying that the same veto does not extend to the correspondents in Japan of foreign being taken to arrest him, though it is journals. It does extend to them, and we necessary to note that as yet he is only have knowledge of a telegram addressed to a London newspaper being "stopped" in The telegraphic head office through which all telegrams for over-sea countries pass, has orders, we believe, to hold back any message which violates the terms of the recently issued order.

It is reported that the Italian cruiser Elba has run on a rock near Tsushima and gone down. Details are not to hand.

A full report of the Board of Trade on Shipping Casualties to British vessels during a quarter of a century has just been issued. It shows that during the last 25 years 6,621 wrecks and casualties to ships belonging to the United Kingdom have been attended with fatal results to 41,267 persons, of whom 34,955 were members of the crews and 6,312 were passengers, pilots, or other persons not on the articles of agreement. The average annual loss 'during the last 25 years was 1,651 persons, consisting of 1,398 crew and 252 passengers, and the loss in 1901-1902 was 1,657 persons, of whom 959 were crew and 698 were passengers. Compared crew and 698 were passengers. Compared with the average for the previous 24 years, the figures show a decrease of 457 in the number of seamen and an increase of 464 cording to the crop desired, and after much in the number of passengers lost, the loss of experimenting and much exercise of that

seamen in 1901-1902 being lower than in any of the previous years except 1897-98 and 1900-1901. The loss of life during 1901-1902 was swollen by the loss of the steamer Camoria, of Glasgow, which was reported as missing while on a voyage from Calingapatam to Rangoon with a crew of 82 hands (including 73 Lascars), and 655 native passengers. The loss of life in 1895-96 was swollen by the loss of 247 lives through the wreck of the Drummond Castle, near Ushant, and the loss of 277 lives through the sinking of the On Wo, of London, by collision with the Newchwang near Shanghai. The number of passengers lost in 1894-95 was swollen by the large number (1,150) of Chinese soldiers drowned by the sinking of the Kowshing, of London. The number of seamen lost in sailing vessels in 1901-1902 was 380, and of passengers 22, against averages of 892 seamen and 48 passengers for the last 25 years. The number of seamen lost in steamships in 1901-1902 was 579, and of passengers 676, against averages of 506 seamen and 205 passengers for the last 25 year.

It appears, after all, that the mysterious loss of thirty thousand yen at the Bank of Japan was no mystery at all. The thing was of the simplest. An assistant clerk, named Ono Shuzo, was on duty at the deinferiors. The nations of the world are chained down by survivals of the bad old transports has been settled. The Government has agreed to pay nearly what the privileges and monopolies, and by the disnumber of the final privileges and monopolies, and the final privileges and monopolies, and the final privileges are disnumber of the final privileges and monopolies, and the final privileges are din handing over, he put the bundle in his own pocket and returned the accompanying On the whole we can not but think it cheque through the usual channel. Nothing wise on the part of the authorities to incould have been simpler. He has made full terdict at this juncture the publication of all confession. But he obstinately refuses to strong impression that accomplices were

It has been shown almost conclusively that the robbery at the Bank of Japan was not the work of one junior official only. Three others seem to have been involved in it. One of these was a chief clerk, Totsuka Kei. He has fled to Shizuoka and steps are necessary to note that as yet he is only under suspicion.

In Japan one of the commonest methods of fertilizing the soil is to plough into it beans that have been grown in the intervals of more valuable crops or on ridges reserved for the purpose. History does not show when or by whom this device was invented, but it has been used for centuries all over the country, though the farmers were quite ignorant of its scientific explanation, namely that whereas certain cereals deprive the soil of nitrogen, which is essential to their growth, others restore that substance. The fact has led a German savant to think out and work out a process which seems destined to do great things for agriculture. He observed that the nitrogen-restoring quality of beans, clover and so forth, is due to the presence of small nodules on their roots, which are produced by nitrifying bacteria. Professor Nobbe concluded that these bacteria could not establish themselves on the root of a plant if they did not exist in the soil, and from that conclusion he passed to the inference that in the case of

remarkable quality, German intelligence, he succeeded in getting a set of bacteria ferti-lizers contained in little phials, a quantity sufficient to restore nitrogen to half an acre of ground being saleable for 50 cents. American chemists have improved upon Nobbe's methods by putting up the bacterial in small dry masses like yeast cake instead of having them in moist cultures in glass tubes. A farmer has nothing to do except to soak one of the cakes and use the solution to treat the coad he is about to some to treat the seed he is about to sow.

The application of Miss Bertha Cave for admission as a student of Gray's Inn has been denied by the House of Lords on the ground that no precedent exists for admitting a woman and that there is no occasion for creating one. The decision moves one American newspaper, the Cleveland Plain Dealer, to remark :-

Dealer, to remark:

The decision is not surprising in view of the numerous and formidable obstacles thrown in the way of woman's advancement by this fetich worship of precedent. Even the battle for the higher education of women is not yet won. Co-education in the tion of women is not yet won. Co-education in the American sense not only does not prevail, but many of the opportunities and rewards of the university courses are still withheld from women. At both Oxford and Cambridge, those one-time homes of light and leading, the proposal to admit women to full university fellowship recently gave rise to student disturbances, which were by no means universally reprobated, Probably these great centres of learning will continue some time longer to live up to their reputations as homes of lost causes, and England, in spite of her vaunted liberalism and enlightenment, will deny women equality in the professions with men.

their reputations as homes of lost causes, and England, in spite of her vaunted liberalism and enlightenment, will deny women equality in the professions with men.

In view of this action of the highest court of England, it is somewhat surprising to read in an article by Mary L. Breakell, in the Ninteenth Century, on the practice of medicine by women, that there is not only no law against it, but that "it is encouraged by the authorities, and almost every advantage of study offered to men is open to women also, if they have private means at their disposal to enable them to make use of it. The distinguished and better class of medical men are not antagonistic, and, when necessary, meet qualified women amicably in professional consultation." The author admits, however, that women physicians are still looked upon dubiously, especially by their own sex. The opportunities for the training of the women who desire to enter the medical profession would appear to be adequate.

Concerning the position of the medical woman in England, in a retrospect of the last century, we find that the London School of Medicine for Women was opened in 1874; that three others have been inaugurated in the metropolis since then; that there are now six schools in England where they can study with men, and, though Oxford and Cambridge are closed to them, six universities where it is open to them to take degrees and diplomas equally with men. Therefore it will be seen that women have had full opportunity of study and hospital practice for close on thirty years: And the result in numbers, according to the last census for England and Wales, is that there were then 212 fully qualified medical women registered in the country; as a matter of fact there are now, including Ireland and Scotland, 249. It is interesting to learn that fully half of the 249 are registered as holding some public medical appointment in attendance on their own sex. Thus, as is only natural, the New Hospital for Women, founded by a woman, is entirely officered by them; also

The fourth part of "Great Masters," the wonderfully reproduced collection of famous pictures which Mr. William Heinemann is issuing from 21, Bedford Street, London, fully maintains the high standard of excelfully maintains the high standard of excellence set in the opening numbers. Anything more beautiful than the large photogravure of Gainsborough's "Miss Linley and Her Brother," or Metsu's "Young Cavalier Writing," or the Rubens' landscape, would be difficult to imagine. They are beautiful in every way, and to those who become their happy pagessors they should prove in all and Baron Oku were summoned to the happy possessors they should prove in all and Baron Oku were summoned to the

a fuller prospectus, giving a list of the works about to be issued, as well as the special privileges given to subscribers, from which we make the following extract :

we make the following extract:

Our complete series will consist of 25 Parts, condaining in all 100 Pictures, representing every Great Master by some of his best works, and every great collection by some of its gems. These 25 Parts would at the price we had fixed for them amount to \$\int_6 5_\text{s}\$, but we offer to supply them to purchasers of \$i 5_\text{s}\$, but we offer to supply them to purchasers of it hese 4 Parts, for \$I \text{s}\$ in addition to what they have already paid, making in all \$I\$ for the complete work. This brings the individual cost of each Picture down to One Shilling, a price 20 per cent, below what we were originally able to offer, and one absolutely out of comparision with anything that has ever before been offered to the public.

This is an opportunity that we strongly advise our readers to take advantage of, for in the language of the market-place, they will reap extraordinary value for their will reap extraordinary value money. Messrs. Kelly and Walsh will money. receive orders in Japan.

Australian papers contain very full ac-counts of the inaugural banquet in the Town Hall of Melbourne when Sir Malcolm the recently elected Lord Mayor of that city, entertained a large and McEacharn, brilliant assembly, to celebrate his assumption of office. Among those present were the Governor-General Lord Tennyson, the Governor of Victoria, the Bishop of Mel-bourne, the Admiral commanding on the station, the General commanding the Federal Army, the Ministers, the Judges, and many other distinguished persons. Several toasts were drunk and several excellent speeches made, but we presume that Sir Malcolm's response to his own health was brief for we find no report of it. Sir Malcolm and Lady McEacharn are said to be among the best loved and most publicspirited people in all Australia, which, it will be admitted, is no slight praise.

The Asahi's London correspondent says that an attempt was made by some mis-creant to blow up the *Nisshin* before she left Genoa. A rough idea of the details are given but we can not gather anything more definite than that the idea was to fire the magazine by tampering with the electric conductors. Some slight explosion seems to have taken place but its effects were purely local. Probably the affair had its origin in the brain of some anarchist who would have been ready to shatter anything savouring of government and discipline.

Thoughtless authors and atrabilious critics rail at the English publisher and declare that the dullness in the booktrade and literary market is due the publisher's stedfast refusal to advertise The publishers do not answer back, but instead take practical measures. Every one of the big London publishing houses has now its own particular organ dealing solely and particularly with the books which it publishes. One of the latest and perhaps the most attractive of these special journals reaches us from Mr. Fisher Unwin, of Paternoster Buildings. He calls his paper M-mainly A-about B-books. The paper runs to 32 pages of the size of the Japan Weekly Mail and is devoted simply to book-notices, special literary articles, verses, and letters,

verity a joy for ever. With Part IV, is issued Palace to receive their commissions, as the Imperial nominees on the recently organized High Martial Council. We may mention in this context that the Official Gazette of the 14th instant announces the abolition of the three Tatakuhu (command lition of the three Totokubu (command sections) hitherto in existence. Nozu, Kuroki and Oku were the Chiefs of these Sections, and they are now appointed to be members of the High Council. They were duly installed at the Palace yesterday, the Minister of State for the Navy acting in the place of the Premier, who is still indisposed. Admiral Baron Inouye was also appointed a member of the Council, and Major-General Usagawa Kazumasa received the post of Kanji-cho, which corresponds, we presume, to that of Chief Secretary.

Japanese newspapers mention with profound appreciation the fact that the Right Honorable Sir Malcolm McEacharn, Lord Mayor of Melbourne, recently telegraphed to Mr. Kondo Rempei, President of the Nipony Viscon Knishe in the cance that Australia pon Yusen Kaisha, in the sense that Australia was prepared to furnish a thousand volunteers to fight in the Japanese army, and a corps of trained nurses, in the event of an outbreak of hostilities between Japan and Russia. Such an offer shows that for all her anti-Oriental legislation the heart of Australia is with the Japanese nation in its Australia is with the Japanese nation in its present struggle for its rights.

News from Vladivostock says that the ice is now a foot thick in the harbour and that it has been found necessary to beach the torpedo-craft. The squadron of vessels lately reported as anchored in the port seems to have taken its departure, but nothing is publicly known about its destination. There can be no doubt that the degree of frost this year is exceptional throughout the whole of the Far East.

Russia, according to London telegrams, is exceedingly angry because English officers and English sailors are helping, and indeed taking the main part, in bringing out the Kasuga and the Nisshin. England would be angry too were the cases reversed. But it strikes us that Russia has more valid cause for umbrage than these cruisers furnish. In her place we should be much more profoundly affected by the news of numerous applications from Englishmen to serve in the ranks of the Japanese army, and by Melbourne's offer of a thousand volunteers. England is Japan's ally, and if Russia gets vexed about the natural consequences of the alliance, it can not be helped.

THE WAXING MOON.

The four days' crescent moon that clasps the old, A silver acorn in a cup of gold, Waxes, sun-lighted, night by night apace, Till the old moon, earth-lighted, hides her face. So waxing truth shall shine full-orbed one day; So earthborn error fade and pass away.

THE KAISER AND WATERLOO.

A GERMAN correspondent to whose opinion we attach much importance, writes thus: -A propos the KAISER's words about the Prussians at Waterloo, it will probably interest you to hear that two English authors -W. O' CONNOR MORRIS in Great Commanders of Modern Times, and E. Hors-BURGH in Waterloo a Narration and a Criticism-and an American (J. C. ROPES in The Campaign of Waterloo) say in so many words that BLUCHER saved WELLINGTON from a crushing defeat. That fact should go far to show how little cause the British press and public had to be angry with the KAISER, but unfortunately the feeling in England is so anti-German and so touchy, that out of an unintentional needle-prick they make an intentional sword cut. The motto as to Germany is now 'What good thing can come out of Galilee'? Let us hope that this unfortunate state of affairs may soon

No one wishes more than we do that what our correspondent justly calls an "unfortunate state of affairs" may soon cease. But, speaking frankly, our hopes for that result are not increased when we see that even the profoundest thinkers among the Germans, even the men who may be regarded as freest from international prejudices, justify this last speech of the Kaiser's on the ground that two English writers and an American had said the same thing previously, and when such Germans speak of the anti-German and "touchy" feeling in England to-day. For our own part, when we recently alluded to this subject we were well aware that certain Anglo-Saxon publicists had taken the view now openly proclaimed by the German EMPEROR. But we were also aware that their view had not been endorsed by the most competent authorities, and that it finds no expression in the accounts of those who had intimate and personal knowledge of the incidents of Napoleon's last campaign. He that as it may, however, the great point, the point before which everything else pales into insignificance, is that the German Sovereign should have made this declaration from his high place urbi et orbi. Suppose that it were true, suppose that it were a thousand times true, what can be said of the tact or friendliness of a monarch who, at an interval of three-quarters of a century, proclaims as an unquestionable fact that the soldiers of his country's ally, the soldiers who bore the brunt and heat of a day of terrible conflict, would have been annihilated had it not been for the succour of his own country's troops? It is not, so far as we can see, conceivable that anything more ungracious and less chivalrous could have been done, and we age astonished that the precedent of two or three obscure annalists should be adduced in defence of a great Sovereign's indiscretion. The German Emperor is too big to news its suggestion that no time should be and his fellow-thinkers some four years ago, and the wasca Semmongarko have deemed in the wasca semmonga forget even for an instant the obligations of lost in communicating the course of the was embodied in a small work called the Shūshin lis station, and though we do not like him negotiations to the Japanese people. on morality generally were fully discussed in omou; sunawachi ii-kayereba gakumon-jo ni oite mo these columns in two articles that appeared ningen no michi ni oite mo, Nihonjin ga kore kara ningen no michi ni oite mo, Nihonjin ga kore kara ningen no michi ni oite mo, Nihonjin ga kore kara ningen no michi ni naru no de arō to omou; sekai no michi annaija ni naru no de arō to omou; sekai no michi annaija ni naru no de arō to omou; sekai no michi annaija ni naru no de arō to omou; sekai no michi annaija ni naru no de arō to omou; sekai no michi ni naru no de arō to omou; sekai no michi ni oite mo, Nihonjin ga kore kara ningen no michi ni oite mo michi ni oite mo tarian and contains no religious, mystical, or philosophic elements of any kind. It is founded to a considerable extent on the old Bushido, but the world-wide, work-a-day modern ethical stan-dard has contributed more elements to it than any dard has contributed more elements to it than any ancient system of morals. It is essentially the product of the Meiji era. Up to four or five years ago Professor Tsubouchi Yūzō had devoted his whole time and strength to literature. The magazine with which he was formerly connected, the Warsha Runnaby had five or six years ago no the Waseda Bungaku, had five or six years ago no superior among literary organs, and its premature decease caused much grief in the literary world. But Professor Tsubouchi was of opinion that he could serve his country's highest interests better by dropping literature for a while and taking to teaching morality. He perceived that the old system of ethics could no longer hold its ground when subjected to modern influences. system of ethics could no longer hold its ground when subjected to modern influences, ground when subjected to modern innuences, material, literary and critical, and so he undertook to elaborate a new system and to make it thoroughly intelligible to ordinary students by means of a series of popular lectures delivered at the Waseda Semmon Gakko. These lectures having Waseda Semmon Gakkö. These lectures having extended over four years, have now been published, and they constitute what we may designate the Waseda System of Ethics, though it is only right to say that Mr. Tsubouchi claims no such authority for them and that they have not as yet been publicly endorsed by the School, though they undoubtedly represent the unwritten code that has been observed in that school, which resembles in many essential particulars that practised in the Keiögijiku. The Tsūzoku Rinridan (Talks on Popular Ethics), the title given to Mr. (Talks on Popular Ethics), the title given to Mr. Tsubouchi's lectures, was briefly noticed by us a Tsubouchi's lectures, was briefly noticed by us a few months ago, but considering the ripe scholarship and great talent of the author and his position as one of the leading professors in the Waseda University, the work seems to call for fuller comment. It covers 492 large-sized pages, printed very clearly in No. 6 type. In the preface the author apologizes for the imperfections of the author apologizes for the imperfections of the book as a literary production. It was not, the tells us, written to satisfy scholars and critics, and it does not pretend to be a full exposition of and it does not pretend to be a full exposition of the author's views on ethics. Its principal aim is by any ordinary reader. tracting the attention of students and of widening their views, Dr. Tsubouchi has ranged over a great variety of subjects. The book contains great variety of subjects. The book contains many comparisons of the ethical standards of the West with those of the East. Nearly 40 pages are devoted to a comparison of Socrates with Confucius. The work is divided into three Sections, and sub-divided into Chapters. The opening and sub-divided into Chapters. The opening Chapter of Section I, is on the Essence of the Chapter of Section I. is on the Essence of the Yamato Daniarkii. It covers no less than 38 pages. This term, we are told on p. 9, came into use shortly after the introduction of Chinese literature. Throughout this chapter Dr. Tsubouchi shows that he has a very high opinion of Japanese national character and he evidently which the true fines speciments of humanity and or japanese national character and he evently thinks that no finer specimens of humanity are to be found anywhere than those produced here. And as regards the future, he is of opinion that the Japanese have only to go on developing the strong points of their character-their love of absolute purity and truth undiluted, and their veneration for the good and the beautiful. These qualities in the nation will, he considers, serve it article penned by Mr. Muramatsu Yoshitarō that in better stead than anything else that could be appeared in the Kiristokyō Sekai some weeks ago, named and will, it may be, in the future make entitled Dōshisha Daigaku Fukkō no Kiun the named and will, it may be, in the future make other nations look up to the Japanese as leaders of thought. The language he uses is very strong. We quote a few sentences to show its gist. Nihonjin wa horto seiketsu wo ai suru kokumin de

sekai no michi-annaija ni naru no de aro to omou; mata narasanakereba naramu. The substance of this is that since the Japanese love truth for its own sake, in both general knowledge and in ethics they are likely to lead the world later on. We say, later on, as Dr. Tsubouchi subsequently ad-mits, that it will take another generation of Japanese to establish the pre-eminence which he predicts for his fellow-countrymen. Chapter IV of the First Section of Dr. Tsubouchi's work of the First Section of Dr. Isologicals with the code of morals practised at the Semmon Gakkô and the ways of the school. He tells us on pp. 132, 133 that the central principle of the Waseda Ethics is a spirit of independence and religious. This is supplemented by ence and self-reliance. This is supplemented by a profound respect for the rights and liberties of others. The Waseda school was, Dr. Tsubouchi reminds us, founded on the principle of the in-dependence of learning, that is, as a protest against making learning subservient to religion or politics. So that it is not surprising that independence of spirit should figure as an ideal in the ethics of the school. Another characteristic of the school to which Dr. Tsubouchi calls attention is its thorough matter-of-fact character. "It cares little for the letter and much for the spirit, little for names and titles and much for sterling worth." tor names and titles and much for sterling worth."
A spirit of equality is manifest among us, says the Professor. The school is most distinctly an anticlass institution. We have no space here to notice the many interesting topics discussed by Professor Tsubouchi in his lectures. There are few unblests connected with precised marality in Lange. subjects connected with practical morality in Japan to-day that he has not touched on in a charmingly fresh and candid way. He points out in a most clear manner how evil ever mixes with good in all human affairs. A chapter is devoted to military abuses and literary abuses and another to and it does not pretend to be a full exposition of the author's views on ethics. Its principal aim is to supply students with some definite ideas on ethical subjects, to show them what remains from the wreck of Japan's ethical ship, to explain to be them how immensely important to Japan is the formation of character of a high type by her young men. The style adopted being that of high class colloquial, the lectures can be understood by any ordinary reader. With the object of attracting the attention of students and of widening a striking resemblance to those of Hobbes. The tribule to be essentially utilitarian and his doctrines bear a striking resemblance to those of Hobbes. The a striking resemblance to those of Froddes. The gist of the whole work may perhaps be summed up in the quotations from Plato and Aristotle which Dr. Tsubouchi compares with to quotations from Contucius and Mencius. "In all things the law of 'limit' is the cause of good while the unlimited the integralized the

moral beauty we have by nature, but it only exists in perfection. after cultivation by experience, in the mind of the wise man, and to him in all cases must be the ultimate appeal." (Aristotle.)

The work is published by the Fuzambō and

sells at 1 yen 25 sen per copy.

The Kiristokyō Sekai thinks that great importance is attached to the appointment of a New President of the Doshisha. According to a long future of the institution is by no means assured and it is thought that its success will depend largely on adroitness in its managerment.

Mr. Ebina Danjo writes in this paper on the

* This, we observe is the opinion of an Austran aru kara, kanarasu ya wareware ga yobo suru connection of music with religion, and the Rev. Indiana tan kokka ni sakidatte, lokoro ni yoreba, tabun ta no kokka ni sakidatte, of a revised hymnal to be used by most of the Nihon kokumin ga makoto no michi wo hakken shi, of a revised hymnal to be used by most of the makoto no ri wo hakken suru yō ni naru darō to Protestant Missions. This book has been in course this respect. Music is taught in some of the High

of compilation for several years and is now ready for use. Its compilation has cost over 2,600 yen. This sum has been provided by the Missions concerned, namely by the American Board, the Presbyterned, namely by the American Board, the Presby-terian Missions, the Methodists, the Baptists and the Christians. Mr. Allchin hopes to see periodical singing classes held in various towns which will be

attended by members of the various congregations.

Under the title of "Impressions received at the General Synod" the Kiristokyō Sekai publishes the opinions of various members of the Kumiai Church. All are agreed in thinking that the cordiality of feeling among the members has never been more marked than it is now. One characteristic of the Conference held a few months ago, already noticed in these columns, was the fact that everything was managed by the Japanese. We are told that the name of no foreign missionary was to be found among the Councillors (Gi-in).
Mr. Takemoto informs us that to allow freedom of thought is one of the principles of the Congregational Churches (Shisō no Jiyu wa Kumiai Kyōkai no Shinkō de aru). There are theologians of the old school and theologians of the new, but of the old school and theologists of they work harmoniously together and help each other in various ways. The project for despatchother in various ways. The project for despatching missionaries to foreign countries met with ing missionaries to toreign countries met with much favour, though some expressed doubts as to the feasibility of the scheme just at present, owing to insufficient means. Mr. Hino Mazumi has published three articles on the "Immortality of the Soul" taking the line that the theory, though not capable of mathematical or logical demonstration is capable of nuch verification and not capable of mathematical or logical denon-stration is capable of nuch verification and coming to the conclusion that the privilege of living for ever cannot be enjoyed by animals,

their nature being of too inferior a type.

Mr. Miyagawa Tsuneteru in an article on
"The Degenerate Koreans" argues that the
only way to save Korea is to establish a only way to save Korea is to establish a Japanese protectorate over the peninsula. The desire for reform hardly exists among the governing class. There is no prospect of any radical change being effected as long as the country is left in a state of nominal independence without possessing a vestige of self-reliance or self-respect. Under Japanese management education in Korea would soon make rapid strides, cation in Korea would soon make rapid strides, says Mr. Miyagawa, and by degrees the world would witness the birth of a new nation.

Mr. Matsumura Kaiseki still continues to put great deal of energy into his magazine the Though principally a religious organ, it usually contains at least one political article. A recent number has a leader entitled, "We must be prepared for a fight," which blows the war trumpet in a tashion that will certainly delight Keiser. the ardent young patriots addressed. Mr. Matsumura predicts certain victory for Japan. When once war is declared it will not be long, says the Keisei, before half the Russian fleet is sent to the bottom of the sea* and on land 100,000 troops will be mown down by Japan's guns. Russia's bigness nor her prestige count for anygood, while the unlimited, the unregulated, the chaotic is evil "(Plato).

"To hit upon the 'mean' exactly requires the fine tact, for virtue is more nice and delicate than the finest of the fine arts. This tact, or sense of macy in the Far East. We must all die many in the Far East. We must all die many in the Far East. macy in the Far East. We must all die some time or other. Rather than die in an ignominious fashion like so many insects, perish like heroes on the field of battle. The Keisei makes it a special object to influence young men. Hence a number of articles are to be found in its pages dealing with the mistaken educational policy of the Mombusho in past years and advocating the granting of entire freedom to those who desire to establish schools throughout the country. In No. 67, under the title of "The Training of Young Men and the Future," Mr. Inagaki Manjirō contends that the Mombushō officials for a series of years took steps to discourage all the refining influences exercised in the West by music, art, religion, and the like, and contented themselves with developing the intellect only.†

* This, we observe is the opinion of an Austrian military expert quoted by the Jiji Shimpō on the 30th ult.:—(WRITER OF SUMMARY.)

The consequence is that in the matter of feeling and sentiment the nation to-day is altogether behind Europeans and Americans. This did not escape the keen scrutiny of the Russian Minister of War during his recent visit to this country, who when pressed by Marquis Itō to say what he who when pleased by maddus no to say what he considered the great defect of the Japanese, replied, "The entire absence of a taste for music." Modern Japanese human nature is developed only on one side, the rational side. To be able to reason is the great ambition of our young men, to reason is the great automotion of our young men, as though human life consisted principally of logic-chopping (Nihon kokumin ni kanjō ga refine serarete oranu kara, ippan kokumin ga yutori no nai kosekose shite, daikokumin no kifū ni toboshi no de aru to omou). In view of the important rôle no de aru to oniou). In view of the important rôte Japan aims at playing as the Eastern pioneer of Western civilisation, it is of vital importance, says Mr. Inagaki, that she should at once take steps for remedying the above-named defect in the mental constitution of her people. Their interests are too narrow, their outlook too confined; they have not as a people yet entered the great world of Western sentiment, feeling and aspiration. Mr. Inagaki goes on to observe that in the near future Japanese character will be put to a severe test in this part of the world, where she will be brought into closer competition with Occidentals than she has hitherto known. Mere military prowess will not serve her purpose in time of peace.
The question will be asked: do the Japanese as a nation possess the qualities which tend to bene-ficent rule? Will those who become subject to them be greatly benefited thereby? Japan has them be greatly benefited thereby? Japan has now reached the parting of the ways that lead to heaven and hell. Whether she follows the road to paradise or descends to the fires of hell depends on the development of the character of her young men. The solution of the Far Eastern problem lies here. Will Japan show herself worthy of the high rank she aspires to occupy in the Far East? High moral qualities will render her position far more secure than mere physical force can do.

more secure than mere physical force can do. In a subsequent article published in No. 69 of the same magazine Mr. Naruse Nizō, writing on "Freedom in Education" expresses the same sentiments. The article opens with the words "Deficient in common-sense, weak in purpose, without deep convictions, with no special aim in life is the modern student. And in the meanwhile society cries "Oh for a man!" Mr. Naruse then proceeds to furnish proofs of Mr. Naruse then proceeds to furnish proofs of these assertions. The Government Schools as now constituted and conducted Mr. Naruse regards as a serious hindrance to character development. No real liberty of action is allowed in these schools. Mr. Naruse describes them tersely as "rule-ridden, but lifeless" (Kono gakkō ni wa kisoku aru nomi, kwatsudo aru nashi.)

In the Shinjin (New Man) appears an article entitled "The Future of Japanese Christianty" which hardly answers the expectations raised by the title. Mr. M:rata Tsutomu is the writer. He begins by relating the story of a knight who had decided to be baptized, but who prior to receiving the rite asked whether if he became a Christian and went to heaven his non-Christian. Christian and went to heaven his non-Christian ancestors would be found there. On being told by the officiating minister they would not, he there and then refused to enter the church; saying that it mould ing that it would be no pleasure to live in a paradise from which his beloved forefathers were banished. This is precisely the feeling we Japannese have, says Mr. Murata. He then goes on to urge his fellow-Christians to strive to make Christianity a national religion. The rest of the article in mostly historical showing what have article mostly historical, showing what have been the forms Christianity has taken in various countries. In the concluding paragraph Mr. Murata says that in his opinion both Buddhism and Confucianism will retain

arise that involve the separation of Chris-special needs of his fellow-countrymen enable tians from their kith and kin thoughout the him to command large audiences in any of the country, then, says Mr. Murata, like the knight great cities of Japan where he may happen to be of old, I would refuse to be a member of the Christian Church.

THE JAPAN WEEKLY MAIL

Mr. Ebina Danjō contributed to a recent number of the Shinjin a long article on "The Tendency of Modern Religious Thought" in which the views of Spinoza are discussed in detail. The Article concludes with the following comparison between religion founded on philocomparison between religion founded on philo-sophy and religion founded on a revelation. But before entering on this subject it may be well to state that Mr. Ebina holds that what is called the Christian Revelation is by no means the only one in existence. This is what he says on that subject :- Tenkei voa tokubetsu naru ichi minzoku mata wa tchi jinshu ni kagirarete oru mono de wa maia wa ichi jinsha ni kagirurete oru muno ae wa nai. Oysoo jinrui no dantai wo nashite seison suru chihô ni wa, kanarasu tenkei ga aru. Sh-kamo seisho wa tenkei no ichijirushiki mono de, Kami no kotoba to shile sonchô suru ni taru.* Mr. Ebina then proceeds to explain the sense in which he believes the Bible to be a revelation, taking the view that in geographical and his-torical details the Bible may be inaccurate, but that it is throughly reliable in its teaching about God and man's relation to him. He concludes his article with the following remarks:-"Religion that is founded on revelation appeals to the imagination. Religion that is founded on philosophy appeals to reason. The strength of the former rests on authority; the latter fulfils its object by means of the hold it has on the minds. of men. Each has its strong and weak points. Both are designed to be carried into practice, the object of both is to lead man to forego the gratiobject of both is to lead man to forego the grau-fication of many of his desires, to make him a holy man. The religion that is founded on philosophy is in the possession of the few; that which is founded on revelation, in that of the The chief object of the latter is to teach submissiveness and veneration and thereby lead men to God; that of the former to develop the reason of each individual man, In rendering man more God-like by means of the clear conman more God-like by means of the clear con-ceptions imparted they pursue different methods, but they have the same object in view. Though the teaching of truth is one of the objects of revelation, it is not its leading object, of revelation, it is not its leading object, which is to fully develop obedience and reverence; hence though the arguments it upholds may have a thousand discrepancies, they must be received without questioning.† Hence there is no need to mix up philosophic investigation with a religion that is founded on revelation. Since a rational religion founded on philosophy is compatible, when the property is a supplied to the property of the property in the property of the property is a supplied to the property in the property in the property is a supplied to the property in the property in the property is a property in the property in the property in the property is property in the property in the property in the property is property in the propert on philosophy is something that cannot be under-stood by the majority of people, nobody has any right to despise a religion founded on revelation. Though the spheres of the two forms of faith are different, their object is plainly one and the same. Spinoza recognized this fact and did his best to reconcile the two forms, but his arguments from the point of view of his philosophy were illogical. philosophy, it was impossible for him to deduce convincing arguments in favour of the theory that revealed religion and rational religion had only one object in view. Reason which was capable of allying itself to imagination was to him an imperfect form of reason.

We have stated at considerable length Mr. Ebina Danjô's views and we shall continue to do so in future, as there are few men in the Christian Church who have so many admirers, Christian and non-Christian, as Mr. Ebina. His outspokenness, manliness, sincerity and deep religious fervour combined with a wide knowledge of the

*"Revelation is by no means confined to one nation or one race of people. In whatever country a community of human beings exists, there will certainly be a revelation. While this is so the Bible contains a remarkable revelation, and is entitled to be honoured as the Word of God."

great cities of Japan where he may happen to be lecturing.

The Chuòkoron, though professedly a Buddhist organ, mostly fills its pages from month to month with the discussion of other subjects. It is a well edited journal. Its monthly extracts from other magazines convey a very good idea of what are the chief topics of discussion in the whole are the chief topics of discussion in the whole of the Japanese press. It is in every sense a thoroughly liberal organ, opening its pages to writers of all schools, Buddhist, Christian or agnostic. It aims at showing up abuses where ever they exist. Educational questions receive a large amount of attention. Sectarian parrowmindedness seems to be banished from its pages, and most of its articles are written by men who and most of its articles are written by men who are more or less acquainted with foreign literature, Like so many other religious magazines, it con-stantly publishes political articles. Its aim seems to be to discuss any and every subject that may be interesting the general public at the time. Broad ethical questions and topics are as a rule handled in a very thorough manner by its contributors. The December number contains an excellent article of this kind, the first of a series, entitled "What is Humanity?" written by Mr. Kuroiwa Shuroku, which shows how keenly the moral progress of the Western world is watched by modern Japanese scholars. Here is the substance of the first of Mr. Kuroiwa's articles. Among the moral sentiments prevailing in all civilised countries to-day there is none that is stronger or more universally honoured than humanity. Wherever there is a ruthless and needless slaughter of human beings the anger of whole communities is aroused and the perpetrators of the communities is aroused and the perpetrators of the cruel deed are branded with lasting disgrace by all right-thinking men. Witness the feeling aroused throughout the civilised world by the Russian slaughter of the Jews and by the Turkish atrocities in Amenia. In Europe more than half of the difficulty of what is termed the Eastern Question is connected with the inhumanity of the Turks. In England's subjugation of the Transvaal and in America's war with Spain the question of humanity was constantly under discussion in of humanity was constantly under discussion in the European and American press. So that we may say that in modern times there is no international question, no political question, no diplomatic question debated but the sentiment known as humanity makes itself felt, and no self-respect-ing nation can afford to disregard it. This virtue has its source deep in man's original nature. It is, as the term implies, the possession of this feeling that differentiates man from all other animals. Self-love and the love of others in human society exist side by side. Exclusive and extreme egoism, were it to exist, would render the formation of communities impossible. Society may be said to be founded on altruism. As was pointed out by Adam Smith and other writers on the point of view of his philosophy were illogical. sociology, sympathy or fellow-feeling is the most Having banished imagination from his system of important of all the foundations of society. Here then is a feeling which not only all moralists but all modern sociologists recognize to be the most essential to human progress and welfare and to the consolidation of nations. In our and to the consontation of nations. In our language we cannot better express this love of our fellow-creatures than by calling it 太爱, viai, brotherly love. The same feeling exists among the lower animals to a certain degree, but with them its exercise depends entirely on controlling passions and is dictated by mere animal instincts. They do not regard themselves as under any obligation to show kindness to fellow-animals, and only do so under certain conditions. It is then vain to look for any real affinity between the **Revelation is by no means confined to one both Buddhism and Confucianism will retain their hold on a certain section of the nation for a community of human beings exists, there will contain a community of human beings exists, there will some serve, "Christianity is more suited to our modern life and hence has been welcomed by us." But if it should ever lead to developments that endanger the existence of the state; if circumstances should be existence of the state; if circumstances should benefit of the students, "Writer of Summary).

**Revelation is by no means confined to one nation for an order of human beings exists, there will be nation or one race of people. In whatever country, the community of human beings exists, there will will be not be not be serve, "Christianity is more suited to our modern life and hence has been welcomed by us." But if the nation for none race of people. In whatever country, the community of human beings exists, there will will be not be not been serve, "Christianity is more suited to our modern life and hence has been welcomed by us." But if the nation for one race of people. In whatever country, the community of human beings exists, there will will be not be not be not been libled to contains a remarkable revelation, and is entitled to of the great laws of our being; with the fellow-feeling possessed by animals there is no authority. The term humanity implies that it is the duty of the existence of the state; if circumstances should him are used to developments that endenger the nation or one race of people. In whatever country, the matter of humanity as understood by us and then vain to look for any real affinity between the nation for one race of people. In whatever country, the containts are the libled to one of the Bible with the religion, and is entitled to our humanity there is authority. It is one of the great laws of our being sufficient to the principle of humanity as understood by us and the tenderness felt by one animal for another.

***TREVELEANT AND AND AND AND AN

large numbers who ignored the moral obligation large numbers who ignored the moral obligation to act considerately towards others. So that it was necessary here as in so many other cases to enforce morality by law. When this occurred its full importance as a fundamental moral principle was fully realized. This took place in the palmy days of the Roman empire. Prior to that time the law regarded man as an object, an article of commerce like other commodities, but Roman law declared that man was not not to be considered as a mere object. The very foundation. Roman law declared that man was not not to be considered as a mere object. The very foundation of that law treats man subjectively and not objectively, that is to say it takes into consideration the teelings of human beings towards each other and aims at regulating those feelings. In subsequent ages what is called natural law was recognized in the codes of various nations and thus the obligation to treat human beings in a considerate manner led by degrees to the suppresconsiderate manner led by degrees to the suppression of the slave trade and other cruel practices.

We observe that Mr. Kano Jigoro's monthly organ, the 國士, Kokushi, was to be discontinued from last month. It has been running for nearly from last month. It has been thanking by the sycars in connection with the interesting Young Men's Society formed by Mr. Kanō called the 登士會 Zōshikai (Lit. Samurai-forming Association). This Society, as is doubtless known to some readers, is by no means simply an Athletic Association, though great attention is paid to physical exercise of all kinds, specially to *fūjutsu*, by the members. The Society, according to its rules, which are now before us, in addition to increasing physical strength, aims at developing to the full the intellectual and moral faculties of young men The branch associations which have sprung up in various towns are numerous. They have hitherto all been under the direct control of Mr. Kanö himself. They will henceforth be independent of each other, but will be conducted on the lines laid down by Mr. Kanō. In the opening article of the last number of the Kokushi Mr. Kanō tells us that in the 63 numbers of the magazine which have appeared he has during the past 5 years treated most of the general topics connected with the proper training of young men. He purposes in future to issue we yearly pamphlet for circulation among his numerous disciples, dealing with such subjects as altered circumstances suggest. Mr. Kanō adds that there are now such a number of magazines written for young men which have the same object in view as the Kokushi, so that his organ can be dispensed with.

The final number of the Kokushi contains the last of a series of excellent articles on "Success," addressed to young men by Dr. Muraka i Sensei. Both as a public lecturer and as a writer Dr. Murakami never fails to produce a powerful Morakami never fails to produce a powerful impression on young men. He has a great command of language and his thoughts are so arranged that the chief points of his discourses are evident at once to ordinarily intelligent listeners. The article now before us is written in colloquial language. Dr. Murakami first warns young men against the danger of expecting immediate success. It is a case of "the more hurry the less speed" in the formation of character or in the preparation for great enterprises. Three or four years do not amount to much in the training of the minil to fulfil all its functions. The saying of Confucius Taiki wa bansei (Large vessels take a long time to make) should never be forgotten by young men. Dr. Murakami then goes on to trace out in a most interesting manner the bearing of self-denial on permanent success, his theory being that unless a man has self-dients expended of about the self-denial on permanent warth, the President of the Society, said while the foreign tension on to trace out in a most interesting manner the bearing of self-denial on permanent success, his theory being that unless a man has sufficient strength of character to suppress every desire whose gratification would interfere with the full realization of his principal object in life, he never can be thoroughly successful. The title of this part of his long essay is Seigyō no seikō ni mattomo hitsuyō naru mono wa Kokeishin (大元) nari. (In lawful enterprises there is nothing which insures success like self-denial.) The greatest of all the Societies work here, there had been 2,585,846

Murakami next goes into the various available methods of forming, developing, and perfecting the habit of self-denial. He refers to Benjamin Franklin and to Washington at some length, and shows how the foundations of their subsequent more had in the self-denian, behits of greatness were laid in the self-denying habits of youth. In Franklin's case he tested his daily conduct by no less than 13 tests, all of which had self-denial as their chief object.

WEEK OF PRAYER.

The Week of Prayer which extended from Jan. 3rd to Jan. 10th inclusive, was very largely attended, and the meetings were unusually devout and interesting. Rev. B. W. Chappeli, Dean of the Awoyama Gakuin. Theological Department, preached the sermon for the opening day, and Rev. E. S. Booth, the Pastor of the Yokohama Union Church, that of the closing day.
The Sunday evening services, as were the daily 6 p.m. services, were led by various Ministers and 6 p.m. services, were led by various Ministers and laymen. The Japanese Churches, as usual, united with the exception of the Methodist Episcopal Churches, in a Union Service held at the various Church edifices in the City. The Pastor of each presiding in turn at his own church, and a Pastor of a different body making the leading address. The addresses and the prayers were of a most edifying nature. The Programme of the Evangelical Alliance was followed, with the single exception of an additional topic for the day of prayer for "God's Ancient Covenant People." prayer for "God's Ancient Covenant People Israel," when "Missions for the City of Yoko-hama" was added. This was not because of lack of interest in the Jews—but contrariwise, never has there been so earnest and intelligent an interest exhibited. The Methodist Protestant Pastor, Rev. Tsugawa, surprised his foreign auditors as well as his own countrymen by his exposition of the Spirit of the Great Apostle to the Gentiles in gard to his own countrymen, and the importance regard to his own countrymen, and the importance of the conversion of the latter as affecting the evangelization of the world. Very appositely the results of Bishop Schereschewsky's labour on his translations into Chinese of the Scriptures, into easy Wenli, and the Mandarin dialects, was referred to by other speakers, and the remarkable providence that has sent a Russian Jew early to Javan where he embroard Christianity and for able providence that has sent a Russian Jew early to Japan, where he embraced Christianity, and for a few years laboured most acceptably in Korea, and after a course in theology in the United States, where he outstripped 40 competitors, and was offered a 600 dollar scholarship for further studies, modestly declined and has been doing yeoman service in the Philippines as an American Missionary, and is now seeking to be transferred to Korea for his life work. Besides! be transferred to Korea for his life work. Besides his linguistic skill he is both a poet and musician. He has written Hymns for both the Koreans and Filippinos. His desire is to render a translation of the Old Testament into Korean.

of the Old Testament into Korean.
Some interesting facts in connection with the coming Centenary of the British and Foreign Bible Society, to be held on the 6th of March in London were given by the Rev. H. Loomis, Agent of the American Bible Society. He said that at a preliminary meeting held 6th of March 1903, the Lord Major, of London, Sir Marcus Samuel, presided, and said that while arms of his correligiousists objected to his doing some of his co-religionists objected to his doing so as he is a Jew, he thanked the Society for its publication of the Holy Scriptures, and for its efforts for his people. Lord Polwarth, the President of the Society, said while the

as all social organization of a permanent type may be, said to begin with what Confucius calls is the fight with his lower self, is the subjugation of two of the Societies for fight (compassion) and Christ, ai (love). But so long as humanity was a mere moral sentiment, it lacked the power to enforce its observance. Men were found in the habit of self-denial. He refers to Benjamin 31,884 Testaments. This includes 1796 English Testaments. Testaments. The confused is the subjugation of the subjugation of two of the Societies for of two of the Societies for of two of the Societies for the wild desires that rise within him. Dr. a few years were forthcoming. The circulation of the wild desires that rise within him. Dr. a few years were forthcoming. The circulation of the power was 167,825 portions. The incheds of forming, developing, and perfecting the habit of self-denial. He refers to Benjamin 31,884 Testaments. This includes 1796 English Testaments. This includes 1796 English Testaments. a few years were forthcoming. The circulation of the past year was 167,835 portions. The increase over the year before was 143 Bibles, 31,884 Testaments. This includes 1796 English Bibles, and 12,834 English Testaments. Total receipts for 1903 were 13,621 year, showing an increase over the previous year of 2,414 year. These evidences of the favour of God upon the work of the distribution of the Word of Life caused yet more earnest prayer that all obstructions to the free circulation of the Scriptures and for inculcation of its principles might be removed. for inculcation of its principles might be removed. for inculcation of its principles might be removed. Many and earnest were the prayers for the removal of the opposition of school teachers and of the Educational Department, and of the Prison regulations forbidding free circulation of religious truth. An amusing instance came to light in one of the most advanced and liberal prisons, where when the Salvation Army's War Cry is about the Publisher Prison in charge cause admitted, the Buddhist Priests in charge cause the faces of females in the pictures in its columns to be inked over or painted black to prevent unchaste thoughts arising in the minds of the prisoners! A fine instance surely of "straining at a gnat, and swallowing a camei."—Communi-

AMERICAN TOPICS.

The results of the change from steam to electrical power on New York's elevated railways are a reduction of cost per passenger from 2.24 cents under steam to 1.98 cents, and an increase in gross earnings of \$400,000 accompanied by a decrease in expenses of \$00,000

Mr. Ben Campbell, assistant traffic director for the Harriman lines, has been in Europe investiga-ting trade conditions, and it is stated that two more vessels will be placed in commission between San Francisco and the Orient as a result of his investigations. The ships will be added to the fleet of the Pacific Mail Steamship Co.

Papers have been served upon Professor Borden D. Bowne, of Boston University, calling him to trial before the ecclesiastical court of the Methocharge of heresy. The specifications, five in number, are based upon the general allegation that the professor has disseminated "doctrines which are contrary to the articles of religion or established standards of doctrines in the Methodist Episcopal Church.

The New York Bible Society has just issued its seventy-ninth report, showing a distribution dur-ing the past year of 72,398 volumes of Scripture, in twenty-seven different languages, of which 4,941 were Bibles, 11,231 New Testaments, and 56,226 were portions, the latter being usually one of the Gospels. Of the total distribution 44,965 volumes went to the immigrants at Ellis island, 9,364 volumes were placed among the shipping of the port, 6,943 volumes were taken by the churches, Sunday-schools, missions, and public institutions, 11,154 volumes were placed in the hands of individuals and families through missions. sionaries, canvassers, or at the office of the society.

On account of the recent acquisition by Canada of two islands near the southeastern boundary of Alaska, as recently laid down by the Joint Tribunal at London, it is expected that the United States Government will eventually establish fortifications in the neighbourhood. The fortifications which the War Department will probably establish either on Sitkian or Kan-

ting competition," says The Railway and Engineering Review. "The Midvale people at Philadelphia have been bidders for Government work for many years, but have been bowled out each time on account of not having facilities. The present requirements of the Government, The present requirements of the Government, however, are so large that it is found practicable and advisable to encourage the establishment of a third armour-plate works. Armour plate is promised in twenty months from the projected plant, and considering the character of construction necessary it will call for the expenditure of the highest type of American energy to meet the the highest type of American energy to meet the requirements."

Garnets, opals and tourmalines have been found in clay deposits near Lue du Bonnet, a village forty miles from Winnipeg. Experts say the clay formation is the same as at Kimberley and that diamonds may yet be discovered in it.

A consular report says that Harvard Univer-sity has succeeded in buying the library of the late Gehelmrath Karl Maner of Munich. The library contains a magnificent collection of scientific books. Especially valuable is the part thereof which relates to the early history of Scandinavia

Cardinal Herrerar y Espinosa, archbishop of Valencia, who died the other day, left a legacy of 50,000 pesetas to the "first Spanish general who will land on territory of the United States with an army sufficiently strong to avenge the defeats of Spain in Cuba and the Philippines. Pending this happy event the money shall remain in the Bank of Spain."

Lieutenant Chandler's torpedo flotilla, consist-Lieutenant Chandler's torpedo nothia, consisting of the destroyers Decatur, Chauncey, Bain-bridge, Burry and Dale, sailed from Hampton Roads on Dec. 12 upon their trip to Manila, which is to be made via the West Indies, Gibraltar, the Mediterranean Sea, Suez Canal and Indian Ocean. The Naval Inspection Board is making the trip down the coast with the flotilla.

The strike among the drivers of horse vehicles in Chicago was still on when the last mail left and was causing some curious developments. It was only with the greatest difficulty that the great city could bury its dead, owing to drivers refusing to drive hearses, and at one time the police had to escort all funeral processions to protect mourners from the mob of drivers who objected to the undertakers-men conveying corpces to the

The New York Board of Education has decided to erect the largest schoolhouse in the world in that city. It will contain 124 classrooms, to accommodate 4500 boys and girls, and an auditorium room which will seat 1600 persons. It will be six stories high and will have numerous elebe six stories high and will have numerous ele-vators, lunchrooms, bathrooms, sewing-rooms, where women will be employed to mend the torn and tattered garments of the poorer children, and tanks and swimming pools into which the dirty may be tossed and scrubbed. If a pupil is too poor to buy lunch it will be provided free of cost, for a time, at least.

There is much discussion in England as to the probable fate of the original manuscript of the first book of "Paradise Lost," dictated by Milton to an unknown amanuensis, which Sothebys are commissioned to sell at auction in March, unless commissioned to sell at auction in March, these it is previously sold privately. Efforts are being made to keep it in England, it being feared that it may follow numerous historical treasures to the United States. The Daily Express announced United States. The Daily Express announced that a New Yorker residing in London has offered £50,000 for the manuscript. The authorities of the British Museum are trying to induce the Government to make a grant to purchase it, the museum not having the money to compete with millionaire collectors. Milton sold "Paradise Lost" to Samuel Simmons, a publisher. He received £5 down and a promise of two more payments of £5 each if two editions

only 23,097. As a matter of fact, the State in which widows are most numerous is New York, in which they number 320,000. The city in which they are most numerous is the City of New sailors. It proposes the control of the city of New sailors. It proposes York, where there are 105,000, says the Sun. There were by the last Federal census 2,720,000 widows in the whole United States, of whom, it is worthy to remark, 88,000 were in Indiana and only 8,000 in Utah. There were Indiana and only 8,000 in Utah. There were 128,000 in Massachusetts, less than the total number in the two states of Alabama and Mississippi, though the view pretty generally prevails that the number of widows is disproportionately arge throughout New England. There are nearly 2,000 in Hawaii and 1,700 in Alaska, a proportionately larger number than in the City of

The President has tendered the position of Civill Service Commissioner, made vacant by the death of John R. Procter, to General John C. Black of Chicago, Commander-in-chief of the Grand Army of the Republic. General Black is a well-known lawyer of Chicago. He was a member of Congress at large from 1893 to 1895, was United States District Attorney for the northern district of Illinois from 1895 until 1899 and is a prominent member of the Loyal Legion. He entered the larmy as private and left as a brevet Brigadier's General. At Pea Ridge he was severely wounded and upon the right arm and at Prairie Grove his left arm was disabled. In the campaign and siege of Vicksburg he gallantly bore his part. His The President has tendered the position of Civil of Vicksburg he gallantly bore his part. His last battle was at the storming of Blakely batteries, April 9 1865. He left the service in August, 1865, after a continuous service of four years and four months. General Black was born in 1839.

According to the Boston News Bureau's New York correspondent, writing in the first week of December, the readjustment that is taking place in business is beginning to rival in magnitude the great shrinkage in security values during the past year. Already more than 140,000 people are idle by reason of closing down of plants and many thousands more are working on a reduced wage scale or on shorter hours. business is a good barometer of business conditions and the volume of theatregoers is the smallest in years in New York city. Leading smallest in years in New York City. Leading hotels are not nearly so prosperous as a year ago and restaurant receipts at Delmonico's and Sherry's have fallen off sharply. In New England between 60,000 and 70,000 mill operatives have gone on a 10 per cent. wage reduction, which means over \$60,000 a week less for them. In Fall River alone 30,000 are affected and in Rhode Island 20,000. The following table shows the effect on labour of the trade shrinkage:—

	Hands
	laid off.
Railroads	., 20,000
Paper mills	15,000
Montana copper mines	4,000
Pennsylvania and Ohio steel and iron	., 28,000
Southern iron and steel	15,000
New England textile industries	65,000

Cardinal Gibbons has isssued an appeal to the Roman Catholic bishops, priests, and people of the United States in behalf of the national Catholie University at Washington. Remarking that the first communication of the new Pope to the hierarchy of the United States "expresses his concern for the welfare of this pontifical institution," Cardinal Gibbons goes on to say: "The generous endowment of educational institutes by non-Catholics is one of the most significant move-ments in our national life. That Catholics, who have contributed so freely to so many other needs of the church, are ready, in respect of educational zeal, to rival their non-Catholic fellow citizens we may take as an assured fact. What is requisite to direct their generosity toward the work of higher education is clear perception of its imof two more payments of £5 each if two editions were sold.

A Chicago mathematician announces that Chicago, with 60,396 widows, has a larger number of Agriculture has been of no avail to stop portance and necessity. . . . Leo XIII., of happy it. As a matter of fact the boll weevil can stand memory, has publicly registered his hope that the Catholic University of America should be to the American people what the Catholic University of It is certainly significant, in view of recent ex-

than any other community in the country—It is added that the number of widowers in the city is of religion and the crown of our Catholic edu-

Senator Hoar has introduced a bill into the United States Senate of great interest to sailors. It proposes to amend the law relative to shipping commissioners and to prevent the practice of crimps in attaching the clothing of sailors. The bill provides that when a crew is shipped by a shipping commissioner for any American trade, an agreement shall be made with each seaman engaged in the same manner, as is according to the same manner, as is each seaman engaged in the same hanner, as is provided in sections 4511 and 4512 of the Revised Statutes, and such agreement shall be posted and such seaman shall be discharged and receive wages as already provided by law, but in all other respects such shipment shall be regarded as if both shipment and agreement had been entered into between the master of a vessel and tered into between the master of a vessel and seamen without going before a commissioner.

This proviso added: "Provided, that the clothing of any seaman shall be exempt from attachment, and that any person who shall detain such clothing when demanded by the owner shall be deemed guilty of misdemeanour and punished by a \$500 fine or six months' imprisonment, or both."

"When, thirty-four years ago, the builders of the first transcontinental railroad pushed the line the first transcontinental railroad pushed the line around the rocky northern shore of Great Salt Lake, they little thought that in a generation 147 miles of that costly road would be abandoned for a cut-off straight across the lake forty-four miles shorter," says the Railway Age. "Their engineers perhaps the ablest of that day, seem never to have thought of piling and filling through thirty miles of water, and so they carried the line by infinite labour, over grades reaching 104 feet to the mile, with curves innumerable, and bequeathed to the Southern Pacific one of its most expensive pieces of track to maintain and operate. expensive pieces of track to maintain and operate. Now the modern engineer and builder devise and carry out the cut-off, by means of 75 % miles of land work and 27% miles of trestle and filling, thus making a line between Lucin and Ogden ro3 miles long, against 147 around the lake, straight as a ruler, for the most part, and practically level, except a slight grade on the westernend—a far better and shorter line than western end—a far better and stotter line than the original and probably costing less money. The engineers of 1869 would have said of Salt Lake cut-off, it they had thought of it, 'It can't be done.' The railway executive of to-day draws a straight line on the map and says Build there, and the engineer finds the way to do it. Whether or not the cut-off will save all of the \$200,000 or so or not the cur-on win save all of the \$200,000 or so a year necessary to pay interest on its cost may be a fuestion, but the increase in both passenger and freight business which the shortening of distance and time must attract will doubtless justify the additional must attract will doubtless justify the additional outlay."

The Louisiana special commission has recommended the passage of a bill by the State Legislature creating a non-cotton-growing belt between that State and Texas to bar out the boll weevil and prevent its progress northward. This little bug has already caused a loss estimated at \$25,000,000. The boll weevil is a small greenish-grey bug only a quarter of an inch in length, and is creeping Northward through the great cotton-belt of Texas at the rate of seventy-five miles a year. Within the next decade, the cotton boll weevil will probably cost the country many millions sterling a year, and the price of clothes mended the passage of a bill by the State Legislamillions sterling a year, and the price of clothes and of all cotton manufactures throughout the world will go up. The very name of the boll weevil strikes terror to the soul of the Southern cotton-planter. A man who returned to his cotton-planter. A half who feathers has home in Georgia from Texas with a specimen of the boll weevil in his possession was threatened with tar and feathers. So far, nothing has availed against the pest. Burn it, beat it, soak it has been at the post it with recognizing with poisonous spray, thresh it with revolving brushes, and it still creeps forward. All the science and wisdom of the United States Department of Agriculture has been affected by ment of Agriculture has been of no avail to stop

perience in the stock market, that the aggregate capitalization of new corporations with \$1,000, capital or more chartered during the month of November is the smallest for any month since Trecords were first compiled by the New York fournal of Commerce, more than four years ago. The total for the month is only \$56,100,000, as compared with \$115,140,000 in the corresponding month of 1902, and the total for eleven months of the current year is \$1,572,201,000, as compared with over \$2,500,000,000 in the same period of 1902, \$3,500,000,000 in 1901 and \$2,255,000,000 in the corresponding months of 1900. The figures for 1901, it should be noted, include the \$1,400,000,000 capitalization (stocks and bonds) of the United States Steel Corporation and the \$400,000,000 capital stock of the Northern Secufigures for the past three years. The returns cover only the principal eastern states, and there have necessarily been some changes in the list of Napoleon of the province to the United States, these during the period covered:

	1903.	1902.	1901.
	\$	\$	\$
January	177,990,000	146,950,000	105,250,000
February.	175,975,000	294,850,000	79,500,000
March	144,975,000	158,150,000	190,500,000
April	243,200,000	231,575,000	1,619,650,000
May	307,666,000	226,500,000	177,980,000
June	135,695,000	196,182,800	303,450,000
July	106,100,000	469,856,400	236,325,000
August	77,950,000	241,879,550	57,450,000
Sept	79,250,000	195,194,900	66,800,000
October	67,300,000	244,550,000	164,600,000
Nov	56,100,000	115,140,000	508,850,000

Totals...1,572,201,000 2,520,828,650 3,510,355,000 According to Secretary Wilson of the Depart-ment of Agriculture, the eastern farmers are rehabilitating themselves by means of dairies, buckwheat, rye and potatoes, sweet and white. The south has gone in for corn, wheat, sweet potatoes, cane and sorghum sirup, hay, fruits, cattle, tarm-made cheese, tobacco and home-made butter. The Pacific slope and Rocky mountain states, the north central states and all parts of the country north central states and all parts of the country where agriculture is followed are more prosperous than ever before. Secretary Wilson presents figures of crop production to show how great the value of some of the principal crops is. In this table is shown what the farms of the country should produce of certain crops in a year under favourable circumstances:—

	Quantity.	Value.			
Wheat, bushels	675,000,000	400,000,000			
Corn, bushels	2,225,000,000	1,000,000,000			
Oats, bushels	1,000,000,000	300,000,000			
Barley, bushels	100,000,000	50,000,000			
Rice pounds	390,000,000	_			
Hay tons	55,000,000	500,000,000			
Cotton, bales	10,500,000	530,000(000			
Tobacco, pounds	900,000,000	50,000,000			
The Department of Agriculture took a census of the nation's farm animals on January 1st of this year. The count showed the following animals on hand, and the department estimated their					
value :					

	Number.	Value.
Horses	16,557,000	1,031,000,000
Mules	2,728,000	200,000,000

Other cattle	45,000,000	. 829,000,000
Sheep	64,000,000	168,000,000
Hogs	47,000,000	365,000,000

Under the authority of M. Delcasse, Minister of Foreign Affairs, Mr. E. Spencer Pratt, former United States Minister to Persia, who is now United States Minister to Persia, who is now residing in Paris, is making extensive researches in the archives of the Foreign Office relative to the transfer of the province of Louisiana by France to the United States. In speaking of his investigations, Mr. Pratt said:—"One of the most curious documents found is an autograph letter of Louis XV., giving away the vast Louisiana territory to his cousin, then King of Spain, as a present. The fact of this gift has heretofore been known only in a general way, but the text of the letter discloses the casual nature

"I have caused the Marquis de Grimaldi, any conventional rules of art. Those peculiar subjected to your majesty's pleasure, to sign a cession of New Orleans and Louisiana to Spain. I had offered it to the English in place of Florida, but they refused it. I would have ceded them but they refused it. I would have ceded mem other possessions to have spared Spain having to cede this latter one, but I fear that any cession in the Gulf of Mexico might lead to serious consequences. I feel that Louisiana but poorly compensates your majesty for the losses you have sustained, but in ceding you this country I consider less its value than the good accomplished in uniting the Spanish and the French nations. Union is alike necessary for our subjects and our house." The letter of the King of Spain accept-ing the present, said Mr. Pratt, refers to the further strengthening of the union of the two nations by a number of royal marriages. Later documents show the recession of Louisiana by Spain to France and gives minute details of the sale by

The U.S. Secretary of War on December 15th approved the recommendation of the General Staff establishing military divisions and somewhat changing the present boundary lines of depart-ments in the United States. There will be four divisions in the United States. There will be four divisions in the United States and one in the Philippines. The Northern divisions will be composed of the present Department of the visions. the Department of Missouri and the Department of Dakota. The Department of Missouri is enlarged by adding thereto the State of Wyeming, which has been detached from the Department of Colorado. The head-quarters of the Northern division will be at St. Louis. The Pacific division will be composed of the present departments of California and Columbia. The headquarters of the division will be San Francisco. The Southwestern division will be composed of the departments of Colorado and Texas. The Departments of Texas will be enlarged by the addition of the states of Louisiana and Arkansas and Oklahoma and Indian territories. The headquarters of this division will be Oklahoma City, O. T. The Philippine division will remain as now constituted, The following division commanders have been decided upon: Atlantic division, Major-General Corbin: Northern division: Major-General Bates; Pacific division, Major-General MacArthur; South-western divi-Sion, Major-General Sumner; Philippine division, Major-General Wade. The order becomes effective January 15, 1904. The following officers have been designated to assume command of the have been designated to assume command of the several departments; Department of the Gulf, Brigadier-General Haines; Department of the Lakes, Brigadier-General Grant; Department of the Missouri, Brigadier-General Wint (Brigadier-General Carr temporarily); Department of Dakota, Brigadier-General Kobbe; Department of California, Major-General MacArthur, temporarily: Department of the Columbia, Brigadier-General Funston; Department of the Colorado, Brigadier-Funston; Department of the Colorado, Brigadier-General Baldwin; Department of Texas, Brigadier-General Lee (Brigadier-General Barry temporarily); Department of Luzon, Brigadier-General Randall; Department of Visaya, Brigadier-General Carter; Department of Mindanao, Major-General Wood; Commandaut of the Infantry and Cavalry School, Fort Leavenworth, Brigadier-General Bell.

VOCAL AND INSTRUMENTAL MUSIC.

(COMMUNICATED.)

It has been contended by some esoteric musicians that vocal music does not belong to the domain of absolute music, and that instrumental music should rank above vocal, because the instrument evokes "pure music," bereft of the factitious aids of language and of the emotional associations which are grouped about the peculiar that large be associations which are grouped about the peculiar that large be the human voice. This distinction is both technical and etymological, since music, "the science of harmony," is considered as being an act presided states are get of the gift, and also the fact that Louis XV over by one of the muses and hence something to previously offered Louisiana to Great Britain, which refused to accept it." The text of the letter relating to the gift is as follows:— of the muse, rather than poured the letter relating to the gift is as follows:— of the spontaneously by the voice, unrestricted by which sway us strongly, it may surely be called,

emotional associations are, no doubt, what is chiefly enjoyed in music, when we speak of the great mass of people who have never had a proper, or perhaps it would be more exact to say a technical, musical education. It has probably been noticed by most persons that, in a miscel-laneous assemblage of all sorts and conditions of people, songs are always received with much heartier appreciation, even when rendered in the most amateurish way, than the most artistic performances upon the piano or any other instrument, unless it may be when the instrumental performer plays the airs of songs that are generally familiar to all of us. There are not many individuals, among those who have never studied music as a fine art, who really appreciate the music which is termed "classical," Listz's, let us say, and when such is performed to a mixed audience, eathered together hy change in a drawing-room gathered together by chance in a drawing-roomnot assembled for a definite purpose in a concert-hall, it is generally received with polite toleration, rarely evoking enthusiasm such as follows the less artistically rendered "Nancy Lee" or "Home, Sweet Home." Hence it would seem, at a first glance, that the suggestion that instrumental music is entitled to rank above vocal, speaking scientifically, is plausible; but on analogous grounds the piano might be set above the orchestra, because the piano gives pure harmony and counterpoint, without the adventitious aid of variety in timbre which asserts itself when a number of different instruments are played in concert; and it is un-doubtedly true that, for some such reason as this, the thoroughly trained and enthusiastic musician delights in pianoforte sonatas, which are above delights in planotoric sonatas, which are above all things tedious and unintelligible to the ears that have not been carefully trained in music, and have not a fundamental love for music in its highest, purest form. Nearly all of the great composers dislike the duty of arranging their compositions for instrumentation by an orchestra; not because orchestral music in itself is not good but because then werely think that the crossion but because they usually think that the grouping of instruments tends to smother the purity of the original theme: the apparently conspicuous excep-tions to this statement do not militate against its truth, for such composers as Wagner (and he will doubtless be thought of at once as the most brilliant exception) have in mind the dramatic results to be exception) have in mind the dramatic results to be produced by the combined effects of orchestral instrumentation and sympathetic vocalization. Nevertheless, in spite of its great and peculiar prerogatives, it would be absurd to prefer the piano to the orchestra, and there is a similar absurdity involved in setting the orchestra above the mighty union of orchestra, organ, and voices which we get in the oratorio. One thoroughly competent critic has said very appositely of the comparative effects of said, very appositely of the comparative effects of the different kinds of music:—"When the reason alleged for ranking symphony above the oratorio leads us likewise to rank the sonata above the symphony, we seem to have reached a reductio ad absurdum."

Rightly considered, the question as to superi-ority between vocal and instrumental music amounts to this: What does music express? amounts to this: What does music express? This is really a psychological question, and as such its answer depends entirely upon the mood or emotional shade which possessed the composer at the time when he produced his work, and, reflectively, the moods which it is desired to arouse in the listener when the composition shall be played or sung by another person to a general audience, and since there is always great danger that purely instrumental music may run riot in the extravagant utterances of emotional states for which it is possible to arouse a responsive emotion in all listeners, it may well be contended that that music is best which appeals most directly and most strongly to the moods of the majority of that large body of listeners who are blest with that certain amount of refinement which is never utterly lacking in even the most casual company. Now, in real life our emotional states are generally determined by their associafor us at any rate, the best music. Even Trilby's grotesque rendering of "Ben Bolt" had another effect upon her amazed yet sympathetic listeners than that which excited their risibles and moved them to wonder how any human voice could so distort a well known tune as to deprive it, although the singer was totally unconscious of the fact, of the least resemblance to what it was supposed to express: there was, on the part of her listeners, association of ideas with what they knew that song meant for so many, and this moved them as well, yet in quite a different way. Without stopping to trace the development of that emotional association through all the various gradations, if that could be done, we may say at once that in the effect of such a combination of voice and instruments as that of the "Hallelujah" chorus, we have all the precision that belongs to the best instrumentalization combined with that flexibility which pertains to the noblest organ of sound, the human voice, and in this combi-nation we seem to have reached the highest pinnacle to which music can carry us. Hence, while we may feel that vocal music is better, we must still admit that the two kinds of music are complementary and at most times mutually inter-

Admitting, therefore, that for the majority of human beings there is more real musical satisfacalone, we may well ask: What kind of song appeals most strongly to the greatest number? The exact answer is, of course, to be given by each person for himself alone, yet daily associa-tion and past memories exert a powerful influence, and the temperament of a person can often be guessed with a good deal of shrewdness by hear-ing him! It has been said of a certain individual, se influence in the financial circles of two continents is perhaps not quite so great to-day as it was a year or two ago, that his humming is an accurate personal barometer: if the time is lugubrious, let no one approach him with a new lugubrious, let no one approach him with a new scheme, no matter how promising it may be; if the air is sprightly, there is reasonable hope for anyone! Another thing to be noted in connection with the influence of a song upon those who are listening to it, is that the majority of them are always in sympathy with the singer and tremble with kindly anxiety when the notes rise much above the scope of the average voice, or descend to the rumbling ones that are executed with precision only by the exceptional basso, therefore it is those songs that have a moderate range which! invariably receive the heartier welcome when the singer is not a well known professional upon whom entire confidence may be placed, and it is those we hear the people be placed, and it is those we hear the people humming as they leave the concert hall or opera

THE LAW COURTS.

AN EX-POLICEMAN v. GOVERNOR HIGAKI.

Mr. I. Taniguchi, ex-police officer of Okayama has filed a case in the Okayama District Court against Mr. N. Higaki, the Governor of Okayama prefecture, claiming yen 3,068. According to the complaint, Mr. Taniguchi was appointed a police officer on Nov. 30th, 1899. Since then he had been most diligent in the performance of his duties. In August 1903, he was ordered to take the service at the Oku station and on the 6th of the same month he was discharged, the of the same month he was discharged, the reason given being that he was stupid. The Governor afterwards published serious reasons in the prefectural police periodical, Keisatsuho, and circulated the copies. It caused injury to reputation of plaintiff, for which defendant should be responsible.

Z. Horii, a shareholder of the Nihonbashi Bank, Tokyo, lodged information on Jan. 7th at the Tokyo District Court to the effect that K. Sudzuki, one of the directors, and K. Ito, chief cashier, had forged documents of the bank. It was alleged that they had lent yen 20,000 to the Hongo theatre on the security of its building, and that they afterward transferred the security to a third person and borrowed money on it.

YOKOHAMA ENGINE AND IRON WORKS, LTD.

The half-yearly general meeting of shareholders of the above-named company was held on Monday afternoon, there being present Messrs. Jas. Dodds (in the chair), B. Gillett, J. W. Weaver, C. B. Bernard, B. C. Howard, C. K. M. Martin and R. T. Bell (Secretary).

The Chairman, in opening the meeting, said: In accordance with the usual custom at our annual half-yearly general meeting, the directors have the pleasure to lay on the table a statement of the liabilities and assets of the Company and the profit and loss account for the half-year ended on 30th November last. It will be observed from these statements that the profit for the past half-year, after providing for depreciation of buildings, plant, and machinery directors' and auditors' fees,

account, viz:--

leaves an available balance of..... yen 32,056.43 which the directors have no doubt the shareholders will regard as a very satisfactory showing. The stock at the end of the half year has, as usual, been most carefully taken and as will be observed has been slightly reduced in amount. The directors have the pleasure to recommend to the shareholders that an interim dividend of yen 5 per share be declared at this meeting. This will absorb yen 13,000, leaving yen 19,056.43 to be carried forward to this second half of the year. This appropriation will require to be confirmed by the present meeting. The directors regret to have to report the resignation of Mr. Johnstone, the chairman of the board, on account of ill-health, and his place on the board has been filled by the appointment of Mr. E. W. Frazar; Mr. Dodds taking up temporarily the duties of

There being no remarks, Mr. Martin formally proposed and Mr. Gillett seconded that an interim dividend of yen five per share be paid.

The Chairman announced that the dividend warrants would be issued the following day.

The meeting then dispersed.

SILK SHIPPERS.

Messrs. Vivanti Bros. publish the following list of silk shippers from Yokohama to the United States, for the season 1903-1904, from 1st July to 31st December, 1903:

all to be hanged as soon as arrangements can be

LITERARY GOSSIP.

In the Sydney Courts Louis Becke, the author of various Australian and South Sea Island tales, has been held to have deserted his wife, who sued for a divorce and practically got it.

One danger haunts the legal author who goes into court—he may be answered out of his own bnook. This was the unhappy experience of Mr. Scrutton, K.C., in the action by Messrs. Novello and Company against Mrs. Brown Potter. Mr. Lawrence, K.C., contesting one of Mr. Scrutton's arguments, triumphantly quoted a passage from his learned friend's admirable work on copyright law. "Oh, that mine enemy would write a book!"
Mr. Justice Kekewich made the obvious comment on the situation, and the Court was merry.

Messrs. Williams and Norgate, Publishers and Messrs. Williams and Norgate, Publishers and Booksellers of 14, Henrietta-street, Covent Garden, London, send us a copy of their 137th International Book Circular. Besides a capitally compiled catalogue of books in many languages and dealing with every imaginable subject under the sun, ecclesiastical topics, perhaps, predominating, the Circular contains a sympathetic, well written article on Adolf Harnack, the German theologian, by the Rev. Dr. W. J. Cobb; and a critical review by the same writer of some Recent Foreign Theological Publications, which thoroughly deserves a wide circulation.

The first American book, according to William The first American book, according to William P. Trent, of Columbia University, in his recently published "History of American Literature," was the "Bay Psalm Book," which was produced at Cambridge, Mass., in 1640, by Stephen Daye, who had set up the first printing press in America the year before. This statement is not quite in accord with the late Mr. William quite in accord with the late Mr. William Blades's note, in his "Pentateuch of Printing," that "in the New World the first city to receive a printing press was Mexico, where Comberger worked in 1540." In the North, Stephen Daye erected a press at Cambridge, Mass., in 1638. It is easy to guess why Prof. Trent may have ruled Cromberger out; and the trifling discrepancy as to the date of Daye's press is of no importance.

The first Christmas Card was issued fifty-seven years ago. Mr. John Caldecott Horsley, R.A., the artist who designed it, died on October the artist who designed it, died on October 19th. He was born in 1817, and, as the Book Monthly for October reminds us, became an R.A. in 1866. He designed the card at the suggestion of "Felix Summerly," otherwise Mr. (afterwards Sir) Henry Cole, and it was issued in 1846, from the office of that gentleman's Home Treasury, 12, Old Bond Street. The picture on the card represents a family party, from grandparents to grandchildren, enjoying the "good cheer" appropriate to the Christmas season. On the right of this central group is a woman giving garments to a woman and a child; and on the left a man feeding the hungry. About a thousand copies of this card were issued. Probably but few of them are still in existence. The late Mr. Horsley's reminiscences are announced for Mr. Horsley's reminiscences are announced for publication by Mr. John Murray.

The latest issue of Lord Ronald Gower's reminiscences is eagerly welcomed in literary circles in England. The book possesses a distinct flavour of its own for Lord Royald has led a life fuller of interesting events than falls to the lot of men less nobly born. And better still, his eye has been quick to see and to record the good, and he has given his knowledge of the great to the world. has given his knowledge of the great to the world. It has been his fate to outlive many who have been too early called away. What he feels looking back, he sums up in the beautiful words of a correspondent whose name the reader would fain see engraved in gold. *As one's life draws near its end, we must learn to be more lenient, more forgiving towards one another. Here, within the chime of the old cathedral bells this Sunday morning I feel it is all such a fleeting show—this A gang of fifteen bandits, captured in Albay, morning I feel it is all such a fleeting show—this earl to be hanged as soon as arrangements can be love, the friendship, the kindness one has found

and cherished, which has sweetened one's pathway.

A distinct loss to the ranks of contemporary novelists is caused by the death of Mr. Hugh Stowell Scott, better known as "Henry Seton Merriman." He had only been before the public He had only been before the public as writer for about ten years, and less than a dozen works have come from his pen, but he had gained a wide and appreciative public, by whom his premature death will be heard of with deep regret. Like Mr. Shorthouse and others, Henry Seton Merriman long combined business with Seton Merriman long combined business with novel-writing, but latterly he had taken up his permanent residence in Ipswich and adopted definitely the literary life. His health, unfortunately, was never robust, and hetravelled a good deal, a fact of which his books—which are always wholesome and stimulating—bear witness. He was ever a conscientious worker, and it has to mentioned to his credit in these self-advertising days that he persistently refused to be dragged into notice, and hated the methods by which so many writers now keep their names before the many writers now keep their names before the public. Had he lived he would no doubt have added much to his already considerable achievements; but that was not to be.

In response to a number of requests from local authorities the Editor of the Schoolmaster has compiled a list of a hundred books wherewith to start a school library, and the list appears in the start a school library, and the list appears in the last number of our contemporary. It was submitted, among others, to Sir John Gorst, and some of his criticisms are interesting. For instance, he asks whether "Lorna Doone" is not above a child's comprehension, and further, whether "Allan Quatermain" is not "too bloody." He says, too, that "The Last of the Barons" is "very immoral." On the question of "Ivanhoe" he writes: "I am told modern children don't read Scott, otherwise I should have advised more." As to the inclusion of one of Marryat's works. read Scott, otherwise I should have advised more." As to the inclusion of one of Marryat's works, Sir John writes: "There are others of Marryat's in the same style which are very good—'The Children of the New Forest,' 'The Settlers in Canada,' and 'The Mission.'" Sir John asks whether "Sesame and Lilies "is not above a child, and would add to the two books from the pen of Charlotte Yonge "The Dove in the Eagle's Nest." Sir William Anson has also looked through Nest." Sir William Anson has also looked through the list. He strikes out Dean Farrar's "Eric" althe list. He strikes out Dean Farrar's "Eric" attogether. Sir William would add Jules Verne's "Round the World in Eighty Days" and Rolf Boldrewood's "Robbery Under Arms." The Bishop of Hereford would omit the following: "Fric," "Our Village," "Sesame and Lilies," "The Heir of Redelyffe." On the other hand, Dr. Percival would add the following: "Black Beauty," (The Heroes" (C. Kingsley), Lamb's 'Tales from Shakespeare, 'The Little Duke' or 'The Caged Lion' 'C. Yonge), or any of Mrs. Emma Marshall's books." Dr. Percival would like to see more poems, ballads, &c. like to see more poems, ballads, &cc.

FIRES.

On the night of Jan. 6th, fire broke out in the barracks of the 8th pioneer battalion at Hiromae, Aomori Prefecture, destroying three buildings.

A telegram from Takata, states that an out-break of fire occurred early on the morning of Jan. 7th in the well-known hotel, Koyo-Kwan, burning down the building.

Fire broke out on Jan 9th in the Methodist Church, Toyama, destroying the building. A defective chimney is reported to be the cause

On the night of Jan. 10th, fire broke out at Suwa-cho, Koishikawa, Tokyo, burning down three houses. The cause is not yet known.

A telegram from Morioka states that fire broke out on the night of January 11th at Morimachi, Kesen-gori, burning down over thirty houses.

FOOTBALL.

Though the weather on Saturday afternoon was decidedly pleasanter in the matter of temperature than we have experienced for some weeks past there were but few spectators at the football match. The Asahi states that the amount of money The game was played under Sokker rules and borrowed by the Government from the Bank of Colours emerged from a rather uninteresting Japan since the end of December amounted to contest victors by three goals to two.

NEWS OF THE WEEK.

A telegram from Nagasaki states that a British steamer with 4,000 tons of coal arrived at Saseho on January 9th.

A British steamer with about ten thousand tons of coal, arrived at Nagasaki on January 12th en route to Vladivostock.

The Jiji states that over fifty Japanese residents in Dalny arrived at Nagasaki on Jan. 11th. More are expected to arrive at Kobe.

The Nippon Industry Bank will hold an ordinary general meeting on Jan. 25th to discuss a proposal to issue debentures amounting to not less than yen 4,500,000.

The Osaka Shosen Kaisha will hold a general meeting on Jan. 23rd to pass the accounts for the past half year. An interim dividend is expected at the rate of 5 per cent.

Wireless telegraphy, according to the *Electrical World and Engineer*, is to be used in the suppression of the smuggling of opium into the Chinese quarters of the United States.

The lead and tin markets in Osaka are reported by the *fiji* to be active. The price of lead ad-vanced on Jan. 11th from yen 7 to yen 8.80 and tin from yen 70 to yen 86 per 100 kin.

The Nippon Yusen Kaisha's European liner Sanuki Maru, which was due to leave Kobe on Jan. 12th, outward, was stopped there by orders from the head office, the previous day.

T. Tanaka, book-publisher, living at Honjo, Tokyo, who was charged with having published a book injurious to social order, was sentenced in the Tokyo District Court on Jan. 11th to

ese negotiations the cotton market is very dull. The stock is estimated at 213,800 bales.

Mr. K. Mori, superintendent of a police station, Jan. 10th on a charge of having forged official during the war. The insurance of military men documents. A judicial official searched their now amounts to year 1,900,000.

party was held on the evening of the same day at the Imperial Hotel.

The British warship Vestal arrived on Jan. 14th at Kelung, Formos

The Jiji reports that the Russian warships Oslabya and others have left Bizerta for the Far East.

A telegram from Taipeh, Formosa, says the price of silver yen advanced on Jan. 13th from 25 sen 93 to sen 95.

An official report from Formosa states that a fresh case of plague appeared on Jan. v3th at Yensuiko. The patient died.

The Emperor of China has decorated Mr. Niwa and other officials of the Board of Ceremony, who attended on Prince Tsai when he paid a visit to Japan last year.

yen 25,000,000.

The godown of the Imaharu Commercial Bank is reported to have been entered, the burglars breaking through a part of the wall. About yen 1,600 was stolen.

Mr. J. J. B. Heimskerk, an old Shanghai hand, has been appointed agent of the Chartered Bank of India, etc., at Hamburg. Mr. Heimskerk was in Japan thirty years ago. Later he was in business in Shanghai and then in Hongkong.

The mother of Baron Sone, Minister of State for Finance, died on Jan. 12th at her villa at Katase. Her age was 77 years. The remains were removed on the following day to Tokyo. Tokyo papers report that she had been ill for a considerable time.

Shocking news comes by telegraph from Mito, Ibaraki prefecture. A farmer living in the village of Yata, Tsukuba district, is reported to have strangled his two children on Jan. 12th, and then committed suicide by hanging himself. Poverty is said to be the cause.

With reference to information to the effect that the Russian warships Gromboi, Rossia, etc., have left Vladivostock for China and Korean waters, the Asahi states that no official information has been received by the Government authorities, and that the report is probably groundless.

The shareholders of the Tokyo Gas Company will hold a general meeting on Jan. 19th to discuss a proposal to add 19th 4,200,000 to their capital, which now stands at 19th 4,200,000. The interim dividend of the last half year is expected to be at the rate of 7 per cent.

The Nichi Nichi says that Mr. M. Alfonso Gasco, interpreter of the Italian Legation at Tokyo, who had obtained leave to pay a visit class Lloyd steamer (2,070 tons) delivery being home, is alleged to have resolved to stay in Tokyo.

The Jiji's Osaka correspondent announces that Class Lloyd steamer (2,070 tons) delivery being received on Jan. 9th at Yokohama. It was renamed the Seium Maru and will be employed on the line between Kohe and North China. on the line between Kobe and North China.

The average rate of the steamers of the Osaka Shosen Kaisha chartered by the Navy is reported twenty days' imprisonment.

The Japanese consul at Bombay telegraphed on Jan. 9th that having been over-shadowed by to appeal to the Government for an increased serious rumours with regard to the Russo-Japanese consultations the other mental is resulted.

The Nippon Life Insurance Company, Osaka, has decided not to increase the rate of premia for insurers who belong to the military services even and Mr. I limpo, headman of the Mameri- at this serious time, but to cut 10 per cent, from kawa street, Toyana prefecture were arrested on the insured amount on payment in cases of death

According to the Official Gazette, Mr. C. A fatal fire occurred on Jan. 13th at the village of Tomioka, Sunto district, Shidzuoka prefecture, at Tientsin, on Jan. 11th married Miss Shidzu, a gram on Jan. 10th that the condition of the market is stationary since the end of the were killed.

Dr. H. Sano, President of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of Tomioka, Sunto district, Shidzuoka prefecture, at Tientsin, on Jan. 11th married Miss Shidzu, a gram on Jan. 10th that the condition of the market is stationary since the end of the were killed.

Dr. H. Sano, President of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the General Hospital Yamada, Japanese consul at Lyons, sent a telestation of the Gener the crisis in the Far East seemed to be hampering transactions. Japanese filatures, No. 11/2-9 to 11 deniers-are quoted at 47 francs.

The nominal editor and publisher of the Niroku Slimpo was prosecuted on Jan. 13th in the Tokyo District Court on a charge of having published some information with regard to military movements, without permission of the

The Daily News says that the late James McNeil Whistler's painting, "La Prince se du Pays de la Porcelaine," has been bought by an American for \$5,000, and will be immediately shipped to the United States. Since Mr. Whist-ler's death there has been an extraordinary demand for his works.

Looking over the Index of the English Hansard one finds that an old acquaintance, Mr. Galloway Weir, heads the list of loquacious private members, fourteen columns recording the multitude of queries he proposed during the Session to Mr. Graham Murray, whose six columns are mainly devoted to replies to Mr. Weir.

According to information brought by the Russian steamer Amur, which arrived at Nagasaki on Jan. 11th, the Russian warships lying at Port Arthur were busily engaged in loading coal but all the officers and bluejackets had landed. Apparently affairs in the port are very quiet. A rumour that a Japanese had been killed by Russians in Port Arthur is baseless.

Two men armed with swords entered early on the morning of Jan. 13th the Buddhist temple Joshinji, at the village of Urasato, Miura, Kanagawa prefecture, where a naval officer of the retired list was lodging. One of the would-be robbers was killed by the officer and the other was subsequently arrested by the police.

The North-China Daily News says that the riot at Amoy, during the races, arose between the Sikh police and the Chinese outside. The latter pursued the police into the race-course enclosure. Some bluejackets from H.M.S. Rambler assisted the police in driving the mob back. A few of the bluejackets and some civilians were slightly wounded. Only the present before night. wounded. Quiet was restored before night.

Princesses Tsune and Kane (daughters of the Emperor) left on Jan. 10th for the detached palace at Odawara by the 10 a.m. train, accompanied by Count and Countess Sasaki and some officials and court ladies. Governor Sufu and Mr. Hamada, the chief police inspector of the Kanagawa Kencho, escorted the princesses from the Yokohama station.

The Berlin Wagner Society has published an indignant protest against the production of "Parsifal" in New York, declaring that "Richard Wagner's holy legacy to art, whose production he designed is reserve for the consecrated temple of art which he created, is thrown away upon auditors in the land of dollars, who poss no conception of the true essence of Wagner and probably never will possess any.

The gun which Captain Roberts, son of the Commander-in-Chief, lost his life in rescuing from the Boers at the battle of Colenso, has arrived at the Royal Arsmal, Woolwich. An inscription, approved by the War Office, recording the herofism of the deceased officer is being engraved upon the gun. When completed it is to be presented to Earl Roberts as a family heirloom.

According to the Official Gasette, Mr. Otagiri Japanese Consul at Shanghai, telegraphed on Jan. 11th that owing to the fear of war and to the fall in exchange the cotton yarn market is very inactive and but few transactions are carried on. The native importers do not intend to make contracts for forward delivery. The stock of the Japanese product is calculated at 28,000

dispute the Rooseveltian theory of race suicide. While at work on Dec. 9th, the three men received word that male twins had been born to each one of them. American papers add that the six little babes are chubby and strenuous and will very likely live.

A policeman of the Yokohama Harbour Station A policeman of the Yokohama Harbour Station went to the Hotel Joshuya, Benten-dori, on Jangth and took away a fowling-piece from a Russian who had just arrived from Hakodate by the steamer Miike Maru. It appears that the foreigner had obtained the gun at the shop of Morikame, Hakodate, and without making payment left there for Yokohama. The Japanese ammunition dealer telegraphed to the police here requesting that it be returned to him. requesting that it be returned to him.

The Central Tea guild received a telegram on Jan. 10th from New York to the effect that owing to the serious rumours with regard to the complications between Russia and Japan, the demand for tea had greatly increased, but no change occurred in prices. The Kokumin believes that having foreseen that means for transportation would be greatly decreased at the critical time, thus pre-venting the import of tea, the dealers have imported for speculative purchase.

Tokyo papers agree that the Japanese Govern-ment intends to place an order with Messrs. Amstrong or Vicker's Shipbuilding yards to construct another first class battleship of about 16,000 tons displacement. The authorities have given instructions by telegram to the Japanese inspect-ing officials staying in London, so that the contract will shortly be made. It is also reported by Tokyo papers that as the result of the scheme of the third expansion of the navy, the authorities have requested the shipbuilders to present their estimates for the proposed ship.

Miss Marie Corelli, the novelist, was awarded a farthing damages, each side to pay their own costs, on Dec. 16th, in a libel suit brought by her against the proprietor of the Stratford-on-Avon Herald in connection with the recent controversy, in which Miss Corelli opposed the erection of a Carnegie library on the ground that it involved a desecration of Shakespeare's birth-place. The alleged libel consisted in a statement that Miss Corelli desired to erect a library at the same place.

Holland is just now passing through a very severe financial crisis. A good many banks have failed in Haarlem, Delft, and other northern towns, and some in the south. Even at The Hague and Amsterdam, one or two houses have fallen into serious difficulties. Much of the trouble has been directly caused by the recent disturbance of the American market, but in its origin is due to reckless speculation and reaction after a period of inflation. The weaker houses are now feeling the strain, and some experienced observers doubt if the trouble is at an end.

As a result of the French interdiction of religi ous orders, England, it is said, has received about 6,000 monks and nuns. Some 1,800 have gone to the United States, and about 1,100 to Canada. Monks and nuns have come in about equal numbers to England, and the convents and monasteries have been increased by about 602 by the one new missions have been opened. Throughout Great Britain forty-seven new convent went there is schools were established last year. The exiles brought a considerable sum of money with them.

He stated at the police station that he was em ployed in 1895 by the Russian authorities as a coolie on the construction work of the Siberian Railway and the East China Railway and that he returned home in December last. The notes which are declared to be counterfeit had been saved by him during his employment in Russia and he believed them to be good. He is under examination at the station.

Governor Sufu issued a notice on Jan. 7th to the foreign insurance companies in Yokohama with regard to the deposit of yen 100,000 which the Minister for Agriculture and Commerce ordered last year. The note states that the deposit in the form of cash will be accepted up to Jan. 31st, which is the last day of the specified period, but that in case of securities the deposit will not be received on the last day, as the Minister's consent must precede their acceptance. It is stated by the Kencho that the only firm which has made the deposit as yet is the New York Life Insurance Company.

It is probable that the season of 1904 will see a new departure in county cricket. Several leading county cricketers have been approached, and unofficial meetings have been held in London and Birmingham, and all were in favour of pushing forward the proposal that, in addition to the present county championship, a new inter-county tournament, by which all beaten teams shall fall out in each round, shall be instituted. Circulars have been sent to the first-class counties requesting meetings to consider the scheme, and even if some of the richer counties do not fall in with the idea, it is believed that the support of the remainder will prevent it being dropped.

The Kobe Herald reports that a fire broke out in the upstair rooms of Mr. F. Domballe, No. 63, Sakaye-machi, Ichome, Kobe, at about 2.20 on Thursday morning, and the rooms, together with the upper story of a Chinese exchange shop to the north of the premises, were destroyed. The cause of the fire is not clear and the authorities are making enquiries. The rooms where the fire Yamashita and Ueta. The amount of damage to the property of Mr. F. Domballe is not known but that to the Chinese Exchange shop is yes. 3,000. The property of the former was insured for yen 8,000 by two insurance companies and that of the Chinese shop for yen 2,600.

Lecturing at Leeds, Mr. Edward Whymper, the well-known mountain climber, gave an interesting account of the first ascent of Chimboraco in the Andes of the Equator, upwards of 20,000 feet above the sea. Mr. Whymper had many stories to tell of mountain sickness through the rarefaction of the air, and of the means used to exercise the dangers to be faced through the overcome the dangers to be faced through the want of oxygen in the air after a certain altitude want of oxygen in the air after a certain altitude had been reached. The sickness having been overcome, Mr. Whymper and his men succeeded, in spite of the failure of their food supplies, in reaching the summit of the mountain. So fascinating had the experience been that the ascent of Chimborazo was made a second time.

The Queen of Holland has just done an Englishman—the Rev. Kirsopp Lake, of Lincoln Coilege, Oxford—the honour of appointing him a Theological Professor at the famous Dutch University of Leyden. Mr. Lake succeeds the well-known Dr. Manen in the Chair of New Testament Everges; Layden has a historical roll. Testament Exegesis. Leyden has a historical roll of great men second to that of hardly any University. She can boast the illustrious names of Descartes, Grotius, Scaliger, Salmasius, Boerhaave, and Arminius. In the eighteenth century, owing chiefly to the fame of Boerhaave, Leyden had one of the most popular medical schools in Europe, and great numbers of English medical students went there for their degrees. Among them were Garth and Akenside, the poets, Goldsmith, and

In the little mining town of New Philadelphia, Pa., are three foreigners, John Motske, Joestavi Slavoni and Mike Parko, who are in a position to change false Russian notes for Japanese money.

S. Akita (30) was arrested by the Kagachopolice, on Jan. 6th at a Chinese exchange shop,
No. 165, Yokohama, where he attempted to exin connection with the competition of the tenth
change false Russian notes for Japanese money.

for the competition, and 5,646 of these persevered to the end and sent in answers to all the three question-papers. The Times had offered £1,000 to the purchaser who could pass the best exami-girls. The function in its Encyclopædia Britannica, as well 7th December as other prizes for the less expert, ranging from £225 to £10. An Army tutor came out at the top in this competition. More than 10 per cent, of the winners were clergymen or ministers. cent, of the winners were clergymen or ministers. The process of compiling answers, says the *Times*, "has been productive alike of pleasure and profit," for, apart from the prize-winning, "the work of ranging through the *Encyclopedia* in search of knowledge has been its own-reward."

The coroner of Derby has just held an inquest concerning the death of a carter named Day, aged 51. This poor fellow had in his time saved aged 51. This poor fellow had in his time saved no fewer than 27 persons from drowning, but had never sought public recognition of his heroism. It seems hard that such a man should have lost his life by drowning at last, but he did, and it is feared that he committed suicide under mental that he had not be a seem of November he ression. In the last week of November he left home and was never seen again until his body was found in a canal, his cap and muffler being on the bank. The jury returned a verdict of found drowned, and gave their fees to the widow.

Going through the financial matters of the Vatican as left by Pope Leo, the present Pope has found that several millions had been employed in restoring the private patrimonies of a number of aristocratic families, the members of which had remained faithful to the Holy See, particularly those of the Princes Boncampagni and Borquez, but more especially the latter. The historic palace of the latter, built by Pope Paul V. at the beginning of the seventeenth century, had fallen into the hands of creditors of the princely house, who rented it as an office to the Grand Orient of the Italian Free Masons, which Pope Leo considered to be a desecration. All rumours to the effect that Pope Pius intends to get this money back through the application of coercive measures are considered at the Vatican as altogether without founda-tion, because the families subventioned are repaying the money loaned them by yearly

A London telegram of Dec. 3rd said: The Royal Commission on Arsenical Poisoning from Food and Drink recommends the prohibition of the sale of beer and other liquids entering into the composition of food which contains one-hundredth on a grain or more of arsenic per gallon, and the prohibition of the sale of solid food containing one hundredth of a grain per pound, "no matter whether habitually consumed in large or small quantities or whether consumed alone (like golden

hundreds of friends in China, Japan and America is extended to Dr. Vinton and his children. Mrs. Vinton leaves six children, three boys and three girls. The funeral took place on Monday, the girls.

The disagreeable fact has to be faced, according to the concurrent testimony of fishermen of several nations, that the shark has once more to be reckoned with in European waters. In the Baltic, where sharks had been extinct since 1759, they have made their reappearance in considerthey have made their reappearance in considerable numbers, and several fishing boats report having had whole draughts of fish devoured from the nets, which were broken, in the Belt and the Cattegat. A fisherman who fell overboard narrowly escaped with his life. Shoals of sharks, some of them could have a seven reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and they are even reported as before the country and the country and the country and the country and the country are the country and the country and the country are the country and the country and the country are the country and the country and the country are the country and the country and the country are the country and the country and the country are the country and the country are the country and the country and the country are the country are the country are the country and the country are the country are the country and the country are the country are the country and the country are the country are the country and the country are the country are the country and the country are the country are the country and the country are the coun German coast, and they are even reported as be-coming far from rare in the North Sea. Their presence is attributed to their pursuit of the herring shoals on the west coast of Norway.

The British Admirally evidently contemplates the extensive adoption of oil fuel for warships in the near future. Three old gunboats at Ports-mouth have been transformed into oil hulks, their mouth have been transformed into oil fulls, their engines, guns, and everything below deck having been removed and replaced by tanks for oil, with a pump by which fluid may be raised for filling oil tanks on battleships. Experiments are still being made on board the destroyer Surly, and the destroyer Spiteful is being prepared for a series of trials. The old battleship Sullan is having the furness reduced for oil buttless and its in her furnaces adapted for oil burning, and it is proposed to carry out a series of experiments her with various kinds of oil and different modes of combustion. Classes of stokers will also be trained to use the liquid fuel, so as to produce the maximum of heat with the minimum of smoke. The battleships Mars and Hannibal, on returning to Portsmouth, will have the whole of their furnaces adapted for oil. At present they use coal in half the furnaces. The oil furnaces have so far given encouraging results, and the extension of the system is no doubt the result of the experiences gained in the summer manoeuvres, during which the oil fuel was in constant use.

According to the Jiji's correspondent, the Osaka Chamber of Commerce held a general meeting on the night of Jan. 11th and decided to present the Minister of State for Finance, the President of the Bank of Japan, the President of the Yokohama Specie Bank, Ltd., and the Committee of the Owner Banker. mittee of the Osaka Bankers' Society's, their views with regard to the control of financial affairs, which with regard to the control of financial affairs, which are involved by current complications. The note to the Committee of the Osaka Bankers' Society is summarized as follows: "As diplomatic dangers are just pending, it is unavoidable that the stock and other markets will fluctuate for speculative purposes. In this case, should those concerned take fright the result will be discretely to commercial circles." They must

published. No fewer than 11,080 persons entered The sympathy of the entire community and of with the inrush of water was presently added a with the inrush of water was presently added a new difficulty. The cargo began to shift danger-ously, creating a heavy list, now to port, now to starboard, rendering the *Thorniebank* at times nearly unmanageable. The ship pitched and rolled in the teeth of persistently contrary winds, until the crew began to fear that they would never reach port. In anticipation of a catas-trophe, the boats were kept constantly provisioned and ready for launching. Fortunately for the and ready for launching. Fortunately for the plucky crew their desperate struggle, which the maritime authorities extol as a feat of marvellous seamanship, was successful.

> On the evening of Dec. 8th the first annual dinner of the staff of the London office of the International Banking Corporation (whose head office is in New York) was held at the Holborn Restaurant, the chairman being the manager, Mr. John C. Budd, ably supported by Lord Fairfax of Cameron, and Mr. C. E. Thomson.

In the course of the really impressive and enthusiastic meeting of London Liberals, which was held on Nov. 25th in the Surrey Theatre, there was one unpremeditated incident which, for significance, quite eclipsed everything else. wards the end of a long and characteristically brilliant speech, Lord Rosebery, with sudden energy, put to his crowded audience this question, "Will the Government fool this people once again?" In a moment came the answer—an again? In a moment came the answer—an answer for which, apparently, he was not altogether prepared—"Not if you will take the lead." As this response, prompt and pat, broke upon the rhetorical pause which Lord Rosebery had made, the crowded audience rose, as if to a signal, and spent itself in a roar of enthusiastic acclamation. In every part of the house, menand women too-clapped and cheered and waved and women too—clapped and cheered and waved hats or handkerchiefs with an energy that was as spontaneous and sincere as it was impressive. What would be his answer to this "message of leadership" so unexpectedly "flung back" to his "message of peace"? As silence at last asserted itself again every ear was strained in eager attention to catch his next words. "I say," repeated Lord Rosebery, with studiously preserved imperturbability, "will the Covernment fool this next to the peace again." Government fool this people once again?" humour of this discreet evasion of an embarrass-ing situation at once appealed to Lord Rosebery's baffled admirers, and in a shout of laughter the incident was extinguished.

In the Naval and Military Record "Paratus" writes anent H.M.S. Centurion, which has jus' oined the China squadron:-

prohibition of the sale of solid food containing with regard to the control of financial affairs, which whether habitually consumed in large or small quantities or whether consumed alone (like golden syrup) or mixed with water or other substances (like chicory, etc.)." The commissioners find there are serious defects in the present machinery available safeguard the public, and urge that more extended powers be given to the authorities too condemn unwholesome food, the establishment of official "standards" and the creation of a "board of reference," to which could be referred specific points and whose decisions should be carried out by the department concerned, the latter's action being subject to the control of Parliament.

It is with the most poignant regrets, says the Korva Review, that we are obliged to note the Korva Review, that we are obliged to note the death of Mrs. Vinton, whe wife of Dr. C. C. Vinton, of Seoul. Dr. and Mrs. Vinton have invited in Seoul for the past thirteen years, having arrived from America in the Spring of 1891. Mrs. Vinton have it was there that she was married to Dr. Vinton on the eve of their departure for Korea. From that time till her death on the fourth of this month she was a prominent member of the small social circle in Seoul. Many are the people who could tell of her unstituted and not be influenced by the actions of Finance to pay attention to the foregoing. The Chamber of Commerce advised the Minister of Finance to pay attention to the foregoing arrived from America in the Spring of 1891. The billing of the Small social circle in Seoul. Many are the people who could tell of her unstituted and not be influenced by the actions of Finance to pay attention to the foregoing. CORRESPONDENCE.

THE UNION JACK CLUB.

To the Editor of the "Japan Mail."

10 THE EDITOR OF THE "JAPAN MAIL."

Sim.—I shall esteem it a favour if you will kindly publish the accompanying letter in your paper.

The kind and patriotic spirit shown by all in Yokohama, which speaks for itself in Mr. Beart's letter, encourages me to suggest that we should try by private subscription to make up the sum already in hand to floo. This will provide a Bedroom to be named the "Tokyo-Yokohama Room" in the Union Jack Club.

The Manager of the Hongkong and Shanghai

The Manager of the Hongkong and Shanghai Bank has kindly consented to receive and acknowledge subscriptions. It is proposed to limit these to yet 25, but the smallest sum will be gratefully received.

As an old soldier I gladly head the List.

in your paper.
I remain, Yours faithfully,

CLAUDE MACDONALD British Legation, January 9th, 1904.

O HIS EXCELLENCY
SIR CLAUDE M. MACDONALD,
G.C.M.G., K.C.B., To HIS EXCELLENCY

SIR,—Enclosed I beg to hand you details of the result of the Amateur Dramatic performance given in the Public Hall, Yokohama, on Monday, the 21st December, 1903, in aid of the funds of the "Union Jack Club," London, under your patronage.

 Note from Messrs. C. Thwaites and Co., booking agents, showing amount of gross Receipt for Hire of Band 18
Receipt for amount paid for stage carpenters, stage hands, small sundries and gratuity to Public Hall Momban 15
Receipt for hire of Public Hall 40
Making together a total of

Yokohama Branch, for the above amount... 560 In presenting this statement of accounts I would add that the proprietors of the Japan Baid, Japan Heads, Japan Gazette, Japan Advertiser, and Box of Curios have most generously waived all claims for cost of advertising and printing, that Messrs. Thwaites & Co. make no charge for commission on the booking and sule of tickets, besides lending a piane free of charge, that the Public Hall Association granted the use of the Hall at a reduced rate, and that Mr. E. J. Moss was good enough to lend the furniture for the stage without any charge whatever. The Amateur Dramatic Club of Yokohama were also kind enough to place the necessary scenery and appliances at the disposal of the company.

With compliments, I am, Sir, Your obedient servant, (Sd.) EDWARD BEART.

(Sd.) EDWARD BEART. 111-B, Bluff, Yokohama, December 31st, 1903.

JAPANESE OPTIMISM.

TO THE EDITOR OF THE "JAPAN MAIL."

TO THE EDITOR OF THE "JAPAN MAIL."

SIR,—In your issue of the 25th instant appears an editorial note, evidently written by yourself, and a letter contributed by Bishop Awdry commenting on certain statements that appeared in my review of Captain Brinkley's work on Japan. I will take the note first. What I said was that you had "omitted to dwell at any great length on the extreme pessimism that characterizes its teaching" and this assertim it seems to me is quite correct. The passages you quote did not escape my notice, but it seems to certain statements that appeared in my review of Captain Brinkley's work on Japan. I will take the note first. What I said was that you had "omitted to dwell at any great length on the extreme pessimism that characterizes its teaching" and this assertim it seems to me is quite correct. The passages you quote did not escape my notice, but it seems to me that in these as well as elsewhere you under rate the influence of Buddhist pessimism on the minds of that section of the nation which accepted Buddhist leaching. The stated opinions of Dr. Inoue Tetsujiró, Dr. Murakami Sensei, Dr. Inoue Senyō and many other writers that could benamed on this subject, the whole literature of Japan down to the Meiji pessimism. But notwithstanding this fact, taking the nation as a whole, the croakers and Jeremiahs were in the minority. The broyant human nature of the Japanese people was no more oppressed by the doctrines of Buddhist many the majority of professing Christians in Europe and America to-day by the doctrines of Buddhist has a san agnostic and therefore could not reasonates the functional parting in journalism as far above phenomena is that the doctrines referred to ap-

peared to most Japanese and appear to most Occiden-tals to be untrue. You will perceive, Sir, that the difference between us is slight. You allow for a certain amount of pessimism, but according to my view you do not allow for as much as really existed.

view you do not allow for as much as really existed. That what I said about Japanese optimism should offend Bishop Awdry is no cause for surprise. What is astonishing is that in this twentieth century, when public opinion throughout the whole of the Western world has become so much fairer, so much broader and more enlightened than it was even thirty years ago, Bishow Awdry should be found treating us in the columns of a newspaper, instead of in his own pulpit, with a sermon on the cheerful effects on the mind of the Christian doctrine of sin. Certainly the present writer needs no enlightenment on that subject, for he was unfortunate enough to Certainly the present writer needs no enlightenment on that subject, for he was unfortunate enough to have been brought up in a family where the doctrine of sin referred to by the Bishop was dinned into him from early youth. Happily for Europe and America, the majority of enlightened people have dismissed the specire of an offended and avenging God standing over human beings ever ready to punish them for their transgressions, here and hereafter, as a product of pure imagination. To say, as the Bishop does, that Japanese optimism is inferior because the Japanese have never known or have only the Japanese have never known or have only known to reject that extremely perverted view of human nature taught by St. Augu-stine, Calvin and others, and still taught by their stine, Calvin and others, and still taught by their modern representatives seems to me too absurd to need serious discussion. Bishop Awdry describes Japanese optimism as the "butterfly's joy" and his own cheerfutness, with fine self-assurance, as "a patriot's welf-founded confidence." If Bishop Awdry will allow me to say so, this haut en has attitude ill becomes a man who has come to this country as a missionary. I have had the privilege of mixing with becomes a man who has come to this country as a missionary. I have had the privilege of mixing with Japanese of all sorts and conditions for over 30 years, and I have no hesitation in saying that what the Bishop is pleased to call, their low type of optimism, in that tone of superiority which it is the fashion of Occidentals to adopt when speaking of non-Christian Orientals, is very much superior to such optimism as is to be found in Western communities. The fundamental assertion of the Bishop that Christian doctrines are conducive to optimism, that is, to a cheerful view of this life, for about the next we know nothing and can know nothing certain, has been, it nothing and can know nothing certain, has been, it seems to me, disproved by history. No such gloom has ever enshrouded human beings as that caused by seems to me, disproved by history. No such gloom has ever enshrouded human beings as that caused by the religious teaching of former centuries throughout Europe. The very assertion that salvation depends on belief—a state of mind that can't be forced and in the case of the intellectual can usually only be reached by the suppression of the rational faculties—is anything but cheering. In his own pulpit it is of course the duty of the Bishop to say all he can in favour of Christianity, and on the ethical side, as distinguished from the doctrinal and dogmatic side, there is much that is to be said for it. But when in the columns of a daily newspaper the Bishop addresses hundreds of American and European agnostics, church-goers and non-church-goers, as well as his own special followers, he has no right to fill his letter with unprovable assertions. The tone of his letter is "We are the people, and wisdom shall die with us." This sounds mediaval. The Japanese light-heartedness of which the Bishop has so poor an opinion is much deeper than he supposes. It is a perfectly natural state of mind in a people who have no belief in a future life—a state of mind which the Greeks had in an eminent degree; and which during the past 50 years has been increasing to an extraordinary extent throughout Europe and America, thanks to the rapid decline of the terror-striking doctrines of Christianity. Most of the publicists who have come to this country from the West have envied the Japanese their habitual cheerfulness. The very sight of it is exhilarating. But what galls the Bishop and those who think with him is the fact that this light-hearted race of people are really and permanently happy as agnostics. A happy agnostic is an eye-sore to

that business interests forces on most editors. But in outside contributions to newspapers in the correspondence columns, let men say what they really think. The present writer has as good a claim to be heard on Japanese national traits as the reverend prelate who takes him to task for daring to suggest that there exists in this country something that is superior to the optimism of penitent Christians. It is, I admit a very unpleasant-sounding theory to the ears of a Churchman. But in the search for truth, we must not be daunted by surprises of this kind. Facts are facts; and nothing that the Bishop writes will persuade thoughtful students of Japanese character that the habitual brightness of Japane's leading statesmen, scholars, educationists, business men and mechanics to-day is the result of mere animal spirits or of mere levity. Many divers causes, some positive some negative, have produced the Japanese optimistic state of mind. Their fatalistic ideas lead them to see that certain powers of nature are invincible and that it is best to cultivate a philosophic calm in submitting to them. Resignation where resistance is hopeless is one of the most beautiful of Japanese virtues. Thus the Japanese as a people enjoy nature to an extent unknown among us. We grind at our professions till either physical weakness or mental weariness incapacitates us for the enjoyment of hardly earned leisure. Our faculty of enjoyment is apt to grow atrophied by disuse. Not so the Japanese. Their view is that life is given to be enjoyed. And their view, is certainly the right view, as is pointed out by a polished English writer, W. R. Greg, who says in his Literary and Social judgments "That life was given us to be enjoyed few men in their sober senses, not distracted by unendurable anguish or rendered morbid by a perverse Theology, have ever seriously dreamed of doubting. The analogy of the lower animals confirms the consciousness. Human infancy holds the same language. The brutes that perish but never speculate and the young whose sweetness. Not one of our senses, that in its healthy state, is not an avenue to enjoyment, not one of our faculties that it is not a delight to exercise. Provision is made for the happiness of every disposition and of every taste—the active, the contemplative, the sensuous, the ethereal. Provision is made for the happiness of every age, for dancing infancy, for glowing youth, for lusty manhood, for reposing age." The answer to your question, Sir, whence comes Japanese cheerfulness, is that it was developed in a natural and normal manner in Japan as in ancient Greece. Remove theological terrors from the mind of man. Banish the idea of a future life as teo improbable to be seriously considered and men are free. To follow their natural instincts. If this natural state of mind be pronounced a childish state, then all we can say is that our clubs, our concerts, our theatres, our dances, our many games prove that it is a state to which the majority of us wish to revert. The civilised world is sick and tired of the theological gloom of bygone ages. "What's the odds as long as you are happy?" may be very vulgar, but it expresses the growing conviction of millions of enlightened people and this principle it is that constitutes the strength of the world-wide system of ethics know as utilitarianism. Apologizing for the extreme length of this letter.

Tam, yours, etc.

I am, yours, etc.

THE "WRITER OF THE REVIEW." December 30th, 1903.

DR. STRATZ'S NATIONALITY.

(TO THE EDITOR OF THE " JAPAN MAIL")

(10 THE LDITOR OF THE "JAPAN MAIL.")

SIR,—In your paper's issue of the 7th inst. I see that Stratz, the author of the book recently criticised by Dr. Baelz, is said to be a Dutchman. Allow me to correct this statement by informing you that Stratz, although he served as a Surgeon in the Dutch Indian Army, is a Russian by birth and a German by descent. Moreover Stratz is not Mr., but a doctor of medicine, a pupil of the late celebrated Prof. Schroeder in Berlin, and himself a gynaecologist of great repute, practising at the Hague, Holland.

Very truly yours.

A DUTCHMAN.

A DUTCHMAN. Very truly yours,

Kobe, January 10th, 1904.

THE HIGHWAYMEN OF VAFIN.

(FROM OUR CORRESPONDENT.)

Port Arthur, December 30.
The burial of the bodies of the Russian soldiers who were killed in the fight with the Hunghutze, or Manchurian highwaymen, at the village of Vafin, in Mongolia, on the 13th of November last, took place

with the usual ceremonies at Dashitzyo in Manchuria

明拾骨董单兰月曾日第三侧郭便物靠可

on the oth of December

with the usual ceremonies at Dashitzyo in Manchuria on the gib of December.

At the same time full information of the little campaign which terminated at Vafin has been published. It is a long story but an interesting one, for li bears a close resemblance to many of the British campaigns against De Wet during the South African war. The Manchurian De Wet is called Tulensan by the Russians and seems to be a resourceful leader. He had under him two licutenants, one of them a Chinaman called Tenben, and the other a Russian convict who had escaped from the penal colony at Saghalien, and who called himself Fulenhoy, but this is probably an assumed name. Mention is also made in the reports of the campaign of a brother of Fulenhoy who was captured by the Chinese and put to death, and it may be here stated that Fulenhoy himself, who was about as useful to Tulenson as Abdullah Sheri was to the Mad Mullah of Somaliland, broke his back in attempting to escape from the Russians at Vafin. Tulensan got away, however, with the loss of several of his fingers. A singular feature of the affair is that the Chinese authorities seem to have connived at Tulensan's railed although they showed no hesitation in Chinese authorities seem to have connived at Tulen-san's raids although they showed no hesitation in executing any of the captured marauders whom the Russians handed over to them. But it is clear that Russians handed over to them. But it is clear that the Russians take care of the more important of the robber chieftains themselves, at least they have a fine collection of them in the Arrestry Dom in Port Arthur which is, in consequence, visited frequently by important-looking Chinamen who drive up to the portals of that establishment in izooscheeks and spend a long time conferring with the captured bandits. It is not improbable that the authorities at Peking are indirectly encouraging the highwaymen to make things hot for the Russians, but a more short-sighted policy it would be difficult to imagine for it only gives the latter an excuse for remaining in Manchuria.

The hunt for Tulensan seems to have now lasted for a whole year. It began in the August of 1902

The hunt for Tulensan seems to have now lasted for a whole year. It began in the August of 1902 when intelligence was received that this redoubtable brigand was in full flight. He seems, by the way, to have always managed to do the most damage when in full flight. He was then, in the Liao River district not far from Monkden, and at the head of 600 men who are described by the Russians as perfectly disciplined and mounted on fine horses. Lieutenant Konshina endeavoured to surround him with the 41st Sothva but Tulensan escaped through a gap left on capined and mounted on the norses. Lieutenant Konshina endeavoured to surround him with the 41st Sotnya but Tulensan escaped through a gap left on the left flank of the Rissians and the Liao River. Cornet Levsheenovsky was sent in pursuit of him with a flying column while the 41st Sotnya came on behind. On the 19th of August last the cornet located Tulensan in the village of Syakhontu, or rather the robbers made known their presence to the Russians by greeting the latter with a volley as they entered the village. The Russian accounts say that the bandits were defeated but as they only lost a few men and succeeded in getting clean away, this defeat was really a very creditable one for them. They suffered more severely on the 20th of August at the village of Tendostun although that place is surrounded by marshes hitherto believed to be impassable. They were driven out of this village with a loss of 25 men killed, many arms and horses, five pood of powder and 12,000 cartridges. After this

passave. They were driven out or ints viniage with a loss of 25 men killed, many arms and horses, five pood of powder and 12,000 cartridges. After this defeat Tulensan field to Mongolia.

Towards the end of October, this year, news was received that Tulensan with a new band of 300 men was at Apshanchjuan on the Chinese Eastern Railway between the rivers Taiuzikhe, Khunkhye, and Liao. A party was at once sent in pursuit of him under the direction of Captain Vestermark. Along with Tulensan was the famous Russian renegade Fulenhoy with 300 mounted men, also the other celebrated brigand chief Tenben, with about 100 mounted men. In view of this formidable combination the Russian force sent in pursuit was sufficiently strong, consisting as it did of the 7th Sotnya, two companies of the 4th Brigade, one commando of captain, Trotsky of the General Staff. The object of the expedition was to surround the highwaymen and to prevent them making their way, the Moreolis In the New Event Geometric In the Internation In the New Event Geometric Internation International highwaymen and to prevent them making their way into Mongolia. In the Novi Krai, from which I take this account, it is stated that Tulensan had been previously in Peking and had received permission to cross into Mongolia.

In order to catch Tulensan it was manifestly neces In order to catch Tulensan it was manifestly necessary to guard all the fords on the Liaoho but the robber captain succeeded in finding a ford which was not guarded. By the night of 30th October (old style), however, the Russians had overtaken him at the village of Vafin in Mongolia. They were not sure at first if it were he and there were not a large number of Russians present so that some care was necessary. But the Russians took no precautions. A non-commissioned officer and two privates penetrated into the vilage, killed several armed robbers, and had soon the whole nest of hornest about them. The robbers numbered no less than goo men and their equipment and good shooting as well as their method of attack seemed to indicate

that they were regular soldiers. For a time the Russians were in great danger but they crouched down behind some Chinese houses on the outskirts of the village and held their own gallantly. But they were unable to prevent the escape of the robbers when the latter mounted their horses and came to the conclusion that it was time to be off. According to the Russian accounts the robbers loss 128 men. Structure of the Far Eastern stituation. the conclusion that it was time to be off. According to the Russian accounts, the robbers lost 178 mer killed and about 200 wounded and had to leave be

killed and about 200 wounded and had to leave behind 250 lorses and a large number of guns as well as considerable supplies of cartridges.

The Russian losses consisted of one officer wounded and of four men killed and nine wounded. A local English doctor, a Mr. Learmont, and his wife tended the wounded with an attention which was much appreciated by the Russians.

THE SITUATION.

THE SITUATION.

The situation is now so bad that it could not well be worse. The Russians say that the Japanese evidently want a war and are acting in the right way to get it. The conduct of the Chinese on the borders of Manchuria is also disquieting, in fact it is clear that they are encouraging and supporting the mounted bandits, a course of policy in which they are believed to be assisted by the Japanese but which is a very mistaken line for them to take. If China openly joins Japan in a war with Russia, her position will be still worse, for the Russians will annex Mongolia and Chinese Turkestan and perhaps overthrow the Manchu dynasty. However, that may be, there can be no doubt that we are now trembling on the brink of war.

TELEGRAMS.

(REUTER'S SPECIAL SURVICE.)

ALLIES.

London, January 7 One hundred and twenty British naval reservists, with ten officers, have left London

for Genoa to assist in navigating Japan's recently purchased vessels. Much enthusiasm was displayed and cheers for Japan were raised when the party was leaving Victoria station.

CARDIFF COAL.

There was an extraordinary demand for Cardiff coal on the exchange yesterday. For tonnage to the Far East, the Admiralty agents paid twenty shillings a ton for a 5,000 ton vessel for Hongkong.

FATAL EXPLOSION ON BRITISH CRUISER.

London, January 8. A boiler explosion occurred on board the third class British cruiser Wallaroo, at Sydney, killing 43 men.

(The Wallaroe was built at Elswick in 1889 for service on the Australian station. She is of 2,575 tons, 265 ft. long and 41 ft. beam, steaming 153/2 knots. She cost £123,592.—ED. J.M.)

AMERICA'S ATTITUDE IN CASE OF

WAR.

A telegram from the United States says that a message has been sent to Admiral Evans, U.S.N., conveying orders for his guidance in the event of hostilities breaking out. The American Navy is to observe the strictest neutrality unless American treaty rights are infringed.

THE "WALLAROO" EXPLOSION.

London, January 9.

Only four were killed and three injured by the explosion on H.M.S. Wallaroo at Sydney. The signals were misread.

THE "TIMES" ON ENGLAND'S DUTY.

situation.

ADMIRAL EVANS' ORDERS.

The Cabinet at Washington has instructed Admiral Evans not to proceed to Japanese waters at present.

MORE HOPEFUL

London, January 10.

All the Bourses are stronger, reflecting a sudden reversion to hopefulness, based on well-accredited reports that Russia's latest note recognizes Japan's preponderance in Korea, which, at the instance of Viceroy Alexieff, was previously refused. It is generally believed that this admission will lead to a continuance of the negotiations, making for peace.

THE JAPANESE WARSHIPS

The Japanese warships have left Genoa for Suez, flying the Japanese flag. The crews are half English half Italian. They are commanded by English officers. the other officers are English, except five Japanese

RUSSIA'S REPLY, ACCORDING TO PEKING.

London, January 11

According to trustworthy diplomatic information received in Peking the Russian reply is thought to be conciliatory in tone but unsatisfactory in substance. Japan desires further delay in order to complete her preparations: therefore she continues the

negotiations.

The prospects of war before the spring continue to be very strong.

[Note.—The latter part of this telegram is pure nonsense. It is evidently one of those reports put into circulation by a certain section of the European press with the express object of discrediting Japan's sincerity in the eyes of the world—ED, [M.]

NEUTRAL POWERS.

London, January 12.

Germany and other Powers forming the Triple alliance are determined to maintain strict neutrality in the event of hostilities breaking out between Russia and Japan.

RUSSIAN OPINION.

The present uncertainty is having a disturbing effect upon Russian public opinion, which is becoming more pessimistic. the press, while warning Japan that Russia has reached the limit of her concessions, professes to be hopeful of peace.

FIGHTING IN SOMALILAND.

A successful engagement has taken place in Somaliland in which a thousand of the enemy were killed. Two British officers were killed and eight severely wounded.

PROBABLE TIEING OF RUSSIAN HANDS.

London, Junuary 13. Advices from the Balkan countries point to the certainty of a general conflagration in the Spring. This is regarded as an im-portant factor in the Far Eastern situation,

ARBITRATION.

An influential conference of representatives of all parts of the country has been held at Washington to promote the conclusion of an Anglo-American arbitration treaty.

CHINA-AMERICAN TREATY RATIFIED.

The ratifications of the China-American treaty, opening Mukden and An-tung, have been exchanged at Washington.

THE APPROACHING RUSSIAN FLEET.

The Russian battleship Aurora and the cruiser Dimitri Donskoi, with seven torpedoboats, have arrived at Port Said.

The Dimitri Donskoi has entered the unal, but the others will follow on the Canal, arrival from Brest of Admiral Wirennieff's squadron.

GERMAN OPINION CHANGING.

German Government circles, which have hitherto been optimistic, now regard war as a proximate contingency.

(RECEIVED AT THE LEGATION OF FRANCE.) THE POWERS IN KOREA.

Saigon, January 7.

It is announced from Seoul that two Russian, two British and one American warship have arrived at Chemulpho, to remain there till the end of the crisis.

RUSSIA SENDS TROOPS

The Bourse Gazette, of St. Petersburg, announces the despatch of a regiment of riflemen to protect the interests of Russians, which are menaced by conflicts between Japanese and Koreans.

RUSSIA'S REPLY.

Saigon, January 8.

The reply of Russia has been sent to the Japanese Government. It is rumoured in London that the reply is not satisfactory.

THE "WALLAROO" EXPLOSION. An explosion has taken place at Sydney

of a boiler of the cruiser Wallaroo. reported that there are 43 killed and

FRANCE AND BRAZIL.

The negotiations between France and Brazil for a commercial treaty have failed.

THE FAR-EASTERN CRISIS

January 9

Foreign marines are guarding the legations in Seoul as a precaution against possible disorders. English dispatches say that public opinion in Japan demands the rupture of negotiations and the opening of hostilities,

THE "WALLAROO" ACCIDENT.

There were only four killed and three wounded in the explosion on board the Wallaroo.

THE SITUATION.

January 10.

It is announced from Tokyo that Japan denies the approaching despatch of an expedition to Korea. This denial is regarded as indicating that the Russian note recognizes the preponderance of Japan in

The French cruiser Fascal is expected at Chemulpho.

CHINA TO OBSERVE NEUTRALITY.

Saigon, January 11.

It is announced from Peking that Prince Ching has informed the Japanese Minister that in the event of war between Russia and England has only the duty of giving moral assist-Japan, China will observe neutrality.

FEELING IN ST. PETERSBURG.

Saigon, January 12. The journals of St. Petersburg declare the impossibility of making the least concession to Japan about Manchuria.

In Russian official circles the hope of seeing peace preserved is maintained.

M. DELCASSE ON THE SITUATION. Saigon, January 13. M. Delcassé, Minister of Foreign Affairs,

has announced to the Council of Ministers that the situation in the Far East seems to be getting better.

P. & O. STEAMER "PALERMO" IN COLLISION.

(FROM OUR CORRESPONDENT.)

Kobe, January 14. The P. & O. steamer Palermo has been in collision at Woosung with a Mitsu Bishi coasting steamer. The Japanese vessel sustained the most damage, and will not be out of dock in less than four weeks. The Palermo's damage was slight and she proceeded to Kobe where she arrived yesterday.

[Note.—On enquiry at the local office we learn that no particulars of the collision have yet reached Yokohama.—Ed. J. M.]

(FROM THE "DEUTSCHE JAPAN-POST.") GERMAN OPINION.

Berlin, January 8.

The newspapers in Europe are reporting movements of Russians and Japanese in Korea. These movements will not constitute a casus belli as long as Russia does not attack with weapons Japan in South Korea or Japan Russia in Man-churia. But this seems not probable.

The Press in Germany is of the opinion that the Japanese will, in so far, gain a point, by having Korea divided between themselves and Russia. This is anticipated and approved of in Germany.

JAPAN'S NEW WARSHIPS.

Berlin, January 9. A fear is entertained in England that the former Argentine cruisers bought by Japan at Genoa and the Russian squadron coming from Bizerta (Algeria) may collide and a naval engagement ensue in the Mediterranean. This fear is unfounded. The cruisers are going with British crews and under the British flag via Suez to Eastern Asia, 'The Russian Mediterranean squadron, war not being declared, will not begin hostilities. The closing of the Suez Canal against Japanese vessels cannot be demanded by Russia, because in this case the Canal would have to be closed to Russian ships

JAPANESE OFFICERS ABROAD.

The Berlin representative of Japan denies the report that the Japanese officers sent to Germany have been recalled.

JAPAN AND KOREA.

In Berlin the idea is that Japan ought not to abandon the present time for occupying the great southern half of Korea, especially as such action would not trouble Russia in her enterprises.

INTERMEDIATION. Nothing is known in Berlin about an intended

Anglo-French intermediation.

THE SITUATION AS SEEN IN BERLIN.

Berlin, January 10. The English idea that in consequence of the Russian answer Japan must declare war is not agreed with in Berlin. The German Government is remonstrating against the propagation of reports in Tokyo that Japan's liberty of action is restricted by the attitude of Germany. There does not exist any German partisanship for Russia, much less any active support, and Russia has never requested such. Germany is less interhas never requested such. Germany is less interested in Korea than England or America and would willingly agree to territorial acquisition by

Japan in that country.

The London Daily Telegraph writes that ance to Japan, unless the territorial independence

of that country is menaced. This declaration seems superfluous, because Russia in no case has any purpose of cutting down the state or possessions of Japan; on the contrary she will give full play to Japan in a great part of Korea.

KRUPP GUNS. The Dutch Minister of War declared in the Chamber, that Krupp's guns are to be preferred to those of Ehrhardt.

DISGRACE OF AN ARCHBISHOP.

The Archbishop of Olmütz (Austrian province of Morovia), His Eminence Kohn, has had to undergo a disciplinary investigation. He is charged with dishonest administration of his office. He has resigned all rank and honours.

PRUSSIAN DIET.
The Prussian Diet (Landtag) will be opened on
January 16th (next Saturday) by Kaiser Wilhelm. RUSSIAN BUDGET.

The Russian Commercial Telegraphic Bureau in St. Petersburg reports: The regular budget of

Receipts Expenditures	Roubles. 1,980,004,493 1,966,458,251
Surplus The items of the extraordinar Receipts	13,636,242 y budget are :— 2,750,000
Plus from the amount of ready money in the Reichsrentei (Imperial Revenue Depart-	.,, 50,000
ment)	195.792,562

All extraordinary expenditures, save two millions, are set aside for railway construction. The whole Budget is balanced at 2,178,637,055 roubles.

· THE SITUATION.

Berlin, January 12.
The Japanese Ministers in Europe have declared that Japan during the time the negotiations are still pending, will respect the status quo in Korea. These assurances are universally acknowhorea. These assurances are universally acknow-ledged in Europe to be a proof of the correctness and discretion exercised by the Japanese diplo-mats. The French press also opposes unani-mously the bellicose reports in England and dwells on the peaceful intentions of all Powers concerned and the prudent tactics of Japan.

THE KAISER.

Kaiser Wilhelm has gone to Silesia, to take part in the wedding of Count Platen-Hallermund, and is going to visit at the same time Prince-bishop Kopp in Breslau.

(FROM THE " JUL SHIMPO,") RUSSIAN EXCITEMENT.

London, January 12.

Russia is extraordinarily excited over the fact that British seamen have been employed by Japan to navigate the warships Kasnga and Alisshin to the

WILD WITH ECZEMA

And Other Itching, Burning, Scaly Eruptions with Loss of Hair.

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Soap, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Cintiment freely, to aliay itching, irritation, and infiammation, and soothe and heat, and lastly take Cuticura Resolvent Pills, to cool and cleanse the blood. A single set in often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pinply humours, eczemas, rashes, irritations, and chafings, with loss in hair, when all else fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurement, as in pimples and ringworm; the awful suffering of infants and the snxiety of worn-out parents, as in milk crust, tetter, and salt rheum,—all demand a remedy of almost superhuman virtues to successfully cope with them. Such are the CUNCURA remedies, the purest, sweetest, most speedy and economical curatives for the skin, scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT for preserving, purifying, and beautifying the skin, for cleaning the scalp of crusts, scales, and dandruft, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby reshes and chafings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Coated) are a new, tasteless, brated liquid Cutricura Resolvent, as well as for all other blood purifiers and hamour cures. Pat up in screwcap pocket vials, containing to doose.

CUTTOURA RENEDERS are rold throughout the world. Australian Depot: R. Towns & Co., Sydney. British Depot: 27-28, Chartenbours St., Lesdon. Franch Depot: 5 Base de le Palz, Paris. PUTTER DEUG AED CREEK. CORF. Soil Proper, Bosion, U. S. A.

COLEMAN'S

WINCARNIS

A delicious beverage and tonic made from choice wines, Liebig's Extract of Meat, and Extract of Malt.

Over 6,000 Testimonials received from the Medical Profession of the United Kingdom.

WINCARNIS has an unrivalled reputation of over twenty years as the finest tonic and restorative in the world.

YOKOHAMA: SATURDAY, JANUARY 23RD, 1904.

SUMMARY OF NEWS.

Tokyo papers announce that diphtheria is now prevalent in the capital.

THE Emperer of China has decorated Viscount Nagaoka, Vice-President of the East Asiatic Nagaoka, Vice-P Literary Society.

THE Emperor of China has decorated Mr. Sakamoto and another police inspector of Kanagawa prefecture.

THE Kokumin announces that 3,600 tons of Cardiff coal was brought on Jan. 16th by a British steamer to Nagasaki.

It is officially stated that the U.S. squadron, under command of Rear Admiral Evans, left Guam on Jan. 13th for Manila.

A TELEGRAM from Yamagata reports that a gale prevailed on Jan. 16th in the district of Kawo. Six fishermen were drowned.

THE German steamer Batavia arrived at Nagasaki on Jan. 14th with 9,800 tons of coal from England, en route to Vladivostock.

Towyo papers state that the Bank of Japan sent at m point near Ishikawajima Shipbuilding Yard, of war, the term being for three months.

be about four tons.

... 85 The steamer Yokohama Maru arrived at Shimonoseki on Jan. 15th from Shanghai carrying Tls. 200,000, the interest on the Chinese indemnity.

> MR. KUBOTA SHUSUKE, father of the Minister of State for Education, died on January 19th at Toyooka, Tajima province. He had been ill for some weeks.

> THE Yokohama Agents of the State Fire Insurance Company and the Transatlantic Marine Insurance Company have decided to close their business in Japan.

> A MAN's dead body, was found on Jan. 14th in the canal at a point near Satowara street, Ushigome, Tokyo. He had been injured in the

> A convict escaped on Jan. 14th from Negishi jail. He was about to be removed to the Yoko-hama District Court where he has been found guilty of a charge of fraud

> M. YAMAUCHI (52) living at Matsuyama, Iyo province, murdered his wife on Jan. 16th and gave himself up to the police. No definite information was given as to the cause.

> It is stated by the *Jiji* that K. Yamakami, a clerk employed in the office of the Public Procurators in Aomori District Court, stole yen a50 belonging to the office and absconded.

> THE steamer Noto Maru collided on the morning of Jan. 15th with a junk off Nakao, Ishikawa prefecture, with the result that the latter was sunk. The crew were saved by the Noto Maru.

> AI KUWABARA (27), living at Nagoya, committed suicide on Jan. 12th on the railway, with her three infants. The cause is reported to be poverty, resulting from the death of her husband.

> THE Mitsui Bussan Kaisha has chartered five steamers from Norway and Germany for a term of six months. They will be employed between Hongkong, Shanghai and on the Chinese coast.

> THE net income of the Kyoto Railway Company during the last half-year was reported to be yen 94,380, and the dividend will be 1½ per cent. The general meeting will be held on Jan. 25th.

> A TELEGRAM from Toyama states that two habutae silk weavers were arrested on Ian. 14th on a charge of having used illegal means to add weight to their products. Their domiciles were

> THE interim dividend of the Teikoku Life Insurance Company, Tokyo, for the last half-year will be at the rate of 6 per cent. The net income of the same period is reported to be yen

and took away some articles.

thirty cases of convertible notes on Jan. 14th to Tokyo, passengers and cargo being saved. Tokyo Moji by train. The gross weight is reported to papers say the accident was caused by the vessel springing a leak.

[Vol. XLI.

S. Nozawa, a wealthy cotton weaver, living in the village of Ika, near Osaka, was arrested on January 19th on a charge of having forged several promissory notes valued at yen 16,000 in all.

THE Sapporo Beer Brewing Company is expected by Tokyo papers to pay an interim dividend for the last half-year of 15 per cent. The general meeting of the shareholders will be held on Feb. 10th at the branch factory in Tokyo.

Iro (22) a waiter employed at Clausen's Hotel, No 66, Yokohama, who stole yen 240 belonging to his employers and absconded on Jan. 8th, was arrested on the 15th in Tokyo. He was sub-sequently removed to the Yokohama District

THE P. and O. Company has followed the sale of the Austral, Carthage, and Iberia with that of the Massilia and Parramatta. The Massilia is to be broken up, and the Parramatta is to run on the Indian coast. All were formerly Austra-

According to the Spanish newspapers, a project according to the Spanish newspapers, a project is on foot for the marriage of King Alfonso to the daughter of his aunt, the Infanta Maria de la Paz. The Infanta is the wife of Prince Ludwig of Bavaria. Their daughter, Maria del Pilar, was born on March 13, 1891.

Owing to his mistreatment of soldiers on 1,520 counts and abuse of authority on 100 counts, a non-commissioned officer named Franzki, of the 85th Prussian Infantry, has been sentenced to five years' imprisonment and dishonorable discharge from the army by a court-martial at Rendsburg.

IT is reported by the Nichi Nichi that six British army officers are expected to have left London for Japan at the end of December. Their purpose is to study the Japanese language and to investigate military operations; they have no connection with the present situation.

S. OKABAYASHI, a merchant living at Kotobukicho, Yokohama, attempted to commit suicide on the evening of Jan. 16th by cutting his throat with a fish-knile. He was immediately removed to the Juzen Hospital. The cause is believed by the Kotobuki-cho police to be temporary in-sanity following on excessive drinking.

THE Asahi reports that the marriage of Prince Tsunehisa Kitashirakawa (the first son of the late Prince Yoshihisa Kitashirakawa) and Princess Masako Tsune (the sixth daughter of the Emperor) has been arranged. The Prince was born on September 26th, 1882 and the Princess in September, 1888. The wedding day is not fixed.

WE are officially informed that the local Branch We are officially informed that the local Branch of the Hongkong and Shanghai Banking Corporation has received a telegram from its Head Office, stating that, subject to audit, the Bank Dividend for the half year will be 30/- with a Bonus in addition to Dividend of 10/- per share. \$500,000 will be added to Reserve Fund and \$1,400,000 carried forward to next year.

The dwelling of a saké dealer, T. Miura, It is stated by the *Hii* that the representatives Tamachi, Hongo, Tokyo, was entered by a man of the Nippon, Teikoku and Tokyo Marine armed with a sword early on the morning of Jan. Insurance Companies held a conference on the night of Jan. 13th at Osaka and decided to effect was insurance are balls of the conference on the night of Jan. 13th at Osaka and decided to effect was insurance. night of Jan. 13th at Osaka and decided to effect war insurance on hulls of steamers, whereas insurance was beretofore imposed only on cargo. The Todan Steamship Company's steamer 3rd They also resolved to add 3rn 1.50 per 3rn 100 Todau Maru, plying on the line between Tokyo to the ordinary rate of premium for steamers and Idzu province, sank onthe night of Jan. 13th chartered by the Government as transports in case

by the Tokyo press that such and such a thing happened and such and such a thing happened and such and such a thing disposibilite list, though of course some the disposibilite list, though of course some statesmen in the Palace. We place little taith in any of these accounts. But, on the other hand, we are not in a position to dear. other hand, we are not in a position to deny them altogether. Thus it is likely enough that Marquis Ito addressed the assembly for nearly an hour on the topic of foreign affairs and that he adduced some instances of the cabinet's divergence from his views, attributing to such divergence some of the troubles now confronting the country. It is also likely enough that he ended by admitting the necessity of ignoring all such differences and facing the crisis with resolute unanimity, which declaration meant that the Elder Statesmen and the Ministers of the Crown are now absolutely united for the purposes of a strong policy. We can further credit the assertion that Marquis Yamagata made an almost equally long expose of the military situation, and that Counts Matsukata and Inouye spake on the topic of finance. But all these things might have been described without access to any source of special information. It is observable also that Tokyo journals now confirm what our readers already know or literally good authority, namely, that Japan's last reply to Russia was not of the nature of an ultimatum, but that it merely asked her to reconsider her position in view of the fact that something was due to the preservation of peace and the dictates of amity. For the rest, there is nothing to be said about the situation. We may now expect another interval of suspense, ornamented with optimist or pes-

There have been several intimations of late that the Japanese in the Liaotung Peninsula find themselves very insecure, the Russians having little regard for their persons and property, and the Chinese being not indisposed to follow suit. Apparently the Japanese in Port Arthur addressed a petition to Viceroy Alexies on the subject, for we learn from telegrams in the Asahi that on receipt of this petition the Viceroy summoned the representative of the petitioners and the Chief of Police to his presence, and gave to the latter explicit instructions that every possible precaution should be taken for the security of Japanese life and property. It may be that the petition had no reference to past occurrences but was directed solely to future contingencies. That seems likely enough, but we remain in doubt as the exact nature of the document is not stated.

simist rumours from European capitals.

A message from Chemulpo says that the S.S. Echigo Maru having unloaded the cargo she had taken for conveyance to Japanese ports and having suddenly departed for Moji, no little alarm was felt by the Japanese residents. Prices of necessaries immediately rose and there were other signs of perturbation. But it must be assumed that the case of the Bchigo Maru was exceptional, for we can not learn that there is any intention of suspending the services of Japanese steamships to Korea, Southern China or Formosa. The lines which are likely to be immediately Toyo Kisen Kaisha), the Bombay and the can neither keep faith nor offer any justifiabout Korea, Russia's method has been Australian. It appears to be contrary to cation of her failure to do so, her Sovereign's to reply by pointing to her own position in police instructions to permit any reference to fair words must be regarded as aggravating Manchuria; whenever Japan spoke about

January 16.

The public are beginning to be informed the suspension of the European and Ametric Tokyo press that such and such a rice. How the suspension of the European and Ametric Tokyo press that such and such a rice.

of the impending war are beginning to reach the Treasury. Among them the largest sum offered by an individual is 5,000 yen by Mr. Tonomura of Omi. The yen by Mr. 1000mura of Onli. The bill-brokers of Osaka give 5,000 yen. and the Rice Exchange of that city send 3,000. Mr. Tomita of Ise gives 1,000, and Mr. Takagi, President of the Kyoto Electric Railway Company, the same amount. Some swear-off tobacco and contribute the proceeds, one such contributor promising 25 yen per month. There are a great many names and among them we note two foreigners, one a Chinese resident of Kobe who gives 25 yen and the other a memberwhose transliterated name is not familiar to us-of the firm of Messrs. Shewan, Tomes & Co. It will be observed that Osaka, always smart and decided, takes the lead conspicuously. Tokyo does not add a single name to the 60 odd thus far advertised.

January 18.

There is no apparent change in the situation. The Asahi Shimbun publishes telegrams from St. Petersburg and London saying that Russia will agree to the open door in Manchuria and, while preserving for herself ample rights in connexion with her railway, will recognise all the treaty privileges acquired by other States. That would mean a pacific attitude which would vir-tually terminate the present crisis. But on enquiry in official quarters the Asahi is unable to obtain any confirmation of such a rumour. On the contrary, the story is said to be contrary to facts. Our contemporary therefore infers that these rumours are merely inaccurate Mr. Kurino, received on the 17th instant, conversions of some assurances given by Russia to the Washington Government with regard to the latter's new commercial convention with China. It is more than likely that Russia has taken some step with the object of inducing the United States to refrain from any immediately embarrassing course in Mannot the least sign of a conciliatory disposi-churia. Such a step would be the giving of tion. She is answering all Japan's proposals a solemn assurance that in any circumstances, the policy of Russia will be the open door and full recognition of all treaty rights.

The Tsar is said to have made very pacific declarations on the occasion of the Russian New Year's Levee on the 14th instant No object of inducing the world to believe that doubt is entertained by the world as to the Emperor of Russia's peaceful intentions. He gets full credit for the best possible impulses, and many Japanese probably still restrain her from striking until all her believe that His Majesty's excellent intentions will save the highly perilous situation now existing. But when we remember how little Russia has to do in order to preserve peace, it must be confessed that the Tsar's professions lose their serious sound. Russia has only to carry out the promises made by herself in the most explicit and unequivocal terms less than two years ago. No reason has ever been shown why she should not carry them out. If there be such a reason, its frank statement, and a renewal of the promises with an engagement to discharge them so soon as But when the answer came, it did not consuspended are the European, the American the reason is removed, would doubtless tain a concession or a conciliation worthy (alike of the Nippon Yusen Kaisha and the secure the preservation of peace. If Russia of the name. Whenever Japan has spoken (Tone Kisen Kaisha) the Pombou and the secure the preservation of peace.

the uses now likely to be made of the ships rather than ameliorating the situation, and thus released. The public must be content

A telegram from London to the Asahi and the fiji says that the Russian Government applied to Turkey for permission to send the Black-Sea Fleet through the Dardanelles en route for the Far East. Turkey, however, at the instance of Great Britain, refused to permit the passage. The telegram adds that in spite of this refusal four Russian line-of-battle ships and two cruisers are loading ammunition and stores at Sevastopol. Russia's Black-Sea fleet may be said to consist of 7 line-of-battle ship only, since all the other units of the Squadron would be virtually useless for the purpose of a campaign Already the ships in East-Asian waters. she has en route for Port Arthur will bring her naval strength in this part of the world to a point higher than the strength of Japan, and could she re-inforce her squadron with, say, four battle-ships from the Black Sea, the superiority would be marked. Reuterhastold us of the passage of the Dardanelles by two of her Volunteer steamers carrying troops. The Jiji Slampo thinks that these vessels were intended as pioneers, and that their unobstructed voyage was designed to pre-lude the application now said to have been refused-the application for the passage of the war ships.

January 19. Among Tokyo newspapers the only one that ventures to make any definite pronouncement about the situation to-day is the Chuo, which alleges that Mr. Kurino has telegraphed to Tokyo that the Russian Foreign Office shows no sign whatever of yielding to Japan's proposals. But there is no confirmation of this statement, nor do we see much reason to suppose that the Chuo alone would have come into possession of such news. The Yomiuri, however, makes a vague assertion that a long telegram from tained an analysis of the situation bearing out the Chuo's news, and an expression of opinion that Russia would merely manœuvre for the purpose of gaining more time.

The Jiji Shimpo, writing without reference to any telegrams, says that Russia shows not the least sign of a conciliatory disposiby crowding out troops and ships to the East. In fact, by her own procedure she has practically removed the question from the realm of diplomacy to that of arms. Meanwhile she preserves ostensibly a semblance of pacific purpose with the plain Japan is the peace-breaker. But the world's eyes are now fully opened, and Japan will be mad if she allow shadowy sentiment to enemy's preparations are completed.

It is noteworthy that the Kokumin takes almost the same line. Once again, it observes, peaceful intentions are attributed to Russia by reports coming from Berlin, from Paris and even from London. But Russia's idea of a peaceful settlement is to send to the Far East every ship and every soldier she can muster. On the eve of her long-delayed answer last month, Count Lamsdorff spoke openly of the conciliations and concessions his Government was about to make to Japan.

moment. It is only great minds that can second reply, made on the 13th of Decemits sheath. For Russia has some respect frankly withdraw from an untenable position, ber, recapitulated her original proposals for the opinion of the nations. The know-Russia has not such a mind. She will shilly-

by the present crisis, the Kobe Chamber of step taken by M. Delcassé is sincere, and gained it had she not proved her patience by the present crisis, the Robe Chamber of step taken by M. Delcassé is sincere, and gained it had she not proved her patience Commerce has compiled figures showing the has nothing to do with any simulation or and moderation in the most signal manner; state of commerce with North China and dissimulation planned by Russia. It is on and it must be remembered that to complete Korea during the last four months of 1903, France that the best hopes of a peaceful issue such a demonstration is a hard task for an as compared with the last four months of 1902. as compared with the last four months of 1902. Trest. Russia will listen to France where she the judges. These figures are published by the Chuo Shimbun. From them we learn that though exports If M. Delcassé be really and earnestly as to the time when Russia's answer may to North China from Kobe declined by 2.6 moving, we consider that a very strong ray be expected, certain Tokyo journals take per cent, only during the period September to December, 1903, compared with the cor-responding period of the previous year, imports showed a decrease of 16.4 per cent.; while in the case of the trade with Korea, a growth of 16 per cent, between January and July of 1903, was converted into a decrease of 23 per cent, between October and December. These figures become still more striking when it is observed that the total bulk of the country's foreign trade grew from 300 millions of yes in 1897 to 500 millions in 1902 and to 600 millions in 1903. There is every reason to suppose that, under normal conditions, the North-China and Korean sections would have shared the general ex-pansion, and from that point of view their marked decrease is doubly significant.

The Asaki feels confident that Great Britain will never be a consenting party to the passage of the Dardanelles by Russia's Black-Sea Fleet, and that Japan need not be concerned on that account. As to Russia's recent declarations about respecting the treaty rights of the Powers in Manchuria, the Asahi wants to know whether any moonshine for her to talk of not interfering exercise of Chinese sovereignty. Only one plain step has to be taken by Russia. She has to discharge her own solemn promise by putting an end to the armed occupation of the Three Provinces; restoring them to the condition existing prior to her seizure of them. The world is utterly weary of her protestations of good intentions and her never-kept pledges. Such things scarcely evoke a smile from the Japanese.

The Department of Communications has taken steps to organize a field service or posts and telegraphs which will be in complete working order should the troops be required to take the field. This step has provided employment for several of the offi-cials who were placed on the retired list in connexion with recent administrative reforms,

January 20 The Jiji Shimpo insists that the public must not be deceived by the pacific reports coming from Europe. Such rumours are circulated, our contemporary thinks, purely in Russian interests. Russia's first answer to Japan's proposals, the answer handed in tain the slightest substantial concession, though it was heralded by announcements of most amicable purpose. Japan's reply, made on the 21st of December, So far as can be seen, the sympathy of the

rest. of light has been shed upon the situation.

A telegram from Nagasaki says that Viceroy Alexieff has issued a most emphatic bable gist, did actually reach Tokyo on the proclamation. His Excellency swears by 19th instant. But the Nichi Nichi points the hopes he has of being mercifully judged by heaven that if any one under his juris- to St. Petersburg until the 14th or even the diction lays so much as a finger violently on 15th, since, though handed in to the Russian any Japanese subject in Manchuria, he, the Legation on the afternoon of the 13th, it had Vicercy, will at once have recourse to to be translated first into French and then uncompromising measures of punishment, into cipher. Hence the Tsar probably did

It is stated that depositors in both of leisurely proceeding. these banks in Peking are withdrawing their deposits and placing them with the Weifeng Bank. It is probable that in the event of war between Japan and Russia no instituone is now likely to be deceived by these tion would be more inconvenienced than the hollow pretences. So long as Russia retains Russo-Chinese Bank. The Yokohama Specie tion would be more inconvenienced than the armed possession of Manchuria, it is pure Bank would have to greatly restrict the area of its private operations. Indeed it has with the enjoyment of any rights granted already begun to do so. But, on the other by China to foreigners in Manchuria in the hand, the functions falling to it on Government account would amply repay any loss under that heading. Perhaps the same is true of the Russo-Chinese Bank in a degree.

> Leading English journals are reported by the telegraph (*Jiji Shimpo*) as casting doubts on the sincerity of Russia's pacific avowals, which they regard as mere pretexts for gaining time to complete preparations. The Times pertinently remarks that if St. Petersburg have any genuine desire for peace, the simple and obvious course is to accede to Japan's moderate and just demands.

The Jiji Shimpo continues its bitter com-plaints about the obscurity in which all matters connected with the complication are enveloped so far as the Japanese nation is concerned. All the dates of the various conferences and communications are marshalled by our contemporary, and it must be confessed that they make a remarkable showing. However, as to the matter of the Japanese Government's patience and as to the criticisms that the favourable opportunity has been lost by Japan, we suggest that throughout all this long period of waiton the 12th of December, did not conling Japanese statesmen have been manufac-

Manchuria, Russia retorted by proposing did not depart in any way from her nations is with Japan to-day, and though it the partition of Korea. The Japanese original proposition. Russia's second answer may justly be urged that sentiment counts for public must not be for one instant decived by any renewal of professions on her part. The arrow is laid in the notch her part. The arrow is laid in the notch and must be drawn unflinchingly at the right Russia has not such a mind. She will shilly—shally and discuss petty points, but neither any that place confidence in the rumours mity she will alienate the world's goodwill by deed nor by word does she deal with the mow arriving will probably be deceived.

Council to consider it can not have been It represents precisely the attitude which we opened before the 18th. All this is true should have expected the Viceroy to assume enough, but we deem it scarcely credible But it has not re-assured the Japanese that the gist of the note was not telegraphapparently. Some 90 of them have fled to ed to the Russian capital from Tokyo on Nagasaki from Dalny, where they are said the evening of the 13th. To wait until the to have suffered severely, and others are translation into French and cipher had been effected before sending any information to St. Petersburg would have been a very

> Meanwhile news has been received in apparently trustworthy quarters that the Emperor of Russia has banished M. Bezobrazoff and the Grand Duke Alexander from St. Peters-burg and that both have left Russia. These two officials were the very pith and marrow of the war party in Russia. It may be remembered that on the 5th of this month news reached Tokyo to the effect that the pacific views of Count Lamsdorff and General Kuropatkin were constantly overshadow-ed by those of Bezobrazoff and Alexander and that, in consequence, Russia's rejoinder to Japan was expected to be unfavourable, as it certainly proved. The disgrace of the Grand Duke and the Private Secretary at this juncture would be very significant. inference would be that these men had misrepresented Japan as not having any heart to fight and had therefore counselled an uncompromising attitude, which has been found unsuited to actual events. Undoubtedly the Tsar himself is for peace if it can be obtained without loss of prestige. As to that, too, some people may be disposed to think that Russia's prestige is in more danger from failure to keep her promises than from any concessions she makes to Japan.

> The Asahi Shimbun has a telegram from London to the effect that the Tsar's pacific utterances to the Japanese Representative at the New Year's levée on the 14th instant had a strong effect in Russian official circles, and that in London the crisis is now also believed to have passed.

We have no stirring news this morning about movements of Russian Legation staff. parture for Nagasaki by the express train parently the reports are trustworthy. on Monday morning, whereas on Tuesday he was going about his business as usual in

January 22. The fiji Shimpo has a telegram from

Vladivostock, dated the 19th instant, 7 p.m., saying that in official circles there it has suddenly come to be stated that Russia will make whatever concessions are necessary to

Japanese, who are fighting for the assertion of Anglo-Saxon ideals in Asia against the establishment of a military despotism.

In the Chuo we find an extraordinary estimate that Japan's outlays in the event of war with Russia would amount to eighteen hundred millions of yen; that is to say, six hundred millions per annum for three That strikes us as a truly ab-recast. The war of 1894-5 cost surd forecast. 200 millions in all and involved some outlays which would not now be needed. On what conceivable account would such immense sums have to be disbursed? Our contemporary appears to think that the affair would be as costly as the South-African war.

It is not expected that Russia's answer can come before the 23rd or 24th.

The Jiji Shimpo again insists that the Emperor of Russia, when he made his pacital, though the ultimate fic statement at the New Year's levce on presence is not quite clear. the 14th instant, did not know the nature of Japan's reply, which had been handed to the Russian Legation on the afternoon of

January 21.

The Rusthe Korean capital.

January 16. There has been some talk of administra-tive reforms in Seoul on account of the present crisis. Apparently the idea is to effect economies such as shall place some funds at the disposal of the Government. But if there was any real disposition to mend matters it appears to have received English people sympathise heartily with the Japanese, who are fighting for the assertion gested to the Emperor that the Con-struction Bureau be abolished, but His Majesty took the suggestion in very bad part, regarding it as an attempt to interfere with the free exercise of the Imperial pre-Li Keun-myong therefore fell into rogative. the state of deferential alarm appropriate in such circumstances, and retired to pen his resignation.

January 18. The United States Government has sent another detachment of marines to Seoul. There is some uncertainty about the num-ber, but it is certainly in the neighbourhood of sixty, and it thus brings the total American force to about a hundred. It is as well that these guards, and those of the other Powers, should be in the Korean capital, though the ultimate necessity of their

It is stated that the American section of Korean politicians has been much strengthened by these evidences of resolute prothe Russian Legation on the atternoon of the death of the United States, and the 13th. We can only repeat that, concedure on the part of the United States, and sidering the difference of longitude of the that there are schemes of administrative and that there are schemes of administrative and the total states of the schemes of the sch cedure on the part of the United States, and least the gist of Japan's reply.

The Jinunin dwells upon the fact that the between Russia and Japan. The Koreans speed of a naval squadron manœuvering can not possibly have any better friends for fighting purposes is the speed of the than the Americans, and if this friendship slowest unit. On that basis the speed took the form of prompting genuine reforms, slowest unit the of bette doi: remeden is it would not perhaps be too late to invest mainly upon America in the event of war between Russia and Japan. The Koreans of the Russian line-of-battle-ship squadron in it would not perhaps be too late to invest the 16th instant.

Eastern waters would be 16.3 knots at best, the Korean empire with some attributes of A letter from and the speed of the armoured-cruiser permanency. But truly it appears to us that squadron would be 17 knots. In this the impulses of Korean statesmanship merit respect the Japanese ships would have a little confidence; they vary with the apparition of a score of soldiers.

There is some unfounded talk in Tokyo journals about the Japanese Government's kind of insurrection has broken out at invertebrate attitude. The cry is for information, and greed for that commodity betrays it has involved an attack upon Japanese Government's it has involved an attack upon Japanese for that commodity betrays it has involved an attack upon Japanese our contemporaries into some indiscretions.

M. Pavlow says that protests of this nature have been frequently made by him and that the Korean Government would be wise if it attended to the matter vigorously and promptly.

Our readers will remember that there has recently been talk of a sharp conflict for official power in Seoul between Li Keunthaik, rightly or wrongly supposed to head the pro-Russian party, and Li Yong-ik, a statesman of doubtful proclivities. The latter appears to have gone under in the fight, for a telegram from Seoul says that he has resigned his post of Minister of Finance, and has been succeeded by Chhim Sang-

The telegraph recently informed us that the French frigate Pascal had been ordered to Chemulpo. She arrived there on the 15th instant, apparently, and on the following day she landed a party of 35 marines under two officers, who immediately proceeded to Seoul to serve as legation guards.

January 19. There are nine ships of war now Chemulpo, namely, 2 Russian, 2 English, and 2 Italian, and one each of the Chinese French and German squadrons. The Asahi's correspondent says that the Englishmen are showing great sympathy with the Japanese, and are keeping them informed of all the movements of the Russians.

It is now stated that the rioters in the south of Korea do not exceed twenty, and that only two Japanese have suffered at their hands. In fact rumour has been at its usual work of exaggeration. On the other hand news comes from Pyong-yang that the Toughaks in that region show signs of ininsurrection and that Korean troops are numbered among the insurgents.

A detachment of French marines, numbering 39 with two officers, entered Seoul on

A letter from Wiju dated the 22nd of December is published by a Tokyo news agency. It says that the Koreans and Chinese in that region are quite convinced that their fate is to become Russian subjects

Later news says that these Chhon-an chhyong, Chholla and Kyong-san are said rioters do not in any sense represent a polito be developing strength. Apparently the tical movement. They are made up of military fugitives from Seoul—of whom there that the Nisshin lest Perim on the 20th and mere loafers, some 300 or 400 of whom are said to be some 2000—have joined the formed a band and robbed the local offices rioters, who thus find themselves formidable of a considerable sum of money. A detachin the possession of arms. Vigorous mea-ment of 15 Korean soldiers were sent against sures have been inaugurated to crush the

It appears that Germany has not yet landed any troops for the protection of her Seoul Legation. The Hertha, however, arrived at Chemulpo on the 16th instant, and probably she will soon contribute a party of marines to the foreign detachments now in

Several Tokyo newspapers publish a state-ment, that whereas Japan, England and America were a unit in pressing for the opening of Yong Am-pho, the United States Representative has now changed his attitude and is attaching more importance to Wiju. On the other hand, the Korean Government would gladly shelve the Yong-Ampho question by the opening of Wiju, their idea being that such a course would placate both Russia and Japan. The British and Japanese Representatives, however, are not disposed for a moment to endorse such a compromise. We may add that this story a compromise. is accompanied by a suggestion that the American clique in Seoul has become sympathetic with the Russian; a conjuncture which we take leave to doubt

It would appear that the entry of French troops into Seoul, as reported in our last issue, was not preceded by any communication from the French Representative to the Korean Government, and the latter has consequently lodged a protest. Such, at any rate, is the rumour.

January 22.

The disturbances in southern Korea seem be gathering force. They had their to be gathering force. origin in nothing more serious than indignation about the excesses of tax collectors, but the petty numbers of the rioters having received accessions of strength in the shape of deserting soldiers and malcontents in general, the affair is said to be now rather formidable. A runnour is current that good

carried home by one Hyon, chief interpreter to the Chamberlains' Bureau, who has just returned from a tour through Russia and France. Hyon is said to have been immensely impressed with what he saw of Russia's military might. He has informed his Sovereign that Japan has not the smallest chance of succeeding in a contest with the Great Northern Power, and that the latter's forces now actually in East Asia or on their way thither must aggregate many tens of thousands. Only, therefore, by placing herself under Russia's wing can the forlorn little Korean chicken hope to find safety. Li Yong-ik, the statesman of doubtful complexion, is said to have endorsed this advice by reminding the Emperor that he too had tendered similar counsels before the issue of Hyon's travels was known, and the distracted monarch appears to have rejoiced at this prospect of terra firma for his wavering proclivities. His Majesty has directed that further inspection be made of Russia's forces. Fate has apparently decided that he shall kiss the rod.

The Korean Government's protest against French marines into Seoul is said to have been accompanied by a demand for their withdrawal. But the French Representative been already furnished with guards before the coming of his nationals, the only feature inviting criticism, as he thought, was the There the matter will probably end. The French official was undoubtedly guilty of an oversight, but from another point of view he

You-Keun, who now lies in a Japanonly instrument carried by Li Pyon-u seems to be a purse of two thousand yen. We should be glad if he possessed some more cogent arguments, for if U was truly the Queen's assassin Ko's act scarcely deserves the halter.

The Korean Government is about to organise a Red Cross Society in Seoul. Li Yong-ik appears to be an active promoter

of this project.

Accounts vary as to the disposition of orean officialdon. The Hochi's corres-Korean officialdoni. pondent wires that everything is quiet and that the people place their reliance on Japan. The Chuo's correspondent alleges that in pretending to trust Japan they are merely obeying the sinister suggestions of M. Pavlow, who counsels simulation of trust with an underlying resolve to turn to Russia at the moment of crisis. We apprehend that the Chuo's correspondent is in some danger of cutting himself.

CHINA.

January 16.
There are two accounts of China's intentions. One represents her as having deter-mined to maintain strict neutrality, the other says that, in accordance with American and English counsels, it will be benevolent formidable. A rumour is current that some neutrality. Benevolent it certainly ought Japanese subjects are assisting the rioters, but that story must be regarded with much if she fights, will be fighting on behalf of doubt. At all events the central Govern-China's independence and integrity. At all ment is taking steps to send a force to events the telegraph alleges that there restore order.

Some excitement seems to have been caused in Seoul on account of the reports announcement that her final note had been presented to Russia, and that the meeting decided to entrust to Viceroy Yuan the duty of guarding the metropolitan province and the northern regions in general, to summon from the South China's three serviceable war-ships, and direct the Yangtse Viceroys to adopt such precautions as shall prevent Shanghai from being used as a Russian basis. This last order will be very difficult to carry out. There will be, in the event of war, a great many operations at Shanghai which could not be reconciled with any theory of strict neutrality, still less of neutrality benevolent to Japan.

The leading Japanese journals are all agreed that, strange as an attitude of neutrality on China's party may appear at this juncture, it is the only course permitted by her condition. Japan asks nothing else. His Among these journals the Nichi Nichi Shim-ction bun notes that all the Powers have now virtually declared their intention to preserve strict neutrality, and that the inconvenience thus caused to Russia will be very great. the unannounced and unsanctioned entry of Japan can obtain all the supplies she needs without any difficulty. She has them at home within easy reach of the scene of operations. But Russia will have to carry everything an replied that all the other Legations having immense distance. Fuel and food alike been already furnished with guards before the will be unprocurable for her wants. Our regards the situation as most dispiriting for

January 18.

One result of this crisis appears to be the one result of this crisis appears to be the merely failed to act a part in a farce.

A Korean subject, Li Pyon-u, formerly a student of law in Japan, seems to have royalty in the Yangtse Valley. A telegram really left Seoul on the 19th instant for the to the Asahi Shimbun says that in view of

purpose of endeavouring to secure the the urgent necessity of maintaining peace extradition of U Pon-son's murderer, Ko and good order throughout that region, the Yon-Keun, who now lies in a Japan-Court has deemed it expedient to restore Chang to his former post, where he rendered such invaluable service during the Boxer troubles. This step will be welcomed by foreigners of every nationality. Meanwhile Viceroy Yuan, in conformity with instruc-tions from the Throne, has made arrangements for General Ma to move all available troops towards China's north-eastern frontier, with the object of asserting and maintaining neutrality in that region. But we are not told what is understood by the north-eastern frontier. Is it the frontier bounding the Three Eastern provinces, or is it the Liao River? If the former, then China tacitly admits that the effective administration of the whole of Manchuria is in Russia's hands. If the latter, then troubles with Russia are not unlikely to ensue.

> The Jiji Shimpo and the Asahi both publish telegrams to the effect that the Russian troops in Peking and Tientsin were to be withdrawn to Port Arthur on the 17th instant, with the exception of 20 men who are to remain in Peking. There is some uncertainty about the numbers of these detachments. One authority puts them at 80 men in Tientsin and 2 companies in Peking; another suggests smaller forces. The fact, however, is important not the dimensions. The withdrawal of these detachments would seem to imply that Viceroy Alexieff, at all events, has virtually abandoned all hope of peace.

January 19. Russia seems to have now withdrawn practically the whole of her detachments from Peking, Tientsin and Chingwan-tao. At the last named place she had some 300 men of all ranks. The three detachments

have gone to Liaotung.

A telegram from Chefoo conveys the incredible news that numbers of Russian soldiers and officers are making their escape to that place, their complaint being that they were not engaged for war purposes. That may be the case with some persons of feesion actionality serving in the Russian foreign nationality serving in the Russian ranks, but from any other point of view the story is absurd.

A telegram to the Asahi Shimbun says that a Chinese Company has been formed for the purpose of constructing mailway from Szchuan to Hankow. The Company is to have a capital of 50 million taels, 10 millions of which will be subscribed by the projec-tors, to millions will be put up by the in-habitants of Szchuan, and the remainder will be raised throughout China. The length of the line is something over a thousand miles, and the programme is to pay a of the net earnings to the Government and to hand over the road to the State, free of cost, at the end of 45 years. Our contemporary's correspondent, in sending this information, adds that a British syndicate has been trying to obtain a concession for the line, but that the Chinese Government naturally shrinks from repeating the experiences it has garnered in connexion with railway concessions to foreign syndicates within its borders. It Tokyo contemporary thinks that it is here will therefore gladly accede to the proposishe will first feel the pinch. Indeed it tion of the Szchuan Company if the latter can be shown to have any back-bone. The Szchuan projectors are said to have taken advantage of the anti-foreign prejudice by declaring in their application that they intend carefully to avoid all use of foreign capital.

respondent says that Viceroy Yuan has now under his immediate command 36,000 men, and that to this fact is to be attributed much of his influence at Court. The force has its head-quarters at Paoting, where there are some 11,500 men. In Peking there are 3,000, including 1,000 palace guards, who have been recently raised. Tientsin has only 2,000 of the force and the remainder are stationed at various places throughout Chili. It will be remembered that Viceroy Li Hung-chang, in the days of his greatest power, was supposed to have an army mf 37,000 under his command. There is an interesting similarity of numbers.

January 20. Russia has in contemplation two railways. One would start from Sim-min-ting on the Liao River to Mukden and thence to An-tung another from Peking to Chan-kia-kow. The latter would open up the approaches to Peking from the north-west; the former would bring the far-east of Manchuria and practically the Korean frontier into direct communication with the Manchurian system of lines Some time ago Russia asked China's permis sion to build these lines. China has now definitely refused. Two things strike us as remarkable in connexion with this. The first is that Russia should entertain any idea of success in making such an application. Russia it is that has demonstrated to China in the most unequivocal manner the danger of granting railway concessions to foreign Powers. The proof is about as complete as proof can be. The Peking Government, even though it possessed only a moiety of the shrewdness it really has, must know beyond all peradventure that railways in the hands of a Power like Russia are simply and purely instruments of aggression. China has just shown her appreciation of this object-lesson by refusing an English syndicate's application for a Szchuan-Hankow line. Surely it is merely courting a similar refusal when Russia seeks further railway concessions in Manchuria, and when she proposes, in effect, to repeat from the direction of Mongolia and Ili the drama she is now acting on the north-eastern frontier? The second curious feature of the business is that she should ask of the business is that she should the China's leave at all in the case of the China's Simminting-Mukden-Antung road. Every mile of the line lies in Manchuria. It would be, in effect, an arc line traversing Manchuria from west to east just as the Mukden-Dalny line cuts it from north to south. Russia's actual position in Manchuria, her military tenure of the whole region, invests such an application with an element of comedy. Why should she make pretence of seeking China's permission? Apparently she still entertains some notion that China's sovereignty in the Three Provinces it not wholly a thing of the past.

January 21. A sum of ten million taels has been devoted by the Chinese Government to meet outlays on account of the new military organ-Two millions of the amount are to be disbursed from the Treasury, but nothing is said about the provenance of the other eight millions. It will be remembered that there was some talk recently of calling upon the provincial authorities to find the money, but that the project met with vehement opposition from certain high officials who insisted that the provinces were already burdened to the limit of their capacity on account of the Indemnity taxes.

Mukden and Harbin. not but amount to a large figure.

A l'elgian missionary who has just come stated that General Tung Fuh-hsiang died they regard war as inevitable. The Jiji Shimpo, at Chen-chi in the middle of December. If this be true, one source of periodical sensa-

tions is removed. A telegram from Chefoo says that a committee of examination appointed by Viceroy Alexieff has reported in the sense that fully one half of the military stores and provisions at Port Arthur are in an unserviceable condition. The Viceroy has consequently made sweeping changes in the personnel of the intendance. This story, coming in the sequel of a recent rumour that much of the flour in stock at Port Arthur had been lying unchanged for five years, seems to warrant a belief that everything is not as it should be; but as for the statement that one-half of the stores are unserviceable, it may be regarded as a great exaggeration.

January 22.

It is reported that Manchurian bandits have begun to raid the districts near Kinchow; that is to say, the district northward of Shanhaikwan and westward of the Liao River. General Ma has received orders from the Peking Government to take steps for the repression of the raiders. This would place his troops on the right flank of a Russian army marshalled for the defence of Manchuria against invasion from the south, which is exactly the position that Ma would take if he desired to become an inconvenient menace to the Russians. However, we have little faith in the theory sometimes advanced that the bandits and such disturbers of the peace can be made to order whenever their existence would further the aims of Doubtless these Kinchow high policy. freebooters are merely a repetition of incidents which used to be common as Vallambrossa leaves in the days prior to Russia's presence in the Three Provinces.

This distinguished Chinaman, formerly a member of the Legislative Council in Hongkong, possessor of an English law diploma and for several years a prominent figure in Washington private and official circles, has been appointed to a post in the Wai-wu-pu. What post it is we do not yet know, but the appointment is attributed to a memorial relating to the Manchurian question. Five suggestions are said to have been submitted by Mr. Wu to the Throne, and they all found approval. The raising of men like Wu Ting fang to places of power and in-fluence in China is probably her sole hope of salvation.

It would seem that some lingering doubts still troubled China as to the possibility or propriety of remaining neutral when the integrity of her own empire was an object of warlike action between two foreign Powers, for only now at the direct instance of Sir Ernest Satow, Mr. Conger and Mr. Uchida, has she definitely decided to maintain neutrality in the event of a Russo-Japanese war. It is said that the three Representatives fully demonstrated to Prince Ching that the balance of advantage for China lay in keeping out of the fighting arena.

THE JAPANESE PRESS.

We observe a change in the general tone account of the Indemnity taxes.

The Japanese seem to be all leaving journals have devoted themselves chiefly Newchwang, Liaoyang, Port Arthur, Dalny, to advocating strong insistence on Japan's

Whatever be the just demands and the maintenance of a issue of the present complication, the losses resolute attitude by the Government, as well is will have inflicted on the Japanese can not but amount to a large figure. tion of theirs seems to indicate plainly that never before undertaken, a conflict with one of the greatest of European Powers, no expense should be shrunk from, no effort spared, to make the fullest preparation. If the outlook be a war lasting one year, precautions should be taken to provide for two years; if an army of two hundred thousand men be deemed sufficient steps should be adopted on the scale of three hundred thousand. It may be argued that a peaceful ending is not yet impossible; that Russia may still make in the interests of tranquillity such concessions as will save the situation.
That is earnestly to be desired. But if she be so advised, it will be easy for Japan to recoup the outlays made on account of preparations, whereas incalculable loss may result from any parsimony at this stage.

In this context it is interesting to note Japan's financial condition at the outset of the war of 1894-5, and to compare it with her condition to-day. In 1894, she had an accumulation of revenue surpluses amounting to 26 million yen; the voluntary contributions made by the people totalled 160,300 yen, and the gifts in aid were 2,788,741 yen. To these totals the Treasury added 116,800,000 yen raised by floating bonds, yen. and the remainder of the 200 million yen spent on the | months' war was taken from the Chinese Indemnity. But the country's financial rank to-day is very different from what it was ten years age. The total revenue of the State in 1894 was 84% million yen, whereas in 1903 it was 282% millions; the foreign trade in 1894 aggregated 180 millions, whereas in 1902 it was 600 millions, in round numbers. The time has millions, in round numbers. now come when the nation must be prepared to put up all, or at any rate a great pared to put up all, or at any late part, of the money accumulated during the past ten years. That is the only spirit past ten years. War past ten years. That is the only spine wherewith to meet the situation. War bonds, should they be issued, must be subscribed at any sacrifice. But, at the same time trade and industry should be pursued with redoubled vigour.

Meanwhile the Minister of State for Finance has been busying himself to confer with the leading financiers of Tokyo and Osaka, explaining to them the situation and urging their cooperation. The Shogyo Shimpo criticises these measures on the ground that the proper line would have been to summon the bankers and financiers in open conclave and repose in them some frank confidence as to the facts of the situation. On the other hand, our contemporary is altogether unhesitating in its avowal that the Minister's appeal should meet with the warmest pos-It makes, however, sible response. shrewd comment that the extraordinary reluctance shown by bankers to grant ac-commodation during the past few months, though it has resulted in a great accumulation of funds which will be most useful, has had the collateral effect of impairing the wealth-earning capacity of the nation. That is an extremely unwise policy. If large expenditures have to be faced, it is obviously advisable that the sources of supply should be refreshed as much as possible.

BANQUET IN TOKYO

On the evening of the 15th instant the leading business men of Tokyo and Yokohama, to the number of about seventy, entertained the naval and military Attachés of the United States and the British Legations, several Japanese naval and military officers, and the correspondents in Japan of European and American journals. Scarcely one of the pro-minent figures in the world of Japanese affairs was absent; presidents of railways, presidents of steamship companies, presidents of banks, directors of commercial and industrial companies, all being among the hosts. The banquet took place in the upper rooms of the celebrated restaurant, Kamesei, near Ryogoku Bridge, and was in pure Japanese style, except that the perennial sake-cup was supplemented by the champague glass. The two second-storey rooms of the Kame-sei make a salon of a hundred mats when thrown into one, that is to say, a chamber 30 feet wide by 120 long. Thus although the hosts and guests totalled over eighty, the accommodation was not only ample for dining purposes, but also sufficed for the appropriation of a fourth part of the space to histrionic purposes. Mr. Fukuzawa, proprietor of the fiji Shimpo, and Mr. Zumoto, editor of the fapan Times, were conspicuous in welcoming the guests, as they had been instrumental in making all the admirable arrangements for the celebration. Colonel Shiba, of Peking fame, sat in one of the places of honour, and the foreigners present were Captain Troubridge, R.N.; Colonel Hume, R.A.; Lt.-Com. Marsh, U.S.N.; Major Wood, U.S.A; Mr. Egan representative of the Associated Press of the United States; Mr Bennet Burleigh, correspondent of the Daily Telegraph; Mr. Kirby, correspondent of the Standard; Mr. Harrison, correspondent of the I.ondon Daily Mail; Mr. Knapp, correspondent of the Boston Transcript; and Captain Brinkley, correspondent of The Times. Shortly after all had taken their seats and the first course had been served, a curtain suspended at one end of the long room rose and displayed a girl dressed in Samurai costume. she held a sheathed sword upright in one hand, the point downward, and seemed to be pensively considering some necessity for action. To her came prancing from the wing another girl disguised with the hide and head of the King of Beasts, and after some pas-seul pantomine by this new arrival, there emerged upon the stage new arrival, there emerged upon the stage a third lassie in the conventional habiliments of Brother Jonathan-striped trousers eked out with straps, a starry waistcoat, a spangled coat, an immense white beaver hat and a colossal collar. She too went through some exhilarating pacings and significant gestures for the benefit of the thoughtful samurai, but when he would have risen in response to these invitations, he was con-jointly restrained by the Lion and Jonathan until the former had placed a ship and a rifle at the samurai's side, and the latter had presented him with bags of flour and the struggle. There is another thing on which we place much fortified samurai sprang up, drew his sword and wielded it victoriously, with of course a sequel of much hand-shaking and congratulatory gesture, the while a chorus of samisen-players and vocalists, ranged among drapery of the three flags, Japanese, American and English, chanted among drapery of the three flags, Japanese, American and English, chantwhich we refrain from publishing lest its jets cause unintered. American and English, chant-humorus semi-martial libretto, which we refrain from publishing lest its jets cause unintered. jests cause unintended offence. Needless to

changed and some semblance of order of his official capacity and the impulses of restored, Mr. Sonoda Kokichi, President of his private friendship. How well he acquitthe Nobles Bank, rose and spoke as follows, every word obviously coming from his heart and almost every sentence being vociferously cheered :-

cheered:—
CAPTAIN TROUBRINGS AND GENTLEMEN,—Webusiness men and financiers of Tokio and Vokohama are met here to-night to pay our respects the to honorable and gallant members of the British and American Legations and also to the distinguished representatives and correspondents of the press now assembled in Tokyo. It is highly gratifying to us to find all our honoured guests present, and we consider it a special favour that notwithstanding this time of unusual pressure, our own naval and military officers of distinction should have accepted our invitations and attended this banquet. Gentlemen, unfortunately things look very gloomy and it is an anxious moment for us, but that ought not to prevent us from drinking each others healths, and from cementing our mutual friendship.

The present situation reminds me of that well-

ment for us, but that ought not to prevent us from drinking each others healths, and from cementing our mutual friendship.

The present situation reminds me of that well-known popular soug which I heard simg in England some 30 years ago. It runs in this way:—We don't want to fight, but by jingo if we do, we've got the men, we've got the ships, we've got the money too.' Now let me examine in a few words how far this song corresponds with our present case. In the first place, curiously enough, we are exactly in the same position as Britishers were, because we ourselves don't want to fight at all. We are peace-lovers. If we did want to fight we would have started long ago. There were many occasions; there were many pretexts. Gentlemen, we Japanese are sometimes called a warlike and bloodthirsty nation. It is utterly untrue. I emphalically deny it. I don't think we are quite so barbarous and cannibal-like. It is true that we fought twice within the past 10 years, but that was solely for the cause of humanity; for the cause of civilization; for the cause of a permanent peace in the Far East, and for the cause of the benefit of mankind at large. If we have to fight again it will be simply for the putpose of self-defence. When the very existence of our Empire is threatened as it is now, and when it is a question of life or death for us, what else can we do but to take up arms and defend ourselves? Such being the present situation, if a war unfortunately breaks out we must decline to take its responsibility upon our own shoulders. It is only just that responsibility should rest upon one who constantly threatens us and who constantly endeavours to disturb the peace of the East, and I trust and believe that on this point the whole Civilized World will pronounce judgment in out favour. Now as to men. We have not only got them but they are pretty well disciplined and are always ready to stand and die in defence of their dear country.

How about ships? We have got them too. They are not very numerous but I believe they are The present situation reminds me of that well-

Captain Troubridge had then to perform say this performance elicited loud applause, the difficult task of replying in such a man-miral Count Kawamura as having memoriawhereafter, loving cups having been ex- ner as to do justice at once to the dictates lized the Throne, and all agree that Count

ted himself will be seen from his speech:

Mr. SONODA & GENTLEMEN,—I rise on behalf of my colleagues and on my own behalf to return you our best thanks for the kind words of welcome which you, Mr. Sonoda, have spoken, and which you, Gentlemen, have so very cordially received. I was relieved to hear from my frier d Mr. Zumoto that a speech was not expected of me to-night. It is merely then my duty and my great pleasure to express to you how entirely we appreciate the beautiful, clever and interesting entertainment you have offered to us this evening.

ful, clever and interesting entertainment you have offered to us this evening.

Our greatest poet, in whose works all your guests of to-night, American and British, have a common heritage, las told us that "Peace hath its victories no less than war," and it seems therefore peculiarly appropriate that you, Gentlemen, whose business it is to strive toward the attainment for your country of the victories of peace, should entertain my colleagues and me, whose business it is to strive toward the attainment for our countries of the victories of war. tories of war.

tories of war.

But I was expected to be brief, and I will be brief. I am speaking only among gentlemen of whom the majority we Englishmen are proud to call our allies, the minority are our blood relations, and if in these very few words I have failed to convey to you how deeply we appreciate the honour you have done us in inviting our presence to-night; if I have failed to convey to you how agreeable to us is the enjoyment of the friendship of you gentlemen representing as you do all that is most cultured and intellectual and perhaps I might add most rich in your charming and hospitable country; if I have failed to convey to you how much we respect and esteem your kindly and gentle people and how earnestly we desire your future welfare and prosperity; then I must ask you to remember and to apply to these very few words of mine one of your own proverbs, ichi voo kiile ju woo shiru, which for the benefit of such of my fellow guests who may not understood it, I will very freely translate: For one thing you hear, you may understand ten.—(Loud Applause.)

Captain Brinkley, speaking on behalf of But I was expected to be brief, and I will be brief.

Captain Brinkley, speaking on behalf of the press, said :-

Captain Britisley, speaking on behalf of the press, said:

Mr. Sonoda And Gentlemen—Allow me to express to you on behalf of my fellow press-men and myself very earnest thanks for this charming and significant entertainment, for the honour you have paid us in inviting us, and for the opportunity you have given us of meeting the leading business men of your capital. I can not profess to be a complete representative of my craft, for I have no direct connexion with the stormy-petrel section of it. That section is personified here by several distinguished journalists who will perhaps speak for themselves. But I know all are with me when I say how sincerely we appreciate your graceful hospitality. There is another sentiment also which we have in common to whatever section of journalisms we belong. It is a sentiment of hope—a hope whose fulfilment would defeat a great part of the purpose that has brought some of my celebrated colleagues to the Far East, but nevertheless a hope which I am confident they would like to see realized, the hope that this occasion may prove another illustration of the old adage, "the darkest hour is before the dawn," and that, gloomy as the outlook is at present, the sun of peace may yet shine through the clouds lowering on the horizon. But if most unfortunately that hope can not be realized, then I desire to substitute for it, not another hope, but an assurance that, whatever happen, Japan will come out on top for she has the right on her side.

After these speeches about an hour was denoted the side and the side and the side and the side.

After these speeches about an hour was devoted to the usual features of a Japanese entertainment; one of which was that the flowers forming a huge motto "Welcome,"
—flowers in the form of hair-pins—were taken from their place in a framework of greenery and handed to the guests by the fair hands of some forty geisha, who acted now as waitresses and anon as dancers. The party broke up shortly after nine o'clock amid enthusiastic demonstrations of mutual friendship.

DOMESTIC POLITICS.

January 18. No less than five Tokyo journals, all of the second class, insist that a change of Cabinet is imminent. Some speak of Ad-

Marquis Ito, and that the new Cabinet would include Count Matsukata, Count but as Keppel says in his log "what matters Inouye and Count Kabayama. We repeat these stories for what they may be worth.

We do not hear anything of consequence about the much-talked-of change of Cabinet which occupied the attention and the columns of five Tokyo journals very recently. The rumour has now dwindled to nothing more portentous than certain activities on the part of Mr. Kono Hironaka and Count Kabayama, and to an alleged attempt to gain the sympathetic cooperation of Count Okuma, who, however, turned a deaf ear to all suggestions. Evidently there is not to be any swapping of steeds in mid-stream.

The Niigata branch of the Seiyu-kai held a meeting on the 15th instant for the purpose of making arrangements for the election next March. The same course was adopted by the Fukushima branch of the Progressists on the same day.

the subject of floating Government bonds, and the monthly changes were occupied by those also on the advisability of refraining from who had been oftenest on the black list and disposing of their available funds by giving did not require daylight." further stated that the Bank of Japan has to H. M. S. Tweed and sailed from Portslent the Government 24 millions of yen and mouth on April 12th for a cruise up the east that the debt will soon be increased. Even coast of England, his position on board being though war be avoided, there will probably be a necessity for issuing some war bonds.

All the Elder Statesmen have returned to Tokyo, presumably in expectation of speedy developments.

THE FATHER OF THE FLEET.

The death of the Hon. Sir Henry Keppel, G.C.B., D.C.L., M.V.O., Commander of the allowed to struggle out as best he could. Legion of Honour, Second Class Medjidie, But, as he writes, "I was then free for life touched the reigns of four British Sovereigns.

Born on June 14th, 1809, at Earls Court, Kensington, when George the Fourth was motion to lieutenant, and he writes: "This William IV., and Victoria, and into the reign to turn the brain of an older head. Sapient of Edward VII. For eighty-two years his resolves no longer to play the fool." name has been on the Navy List, for he Seventy years later he writes: "Still playentered at the age of 12 the Royal Naval ing the fool." There is a very steep cutting College, and serving in all the grades as an officer, rose to be Admiral of the Fleet on Aug. 5th, 1877, just twenty years after he for there at this time he drove a tandem had attained full flag rank. His entry into down a pathway which had been cut in the this world can scarcely be termed auspicious. He tells us in his book "A Sailor's Life sheer drop to the sea being between 30 and under Four Sovereigns":-

It was only in 1820 I learned from my sister Mary that three weeks after birth, I was deposited in my father's footpan to be interred in the garden at the back of the house, not being entitled to a berth in consecrated ground. That mattered little, as before the final screwing down the old nurse discovered there was life in the "small thing."

ings, the scanty bedroom furniture of that era, and in a chair by the hearthrug sits an old body of the Betsu Price and in a chair by the hearthrug sits an old body of the Betsu Price and in a chair by the hearthrug sits an old body of the Betsu Price and the accession of William IV. July 15th, fired 30 minute guns on interment of his late Majesty George IV."

Now commenced Keppel's active accession of William IV. July 15th, fired 30 minute guns on interment of his late Majesty George IV."

start for a man who was to outlive the century how you get away so long as you keep the course." Sir Henry, who was the fourth son of the fourth Earl of Albemarle, was descended from Arnold Joost Van Keppel, who was with the Prince of Orange's expedition in 1688 and for his services was created a Baron, a Viscount and finally Earl of Albemarle.

In 1820, Keppel tells us, he and his brother Tom were summoned to their father's dressing room and there were informed that it was time to select a profession. Keppel was then 11 years old. He says:—

We both decided for the Navy. Father thought we should have separate professions. As we disagreed I hit Tom in the eye which he, being biggest, returned with interest. When we had had enough Father decided we should both be sailors.

He joined the Naval College, taking his place among the ranks with other small boys in a "blue tailed cutaway coat, standup collar, plain raised gilt buttons, round black top hat, gold lace loop with cockade, white January 20. trousers and shoes, with a big metal buckle
Viscount Sone on the evening of the 18th across the foot." These young gentlemen
invited the bankers of Tokyo to dine at his had each a cabin about 7 feet square with a
official residence and consulted with them on window "except the corner ones which at

that of gig's midshipman. Promotion came quickly for on Jan. 29th, 1829, he received his commission as lieutenant. He had made his first crossing of the line in the meantime (in 1824) and was received by the god Nepture in the manner of those days-that is, his face was plastered with a mixture of tar and dirt, which was scraped off with a jagged piece of iron representing a razor; he was then tipped backwards into a ducking pond and

on the Throne, he lived through the reigns of was indeed an unexpected pleasure, enough in the cliff of Fishhook Bay (Simon's Bay which is still known as "Keppel's Folly" sheer drop to the sea being between 30 and 40 feet.

On Feb. 11th, 1830, he joined the Galatea, one of the Channel Squadron, Capt. Charles father's footpan to be interred in the garden at the back of the house, not being entitled to a berth in consecrated ground. That mattered little, as before the final screwing down the old nurse discovered there was life in the "small thing."

In Keppel's breezy log he gives a pen and link sketch of this scene. There is the old fired on the accession of William IV. July

of running down slave traders on the west mob cap, quilted gown, etc., who is holding up her hands in horror at the sight of a wee white toe kicking itself free from the encumbrance of the cloth that is smothering its owner as the latter lies in small wooden tub, while through the open door comes in on Jan. 30th, 1833. Before his promo-

Katsura has determined to make his present illness an occasion for resigning. They say that he would be succeeded by grave-digger." It was scarcely a promising nearly lost his life by being chased by a nearly lost his life by being chased by a rogue elephant in Ceylon. On June 6th he anchored off Malacca and took part in the expedition that is known to history as the Nanning War. This was the first of Great Britain's attempts to inculcate the principles of peace and good order in what we now know as the Malay States. Keppel's description of his first palaver with a Malay rajah makes breezy reading, but we have not space to quote it here, a limitation which also prevents us from giving any account of his actions during the war, and of his refusal of the daughter of this Rajah, offered him for his services.

Sir Henry Keppel had paid his first visit to Singapore on Sept. 5th, 1832, and even in those early days found it a charming place. A year later he notes in his diary:—"Came to in Singapore Roads. It was curious to find almost every European down with the influenza and that within three with the influenza and that within three degrees of the equator.

Keppel's exploits on the west coast of Africa in the Childers, breaking up the slave trade, earned him his commission as Captain. In 1841 he commanded the Dido and was employed in the China War of 1843, and afterwards in the suppression of piracy in the Eastern Archipelago. From November, 1847, till July, 1851, he commanded the Meander, 44 guns, on the China and Pacific station; in May 1853 was appointed to the command of the St. Jean d'Acre, to I guns; served in the Baltic and in the Black Sea, and having in July, 1855, exchanged into the Rodney, 74 guns, obtained command of the Naval Brigade before Sebastopol. After the fall of that stronghold he returned to England, and was appointed to the Colossus. In September, 1856, he hoisted his pennant as Commodore on board the Raleigh, 52 guns, and proceeded to China.

It was in 1857, while he was in com-mand of the Raleigh, that the famous incident occurred of an English man-ofwar saluting the French flag as herself was sinking. Keppel was making for Macao when he struck a rock which rent a great hole in the fine wooden frigate. The French Admiral was lying off Macao and Keppel ordered his first licutenant to 'lower the fore-royal, hoist French flag and fire a salute." The Raleigh sank so rapidly that the water was pouring in at the portholes as the last gun was discharged. portholes as the less game of the Rear-Admiral Guérin at once pulled over to offer assistance and, reaching Keppel, "embraced and kissed me, exclaiming, 'C'est braced and kissed me, exclaiming, 'C'est magnifique, c'est magnifique,' then break-ing into English 'a British frigate saluting the French flag while sinking!'" Keppel was then 48 years of age, and took an acti part in the battle of Fatshan Creek and all the operations around Canton

The China operations concluded, he was ent down to Borneo and, repeating his West African experiences, smashed up the slave trade. On Sept. 20, 1857, he heard that he had been promoted Admiral and made K.C.B. Curiously enough, the unconventional old sea dog was never a favourite of Queen Victoria, though a perennial source of delight to her children and grand-children, and she was always chary of bestowing marks of royal favour upon him. Doubtless he was too free and easy for her and shocked her sense of decorum by many mad escapades which of

to allow of his becoming a Groom-in-waiting, but the office was not congenial and he gladly relinquished it in May, 1860, upon being appointed to the Cape of Good Hope as Naval Commander-in-Chief, from which he was transferred to the Brazilian station. In January, 1867, he hoisted his flag on board the Rodney, as Vice-Admiral Commander-in-Chief on the China and Japan station, a position which he owed greatly to the friendship of Albert Edward, Prince of Wales, who wrote: "I am only too happy if I have in any small way been the means of getting Sir John to give you this command." Sir Henry Keppel's first visit to Japan

seems to have been paid on June 18th, 1867 on H.M.S. Manila, when he entered "the deep bay which forms the beautiful harbour of Nagasaki. Flag shifted to Pelorus." He gives long descriptions of his first rides in and around Nagasaki and mentions many of the old residents, Haswell, Lindau, Norton, Alt, etc. He passed through the Straits of Shimonoseki into the Inland Sea in H.M.S. Salamis, and arrived at 4 p.m. on July 5th, 1867 at Yokohama, staying but a few minutes and there laid. ing but a few minutes, and then laid a course for Yedo at which he arrived in an hour and five minutes. In his log Keppel has much to say of Sir Harry Parkes and the troubles of those days. He seems on the whole to have spent a very pleasant time in Yokohama for

There is more to see and be amused with at Yoko-bama than at most places. The Club is well man-aged by a ci-devant Marine officer, W. H. Smith, but that which makes the society and place most agree-able is the presence of the second battalion Ninth Norfolk Regiment, commanded by Colonel Knox.

Sir Henry's description of a ride to Kamakura and his impressions of Daibutsu make interesting reading for us sojourners of the present day, while he has nothing but good to say of the Japanese with whom he came in contact. The Shogun was still Lord Paramount, and Sir Henry Keppel's diary is full of allusions to contemporary events. Like the sailors of the present day he seems to have been enchanted with Hakodate and the scenery around that place and he made many riding excursions with Mr. Mitford, then in the English Legation. It Mr. C. D. Moss, was built and was known for years after as the Admiral's bungalow. He seems to have taken a considerable share in the social life of the place and left Japan with great regret. Old residents have many memories of the "little Admiral," and Mr. Mollison, speaking before the Yokohama Literary Society last year, told of Admiral Keppel's charm of manner—a charm which hung around him to the very last days of his life. It was one of his idiosyncracies to have as his coxswain the tallest seaman on his ship and in the Hongkong Club some years ago there was to be seen a pencil sketch of the "short and the long of it," the Little English Admiral five feet nothing and his coxswain six feet four—which had appeared in the pages of the Hongkong Punch.

On November 2nd, 1869, he came to the end of his naval career in the Far East, having spent the greater part of 27 years in these waters. Of his departure for cluded, M and was "P. and O. passenger," he writes:
"Although my uniforms had long since been Emperor. packed It was to embark from the Government wharf under a salute and with a guard of honour. At 8 a.m. the Royal standard was hosted on board the Galatea and a general royal salute, with ships dressed, took place. I "Fashoda" will disappear from the map. The playing one more or the odds." There is a passed the guard, with Colin (his little son, seem of Major Marchand's exploit will hence a commander in the Navy) clinging to forward by known as Cabak. packed I was to embark from the Government now a Commander in the Navy) clinging to forward be known as Cabak.

my hand. At the Pier we found all the Government officials in full costume to bid farewell to the little old Admiral rigged out in his Norfolk shirt and 'Rodney hat, and instead of his galley there were the Galatea's barge and cutter—the former manned by His Royal Highness (the Duke of Ediphurgh) and worksom of Ediphurgh) Edinburgh) and wardroom officers, and steered by the Commodore, to take me off, while the latter was manned by the gunroom officers to take my wife and children however, refusing to quit his hold of me par-took of the honour of being so conveyed. Never was such a demonstration, such a triumpli, for an Admiral degraded."

Arriving in England in 1870 he attained the rank of full Admiral, being promoted to the highest honour of the Service on Aug. 5th, 1877, that of Admiral of the Fleet. His interest in the Far East continued to the very end of his life and it is only a little over a year ago that he said his final Goodbye to Singapore, having come out when 93 years of age to escape the rigours of an English winter. A thorough sailor in all his ways, habits, and outlook on life, he was a typical product of the Royal Navy when its ships were really the wooden walls of old England, and their white sails were the most picturesque things affoat. Yet he most picturesque things affoat. Yet he adapted himself to the conditions of steam and was fully alive to all the possibilities of the modern commerce destroyer which makes its 22 knots an hour under bare poles. He lived down the official antagonism which his too breezy nature provoked and was undoubtedly one of the best loved men in England at the time of his death. It is significant that the dedication to his most famous book "A Sailor's Life under Four Sovereigns" reads: "To my sailor son, in the hope that he will avoid all those shoals on which I so often grounded." And now, in conclusion, may we be permitted to say that he was

A fine old English gentleman, One of the olden time.

THE PRIVY COUNCIL.

The Privy Council met on Wednesday at was about this time that the bungalow at 109 half-past nine in the forenoon, and after an Bluff, for so many years occupied by the late explanation from the Vice-Minister of the Mr. C. D. Moss, was built and was known Navy, approved the draft of a law (Kaimenrei) dealing with the laying of torpedoes and with other maritime arrangements in time of war. This law will probably be published as an urgency Imperial Ordinance.

Marquis Ito attended the Council at 10.30

The Minister of State for War, the Minister of State for Communications and Mr. Inuzuka, Chief of the Railway Bureau, offered explanation of a draft law relating to the transport of troops by rail and the State purchase of private lines in time of war. This draft also obtained approval.

Finally a measure was approved relating to the special employment of officials by the Department of Communications. This doubtless had reference to the postal service which the Department is now organizing for use in time of war.

After the above business had been concluded, Marquis Ito proceeded to the Palace, and was received in audience by the

GOLF SIXTY YEARS AGO.

In the course of an interesting article written to the Outlook on this subject, Mr. W. L. Watson says:—Passing through Furnival-street, off Holborn, the other day, I saw in the window of a second-hand book-shop a volume entitled "Saint Andrews as it was and as it is; being the third edition of Dr. Grierson's Delineations, containing much curious and valuable information never before printed." This edition is dated from Cupar in the year 1838. A memory of the "twelve plates" with which the book is "embellished" came over me from boyhood's days. It was an old book in an old bookcase then, and I found that the first edition bore the date 1807. But to my delight I discovered that this 1838 edition contained a chapter on the "Company of Golfers," embodying a description of the links, the game, and the implements thereof. Two shillings made it mine. Even the Scots had to be enlightened, it appears, as witness this statement by Dr. Grierson: "As golf is believed to be a game peculiar to the Scots, and, on account of the particular nature of the ground required in playing it, not generally understood even among them, it may be proper, in speaking of such a place as St. Andrews, where the sport is admitted to have been long found in great perfection, to give an idea of the nature of this elegant amusement." Considering the many things which golf has been called, flattering and the reverse, it gives one peculiar satisfaction to reinstate it in its proper class is in regard to the implements of the game that this old account becomes most interesting. The balls, we are told, were " five quarters of an inch in diameter," which to a mathematical mind seems to work out to about 1½ in. The diameter of a 27½ ball to-day is nearly half an inch greater. The weight of these old balls is given as from 26 to 30 drams avoirdupois. A Haskell ball of the present day weighs 24 drams Apparently therefore, the old feather ball was smaller and considerably heavier.

If there is one thing in which we of these days believe ourselves superior to the golfers of 1838 it is pre-eminently in length of drive. But listen to the testimony of Dr. Grierson. He tells us that "the bat or club" with which the feather balls were played was about 4ft. in length, and that "a good a good player with one of these clubs will strike a ball to the distance of 180 to 200 yards." Now a drive of 200 yards with the newest of patent clubs and with a Haskell ball will serve perfectly on any course in existence, and we might just as well go back to the four foot "bat" and the feathery ball. In other respects, too, the olden golfer did not differ from the present-day player. For, while a set of clubs consisted of "four at least, viz., the common or play club, the spoon, the the common or play club, the spoon, the putter, and the iron, most golfers have ten or a dozen sorts." In regard to the play of the game, Dr. Grierson describes golf as it still is, only premising that "no proficient at golf ever plays "in a match "exceeding four players, that number being allowed to be the most elegant and convenient." But its describing the puthod of realizations the in describing the method of reckoning the game he makes an observation which recalls an interesting point. . "A plays off, old account of the game.

CHANGING SEASONS.

Ever and anon one hears in the course of the weekly round of work a remark to the Japan have had several opportunities of effect that the climate of some particular enjoying the verses of Madame la Baronne place is changing. Old residents of Japan, d'Anethan, and they will be glad to learn for instance, invariably tell newcomers that these admired poems (with many not the summers nowadays are nothing like so previously published) have now been rescued the summers howadays are hothing like so previously published) have how been restuded they were twenty or thirty years ago; or columns and gathered into a little volume. mayhap it is the winter they are alluding to, and then the remark is that our present winters are nothing like so severe, etc., etc. typographical errors and the printer's work, Considering the wonderful samples of climate on the whole, is scarcely worthy of the matter. that England is blessed with, it is little This defect is partly atoned for, however, by matter for wonder that similar notions illustrations well chosen and very attractive. are very prevalent there. From our youth The authoress has unquestionably the gift of up have we listened to them until at last we song. Her range of subjects is not wide—a With these heautiful and profound that the profound the profound the profound the profound that the profound the profound the profound that the profound the began to believe that our grandfathers did criticism which future publications will render once upon a time know what summer- inapplicable, we trust - and occasionally the weather was like and that our fathers actually even melody of her verse is broken by notes learnt to skate during periods of prolonged of jarring rythm. But this latter is a fault frost which came principally during the very rarely avoided altogether by poets, Christmas holidays. We can not remember who detect in words a music not perceptible many Christmases spent in the Home to common ears. We are not quite certain many Christmases spent in the Home to common ears. We are not quite certain Land which were accompanied by the tradi-tional weather of the Christmas-books and ment at Baronne d'Anethan's hands. To Christmas-cards. Rather more often than say that she in at her best when pourtraying not we had a "green Christmas," and the passion is to repeat a comment almost univerfrost and snow came when we were all back sally appropriate. Yet if the definition be at school again and unable to take advantage a little restricted, if it be limited to the of their presence, at least to any considermajority that the climate was changing strongly with regret, and on the whole we Mr. C. W. Saleeby, in the course of an shall perhaps be right in saying that the interesting article in the Academy fully bears melancholy of memory is the dominant tone out the truth of popular contention on this of the most moving poems in this volume. point. He says that it is an astronomical "Night after night in dim unconscious dreams, fact that the seasons are changing.

When first we considered the causation of the sea sons most of us guessed. I fancy, that the earth—which every-one knows to move not in a circle but an ellipse —must be nearer the sun in summer and further from him in winter. That, however, as we were soon assured, is a delusion; for the earth is nearer the source of its heat to-day than it was at mid-summer. Probably this unexpected state of affairs was not always so. The geologist, attempting to explain the cold of the Ice Age, suggests that the earth once the cold of the Ice Age, suggests that the earth once moved in an orbit even more eccentric than her present path, so that the difference between her nearest and furthest position in relation to the sun was much greater than now. And he further suggests that perhaps the period of greatest distance from the sun coincided with the winter of our Northern Hemisphere; so that herein may be found some explanation of the cold of the Glacial Epoch. Enough, then, to say that the variations in the earth's distance from the sun are not only an inadequate explanation of the seasons, but that any action they have is in the direction of modifying the severity of winter and the glow of summer.

glow of summer.

The real explanation of the seasons, as every one knows, is the fact that the earth is tilted on her axis. If we think of the earth as travelling round the sun in the plane of this sheet of paper, the North Pole would not stand vertically upwards from the page but would be inclined to it. And the interesting fact is that this inclination of the earth's axis is constantly altering. We all know the Pole-Star, to be found by tracing a line upwards from the two stars—the "pointers"—which form the right border of the Plough. When the Pole Star received its name, the North Pole of the earth did actually point towards it, but the axis of the earth has so altered in the interval that the true North Pole of the heavens is now some little distance from the Pole-Star. The astronomical phenomenon known as the "procession of the equinoxes." first observed by Hipparchus, is also due to this cause.

Now, if the direction of the earth's is changing, so constantly must the seasons be changing. And where will it stop, you may ask? The answer is that this is one of the cycles of the universe. In about twenty-six thousands of years, the axis of the earth will have completed the circle which it is ever describing in the heavens, and will have returned to its present point. One can often see the movement in a spinning top. This period of twenty-six millenia—the annus magnus—through which the seasons pursue their course of cyclic change, has been calculated to a year by astronomers, as a deduction from the law of gravitation and the shape of the earth. For if the earth did not bulge at the equator there would be on such Great Year. The real explanation of the seasons, as every

earth did not bulge at the equator there would be on

"LOVE SONGS AND OTHER SONGS."

Readers of English journals published in So we also believed with the ably endorse it. But it is love tinged

"Night after night in dim unconscious dreams,
"I feel those flitting kisses on mine eyes,
"Vain vagrant vision! Vanished with the beams

"Of morn, that bids to waking life arise "Bids us arise, and cast delusions sweet

"Far, far from us,—and once more lift the load
"Of life. Once more its stern dull duties meet
"Exiled,—once more to tramp its lonely road."

These are a tears for the days that are no more," and we seem to hear the sound of such tears falling through all the "Love

The great gray waves are breaking on the shore, In angry ebb and flow: and blinding rain Obscures the distant view. The wine's deep roar Shares with the sea one weary wail of pain, Ah! whirling wintry wind! tempestuous sea! Yon fragile bark wrenching in whath apart, Why storm thee thus? Why rage thee censelessly? Does not calm love thrill through my happy heart? The silver sea is slumb'ring on the strand; The wind sings sweetly 'thwart the Summer trees; The sun's rich glow gleamy 'cross this smiling land; All nature joins in laughter with the breeze.

Ah! witching winsome wind! ah! happy sea! Sweet voices ming! ling e'er the white waves part. Why whisper thus thy soft love songs to me? Thy kisses cannot heal a broken heart!

The fickle falseness of the twentieth century. The great gray waves are breaking on the shore,

The fickle falseness of the twentieth century Twentieth Century Episode," "Her Reward" and "The Up-to-date Wife" with its contrast "The Out-of-date Wife." We should like to quote all these in full but must restrict ourselves to two verses, one from the "Episode," another from "Her Reward:"

"Methinks if this were Love, 'twere best
"To treat love as a transient guest,
"Twas wafted by the Summer breeze
"And died when died the Autumn leaves.

"A flitting dream, unmarred by tears.
"So—if we meet in after years
"I wonder if I'll feel surprise.

"While gazing in thy deep, dark eyes,
"That I on thee had once bestowed
"One kiss, one thought—brief Episode!"

"I think for just a little space
"I loved this woman carelessly.
"She eased the dullness of the place.
"And passed those hours beside the Sea.
"What do I hear? She's ill, you say?
"The doctors croak and prophesy?
"Poor thing! Ah well! "is fine to-day;
"['Il drop a card; I'm passing by."

For truest pathos, however, pathos that must appeal to the most callous heart, we have no hesitation in choosing the verses "Beside a Grave. J. R. H. aged to:"-

The weary years have sped away—my dear, Since thou wast laid within the churchyard green. Since thou wast laid within the churchyard green. The years have flown, and yet how very near. Thy boyish form with me to-day has been. Thy bright young voice that echoed through the half, Thy pure blue eyes, sparkling with fun and joy; Ah! who could dream that Death's relentless call, Would summon thee, and chaim thee,—darling boy? Ah! who could dream, that thou—replete with youth, So loving and so loved,—so talented,—so brave;—Dream that thy gifts,—thy virtues, and thy truth, All—all should vanish 'neath this little grave? And yet thou liest now where boyish pain. Is felt no more.—Beyond in lasting joy!

With these beautiful and profoundly sad verses in our ears we take leave of Baronne d'Anethan's little volume, offering her sincere congratulations on her work and hoping that the welcome which this book can scarcely fail to receive from the public will prelude further publications.

SPORT-CRAZY WORKMEN OF ENGLAND.

It seems that England is at last waking up to the evils which attend upon the too great devotion to sport shown by the working classes, more particularly during the football season. Kipling's diatribe against the "muddled oafs at the goal" though railed at at the time of its first appearance, is being taken up seriously by the more sober journals of the country, and following in their wake the men who control the big manufacturing centres of the Kingdom are taking steps to combat the manifold mischiefs. It must not be forgotten that practically a large founds and that practically every mine, foundry and factory operative in England has the Saturday half-holiday off, and most of the football contests, pigeon-flying matches and rabbit coursing take place on that day. But the average English coal miner, fron-worker and factory hand never seems to consider this for a moment if there is a midweek con-test which he thinks worth seeing, for even when trade is at its worst thousands of operatives still find money to enable them to attend the playing fields on Wednesday afternoons. Work is neglected, duty can go hang, if sport conflicts with labour. According to recent reports from London the evil is worst in the iron and coal districts in the north country. In the case of an important football match to decide a tie for a cup, 40 per cent of the men in the pottery factories have been known to stay away without leave, men have neglected the ovens during important firing opera-tions, and great loss has been the result. Now manufacturers and mine owners are We should beginning to deal with the evil with a stern hand, and we read that china manufacturers have served notice on their employes that absentees on midweek match days will be instantly dismissed. The colliery owners have taken a similar step. Hitherto the manufacturers have found it more profitable to shut down for half a day than to work with only half the usual number of men. But now the loss of half a day when there is a contract to be filled has become a serious matter. Even in strike times, when the workers have been supposed to be starving, the attendance at the weekly football games in which the contestants are practically professionals drawn from the district, has shown but slight diminution. In the pottery districts a man without a suit of respectable clothes will still go regularly to a foot-ball

match. He would rather lose his furniture than not have the sixpence admission fee. At present, owing to bad trade, many of the workers have Monday as well as Saturday They are piece-workers and the loss is theirs, but the attendance at League football games is increasing enormously. with trades-union tyranny curtailing his output on one hand and foreign competition cutting off his markets on the other, the harassed British manufacturer is compelled to tackle another hindrance to his retaining for England her industrial supremacy.

RUSSIA'S TROOPS IN CHINA PROPER.

The telegraph says that Russia has with-drawn her whole force from Tientsin and that there is every appearance of her adopting the same course in Peking. This is somewhat perplexing. It is possible, of course, that she anticipates troublesome contingencies should she leave small bodies of soldiers in places like Peking and Tientsin during the progress of her war with Japan, but the value of that apprehension is not very apparent in view of the facts that China's neutrality is now assured and that Russia is merely pursuing, in common with other Powers, the programme mapped out in 1901, when it was agreed that all should have a certain military force in Chili. In Peking also people are evidently perplexed about her doings. They suggest that she is adopting a policy not by any means new to her, the policy of converting her own convenience into a pretext for conferring obligations on China. She took, in 1900, a line independent of all the other Powers when she withdrew her forces from the Chinese capital, and it is quite possible that she may now bid for the recovery of China's goodwill by a similar act of spontaneous self-effacement. There is a suggestion that such a course would have specially marked effect because Japan's new treaty with China provides for the opening of Peking so soon as it is relieved of the presence of foreign garrisons. But on the other side of the account has to be set the obvious consideration that the withdrawal of the Russian detachments from Peking and Tientsin at present would certainly be construed by the Chinese as a relief brought to them by Japan's warlike pressure upon Russia. They would surely say—probably they are already saying with regard to Tientsin—that even before the outbreak of actual hostilities Russia's grip upon their country has been Russia's grip upon their country has been loosened by apprehension. That aspect of the case being quite unequivocal, we should certainly have expected Russia to keep intact her Peking and Tientsin garrisons at all hazards. As for the notion that her removal of them at this special juncture could be successfully represented to Chinese eyes in the light of a gratuitous concession to the successfully represented to Chinese eyes in the light of a gratuitous concession to the cause of international goodwill and commercial expansion, we really think it may be dismissed with smile. Should the withdrawal be effected, it will have to be attributed solely to apprehension that the presence of small bodies of Russian troops in these two great Chinese cities throughout the course of a conflict between Russia and Japan to determine the integrity or the disruption of the Chinese empire, would be at once an incentive to some deed of violence and an opportunity for it.

The Kokumin states that the Tokyo Beer Brewery Company intends to wind up its business. It will hold a general meeting on Jan. 30th at the Doki Club, Tsukiji, to discuss business arrangements.

THE NEW COMMERCIAL TREATY WITH CHINA.

The publication of the text of the new commercial treaty between Japan and China was made in Tokyo on the 19th instant. reserve shown by the officials of this country towards their own nationals. For the full text of the treaty reached London at the end of November, and copious extracts from it appeared in The Times of December 2nd. London, therefore, was just seven weeks ahead of Japan.

There is a great deal of interesting matter in the treaty, but of course the clause over-shadowing all others at this juncture is the one relating to Mukden and Tatung-kow. The document's language is perfectly explicit. Not only are these places to be opened to trade, but also they are to be opened to international residence, and the selection of sites for residential purposes is to be effected after consultation between the Governments of China and Japan. Now it is understood that Russia, while not objecting to foreign consular representation at the places indicated, does distinctly object to the establishment of settlements. Here, then, a crucial issue is raised. But we do not imagine that it is likely to create international difficulties -not immediately at all events.

An interesting fact is that whereas Japan, by means of the Shimonoseki Treaty, relieved foreign Powers from the disability under which they had previously laboured in the matter of manufacturing enterprises in China, so she now, by this new convention, removes the difficulty that proved so disastrous to an English financial venture, the difficulty that Chinese shareholders in a foreign enterprise can not be compelled to pay calls.

THE AMERICAN NAVY.

The report of Mr. Moody, the Secretary of the United States Navy, made public at Washington on December 4th, announces that in the last fiscal year closing with June 30, 1903, the effective force of the Navy was increased by the addition of 25 new These were the battleship Maine, the four harbour defense monitors, Arkansas, Nevada, Florida, and Wyoming; 12 torpedoboat destroyers; one torpedo boat, and seven submarine boats. Since the close of the fiscal year additional vessels have been accepted as follows: One protected cruiser, transferred from the army the transports Hancock and Lawton, which have been fitted up for use as receiving ships, and the hospital ship Relief; and from the Treasury Department, the schooner Eagle. During the year two vessels were dropped, the iron tug Leyden, which was wrecked, and the iron paddle-wheel gunboat Monocacy, condemned? as unserviceable, and later sold. regard to armour plate the report proceeds :-

The armour manufactories of the United States, in accordance with promise, have added to their facilities, and deliveries amounting to 11.493 tons have been made—a marked increase over any previous remains stable. The demand by Japanese traders year. Armour plates are now tested with capped

projectiles. The acceptance tests for armour-piercing projectiles have been made more rigorous, it being now required that they shall, at a prescribed velocity, perforate unbroken a plate of hard-faced armour equal in thickness to the diameter of the projectile, and then he in a condition for bursting.

The subject of docks and naval bases is Thus, That is a striking illustration of the extreme also exhaustively treated, but we have space for only two paragraphs:-

The chief of the Bureau of Yards and Docks reports that fairly satisfactory progress has been made during the year in the construction of the dry docks at Boston, where the work is now carried on by the surety on the contractor's bond, and at League Island, but that progress in dock construction at Mare Island has been hindered by difficulties encountered by the has been hindered by difficulties encountered by the contractor in placing a satisfactory cofferdam to exclude the water from the site. A private firm has completed and has in operation in San Francisco Bay a concrete dock which was begun after the Mare Island dry dock was contracted for, while even the excavation for our own dry dock is yet uncompleted. The floating steel dry dock purchased from Spain and transferred from Havana to Pensacola has been repaired and will soon be placed in commission, and the construction under contract of new floating steel dry dock for use in the Philippines has been commenced. menced.

menced.

Although it is almost five years since we acquired the Philippines, no steps have been taken to establish a naval base there. We have in Asiatic waters a large fleet, comprising not only smaller vessels but cruisers and battleships. There is no naval base at present nearer than Puget Sound or San Francisco Bay. In time of universal peace it is possible to repair our ships in the dockyards at Hongkong and in large, and to transport without moleculation stores. repair our snips in the dockyarus at Trongkong and in Japan, and to transport without molestation stores and supplies to eastern waters. If we were at war with any Power these facilities for repairs would not be available, and the possibility of furnishing stores and supplies would be greatly lessened. If other Powers were at war in those waters, it would be difficult for us to procure the necessary facilities for the repair of our ships."

The Secretary also comments upon the necessity of keeping a naval force in the Caribbean. Finally we read that the expenditures for the year were \$82,618,034. By reasonable approximation the valuation for that year was \$106,239,266,872, Thus there was expended for this year for each dollar of the national valuation \$0.00077. If the average of the last century had been reached, the ex-penditures would have been \$130,674,298.25.

JAPANESE SUBJECTS IN MANCHURIA AND SIBERIA.

It appears from calculations published by the Jiji Shimpo that there are some nine thousand Japanese subjects in Manchuria and Korea, namely, about 3,000 in Man-churia and 6,230 in Siberia. Saghalien has now only a few Japanese residents though in the summer they are very numerous. Our contemporary insists that steps should the Cleveland; one torpedo-boat destroyer, be at once taken to remove these people as the Macdonough. Aside from the vessels Russia's observance of the laws of civilized which were built for the Navy, there were warfare can not be depended on. It is certainly necessary that some measures should be adopted to secure the safety of Japanese subject, but we (Japan Mail) can not for a moment endorse the apprehension that they would not receive due protection from Russia in accordance with the usages of modern warfare. The incidents that happened in 1900 are calculated, it is true, to inspire doubts as to the extent of Russian humanity in time Secretary Moody devotes some space to of emergency, but if isolated cases are to be changes in procedure in order that vessels regarded as general guides, few countries may be finished with greater dispatch. These would emerge with unimpaired reputations. steps have necessitated some delay in letting It is our opinion that the situation in Man-contracts, but this, he believes, will be more churia and Siberia might be fully met by than offset by the thorough preparation of entrusting to the American Consular author-plans and specifications and by greater seve-ities the duty of looking after Japanese life rity in the relations with contractors. With and property.

ANNUAL BANQUET OF THE ENGLISH SPEAKING SOCIETY.

明治计划基立具件目第三键框侧整理可

On the 16th instant the English Speaking Society held its annual banquet in the Baron Kanda, President of Peers' Club. the Society, occupied the chair, and on his right and left respectively sat Baron Kikuchi and Baron Kaneko. Covers were laid for about thirty. The principal feature of these gatherings is the speeches, and before each guest was placed the following list of toasts:

TOASTS.

EMPEROR AND EMPIRE. "O child of nations, giant-limb'd, Who stand'st among the nations now." GREAT BRITAIN.

"Rule, Britannia! Britannia rules the waves!"

"Sweet land of liberty." NAVY.

"Your glorious standard launch again To match another foe."

GUESTS

"You're welcome sirs, you're welcome all, We'll have a straight speech; Come, give us a taste of your quality." EIGO-KWAI

" Let us swear an eternal friendship." LADIES.

"Dich liebt'ich immer, dich lieb'ich noch heut," Dich werde ich lieben in Ewigkeit!"

PRESS.

" I must have liberty Withal, as large a charter as a wind To blow on whom I please."

The Emperor's health having been drunk with great enthusiasm, Baron Kanda proposed the toast of "Our Country" to which Baron Kikuchi responded as follows:

Looking back fifty years we may well feel surprised and we may congratulate ourselves on the progress we have made during that period, in our civil administration, in our education, our army and navy, our commerce and industry. The poet has said "Better fifty years of Europe than a cycle of Cathay." Well I think the last fifty years of our country have been in many ways equivalent to two or three centuries of Europe. Centlemen, we are just now on the brink of grave events, the gravest in the history centuries of Europe. Gentlemen, we are just now on the brink of grave events, the gravest in the history of this nation, and are we not supported by the sympathy of the whole civilised world, feeling that our cause is universally recognised to be that of civilisation? And it is not thirty years ago that in foreign books on geography which I read when I was a boy Japan was mentioned among "semi-civilised" mattons. Wonderful as this change has been, it is, a mistake to suppose age has been done constituted. tions Wonderful as this change has been, it is a mistake to suppose, as has been done sometimes, that we have as it were, jumped suddenly from barbarism to civilization. Our civilisation was not of the same nature as the Occidental, but in many respects it was just as high, if not higher: we have proved our wonderful capacity of assimilating alien civilisation and making it our own; we have always been earnest seekers after new knowledge. Seeds sown here by Thunberg, Kaempfer, Sielold and others have not been cast on a rid ground. I can never sown here by Thunberg, Kaempfer, Sielvold and others have not been cast on arid ground, I can never sufficiently admire the spirit of eager and patient search after truth shown by Mayeno and his band, when with the help of a book written in a language of which they knew literally only the alphabet, in face of the opposition of the Government and the public, they secretly studied the anatomy of the human body as a necessary preliminary to their practice of medicine. Again, look at the work of the Restoration, the spirit which animated men on both sides, that set the welfare of the nation supreme and regarded the sacrifice of the lives and interests of individuals or sections as nothing in balance with those of the country. As long as we have such a spirit amongst us, we need not fear for the future of our country, immediate or distant; it behoves us therefore to be most strenuous in keeping up this spirit of earnest knowledge-seeking and of highest patriotism.

Baron Kanda then proposed "Great Bri-in," coupling with it the name of Captain Brinkley, who, he said, during many years of residence among them, had made the Japanese language his own, had made Japan his home, and had showed himself a true friend of their country.

Captain Brinkley responded as follows:-

MR. PRESIDENT AND GENTLEMEN,—The toast to which I have to respond being "England," you will permit me to dispense with any detailed reference to Baron Kanda's flattering remarks about my wholly insignificant self. There are not many British subjects present, but in their behalf and in my own I thank my have it for your certific presenting of this thank you heartily for your cordial reception of this toast. Concerning England it may be justly said, I think, that though she showed some tardiness in recognising your early claims as an autonomic empire, she has offered in recent years the strongest possible evidence of confidence in the reality of your progressive successes. I had it in mind to say something about that provens but Brank Flished; here possible evidence of commence in the reality of your progressive successes. I had it in mind to say something about that progress, but Baron Kikuchi has already dealt so fully with the subject that nothing remains for me to add. I should like, however, to note one feature of that progress, its eelecticism. Since you emerged from the seclusion of your old home you may be said to have adopted the career of intellectual wanderers, travelling here, there and everywhere in search of the good, and taking it wherever you found it without respect for person or place. In these wanderings of yours your feet were not turned very often to England, and possibly you may imagine that we Englishmen entertained some feeling of jealousy on that account. But for my own part I can assure you that through all these years I have never entertained the smallest doubt that the trend of your national sentiment would ultimately be in the direction of Anglo-Saxon ideals, for those ideals are founded on principles whose realization surely makes. of your national sentiment would ultimately be in the direction of Anglo-Saxon ideals, for those ideals are founded on principles whose realization surely makes; for the greatest happiness of the greatest number of humanity, the principles of liberty, equality and fraternity. I would ask you whether the events of the past few years and whether the position in which your country now finds itself do not warrant the confidence I have entertained. Baron Kikuchi's reference to the past 50 years reminds me of the first visit I paid to this city of Tokyo. It was just 37 years ago, that is to say, before the old order had given way to the new and before the Meiji era had dawned. You will probably understand, without much explanation from me, that the opportunities we foreigners then had for studying the conditions of life in Yedo at first hand were not very numerous and could not be enjoyed in merculation consisted of two-sworded Samerni. The absquitons consisted of two-sworded Samerni. The absquitons consisted of two-sworded Samerni. The absquitonsness of the Samurani was not, pethaps, as real as it seemed. Probably some of you are old enough to remember that these gentry took up a great deal more of the road than their numbers actually warranted. But the impressions I speak of were none the less vivid. Yedo seemed to be a military city. The citizens appeared to live under the shadow of the sword. Well, gentlemen, we foreign onlookers. the less vivid. Yedo seemed to be a military city. The citizens appeared to live under the shadow of the sword. Well, gentlemen, we foreign onlookers at that time fondly imagined that when you emerged from your isolation, when you abolished military feudalism, these evidences of militarism would disappear, and you would engage permanently in a strug, le for the victories of peace, victories in art, in science, in literature, in commerce and in industry. But looking back over the past 40 years, it would be hard to say that our hope has been fulfilled. In 40 years you have had to fights with foreign Powers in your own waters; you have had to deal with a terrible domestic tragedy; you have sent three expeditions over-sea to do battle with foreign countries, on each of which occasions you sent three expeditions over-sea to do battle with foreign countries, on each of which occasions you emerged with enhanced reputation, and you are now apparently on the verge of an armed struggle that overshadows all the rest. Seven belligerent incidents, gentlemen, in 40 years, or an average of more than one every six years; whereas, under your own old system, though the paraphernals of war were so constitutions you manufact to live in admitting the paraphernals. were so conspicuous, you managed to live in absolute peace for nearly 300 years. That is a very strange difference, and I daresay if you were to ask an ethical philosopher like our friend here. Mr. Lloyd, he would philosopher like our friend here, Mr. Lloyd, he would tell you that the cause is to be found in the fact that the practical basis of Occidental civilization is egoism, and that when you stepped out of your seclusion you entered a society of Powers each of which was working for its own interests without any regard or consideration for the interests or rights of its neighbours. That explanation may not he exhaustive, but it is true so far as it goes, and what I would ask you is whether you do not think that two Powers may fairly be excluded from the category, Great Britain and the United States of America. I do not for a moment claim that England is sinless. She has many sins of selfish aggression recorded against her; there are not meter included. has many sins of selfish aggression recorded against her; there are not me few incidents that we Englishmen would fain see era-ed from her records, and perhaps she is even now adding to the list in some part of the world. But so far as least Asia is concerned, it may be truly claimed for England that she has divested berself of all aggressive ambition, and that her international policy is as altrusitic as is consistent with safety. For whatever privileges she acquires are freely shared with all nations, and wherever her flag

flies there every one, whatever his race, can be sure mes there every one, whatever his race, can be sure of finding in active operation the principles of liberty and equality. The same is essentially true of America, and it may be hoped that this identity of policies supplementing the promptings of kinship, will ultimately draw the two Powers into a union which would be the greatest force for good the world has ever seen, the Anglo-Saxon-Union. We seem to be nearing such a union and yet it is not achieved. to be nearing such a union and vet it is not achieved. Something is still wanning and I have often thought that Japan's destiny may be to supply that something. She may perhaps furnish an occasion for the combined exercise of the high principles I have alluded to, since the strong sympathy that America and England feel with her in this hour of her trial, and the approval they extend to her cause may constitute a bond to draw them together and may be the means of materializing their mutual sentiments of kinship and appreciation. Nothing could possibly make for the good of humanity more than would a union of all the Angle-Saxon races, and may it not be in the all the Anglo-Saxon races, and may it not be in the lap of the future that that union should be largely promoted by Japan and should be called, not merely the Anglo-Saxon Union, but the Anglo-Saxon-Japanese Union? Gentlemen, if that result could be brought about the nations would owe to Japan an immense debt of gratifude.

The toast of "America" was acknowledged by Mr. H. St. George Tucker :

The toast of "America" was acknowledged by Mr. H. St. George Tucker:—

Mr. President,—I count it an especial honour to be asked to respond to the toast, "America," here to-night because I feel sure that the Anglo-Saxon-Japanese union alluded to by the preceding speaker, though it may not yet be a formal union between the nations, is at least an accomplished fact in the hearts of all in this room. When I was a very young boy, I imagined that there was but one "sweet land of liberty," but when I grew a little older, I soon learned that in the mother country across the sea the same ideals of true liberty were upheld. Again when in the course of time I left the shores of my native land, and crossed the broad Pacific, I woke up one morning to find still another sweet land where Anglo-Saxon ideals of liberty are cherished. It is hardly necessary for me to recount the history of America's efforts to render herself worthy of the high title. The torch of liberty which her sons brought ready lighted from Old England, they have endeavoured to keep burning brightly. Of course there have been mistakes and deviations from the right way, but on the whole she has succeeded in restoring to honour the ideal that had at one time fallen somewhat into disrepute, because of the excesses of its advocates. What then is the underlying principle of Anglo-Saxon liberty? It is expressed in the phrase "equal rights for all, special privileges to none." It means so far as is consistent with law and order to give to each one an equal opportunity in the competition of life. It insists that success shall not go by favour, but by true merits. This is the same spirit of liberty which we find in the hearts of the people of this country. I not'ced it first in your educational system. In it you offer equal advantages to every one and success depends only upon the ability and perseverance of the individual. But especially does the spirit with which Japan is approaching the present crisis convince us Anglo-Saxon principle of "a fair field and no favo

The "Navy" brought Captain Iwasaki to his feet, who said: -

MR. PRESIDENT, LADIES AND GENTLEMEN,-It is a pleasing task for me to have to thank you for the kind way in which the toast of the Navy has been proposed and for the cordial manner in which it has been received. Indeed it is alike a pleasure and an honour for me to respond to it.

It may be needless to say that the mission of the

It may be needless to say that the mission of the Navy is to preserve peace and if war should ever break out, to fight to win.

There is no sort of difference between war and peace as far as the duties of the navy are concerned, with the single exception that in war the target the ships fire at fires back at them, but in peace it does not does not.

strong moral support to back us up, we can hardly fail no matter what task we may be called upon to

In behalf of the officers and men of the Imperial Navy I again express my warnest thanks for the toast and for the way in which it has been received.

The Rev. Arthur Lloyd, responding for the "Guests," said:—

the "Guests," said:

I am admonished by the poem in front of me to give you "a straight speech," which, I take it, means that I am to stick to my subject; and also to give you "a histe of my quality," which I think means a short speech. I will try to obey the admonition.

We have had the praises of Japan sung this evening from various points of view. We have been told that it is progressive and energetic. We have also been told that it is a sweet land of liberty. I want to bring out the thought that it is a very pleasant land to live in, precisely because it is progressive and energetic and free.

A Greek poet once wave vent to a very dreadful.

energetic and free.

A Greek poet once gave vent to a very dreadful sentiment. He said that patriotism was all nonsense—"A man's country." he said, "was the place in which he was comfortable." And yet the sentiment after all has much that can be said for it. A man's country is the place where a man feels at home—and when a country is progressive and earnest and is withtal a sweet land of liberty a man feels at home in it, and soon considers it as his country.

In England, in the United States, in Japan—all three lands of progress and liberty, we all feel at home. It is good to live in them, and the Anglo-American-Japanese alliance which has been spoken of this evening means that each of these countries is

one of the Society's earliest meetings, many ears ago, when several men, now leading lights in the world of science, of literature, of jurisprudence, of art, of politics and of education, had figured in the recitations and theatricals with which the Society celebrated its annual assemblies. It was a source of sincere pleasure to him to see how the institution had grown from small beginnings to be an association of no little influence and popularity. That it had so grown was proved, he thought, by the character of the gathering that evening; a gathering which might justly be described as one of the most important they had ever witnessed. There could be no doubt about the services the Society had rendered in popularizing and spreading the study of the English language in Japan, and when they observed what the English language was, what an immense factor of civilization it constituted, and how steadily its use was spreading, they might feel absolutely confident that their efforts were in a good cause.

The health of the "Ladies" having been

drunk and responded to wittily by Mr. Sakai, and the toast of the "Press" having been worthily acknowledged by Mr. I. Yamagata, Baron Kaneko rose and spoke as follows :-

LADIES AND GENTLEMEN,-Before I respond to

day, carry within their bosoms the same feelings as more than any ordinary constitution can the answer given being, "you should not have the Anglo-Saxon people. As you all know our country was opened up and introduced to the world by stand and it is not surprising that the fallen asleep." But the younger children commodore Perry in 1854; and afterwards the girls suffer from weak eyes and aching take all as a matter of course and do

by the Anglo-Saxon nations; and after the Imperial Restoration in 1868, the work of reorganizing the Japanese Empire was carried out by the spirit and powers of the Anglo-Saxons; because in that early period were found many English advisers or American councillors in all the Departments of Govern-ment, and through them the best qualities of Anglo-

dangerous ideas of miniarism and asserting those of liberty and freedom. Again we remember well how bravely the English soldiers and seamen fought against the tyranny of Napoleon Bonaparte, when the whole of Europe was trampled under his feet, and the peace of the civilized world lay at his mercy.

Still further we may add how patriotically the Americans—the descendants of the Anglo-Saxon—treed up for the freedow and independence of their

stood up for the freedom and independence of their country, when the interference and invasion of European Sovereigns were threatened in the affairs of the American continent.

The history of England and America shows that the aim of the Anglo-Saxon is Freedom, Peace and Happiness, and all the English-speaking nations are three lands of progress and liberty, we all feel at home. It is good to live in them, and the Anglo-American-Japanese alliance which has been spoken of this evening means that each of these countries is what the Greek poet would call our home.

In the name of my fellow guests I beg to thank you for the practical exposition of the luture Anglo-American-Japanese Aliance which you have given us by making us feel at home in this room which is for the present yours.

Baron Kanda himself proposed the health of the "Eigo-Kwai." He created much amusement by reading the programme of one of the Society's earliest meetings, many

At this critical moment of the Manchurian question, our people only desire the peace of Asia—nay, the peace of the whole civilized world. But we will not seek to obtain that peace by disgracing our national honour, or by endangering the freedom and happiness of our people. That is the stand of the Japanese people. We are often misrepresented in Europe and America as "born fighters" but we have never fought, during our national existence, a guerilla war. Whenever we have fought, we fought for the honour and independence of the nation and the freedom and happiness of our people.

and happiness of our people.

Now 1 thank you for your patience, and for the permission accorded me to speak before you and permission accorded me to speak before you and exchange our feelings at this moment through the medium of the English language. I have many things more that I should like to say to you particularly at this moment. Being the last speaker this evening. I ought perhaps to conform to your old saying, "Last, but not least" and say a great deal on matters of critical moment; but on the contrary, I will say "last and least" to-night; because do not like to disturb the peace of the table

The party broke up at about 10 o'clock after a most successful evening.

FACTORY GIRLS' LIFE IN JAPAN.

(COMMUNICATED.)

Eight years ago articles appeared in the Japanese papers pointing out the evils prevalent in modern cotton factories. readers of those revelations were filled with they read, but were comforted on hearing that the Government intended to thoroughly over President, I must ask you to excuse me for not observing the usual rule to appear in foreign evening dress; but as I was invited to a Japanese dinner to-night, I at first declined your kind invitation. However I was requested by your Secretary to come here irrespective of dress, even though the dinner might be over. My appearence only, he said, was needed, and no more. Now I know what you wanted of me to-night, for your President has called upon me and you want me to say something.

Although I am dressed in Japanese costume yet the heart under it beats in English. And this is not my case only: there are many thousands—millions do not in the many to the there is not my case only: there are many thousands—millions and sleep being six hours out of the twenty-four. This, it is needless to say, is more than any ordinary constitution can that the Government intended to thoroughly

the sea around their coasts. It is with the greatest Treaty of Comity and Commerce was made with heads and that their lives seem to them a pleasure that I hear such sentiments so warmly England and other European Powers; therefore expressed by this distinguished assembly. With such Occidental civilization was first introduced to Japan five holidays in the year, there are no rest five holidays in the year, there are no rest days in most factories, except when the day and night shifts of operatives are exchanged, they then have some leisure, but at such times all the machinery has to be cleaned. ment, and through them the best qualities of Anglo-Saxon civilization were firmly engrafted upon the Japanese mind. Maintaining and carefully preserving the fundamental principle of the ancient Japanese monarchy our nation has since undergone many social and political changes while incorporating the spirit and freedom of the Anglo-Saxon nations. You all know well how courageously English people and statesmen met face to face the invading tide of the French Revolution, and finally succeeded in crushing down the erroneous and dangerous ideas of militarism and asserting those of liberty and freedom. Again we remember well of these bourses he is comparison of the women factory workers in Japan with those in England, we find the comparison most unfavourable to the former. No woman in any English before 6 a.m. or to work later than 6 p.m. with a whole day off on Sunday and half holiday on Saturday, nor in any but exceptional cases is she allowed to work more than 10 hours out of the twenty-four. Out Comparing the condition of the women facof these hours she is given two hours for meals, and she is never allowed to work more than five hours on end.

This arrangement leaves the English factory girl with twelve hours at her own disposal, twelve hours which may be spent away from the factory and its surroundings, On the other hand, the whole rest the Japanese factory girl has is spent in most cases within the factory walls. For, according to a system peculiar to Japan, sometimes as many as 2,000 girls are sometimes boarded together in dwellings within the factory walls, or in the very precincts of the factory. Thus never for a minute can they free themselves from the feeling of oppression, or the remembrance of toil. The Cox sion, or the remembrance of toil. The Cox and Box system is observed. When half have risen and are at work the other half are in possession. Most of the workers in the large factories are girls brought up from the country on a three years' contract. It is not an easy matter to procure operatives, so the agents who fetch the girls are given so much commission on each girl they succeed in persuading to accompany them. The usual rate at which they are paid is one yen per girl and they can aim at getting 500 or more.

It can easily be understood how unscrupulous agents will use all manner of wiles to allure and attract the girls, and the poor deluded things often accompany them with the idea that they are going to a regular palace of ease and plenty. When they discover the real facts of the case the disappointment they experience is most painful. Under the stress of grinding work, poor food, and the effect of night work, these once strong and healthy girls grow daily weaker and weaker. Many die from consumption, others from sheer hopelessness. A well known worker among English factory girls once said that she had found more natural wit and humour among them than among any other class of people with whom she had had to deal.

Think of this and then look for a moment at their poor wretched sisters in Japan whose stock of vitality soon becomes so small that righteous indignation at the abuses of which they begin to feel that they are, in truth, what their managers seem to deem them-mere machines, but worse off than machines in most respects, being sufficiently human in spite of all to be deeply conscious of their misery and degradation. For no-thing can be more degrading to the ideal of womanhood than for women to be helplessly at the mercy of coarse underlings who at night often strike them should they not be able to keep awake. Some girls have continuous headaches resulting from blows. When they have complained of such treat-ment at the office there has been no redress,

There are also many not complain. These result for the most part from the inattention of those in responsible positions to details which of necessity incur both time and trouble and their power to ameliorate the con-expense. For though there are dispensaries, ditions under which the women have resident doctors, nurses in uniform and all outward forms of order, in some factories the mats in the wards are so disgracefully dirty and full of vermin that the girls would far rather suffer the ills they have than resort to evils of which they are only too well aware. When the girls do go into such hospitals the attention they get is so scant that they are really better off out of them. In one factory a girl who had been ill for fifty days had never once been washed during that period. Her nails were an inch long. In another factory hospital two rows of girl patients were seen lying on " futon " packed together like herrings, side by side with their feet to the wall and only a passage of two feet between those lying one way and those lying the other. In this same ward a patient died early one evening, and her body was not removed until the following morning, an occurrence which helped further to aggravate the nervousness and misery of the girls who were left. Again, in another factory one day the two nurses had gone out on the spree because, forsooth, there were so few patients to attend. Of these patients, two were dying and one overcome by violent thirst was seen feebly dragging herself across the room to a tray in the corner, on which stood an empty teapot and cups, where she poured dregs from one teacup into another and drank them up. Surely if the factory companies go to the expense of hospitals and staff, some plan should be arranged by which all such abuses would be avoided. As it is, most of the Companies are ashamed of their hospitals, and do not care for kind Japanese ladies from outside to visit the It would be well if trained and well educated ladies as nurses, with diplomas, in the employment of the Government had free access to the factory hospitals to see that the laws of nursing are observed, and to report on inefficiency. Another great evil which ought to be stopped is child labour. We would re-mind readers that not only elder girls and women but also children have to suffer from the evils mentioned, evils of excessive work and poor food. Children's natural heritage is one of joy. But the lines which we quote below are more eloquent than words of ours and as true for the children of the East as for the children of the West: for the children of to-day as for the children of half a century ago.

斯特普亚基兰月昔日第三種医療協定研

Thay look up, with their pale and sunken faces;
And their looks are sad to see,
"Your old earth," they say, "is very dreary;
Our young feet," they say, "are very weak;
Few paces we have taken, yet are weary:
Our great rest is very far to seek.
Ask the aged why they weep, and not the child-

For the outside earth is cold.

And we young ones stand without in our bewildering, And the graves are for the old,"

And the graves are for the old,

They look up, with their pale and sunken faces,
And their look is dread to see,
For they mind you of the angels in high places,
With eyes turned on Deity.

"How long," they say, "how long, O cruel nation,
Will you stand and move the world on a child's
heart.—

Stifle down with a mailed hand its palpitation

Stiffe down with a mailed hand its papitation.
And tread onward to your throne amid the mart?
Our blood splashes upward, O gold heaper,
And your purple shows your path!
But the child's soul, in the silence, curses deeper
Than the strong man in his wrath."

Of course it must be understood that the ed to receive contributions to this end,

managers of all the factories in Japan are not thoughtless and inhuman. There are several conscientious and enlightened men, who are doing all that is in to labour. There are good companies. The superintendents in these factories' boarding houses are as a rule, bright and educated young women, who treat the girls with courtesy and kindness. Unfortunately, these factories even have their abuses, where the practice of night work is enforced.

One who has given much attention to this sad subject of Japanese child-labour writes with regard to Japanese factories: "Firstly they differ from the English ones in this particular that inside the walls of the it is a rush for gold, not fox-huntin factories there are sometimes thousands of interrupts the judicial proceedings. girls living there as boarders, most of them drawn from the labouring farmer class living in the remote country districts. They have been accustomed to an out-of-door free life, and when more or less prisoners within the four walls of the factory they feel their privation of liberty (especially those who have had the brightest prospects put before them by unscrupulous agents). Disap-pointed, they often try to escape and failing sometimes pine away long before their contract is over. The long hours, and more specially the night work, saps their vitality. In busy times I have known girls to be put on for 15 hours out of the 24 and in other factories for 18 hours. The agitation about factory laws which commenced about eight years ago, has not resulted in legisla-tion yet. All the good managers in the factories wish that the night work should be stopped. They deplore an evil which they have no power to remedy. If the foreign residents who see the brightly lit up factories at night could imagine the unnatural sight of weary little children keeping a long night vigil from 6 to 6 they would find their sleep disturbed. What a contrast are the girls when they come up fresh from the country to a factory to what they become after a year of work. Some observers have seen the changes, and their hearts bleed. Many children who ought to be playing with dolls are working in the factories for 12 hours; poor little girls; so lifeless and so sad, the long hours of work, the monotony of existence, the loss of strength, home-sickness-the picture conjured up can hardly fail to bring tears to the eyes of the kind-hearted."

Happily all the poor factory girls are not quite without comforters. There are a few ladies who devote their whole time to teaching and entertaining them. They have been much handicapped in their work by the lack of suitable books to give them. Now really entertaining ones can be bought, but an enormous number are needed and without aid it is impossible to cover the ground. Every time the teachers visit the factories they like to leave something behind to brighten the lives of the girls--the number in all is about 5,000-but to give one sen's worth of literature to each once would cost 150 ven. Then there are the outside boarding houses, sometimes even more wretched than the others, where there are many thousands under the control of unscrupulous proprietors. Therefore the public are asked to lend a helping hand. Who can tell the boon of sunshiny thoughts which may come through a book to refresh the young toilers in Japan? Mechanical toys or dolls are also needed. Mrs. Townend, Negishi, and Mrs. McArthur, 211, Bluff, will be pleasNOTES ON CURRENT EVENTS.

A well-known hunting song, an old established favourite in England, tells how a meeting of the foxhounds at a certain county town led to the adjournment of Her Majesty's Court of Assize.

The Judge sits in Court: he gets wind of the sport, For the lawyers apply to adjourn; No witnesses come and there're none found at home, They've followed the horn and the hound, Says his Lordship, great fines they must pay If they will not my summons obey;—
But us very fine sport, so we'll break up the Court,
And we'll all go a hunting to-day.

A telegram from Albuerque, New Mexico, in the New York Commercial, brings the old song back to memory, though in this case it is a rush for gold, not fox-hunting, that is the story, revised version :-

Messages from Hillsboro, N. M., confirm the reports of the discovery of bonanza gold ore near the old Hillsboro placer workings, which had been abandoned. The sand is exceedingly rich, and it is said that it can be separated by blowing the sand as it falls from hand to hand.

said that it can be separated by blowing the sand as it falls from hand to hand.

Judge Parker has adjourned the Third Judicial District Court, now sitting in Hillsboro, and the entire court, officers and jurymen have rushed to the scene of the find.

The greatest excitement prevails in Hillsboro, Many large nuggets have been found already, and miners from all over Sierra County are flocking into Hillsboro by stage, on horseback and on foot. Hillsboro is in the heart of the Sierra County

mining district, and was once one of the famous placer camps of the Southwest. Of late years it has been almost abandoned, due to the apparent workbeen almost abandoned, due to the apparent working out of the rich ore. Only a few prospectors have remained in the district. When the find was first reported it was said that one rich streak of placer dirt had been found. It is now said that the sand is showing richer with every spadeful, and the richest find New Mexico has known is believed to be sure.

A singular statement has been made by a leading vernacular journal and is now going the rounds of the local English newspapers-a statement to the effect that the Lord Mayor of Melbourne, Sir Malcolm McEacharn, has offered to lead a thousand Australian volunteers to the assistance of Japan in the event of war. We need scarcely say that no such absurd offer was ever made. Information . was privately conveyed, through the Lord Mayor, that many volunteers were offering their services to Japan, but as to Sir Malcolm's leading them, or associating himself in any way with the movement so long as he occupies an official position, the notion is so palpably silly that we are astonished to find it treated seriously by any newspaper.

There is a rumour that the Russian Minister of War, General Kuropatkin, is likely to visit Port Arthur soon in a private capacity. Such an event seems scarcely credible, for unless the horizon clears very unexpectedly in the near future the Minister's services would be essential in St. Petersburg.

From the 20th of this month all ordinary telegrams will cease to be sent from the office at Takeshiki in Tsushima.

The Countess of Minto is said to have been greatly charmed with her visit to Japan, and to have shown her appreciation since her return to Canada, by taking every occasion to eulogise the civilization of this country and express grateful appreciation of the hospitality shown to her here.

We take the following from the New York Commercial:

San Francisco, December 20.

A dispatch from New York states that Mrs. A. S.
Rosenthal, wife of a silk importer in that city, has
succeeded in establishing her claim to a share of a
\$25,000,000 estate, consisting of valuable lands in

The chief discovery of the year in the Roman excavations was that of the foundation of the Equus Domitiani, the colossal equestrian statue of Domitian described by Statuis in the Silvae. The foundation consists of concrete, in which some of the original beams and planks are still embedded. It blocks one of the subterranean galleries, supposed to have been built by Julius Cæsar in connection with the gladiatorial shows. The statue, which seems to have entirely disappeared occupied a central position in the Forum, being about six times life size, and promises to take fifty thousand and must have dominated the surrounding worth of war bonds. As yet Tokyo temples. It faced the temple of Julius, and behind it lay those of Vespasian and Concord. The excavation, begun in August on the site of the Ara Pacis Augustæ, has been stopped for the winter by an inflow of water, and the necessity for underpinning in Tokyo on Monday evening. It was the Palazzo Fiano Ottoboni and the Via hawked about the city by stentorian criers Lucina, about sixteen feet below which the and a great many folks bought it only to find base of the monument lies. This monument that it contained chiefly a list of the success commemorated the return of Augustus from ful combatants in the wrestling matches the western provinces in B.C. 13, and his achievement of peace throughout the Roman empire. It was finally dedicated by the following sentence, which evidently was Senate on January 30, B.C. 9. The sculptured panels of the enclosing wall form the masterpiece of Augustan sculpture. Along the outer face ran a frieze representing a procession, in which Augustus, his family, and the great ecclesiastical dignitaries of Rome appear. A panel of this frieze is now partially uncovered, which fills a gap between partially uncovered, which fills a gap between two at present in the Uffizi at Florence, and and dramatist, has been satirizing the Engis thought to contain the figures of Livia and Julia, the wife and daughter of the emperor.

two large private banking houses. Since then it has absorbed no less than twenty separate joint-stock and private bank-ing concerns. Lloyds Bank has twelve offices in London, two hundred and sixty country branches and one hundred and twenty sub-branches and agencies. For the past five years it has paid dividends of 1834 per cent to its stockholders, of whom there are about twelve thousand. Lloyds Bank is now much the most powerful banking institution in England, with the exception of the Bank of England. It was announced the other day that arrangements have practically been completed for the absorption by Lloyds Bank of the Liver-pool District Banking Company. With the absorption of this company Lloyds Bank will have deposits and current account balances amounting to \$360,000,000. This compares with \$5,830,000 in 1863. No other bank in the world shows such a remarkable expansion.

With regard to the short-period loans authorized by the recent Imperial Ordinance at rates not exceeding 6 per cent, it is thought probable that a sum of a hundred million yen will be raised at once in that manner. The Shogyo Shimpo affirms that such a reference with them, and that preliminary measures are now in progress. We are inmeasures are now in progress. clined to think that the statement is exaggerated. The Government has several sources of supply in immediate sight without who fell into a mistake in their judgment that the entertainment would be repeated on the such extensive recourse to domestic loans, against Mr. Tachibana, have had their re- 28th inst.

and about Melbourne, Australia. Mrs. Resenthal is The issue of a loan amounting to 100 millions said to be one of six heirs. would be an extreme measure. On the other hand, the Minister may possibly think, and experience favours the idea, that the first issue of such a loan is likely to be the most readi ly subscribed and he may therefore be in-clined to make a big coup forthwith. From what Mr. Sonoda said at the recent banquet in Tokyo it is probable that the money will be put up at once. Meanwhile voluntary subscriptions continue to reach the Treasury. Seventy-five names were published yesterday. Among them we find the name of Mr. Abe of Yokohama, who gives ten thousand yen worth of war bonds. As yet Tokyo has not joined this movement, which is confined to Kobe, Osaka, Kyoto, Yokohama and Nagoya.

> As an example of gulling an anxious public some credit belongs to an extra issued of the day, a statement that French marines had joined the legation guards in Seoul, and

** of ** * to * * ed * * * * the * * * has arrived.

If that is not feeding the public with chaff we do not know what is,

lish, in a play he calls " Little Mary," for eating too much, and his comedy has, through its own direct effect and that exercised by world during the last thirty-five years is to a consideration of the subject. Oddly Lloyds Bank of London, remarks the New enough, almost simultaneously with Nork Commercial. This bank was a subject to a consideration of the subject. in 1865. Within three months it absorbed Fletcher, an English merchant resident in Italy, has made a serious attack on the cating habit. He does not confine his assault to the English, says the Chicago Chronicle, but asserts that it is the rule with nearly "everybody who can get the chance" to eat too much and not to eat it in a right way. By experiments the to eat it in a right way. By experiments with respect to the chance of the on himself and officers he claims to prove that even the so-called daily ration prescribed by science is 50 per cent too large. He holds that the energy needed to digest the surplus half is a total loss of vital force. He holds, also, and this is the gist of his theories, that a worse fault than eating too much is not masticating thoroughly, and that less than half in amount of food, masticated four or five times as long as is customary, sustains life, strength and flesh far better than is now done and does not furnish the causes of indigestion and many of the diseases common among all peoples. It is said that the American War Department is now making thorough investigation of the subject, which may be said to be a guarantee that it is no joke. It is a curious theory and not the least of its possibilities are economic. If nearly everybody eats 50 per cent too much and all the people of the United States could be educated to eat according to Mr. Fletcher's theory, the saving, subtracted from the daily solution was announced by the Minister of theory, the saving, subtracted from the daily finance to the bankers at his recent conwould create disturbance in the market and a readjustment of occupations all along the

signations accepted. They committed the blunder of finding the accused guilty of violating a law which had not been enacted at the time he committed his offence.

The foreign officers and men that are navigating the two new cruisers Nisslan and Kasuga to Japan, are likely to receive a very warm welcome. It is just in the nature of the Japanese people to show their glad acknowledgement of such services. The /iji Slumpo has a leading article on the subject and the Tokyo Chamber of Commerce is moving.

FIRES.

The fire at Messrs. Heller and Co.'s godown, at No. 176-A. Yokohama on Friday evening proved more disastrous than was at first imagined. The godown was gutted and through the falling in of the roof much of the valuable merchandise stored therein could not be salved. A list of foreign companies interested shows that the insurance runs up to nearly yen 130,000, as follows :-

Fire broke out on Wednesday about 6 p.m. in the two-storied godown of Messrs. Becker and Co. at No. 195 Yamashitacho, Yokohama. The Fire Brigade was promptly in action, but the ontbreak was subdued by a supply of water by means of buckets. Superintendent Morgin reports that the floor had been set fire to from the outside by the use of straw saturated with kerosene, from which incendiary act a serious conflagration might have resulted.

Early on the morning of Jan. 18th, fire broke out at Sarugaku-cho, Kanda, Tokyo, destroying 16 houses and damaging 14. The cause is

at the compound of the Shinto temple, Chiba-Jinsha, Chiba prefecture, destroying the temple and its offices as well as four dwellings. Mr. Y. Chiba (65) the chief priest, lost his life while endeavouring to save the sacred image. The cause is not yet known,

VAUDEVILLE AT THE U.S. NAVAL HOSPITAL.

A most enjoyable entertainment was given at the U.S. Naval Hospital on Wednesday evening, the proceeds being devoted to the fund for equipping the hospital gymnasium. Under the supervision of Dr. Garton the concert hall had been very tastefully decorated for the occasion, the attree consciell presenting a fine appearance.

been very tastefully decorated for the occasion, the stage especially presenting a fine appearance. The fare provided was of the best and distinctly varied in character. Mr. Brady, though suffering from a severe cold, gave three turns, each of which was, of course, vociferously encored. Messrs. Aslet and Bernard also met with a very warm reception for their banjo duets. The second-sight act created much amusement. Mr. C. H. Thorn, gave some clever conjuring tricks, some of Thorn gave some clever conjuring tricks, some of which were loudly applauded. Mr. Tucker, in his coon song, and Mr. Mann and Mr. Somerton were also heartily received, and Mr. Windett's comic songs provoked much laughter. All the accompaniments (with one exception, when Mrs. Thorn presided at the piano) were played by Mr. Berrick.

THE NEUTRALITY QUESTION.

more and more practical form. We therefore national morality, Japan would justify Eng- ally the same principles apply as when choosing a personal friend." The Kokumin Shimbun similarly takes for its text the evident ambiguity of Germany's attitude at this juncture. Germany's statesmen to-day flow, China would come out minus the cradle the situation in the Far East is clearly her; have often been involved in heavy ese statesmen, and its logical sequel was though the Emperor William the Second Europe few regard Germany other than as that the Middle Kingdom should strike into is universally admitted to be a great man, it the great stirrer-up of troubles in the world. the quarrel on her own account, so as to may be doubted whether he has any definite. Thus there are many conjectures about her preserve a tangible right to be heard in the and thorough policy. Several incidents of attitude towards the Far-Eastern question final court of settlement. But it would ap recent history are adduced in support of that and many criticisms. But we believe pear that Great Britain's representations theory, prominent among them being Ger- that she will maintain strict neutrality. have reassured the Peking Government as to many's action with regard to her convention Should she again have recourse to prothat point, and that, consequently, China is with England concerning the Far Eastern cedure such as she adopted on the occasion of the triple alliance (in 1895), what could can be easily approached by a hostile squaso unwise and unprofitable a course."

Russia happens just now to be stricken with her people's disgust, has to act a part wholly much difficulty in conjecturing.

PLANS OF CAMPAIGN.

ONLY the Japanese themselves know what line of action they contemplate in the event of war with Russia, and we may be quite sure that the Japanese will keep their counsel. In the middle of December people in Europe were speculating much about this topic and many of them had fully persuaded themselves that they knew exactly what would happen. One thing they regarded as certain, namely, that Japan would not attempt to destry the Russian fleet in the neighbourhood of Port Arthur. By adopting that course she would deprive herself of two of the prominent advantages her squadron possesses, speed and homogeneity. Rather would she choose some plan of imposing upon Russia the obligation of attack. Such a plan would be the occupation of Korea, where Russia could not tolerate her armed presence, but where, at the same time, it would be very difficult for day of the ninth month of the thirty-fourth year. Russia to get at her. The probabilities, then-according to these forecasts-are that Russia would deliver her blow at Nagasaki, mentary Treaty of Commerce and Navigation, since "without beating Japan there and designed to facilitate and promote the commersecuring a coal supply the Russian fleet could not hope to round Japan and attack Tokyo and the farther side of the island, fifteen hundred miles from its base." It will be observed that this conjecture takes no account of Japanese land Imperial Order of the Rising Sun, Consul made such regulations as are necessary for affordfortifications. It assumes that Nagasaki General;

she hope to gain? In Europe she would dron and that this same is true of Yedo unquestionally accentuate France's dislike Bay. But there is one thing that these and would offend English sentiment, while prophets do take into account; that is the at the same time she would provoke Ame- contingency of Russia sitting quietly in rica's opposition. In the Far East she would Manchuria and leaving Japan to disport be making an enemy of our country, Japan, herself in Korea. Could she do that? which the Powers can no longer leave out of Many people think that she might; think their account. In a word, for the sake of even that from Japan's presence in Korea gaining the goodwill of Russia alone, she as an armed occupier Russia would derive a would take the risk of isolating herself new mandate for her own tenure of Manfrom the sympathy of all the civilized nations. churia. It is not easy to share that view. We can not believe that the far-seeing In the first place, Russia, while admitting that German EMPEROR will so easily ignore Japan is entitled to a voice in the destiny of the principles of right or that he will adopt Korea, denies that she has any right to be heard about Manchuria. Therefore nothing These comments can not but have interest that Japan does outside Manchuria could theofor our German readers. They have interest retically affect Russia's arbitrary pretensions for us all. Of course no thinking person there. But it is more than doubtful whether can admit for a moment that the morality Russia would permit Japan to hold Korea of the German nation justly exposes it to and dominate the sea between the peninsula any charge of international chicanery. There and this empire. For that would mean that is probably no people on the face of the the Russians would have to abandon all globe whose instincts and inclinations would their enterprises in the Yalu Valley, and prompt the pursuit of higher ideals. But that their direct line of communications bethe terrible difficulty of position perpetually tween Liaotung and Vladivostock would be oppresses Germany. She is compelled to severed. They would have either to crush consider Russia before everything, and since the Japanese navy or to send all their ships round by the east coasts of the Japanese a fever of territorial aggression more violent islands, with the added difficulty that to enter than anything recorded since the days of or emerge from the Gulf of Tartary and the ALEXANDER or GHENGIS, Germany, greatly to Japan Sea, either the strait of La Perouse or that of Tsugaru would have to be passed. uncongenial to her own heart. What edu- In fact, the sea approaches to Vladivostock cated Germans think of it all, there is not would be practically sealed by a Japanese occupation of Korea. That is where Russia has a distinctly vulnerable point. We know nothing about Japan's plan of action in the event of hostilities breaking out. What we are doing here is merely discussing the soundness of the views put forward in Europe a month ago, and our conclusion is that whereas Russia's presence in Manchuria has only remote consequences for Japan, Japan's presence in Korea would have immediate consequences for Russia, and would compel her to attack or to accept the necessity of occupying an inconvenient and humiliating position. As to our own belief concerning Japan's programme we say nothing.

> AND NAVIGATION BETWEEN JAPAN AND CHINA.

Following is the text of the above treaty:-

of Meiji, corresponding to the twenty-fifth day of the seventh moon of the twenty-seventh year of Kuang-hsu, have resolved to conclude a Supplecial relations between Japan and China, and have for that purpose named as Their Plenipotentiaries, that is to say:

His Majesty the Emperor of Japan, Hioki Eki, Jugoi, Fifth Class of the Imperial Order of the Rising Sun, First Secretary of Legation, and Odagiri Masnosuke, Shorokui, Fifth Class of the

And His Majesty the Emperor of China, Lu Hai-huan, President of the Board of Public Works, Steng Hsuan-huai, Junior Guardian of the Heir Apparent, formerly Senior Vice-President of the Board of Public Works, and Wu Ting-fang, Senior Vice-President of the Board of Com-

Who, after having communicated to each other their Full Powers found to be in good and due form, have agreed upon and concluded the fol-

lowing Articles:-Art. I.—Whereas China, with the object of reforming its fiscal system, proposes to levy a surtax in excess of the tariff rates on all goods passing through the Custom Houses, whether maritime or inland and frontier, in order to compensate in a measure for the loss incurred by the complete abolition of likin, Japan consents to pay the same surtax as is agreed upon between China and all the Treaty Powers. With regard to the production tax, consumption tax and excise, and the taxes on native opium and salt, leviable by China, Japan also consents to accept the same arrangements as are agreed upon between all the Treaty Powers and China. It is understood, however, that the commerce, rights and privileges of Japan shall not, on account of the above, be placed at any disadvantage as compared with the commerce, rights and privileges of other Powers.

Art. II.-The Chinese Government agrees to permit Japanese steamship-owners to erect, at their own expense, appliances for hauling through the rapids of that part of the Yangtze-kiang be-tween Ichang and Changking. But as the inter-ests of the population of the provinces of Sze-chuen, Hunan and Hupeh are involved, it is therefore necessary that the approval of the Imperial Maritime Customs be obtained before such appliances may be so erected.

These appliances, which shall be at the dis-posal of the vessels, both steamers and junks, shall not obstruct the waterway nor interfere with the free passage of junks or of persons on the banks of the river. Such appliances shall be subject to special regulations to be drawn up by the Imperial Maritime Customs.

Art. III.—The Chinese Government agree that any Japanese steamer capable of navigating the inland waterways, upon reporting at the Imperial Maritime Customs, may proceed for the purpose of trade from a treaty port to places inland, so reported, on complying with the Original and Supplementary Regulations for Steam Navigation Inland.

Art. IV .- In case Chinese subjects conjointly with Japanese subjects organise a partnership or company for a legitimate purpose, they shall equitably share the profits and losses with all the members according to the terms of the agreement or memorandum and articles of association and the regulations framed thereunder, and they shall be liable to the fulfilment of the obligations imposed by the said agreement or memorandum and articles of association and the regulations framed thereunder as accepted by them and as interpreted by Japanese Courts. Should they fail to SUPPLEMENTARY TREATY OF COMMERCE fulfil the obligations so imposed and legal action AND NAVIGATION BETWEEN JAPAN AND be taken against them in consequence, Chinese Courts shall at once enforce fulfilment of such obligations.

It is understand that in case Japanese subjects conjointly with Chinese subjects organise a part-nership or company, they shall also equitably share the profits and losses with all the members according to the terms of the agreement or memorandum and articles of association and the regulations framed thereunder. Should such Japanese subjects fail to fulfil any of the obligations imposed by the said agreement or memorandum and articles of association or by the regulations framed thereunder, Japanese Courts shall in like manner at once enforce fulfilment of

such obligations by them.

Art. V.—The Chinese Government agree to make and faithfully enforce such regulations as are necessary for preventing Chinese subjects from infringing registered trade-marks held by

Japanese subjects.

The Chinese Government likewise agree to ing protection to registered copyrights held by

Japanese subjects in the books, pamphlets, maps and charts written in the Chinese language and specially prepared for the use of Chinese people.

It is further agreed that the Chinese Government shall establish registration offices where foreign trade-marks and copyrights, upon ap-plication for the protection of the Chinese Government, shall be registered in accordance with the provisions of the regulations to be hereafter framed by the Chinese Government for the purpose of protecting trade-marks and copyrights. It is understood that Chinese trade-marks and

copyrights properly registered according to the provisions of the laws and regulations of Japan will receive similar protection against infringe-

ment in Japan.

This Article shall not be held to protect against due process of law any Japanese or Chinese subject who may be the author, proprietor or seller of any publication calculated to injure the well-being of China.

Art. VI.—China agrees to establish itself, as

Art. VI.—China agrees to establish itself, as soon as possible, a system of uniform national coinage and provide for a uniform national currency which shall be freely used as legal tender in payment of all duties, taxes and other obligations by Japanese subjects as well as by Chinese subjects in the Chinese Empire. It is understood however that all Customs duties shall understood, however, that all Customs duties shall continue to be calculated and paid on the basis of the Haikwan tael.

Art. VII.-As the weights and measures used by the mercantile and other classes for general and commercial purposes in the different provinand commercial purposes in the dimerent provin-ces of China vary and do not accord with the standard fixed by the Imperial Government Boards, thus resulting in detriment to the trade of Chinese and foreigners, the Governors General and Governors of all the provinces, after careful inquiry into existing conditions, shall consult together and fix upon uniform standards which after a Memorial to the Throne for sanction, shall be adopted and used in all transactions by officials and people throughout all the Empire. These standards shall be first used in the places opened to foreign trade and gradually extended to inland places. Any differences resulting from divergence between the new weights and measures and those now in vogue shall be equitably settled, whether by way of increase or decrease, according to the amount of such difference.

Art. VIII.—The Regulations for Steam Navi-gation Inland of the fifth moon of the twentyfourth year of Kuang-hsu and the Supplementary Rules of the seventh moon of the same year having been found in some respects inconvenient in working, the Chinese Government hereby agree to amend them and to annex such new Rules to this Treaty.

These Rules shall remain in force until altered

by mutual consent.

Article IX.—The provisions of all treaties and Article 1A.—The provisions of all treaties and engagements now subsisting between Japan and China, in so far as they are not modified or repealed by this Act, are hereby confirmed; and it is hereby expressly stipulated in addition that the Japanese Government, Officers, Subjects, Commerce, Navigation. Shipping, Industries and Property of all kinds shall be allowed fee and fell perty of all kinds shall be allowed free and full perty of an kinds shall be allowed free and full participation in all privileges, immunities and advantages which have been or may hereafter be granted by His Majesty the Emperor of China or by the Chinese Government or by the Provincial or Local Administrations of China to the Government, Officers, Subjects, Commerce, Navigation, Shipping, Industries or Property of any other particip. other nation.

The Japanese Government will do its utmost to secure to Chinese Officers and Subjects resident in Japan the most favourable treatment compatible with the laws and regulations of the

Empire.

Art. X.—The High Contracting Parties hereto agree that, in case of and after the complete withagree that, in case of and after the complete with-drawal of the foreign troops stationed in the province of Chihli and of the Legation guards, a place of international residence and trade in Peking will be forthwith opened by China itself. The detailed regulations relating thereto shall be settled in due time after consultation.

The Chinese Government agree to open to

foreign trade, within six months from the exchange of the Ratifications of this Treaty, Ch'ang-sha-fu in the province of Hunan on the same footing as the ports already opened to foreign trade. Foreigners residing in this open port are to observe the Municipal and Police Regulations on the same footing as Chinese residents, and they are not to be entitled to establish a Municipality and Police of their own within the limits of this treaty port, except with the consent of the Chinese authorities

The Chinese Government agree that, upon the exchange of the Ratifications of this Treaty, Mukden and Tatungkow, both in the province of Shengking, will be opened by China itself as places of international residence and trade. The selection of suitable localities to be set apart for international use and occupation and the regulations for these places set apart for foreign re-sidence and trade shall be agreed upon by the Governments of Japan and China after consultation together.

Aet. XL.—The Government of China having

expressed a strong desire to reform its judicial system and to bring it into accord with that of Japan and Western nations, Japan agrees to give every assistance to such reform, and will also be prepared to relinquish its extra-territorial rights when satisfied that the state of the Chinese laws, the arrangements for their administration

and other considerations warrant it in so doing.

Art. XII.—The present Treaty is signed in the
Japanese, Chinese and English languages. In order, however, to prevent future discussions, the Plenipotentiaries of the High Contracting Parties have agreed that in case of any divergence in the interpretation between the Japanese and Chinese Texts of the Treaty, the difference shall be settled by reference to the English Text.

Art. XIII.—The present Treaty shall be ratified by His Majesty the Emperor of Japan and His Majesty the Emperor of China, and the Ratifications thereof shall be exchanged at Peking as soon as possible and not later than six months.

from the present date.

In witness whereof the respective Plenipotentiaries have signed the same and have affixed thereto the seals of their arms.

thereto the seals of their arms.

Done at Shanghai this eighth day of the tenth month of the thirty-sixth year of Meiji, corresponding to the eighteenth day of the eighth moon of the twenty-ninth year of Kwang-hsü.

INLAND WATERS STEAM NAVIGATION.

ANNEX I.

1.—Japanese steamship-owners are at liberty to lease warehouses and jetties on the banks of waterways from Chinese subjects for a term nor exceeding twenty-five years, with option of renewal on terms to be mutually arranged. In cases where Japanese merchants are unable to secure warehouses and jetties from Chinese subjects on satisfactory terms, the local officials, after consultation with the Governor or Governor General or Minister of Commerce, shall arrange to provide these on renewable lease, as above mentioned, at current equitable rates.

2.—Jetties shall only be erected in such positions that they will not obstruct the inland waterway or interfere with navigation, and with the sanction of the nearest Commissioner of Customs; such sanction, however, shall not be arbitrarily withheld.

3.—Japanese merchants shall pay taxes and con-

tion, however, shall not be arbitrarity withheld.

3.—Japanese merchants shall pay taxes and contributions on these warehouses and jetties on the same footing as Chinese proprietors of similar properties in the neighbourhood. Japanese merchants may only employ Chinese agents and staff to reside in warehouses so leased at places touched at by steamers engaged in inland traffic to carry on their business. but Japanese merchants may wist these steamers engaged in inland traffic to carry on their business; but Japanese merchants may visit these places from time to time to look after their affairs. The existing rights of Chinese jurisdiction over Chinese subjects shall not by reason of this clause be diminished or interfered with in any way.

4.—Steam vessels navigating the inland waterways of China shall be responsible for loss caused to ripatian proprietors by damage which they may do to the banks or works on them, and for the loss which may be caused by such damage.

because there is reason to fear that the use of it by them would be likely to injure the banks and cause damage to the adjoining country, the Japanese authorities, when appealed to, shall, if satisfied of the validity of the objection, prohibit the use of that waterway by Japanese launches, provided that Chinese launches are also prohibited from using it.

Both Foreign and Chinese launches are prohibited from crossing dams and weirs at present in existence.

Both Foreign and Chinese launches are prohibited from crossing dams and weirs at present in existence on inland waterway where they are likely to cause injury to such works, which would be detrimental to the water service of the local people.

5.—The main object of the Japanese Government in desiring to see the inland waterways of China opened to steam navigation being to afford facilities for the rapid transport of both foreign and native merchandise, they undertake to offer no impediment to the transfer to a Chinese company and the Chinese flag of any Japanese steamer which may now or hereafter be employed on the inland waters of China, should the owner be willing to make the transfer.

In the event of E Chinesa company registered nder Chinese law being formed to run steamers on under Chinese law being formed to run steamers on the inland waters of China, the fact of Japanese subjects holding shares in such a company shall not entitle the steamers to fly the Japanese flag. 6.—Registered steamers and their tows are forbid-

6.—Registered steamers and their lows are sorona-den to carry contraband goods. Infraction of this rule will entail the penalties prescribed in the treaties for such an offence, and cancellation of the Inland Waters Navigation Certificate carried by the vessels,

Waters Navigation Certificate carried by the vessels, which will be prohibited from thereafter plying on inland waters.

7.—As it is desirable that the people living inland should be disturbed as little as possible by the advent of steam vessels to which they are not accustomed, inland waters not hitherto frequented by steamers shall be opened as gradually as may be convenient to merchants and only as the owners of steamers may see prospect of remunerative trade.

In cases where it is intended to run steam vessels on waterways on which such vessels have not hither.

on waterways on which such vessels have not hither-to run, intimation shall be made to the Commissioner of Customs at the nearest open port, who shall report the matter to the Ministers of Commerce. The latter, in conjunction with the Governor General or Governor of the province, after careful consideration of all the circumstances of the case, shall at once give their

approval. A registered steamer may ply within the waters 8.—A registered scanner may piy want toe waters of a port, or from one open port or ports to another open port or ports, or from one open port or ports to places inland, and thence back to such port or ports. She may, on making due report to the Customs, land or thin passengers or carro at any recognised places.

or ship passengers or cargo at any recognised places of trade passed in the course of the voyage; but may not ply between inland places exclusively except with the consent of the Chinese Government.

9.—Any cargo and passenger boats may be towed by steamers. The helmsman and crew of any boat towed shall be Chinese. All boats, irrespective of ownership, must be registered before they can proceed inland.

ceed inland.

10.—The above Rules are supplementary to the Regulations published in the fifth and seventh moons of the twenty-fourth year of Kuang-hsii, which remain in full force and effect in so far as they are not modified by the Rules now agreed upon.

The present Rules and the Regulations of the fifth and seventh moons of the twenty-fourth years of Kuang-hsu may hereafter be modified, as circumstances require, by mutual consent.

Done at Shanchai this eighth day of the tenth

Done at Shanghai this eighth day of the tenth month of the thirty-sixth year of Meiji, corresponding to the eighteenth day of the eight moon of the twenty-ninth year of Kuang-hsti.

Shanghai, the 8th Day of the 10th Month of the 36th Year of Meiji.

GENTLEMEN,—According to Article III. of the present Treaty the Chinese Government agree that any Japanese steamer capable of navigating the Inland Waterways, upon reporting at the Imperial Maritime Customs, may proceed for the purpose of trade from a treaty port to places inland, so reported, on complying with the Original and Supplementary Regulations for Steam Navigation Inland.

It is understood that all electrons Inland.

tions for Steam Navigation Inland.

It is understood that all classes of Japanese steamers, whatever their size, provided they are capable of navigating the Inland Waterways, may on complying with the Regulations receive an Inland Waters Certificate and carry on trade with inland places, and the Chinese Government will in no case raise difficulties and stop such steamers from plying to and from inland places.

diminished or interfered with in any way.

4.—Steam vessels navigating the inland waterways of China shall be responsible for loss caused to riparian proprietors by damage which they may do to the banks or works on them, and for the loss which may be caused by such damage.

In the event of China desiring to prohibit the use of some particular shallow waterway by launches, Excellencies.

Shanghai, the 18th Day of 10th Moon of the 29th Year of Kuang-hsü.

the 29th Year of Kuang-hsü.

GENTLEMEN,—We have the honour to acknow-ledge the receipt of Your Excellencies' despatch of this date, written with a view of preventing future misunderstandings, to the effect that, in accordance with the provisions of Article III. of the present Treaty, all classes of Japanese steamers, whatever their size, provided they are capable of navigating the Inland Waterways, may on complying with the Regulations receive an Inland Waters Certificate and ply to and from inland places, and that the Chinese Government will in no case raise difficulties and stop them.

and stop them.

During the negotiation of this Article, we received During the negotiation of this Article, we received a list from Your Excellencies of the Japanese steamers—viz. Sanyo Maru, Selagarua Maru, Hinga Maru, Vrato Maru, Neisei Maru, Heina Maru, Tako Maru, Yoshino Maru, Meiko Maru, Heina Maru, Kushino Maru, Mayah Maru, Kyo'o Mar., Horai Maru, Kwanko Maru, Ketko Maru, Kinrin Maru, Zensko Maru and Kohei Maru, ranging from one hundred and twenty-one tons to four hundred and tent ons register—plying from Chefoo to inland places in Manchurin, under Inland Waters Certificate and in accordance with the Regulations for Steam Navigation Inland, which vessels have not been prevented from doing so on account of their class.

At that time we instructed the Deputy Inspector General of Customs to make inquiries into the records of the Custom Houses, and he reported that the circumstances were in accordance with Your Excellencies' statement.

lencies' statement.

In consequence of the receipt of Your Excellencies, despatch we shall communicate with the Wai-wu Pu and request that instructions be sent to the Inspector General of Customs to take these circumstances into consideration and to art accordingly, and we have the honour to write this despatch for purposes of

ANNEX 4. Shanghai, the 8th Day of the 10th Month of the 36th Year of Meiji

of the 36th Year of Meiji

GENTLEMEN,—The provision contained in No. 9 of
the Supplementary Rules governing steam navigation on Inland Waters published in the seventh moon
of the twenty-fourth year of Kuang-hsit, regarding
the appointment of an officer to collect dues and
duties, not having in all cases been given effect to,
we have the honour to request that Your Excellencies'
Government will again issue instructions to all provinces to give strict effect to this provision, as it is a matter of importance. We trust that Your Excellencies will comply with

the request contained in this despatch and that you will favour us with a reply.

ANNEX 5

Shanghai, the 18th Day of the 18th Moon of the 29th Year of Kuang-hsü.

GENTLEMEN,—We have the honour to acknow-ledge the receipt of Your Excellencies' despatch of this date to the effect that, the provision contained in No. 9 of the Supplementary Rules governing steam navigation on Inland Waters published in the seventh navigation on Inland Waters published in the seventh moon of the twenty-fourth year of Kuang-hsü, regarding the appointment of an officer to collect dues and duties, not having in all cases been given effect to, you request that instructions he again issued to all provinces to give strict effect to this provision, as it is a matter of importance.

We have noted the above and have communicated with proper authorities in order that action may be taken, and have now the honour to write this reply for Your Excellencies' information.

ANNEX 6.

Shanghai, the 18th Day of 8th Moon of the 29th Year of Kuang-shü.

Shanghai, the 18th Day of 8th Moon of the 29th Year of Kuang-shii.

GENTLEMEN,—According to the provision of Article X of this Treaty, regarding the establishment in Peking of a place of international residence and trade, it is agreed that in case of and after the complete withdrawal of the foreign troops, now guarding the Legations and Communications, a place in Peking outside the Inner City, convenient to both paries and free from objections, shall be selected and set apart as a place where merchants of all nations may reside and carry on trade. Within the limits of this place merchants of all nationalities shall be at liberty to lease land, build houses and warehouses, and establish places of business; but as to the leasing of houses and land belonging to Chinese private individuals, there must be willingness on the part of the owners and the terms thereof must be equitably arranged without any force or compulsion. All roads and bridges in this place will be under the jurisdiction and control of China. Foreigners residing in this place are to observe the Municipal and Police Regulations on the same footing as Chinese residents, and they are not to be entitled to establish a Municipality and Police of their own within its limits

except with the consent of the Chinese authorities. When such place of international residence and trade shall have been opened and its limits properly defined, the foreigners who have been residing scattered both within and without the city walls, shall all be required to remove their residence thereto and they shall not be allowed to remain in separate places and thereby cause inconvenience in the necessary supervision by the Chinese authorities. The value and thereby cause inconvenience in the necessary supervision by the Chinese authorities. The value of the land and buildings held by such foreigners shall be agreed upon equitably and due compensation therefor shall be paid. The period for such removal shall be determined in due time, and those who do not remove before the expiry of this period shall not be entitled to compensation.

We have considered it to be to our mutual advan tage to come to the present basis of understanding in order to avoid future unnecessary negotiations, and we beg that Your Excellencies will consider and agree to it and will favour us with a reply.

ANNEX 7.

Shanghai the 8th Day of the 10th Month of the 36th Year of Meiji.

GENTLEMEN,—We have the honour to acknow-ledge the receipt of Your Excellencies' despatch of this date in which you state that—

"According to the provision of Article X of this Treaty, regarding the establishment in Peking of me place of international residence and trade, it is agreed that in case of and after the complete withdrawat of the foreign troops, now guarding the Legations and Communications, a place in Peking outside the Inner City, convenient to both parties and free from objections, shall be estected and set apart as a place where were both parties and free from objections, shall be selected and set apart as a place where merchants of all nationalities may reside and carry on trade. Within the limits of this place merchants of all nationalities shall be at liberty to lease land, build houses and warehouses, and establish places of business; but as to the leasing of houses and land belonging to Cliniese private individuals, there must be willingness on the part of the owners and the terms thereof must be equitably arranged without any force or compulsion. All roads and bridges in this place will be under the jurisdiction and control of China. Foreigners residing in this place are to observe the Municipal and Police Regulations on the same footing as Chinese residents, and they are not to be entitled to establish a Municipality and Police of their own within its limits expality and Police of their own within its limits ex-cept with the consent of the Chinese authorities. When such place of international residence and trade shall have been opened and its limits properly defined, the foreigners who have been residing scattered both within and without the city walls, shall all be required to remove their residence thereto and they shall not be allowed to remain in separate places and thereby cause inconvenience in the necessary supervision by the Chinese authorities. The value of the land and buildings held by such foreigners shall be agreed upon equitably and due compensation therefor shall be paid. The period for such removal shall be determined in due time, and those who do not remove before the expiry of this period shall not be entitled to compensation. trade shall have been opened and its limits proshall not be entitled to compensation.

we have considered it to be to our mutual advantage to come to the present basis of understanding in order to avoid future unnecessary negotiations, and we beg that Your Excellencies will consider and agree to it and will favour us

King Edward has invested Mr. James Knowles. founder, editor and proprietor of the Nineteenth Century, with the insignia of a Knight Commander of the Royal Victorian Order, and conferred upon him the honour of Knighthood.

- THE CANADIAN HABITANT."

The usual fortnightly meeting of the abovenamed Society was held at the Van Schaick Hall on Friday evening, the Rev. J. L. Dearing, D.D., presiding over a large attendance of members and invited friends. Mr. Dearing in introducing the Rev. C. J. L. Bates, who was to speak on "The Canadian Habitant," said that the lecturer was peculiarly able to place before them the habits, dialect, etc., of the French Canadian.

The Rev. C. J. L. Bates commenced by giving very fine reading of a poem entitled "The French Habitant." He then briefly outlined the history of Canada from the time of its discovery, speaking of the characters and deeds of many of the great Frenchmen who played such a conthe great Frenchmen who played such a conspicuous part in the development of the country. Proceeding, he spoke of the habits, sentiments, and religion of the French-Canadians, paying a fine tribute to their staunch loyalty to the British throne. This section (if it may so be called) of the lecture was nicely finished off by the reading of a poem, entitled the "Habitant's Jubilee Ode." Mr. Bates went on to speak of the poets, musicians, diplomatists, sculptors, etc., which Canada has produced, and brought his remarks to a happy close by reading the poem, "How Albani Sang." All the poems read were the compositions of Dr. William Henry Drummond, and as they each and all introduced the characteristic patois of the Habitant, they the characteristic patois of the Habitant, they conveyed capital word-pictures of the people he described. During the address number of magnificent pictures were thrown upon the screen, each of which were fully commented upon by the lecturer. This is the first time Mr. Bates has appeared before the Literary Society, but it is sincerely to be hoped that it will not be the last, as the general expression on Friday was that he bad furnished "one of the most enjoyable evenings the members have ever spent."

The pictures on Friday evening were shown to far better advantage than on former occasions, in fact they were the best we have ever seen at the Society's gatherings. This was due to the new electric apparatus which has just been imported from America through the instrumentality of the Rev. G. Allchin, of Osaka, a keen enthusiast in all matters pertaining to the magic-lantern.

At the conclusion of the lecture Mr. Dearing proposed a very hearty vote of thanks to Mr. Bates for the extremely enjoyable exposition he had given. The speaker then went on to refer to the good work done by Mr. Clarence Griffin, Mr. Allchin and others in refitting the lantern, saying he was sure the very best thanks were due to them for the amount of time and trouble they had devoted to assisting in giving the excellent entertainment that all present seemed to have

enjoyed. The second part of the programme has already been published, but we may mention that Ma-dame La Croix's French Canadian songs were highly appreciated, a hearty encore being accorded for her rendering of "L'Alouette." Miss Watt played a pretty pianoforte solo, and Mr. A. H. Atkinson gave a dainty rendering of two songs. Mr. Bates, however, was par excellence in his two further readings, having to bow his acknowledgements of the vociferous applause accorded to each. At the next meeting Mr. W. Karl Vincent has arranged "An Evening with Sir Arthur Sullivan."

KOBE CRICKET CLUB.

Pakenham, the President, being in the Chair. In opening the proceedings he said that the thanks of the Club were specially due to Mr. F. J. Bardens for presenting a cup to the member playing the best all-round game during the season, and to Mr. H. E. Bottlewalla for presenting a similar trophy to the member giving the best performance in the Interport match. The former cup was won by Mr. A. H. Gillingham and the latter by Mr. E. C. Jeffrey, and the Club was much indebted to the donors. The Committee's report stated that only one century was scored this season by a member of the Club, viz., Mr. A. H. Gillingham, 110, not out. The batting average was won by Mr. A. H. Gillingham with the very fine average of 57.71, while Mr. H. E. Green secured the bowling average at a cost of 9.56 runs per wicket. The balance sheet shows a credit balance carried forward of yen 7 to.66. Mr. G. C. Pakenham was unanimously re-elected President of the Club. and Mr. G. C. Murray, Captain of the Club; Mr. D. McLaren was re-elected Captain of the Baseball section; and the new Committee was balloted for, the following gentlemen being elected: - Messrs. A. W. Allen (Hon. Treasurer), A. H. Gillingham, H. E. Green, G. Watrous, and C. H. Lightfoot. Mr. F. J. Bardeus announced that in order to keep up the interest in the game he intended to give a cup again this year for the best all-round performance, on the same terms as before,

THE LAW COURTS.

CASE AGAINST A CHINAMAN.

La-tow, a Chinaman, was charged in the Yoko-hama District Court before Judge Hadano, on January 7th, with digging in the Cemetery at Byobugaura, near Negishi, with the purpose of stealing the bones of the departed. After hearing evidence, the Court acquited accused on the ground of insufficient evidence.

OBJECTION TO THE SEIZURE OF PROPERTY.

The hearing of an appeal brought by Mr. H. V. Gielen in the case which he brings against Mr. J. H. Jewett, petitioning that a judgment given in the Yokohama Local Court be quashed, began on Jan. 19th in the Yokohama District Court before

Judge Kato.
Mr. R. Masujuna was present for the appellant, and Mr. H. Sato for the respondent.
Appellant's counsel asked the Court to quash the

judgment given by the lower court and to sustain

the order seizing the property of Mr. J. H. Jewett.
Respondent's counsel contended that Mr. Jewett was a wealthy and popular raw silk ex-porter having offices in Yokohama, and Mr. Gielen had been one of his employees at the time when the former was partner in the firm of Messrs Bavier and Co. Mr. Gielen therefore was well acquainted with the financial position of Mr. Mr. Gielen seized, on September 23rd, 1903, the property of Mr. Jewett on an unreasonable claim for yen 4,604.80 just as the latter was about to leave for America on a business tour. To avoid trouble Mr. Jewett paid to the bailiff temporarily the amount claimed, but at the same time filed an objection to the seizure in the Yokohama Local Court, where judgment was subsequ-Mr. Gielen, however, appealed against this cancellation. His appeal seems to be entirely groundless as there was no necessity to seize the property. Mr. Jewett possesses several parcels of land in paraetual lease and heil-time in Vs.

The annual general meeting of the Kobe Gielen, Mr. Jewett would have paid it without Plaintiff's Counsel stated that plaintiff was em-Cricket Club was held on Thursday, Mr. G. C. any such extraordinary action as seizure through a bailiff. The only purpose Mr. Gielen would seem to have was to injure the fame of Mr. Jewett.

Mr. Masujima, appellant's Counsel, stated that the firm bearing the name of Bavier & Company was established by Mr. Gielen in accordance with Japanese law and was registered as a Goshi-Kaisha (Partnership Company) after Mr. Bavier, one of the partners, had retired. Mr. Jewett who was also one of the partners of the old firm had no connection with the new firm established by Mr. Gielen. In spite of this fact, Mr. Jewett, before the enforcement of the revised treaty, forged several private letters with which he registered the new firm of Bavier & Company. Afterwards he asked Mr. Gielen to return the books of the old firm which were kept by Mr. Gielen. This having been refused, Mr. Jewett seized the books, by which action Mr. Gielen sustained damage amounting to jen 2,604.80. To recover this loss, Mr. Gielen lodged a claim in the Court against Mr. Jewett and at the same time seized his property as the latter was leaving Japan and going to America. Mr. Gielen of course did not know when Mr. Jewett would return here.

Both parties then presented several documents to the Court as evidence after which Counsel entered on m brief discussion.

On Jan, 21st judgment was delivered rejecting the appeal.

T. BACHELOR v. THWAITES.

The hearing of this case, in which plaintiff claimed yen 2,500 with interest at the rate of 5 per cent per annum from Oct., 1902, till the execution of judgment, was resumed on Jan. 20th in the Yokohama District Court before Judge

Upon the assembling of the Court counsel for plaintiff repeated the explanation as to the claim as given in the previous hearing on Dec. 24th, which appeared in this paper the following day.

Defendant's counsel held that defendant made

Defendant's counsel heid that defendant made a contract with a third person to give a magical exhibition on joint account, in which project plaintiff proposed to invest yen 3,000. In October 1902, plaintiff paid yen 2,500 to defendant, at the same time promising that the remaining yen 500 would be paid in case of necessity. The parties agreed that plaintiff should have one-third of the profits from the performances or that defendant might obtain the sale rights. or that defendant might obtain the sole rights in the exhibition on payment of yen 4,500 nine months after the contract. Defendant, however, did not promise to bind himself with regard to the finds invested by Mr. Bachelor, in case of loss.

Defendant did not in September arrange with
plaintiff for any places where the exhibition should
be shown, but plaintiff insists that the parties agreed that the show should be given in the Osaka Exhibition of 1903. Before the opening of the 5th Osaka Industrial Exhibition the performance was shown in Tokyo and unfortunately the syndicate sustained heavy loss and it was well understood that the show was unpopular. The Magical Exhibition was removed to Shanghai Magical Exhibition was removed to shanghat where again it met with unfavourable results. The syndicate at first thought to recover these repeated losses by opening at the Osaka Exhibition, but they found they could not do it under the circumstances. Defendant was very sorry and informed plaintiff of the ill result, also informed him that it arose through no default on the part of the former.

Plaintiff's Counsel presented to the Court as evidence three letters written by defendant with regard to the contract between the parties. A discussion thereupon followed, after which the Court adjourned the case till Jan. 22nd at 10 a.m. when judgement will be delivered.

S. NAKAKAMI v. THE SINGER MANU-FACTURING CO.

property. Mr. Jewett possesses several parcels of land in perpetual lease, and buildings in Yo
The hearing of this case instituted by a lapanese, S. Nakakami, ex-employee of the Singer kohama besides, while he had a good amount of Manufacturing Company, against the firm claimcash deposited with the banks: his departure for America was also temporary and connected cent per annum from July 14th, 1903, till the the Court to postpone the case on the ground

with his business. If there had actually been any execution of judgment, began in the Yokohama

ployed on Aug. 23rd, 1902, as a salesman of sewing machines and continued in the company's service till July 3rd, 1903, when he was discharged without notice. When first employed by the firm, plaintiff deposited with them yen 60 as guarrantee, and yen 30 as a further guarantee at a time when he was taking ten sewing machines out of this city, as this was an office rule. As the result of business done by plaintiff, yen 38.55 was due to him as commission in accordance with the contract between the partes. Beside the guarantee money and commission an amount for wages was also due when plaintiff left the firm's empoly. He had very often applied to the firm for payment but the latter refused under several

Defendant's counsel contended that plaintiff did not pay to the firm certain money received from customers to whom he sold the machines while in the service of the firm. As his conduct while in the service of the firm. As his conduct was such as to defraud the firm, defendants informed the police. Afterwards plaintiff paid yen 134 to the firm and consequently the latter withdrew the information. The office appropriated the guarantee and commission due to plaintiff to compensate for the expected loss. Plaintiff was also negligent in his work so when he claimed wages the firm said it had no responsibility.

The counsel discussed these facts after which

The counsel discussed these facts, after which Plaintiff's counsel asked the Court for leave to examine two Japanese and Defendant's counsel four others as witnesses. The Court granted consent, and decided to examine witnesses in the Local Courts of the respective places where they might be living.

The case was adjourned sine die.

JOHNSTONE v. MARKS.

This case, filed by Mr. J. Johnstone, No. 7, against Mr. Alexander Marks, who has temporary offices or chambers at the office of Messrs. Witkowski & Company, No. 93, Yokohama, petitioning for the enforcing of a receipt for ground rent which plaintiff was to pay on behalf of a China-man, Kwan Chon, who is absent, began in the Yokohama District Court before Judge Yasuda

Plaintiff's Counsel stated that the Chinaman on Nov. 28th, 1900, rented property on lot No. 118, Yamashita-cho, from defendant for yen 113.68 Yamashila-cho, from defendant for yen 113.00 per month, on a 20 years' lease on the promise that the building should be transferred to the land owner without compensation after the cancellation of the lease. The Chinaman built a house on the ground and borrowed yen 10,000 from Mr. V. Blad, offering the building as security, after which he went home without giving any intimation to defendant. As plaintiff has an interest in the building, he presented the rent to defendant in behalf of the Chinaman but the land-owner refused to receive payment insisting that the contract with the Chinaman was void and null. Plaintiff thereupon deposited on May 10th, 1908, yen 682 with the Local Court as six months' rent. Counsel peti-tioned the Court to give judgment, ordering defendant to receive the deposited money and the rent for the following munths.

Defendant's Counsel contended that the petition was not valid in accordance with Art. 413 of the Civil Code and asked the Court to reject the case.

Plaintiff's counsel stated that the present case was to be controlled by Art. 474 of the same Code.
After a discussion this part of the complaint was

The Court then rejected the case, ordering plaintiff to bear costs.

CLAIM ON PROMISSORY NOTE.

The case instituted by Dr. Paul Ritter against Mr. J. F. Wagen, claiming yen 387.60 and interest came up in the Yokohama District Court before Judge Kato on Jan. 21st.
Plaintiff was represented by Mr. Nagashima, a Tokyo lawyer and defendant was present in

Flaintin's counsel stated that plaintin lent defendant 1,000 francs, receiving on December 1st, 1902, a promissory note payable on Jan. 1st, 1903, the French money being convertible into Japanese at yen 387.60. Defendant did not pay the note when due. Counsel produced the promissory note in Court as evidence.

The Court thereupon gave judgment ordering defendant to pay the amount claimed and interest at the rate of 6 per cent. from Dec. 2nd, 1902, till the execution of judgment, and to bear costs.

LITERARY GOSSIP.

We have received the following German books:—"The Application of the Bamboo in Japan" and a "Catalogue of Spörry's Bamboo-Collection" by Hans Spörry, with a botanical introduction by Dr. C. Schröter, Professor of Botany in the Confederate Polytechnic in Zürich, published by a Zürich form. Lie divided into 6 posters shed by a Zürich firm. It is divided into 6 parts. The first treats of "The Bamboo in Japan"; the second of "The Application of the Bamboo in Japan"; the third of "The Conversion of in Japan"; the third of "The Conversion of the Bamboo, as a Motive of Art and Decora-tion"; the fourth, of "The Bamboo in Lan-guage and Literature;" the fifth of "New Applications of the Bamboo;" and the sixth Part contains "Notes from China" the two latter Parts forming an appendix. The book contains numerous illustrations.

"The Over-sea Emigration of the Chinese and its Influence on the White and Yellow Races," is a Study by H. Gottwaldt, published in Bremen. In this work Herr Gottwaldt deals with the history and laws of the Chinese; the recruiting of work men; the distribution of emigrants; agreement and business relations in the foreign colonies; the extent of emigration; female emigration; the effect on China of the emigration; Chinese subjects of foreign nations; the Chinese abroad, and the yellow peril. An appendix is added containing the convention of March 5, 1886, between the Ministers of France and Great Britain and China's representatives, regulating the nature of emigra-tion, (which convention has never been ratified nor brought into force), the Swatow Regulations, and an ordinance of the year 1896 concerning the distribution of Chinese passengers on German ships in East-Asiatic waters

One of the most coveted volumes in the world of book-collecting, "Original Poetry by Victor and Cazire" (the pen names of Shelley and his sister), has been sold at Sothelp's for £600. It was a presentation copy from the printer to Charles Phillips. 'The sale-rooms were filled to their utmost limits by a crowd, which included eager book dealers, connoisseurs, and a sprinkling of American agents prepared to bid high prices to secure the treasure for the wealthy collectors they represented. £300 was the first serious bid, and the price rose rapidly £10 at a time. The Americans were keen, but dropped out towards Sabin, a dealer, and Mr. Wise. To the latter finally fell the prize. This gentleman, a private collector, now possesses the only two known copies of this valuable pamphlet, for it is nothing more. He secured his first copy in 1898. The sum paid on this occasion is a record for a "Shelley," but has of course been far exceeded in the case of other much-sought-after volumes.

the most important books of the year, but says:—
"I question whether any of the new books I did not read can possess more ingenious originality or a finer grace than Mr. Henry James' 'Life of W. W. Story,' which I did read." Mr. George Gissing has read Mr. Conrad's "Typhoon," Mr. H. G. Wells's "Mankind in the Making," and Mr. Morley Robert's "Rachel Mar." Mrs. Craigie votes for the "Gladstone" and S. G. Tallentyre's "Life of Voltaire."

In the Revue Bleue appears a most interesting letter of Balzac, hitherto unpublished, and one that gives a fine impression of the novelist's It bears date December 23, 1843, and relates to his candidature for the Academy, for which his poverty was known to be an obstacle among the more fortunate Immortals. This had deeply wounded Balzac, and in a letter to M. de Pougerville, an Academician and friend, he expresses himself as follows; "If fortitude in an uphill struggle, if the independence which refuses to exchange labour for irritating Government protection, if poverty constitute an obstacle to my election, then I ought never to offer myself when Fortune shall have tavoured me. It would be as discreditable for me as for the Academy that gold should give a claim higher than that of a life devoted to literature. You will approve, I trust, an attitude dictated by the self-respect inseparable from love for one's own good name."

AMERICAN TOPICS.

The number of illiterate children in the United Inte number of litterate children in the Omited States between ten and fourteen years of age is: In Alabama, 66.072; Georgia, 63,339; Louisiana, 55,691; South Carolina, 51,596; North Carolina, 51,199; Mississippi, 44,334; Tennessee, 36,376.

On the Ogden-Lucien cut-off of the Union Pacific there are 11.1 miles of permanent trestle and 11.8 miles of temporary trestle. The temporary structure, which is being gradually filled in, is in twenty-seven feet of water. The permanent trestle is nearly all in water from thirty feet to thirty-four in depth.

Before work is started on the Panama canal the Government and its contractors will be in the market for \$125,000,000 worth of materials and supplies. Some of these expenditures have been summarized: Steamships and barges, \$5,000,000; gummarized: ofeathsups and uarges, \$5,000,000; dredgers, \$2,000,000; engines, machinery, rails, etc., \$12,000,000; lumber, etc., \$1,000,000; coal and other supplies, \$1,000,000; horses and mules, \$500,000; medical stores and outfit,

According to the Railway Age, the total railway mileage of the United States on January 1, 1904, will be 209,855 miles, the present year having added 5,723 miles. This mileage takes into account all of the new track laid up to the last days of the year. Compared with 1902, the present year is about on a parity in matter of railroad construction. The construction reported was done on 380 lines and in thirty-nine states and territories, including Alaska. Early in the year it was shown that there were 8,500 miles of railroad under construction, but labour troubles and financial difficulties caused some of the work

"Shelley," but has of course been far exceeded in the case of other much-sought-after volumes, The greatest sum ever paid for a book is £4,950 for a volume of psalms at the Syston Park sale.

The new editor of the Academy has followed the old in giving his readers a list of the preferences of well-known people among the books of the year. Mr. Frederic Harrison has read with most interest and pleasure Mr. Morley's "Gladupper portion of the framed engraving of Washington of the framed engraving of Washington of the framed engraving of Washington of the street and pleasure Mr. Morley's "Gladupper portion of the framed engraving of Washington, which also covers the greater portion of Mr. Myers' "Human Personality," and Mr. Oman's "Peninsular War." Mr. Austin Dobson has read "for pleasure" nothing but Madame Sevigné's Letters, and some novels of Scott. The U.S. Postoffice Department has issued a

No fewer than 62,354,965 acres are now embraced within the national forest reserves of the United States. This represents an increase of 2,179,200 acres over last year. There are now in all fifty-three forest reserves. Two additional ones have been established during the year, and two have been slightly reduced in area. There have also been some consolidations. The Vellowstone and Teton forest reserves in Wyoming and the Absaroka reserve in Montana have been consolidated under the name of the Yellowstone forest reserve, and the Lewis and Clark and Flathead reserves in Montana have been consolidated under the name of the Lewis and Clark forest reserve. It appears that, taking them year by year, the reserves are experiencing the good effects of the forest fire laws and of the enducation of the people by the forest force. Fires still occur, it is true, covering large areas, but there is a great reduction in the number of camp and other small fires discovered by the forest rangers.

"If the Pennsylvania Railroad Company had done, twenty-five years ago, what it is now beginning to do in cooperation with the United States Bureau of Forestry for its future supply of ties, namely, planting 1,000,000 young locust trees, it would now have the timber for 5,000,000 ties, worth, say, \$2,500,000. Similarly, if all other railway companies, as some of the largest systems have now decided to do, had taken the suggestions of a number of far-seeing men of affairs," says the Railway Age, "and had planted catalpa, locust and other quick growing trees along their right of way and on vacant and practically valueless tracts of land, they long ago could have been cutting their own ties alongside their own lines, at a saving of many millions of dollars. A few companies did take the advice and started tree-growing on a limited scale, but the majority lacked the wisdom, in consideration for those who should come after them, to plant the seed of whose harvest they themselves might not reap, and so the railways have been consuming the natural forests at a tremendous rate without making any serious effort at replacement. The lost time cannot be restored of credited back to the treeless land, but it is not too late to start a general movement of tree-panting for the railways of the next generation, and it is a matter for congratulation that such a movements is now under way,"

The geological department of the California University is studying a fossilized egg, preserved in a hard nodule, which is claimed by the owner to have been purchased from an Arizona miner. As far as known, there is only one other specimen in existence, that in the California Academy of Sciences in San Francisco. According to the experts, there can be no mistake about the nature of the curiosity, as an examination has revealed the fact that the delicate shell has be n perfectly preserved, even to the fine pitting of the outside. In places where the shell is cracked the inside is seen to be filled with some mineral substance, the exact nature of which is still undetermined. Professor John C. Merriam, head of the palaeontology department, is inclined to the belief that the original organic contents of the egg have been changed by the intrusion of some delicately

going on at this locality, and the outlook appears to be good. The reconnoissance work of the United States Geological Survey indicates that the distribution of tin in the Seward peninsula is wider than supposed, although the occurrence of placer tin has only been proved in the creeks at York, and in the valley of the Snake river, 100 York, and in the valley of the Snake river, 100 more freely than for many years. Commencing miles east of York and about twenty miles inland with 1891, there was a very heavy decline in the from Nome. The cassiterite is grayish brown to black, and is more often confused with magnetite than with garnet. Even tournaline has been was 6 cents a pound. The crop of that year, of was 6 cents a pound. The crop of that year, of mistaken for tinstone by prospectors unfamiliar with the mineral. Outside of Alaska the only tin mining in the United States at present is found at Gaffney, in the northwestern part of South Carolina, near the North Carolina line, The first shipment, amounting to twenty tons, of tin ore from this Gaffney deposit was recently made, the ore going to England.

Bradstreets remarks that unless all signs fail "1904 will witness the beginning of a number of improvements of great magnitude, the completion of which cannot fail to effect profoundly the transportation interests not merely of the country, but of the continent. In one case, indeed, the effects cannot be less than worldwide. We refer to the isthmian canal, the construction of which we may perhaps regard as now destined to proceed without interruption. The completion of this great work cannot but affect materially the trade routes of the world as they exist to-day. Another improvement, of smaller scope indeed, but still of high importance, is the project of the Pennsylvania Railroad to connect its system with Manhattan and Brooklyn by tunnelling under the Hudson and East rivers. The Erie canal improvement in New York is a scheme of great magnitude, and the new transcontinental railway in Canada will be a work of capital consequence to that country. Added to these, the demands for betterments on the railroads throughout the country will go to swell a demand for engineering skill and labour which should render the coming year one memorable in the annals of enterprise and

The following is a translation of an article from the Taegliche Randschau regarding the establishment of American retail stores in Germany:
"It certainly has not escaped the careful observer of our economic development that American commercial enterprises are systematically trying to gain a firm and lasting footing in the larger cities of Germany for the sale of American pro-ducts by the establishment of retail stores. Mandering through the business streets of our large cities, these efforts of Americans become self-evident. Generally speaking, this was heretofore only the case with branches of a specifically American nature. Of late, however, the Americans appear also as competitors in the most varied by the most varied branches of our home, large scale industry. American competition has almost paralyzed some of our industries-for instance, those of typewriters, sewing machines and cash registers. Photographers' articles and musical instruments also form an important branch of American competition. Now the experiment is added to establish American shoe stores. tendency of all these American establishments is, above all, this: to deal directly with the purchasing public, avoiding as far as possible all

The Manyfacturers' Record of Baltimore, in a review of the effect of the present prices of cotton on the prosperity of the south, points out that in the last five years, during which there has been a gradual rise in the price until the present very high figures have been reached, the excess in the value of the south's cotton crop over the preceding five years is \$800,000,000. The magnitude of this excess and the influence which it must ing twe years is \$800,000,000. The magnitude the negotiations which have been going on for of this excess and the influence which it must many months between the Chinese and the have upon the prosperity of the whole country, Russian Minister at Peking have been made especially upon the south, is illustrated in the public, they indicate most plainly that Russia fact that it is nearly twice as much as the entire capital invested in all the cotton mills of the united States in 1900; it is about equal to the considered in Europe that other countries have present market value of the entire prospers of the considered in Europe that other countries have

granite traversing limestone. Prospecting is now than the market value of the Standard Oil Company, and more than the entire capital of all the national banks of the United States. For the first two or three years of this five-year period the southern farmers used their increased earnings to pay up debts; then they began to accumulate a little, and this year, they will be in shape to spend was o cents a pound. The crop of that year, of 11,247,000 bales, the largest ever produced, was worth \$282,000,000, while the crop for the present year, of about 10,000,000 bales, will be worth about \$600,000,000. The value of the seed in each year was about \$50,000,000 so that the total income of southern farmers from their cotton and cotton seed this year will be not less than \$650,000,000, or at least \$320,000,000 more than the big crop of 1898 yielded. The total production of cotton for the last five years has not been very much in excess of the total production for the preceding five years; but for the last five years the total value has been \$2,575,000,000, against \$1,775,000,000 for the five preceding years, much of the greatest gain being during last year and this.

It is not generally appreciated, but it is none the less a fact, that few articles of American export trade show a greater growth in a shorter time than do shipments of shoes. The Depart ment of Commerce reports that for the calendar The Departyear 1903 the exports of shoes from the United States will exceed \$7,000,000 in value, against a value in 1893 of only \$590,754. Sixty countries or colonies of the world take these shipments, but Great Britain takes one-third of all, Curiously enough, too, the value of the shoes exported is said to be 50 per cent, greater than the value of similar exports from the greatest shoe exporting country, Great Britain. For instance, the exports from Great Britain in 1902 aggregated 9,466,056 pair, valued at \$9,229,823, or about 97 cents per pair, while those from the United States numbered 3,966,766 pairs, valued at \$6,182,098, an average of \$1.56 per pair. Despite this excess in value the growth of the export trade from the United States is greater than that of the leading exporting country, as the following table, giving the exports in quantity and value for ten years past from the United Kingdom and the United States,

MONTHLY SUMMARY OF JAPANESE CURRENT LITERATURE.

The December number of Dr. Ariga's organ Gwaika Jiho (Revue Diplomatique) several articles on the present political situation in the Far East. Among them there is one by Mr. Makino Eiichi which discusses the principal points of difference between Russia and Japan Mr. Makino sets out by observing that opinion among the Japanese and opinion in the West differ in some material respects; specially in regard to Japan's right to interfere with Russia in Manchuria. The general feeling abroad, says Mr. Makino, is that Russia has gone too far in Manchuria to be able to withdow. In occur Manchuria to be able to withdraw. In so far as the negotiations which have been going on for present market value of the entire property of great interests in Manchuria and most people in * This, it must be borne in mind was penned at the United States Steel Corporation; it is more Europe and America fail to see why Japan should least six weeks ago.—(WRITER OF SUMMARY).

feel under any obligation to act by herself in attempting to solve the Manchurian problem. In our press, continues Mr. Makino, it is all Manship Mondai! (the Manchurian Question), as though that were the chief question of the hour. But it is by no means so. The Korean question is undoubtedly of far greater moment to the nation. The European press has recognized the fact that Russia is settled in Manchuria and that she does not mean to relinquish that province unless forced to do so. That it is obligatory on Japan to undertake this task nobody contends. But Russia having shown distinct signs of having territorial designs on Korea, the Western world does expect Japan to defend her rights there. The rapid increase of Russia's armaments in this quarter of the globe indicate some deep design on her part beyond the mere protection of her railway lines, and to frustrate that design we have been steadily preparing for many weeks past. The constant changes in the officers of our Head-quarters' Staff has attracted the attention of foreigners and it is asserted that the reason of this is that we are despatching the reason of this is that we are despatching officers to China to superintend the Chinese military preparations; so that in the event of war China and Japan may act together: and it is stated that preparatory orders for mobilisation have already been issued by our War Office.* For some weeks past the hope of peace has been confined principally to one quarter. The relaconfined principally to one quarter. The relations of our Foreign Minister and Baron Rosen are still apparently on a friendly footing, but how long this can last nobody knows. The partition of Korea has apparently been proposed—Russia to occupy the North and Japan the South, and the centre to be declared neutral territory. But this naturally Japan would not hear of. There is no hope for peace unless Russia agrees to withdraw from Korea altogether, and this nobody seems to think she will do. (Sareba yoron no kichaku suru lokoro wa, Rokoku ga Chosen yori te wo hiku ni arazareba, Komura, Rosen no kaiken (音見) wa heiwa ni sono kyoku wo musubu atawasarubeshi to iu ni aru mo, Rokoku ga kore ni ōzuru koto nakarubeshi to iu mo, mata ippan ni shinzeravuru tokoro nari). It is recognized in Europe and America that war is inevitable if Russia persists in claiming equal rights with Japan in Korea. The exchange of Korea for Matchuria is a proposal which now finds few supporters in this country. Mr. K. Tomizu, we note in passing writes at great length on this subject in the December Taiyo, showing the futility of trying to permanently settle the Far Eastern question by coming to any such arrangement. My idea is, concludes Mr. Makino, that all we need to do is to occupy Korea. Having driven Russia out of the peninsula, we can leave the Manchurian question to settle itself.

* * *
We learn from the Rikugo Zasshi that Dr. Inoue Enryô has decided to convert the Tetsugakkan into an independent private academy of learning, and Mr. Nakajima is still to be retained as a lecturer in the institution. The Rikugo Zasshi welcomes this new policy. For years past, says this organ, every private school in the country from the Keiögijuku and the Waseda Semmon Gakkō downwards has been always hankering after Government recognition and certain special privileges, and on this account has not been free to conduct its affairs unhampered. What are needed in this country are schools that have no connection with the Government what-The non-Government schools have hitherto sold their birthrights, that is, their independence, for a mere mess of pottage. Let them do so no longer. Well conducted private schools stand in no need of Government patronage in any shape or form. The nation is gradually beginning to see that the best school is the one which prepares a lad best for the business of life whatever that may be. Degrees are ness of life, whatever that may be. Degrees are for the most part mere empty titles, and if we were to look well into the statistics bearing on this subject to-day, we should find that our banks, business houses, and numerous companies employ quite as many graduates of private schools as they

will make up for the lack of real ability, and it every year, and there are now 65,000 Japanese is high time that other educationists of note should follow Dr. Inoue Enryō in striking out in a new line. Henceforth the students of the Tetsugakkan will receive no privileges whatever from the Government beyond exemption from the Conscription Laws. In private schools the Conscription Laws. In private schools the teachers enjoy liberty which is denied to them in Government institutions. If they are men of character and learning, they should be allowed to teach as they please. It is only by adopting this course that real progress is made and men of purpose are given an opportunity of imparting decision of character to others. We trust controlled the Rikugō Zasshi, that there will be many to follow this new departure in the educational

The New Year's number of the Jiji Shimpo was less bulky than last year and made a change in the kind of extra material inserted. This in the kind of extra material inserted. This year's articles were mostly on scientific or practical subjects. Botany, Entomology and even shipbuilding were made to contribute instruction to readers who know next to nothing on these subjects. The summary of the events of the year published by this paper seems to us open to grave objection. It consists of little more than a recapitulation of the instances in which the paper was alread of its contemporaries or more accurate. was ahead of its contemporaries or more accurate than they were in publishing news. This savours too much of the American and English self-advertising style of journalism. The Jiji Shimpō is publishing a series of articles on "Industry and Health," written by Mr. Nakai Eijirō. There is no doubt much ignorance in this country as to the injurious effects of certain classes of labour on the young men effects of certain classes of labour on the young men and women employed. Mr. Nakai furnishes a number of statistics on the subject, derived mostly from reports drawn up in western countries. He discusses the question of hours of labour at some length. He takes the view that industry should be regulated by the Government in a special manner, as otherwise thousands of needy people will be found engaged in occupations that undermine health or will work more hours than they ought to do. they ought to do.

The Jiji Shimpō recurs to the much-discussed subject of school-textbooks. It will be remembered that notwithstanding the objection of both Houses of the Diet to granting money for the Government compilation of Primary School textbooks, principally on the ground that the Mombushō was not trusted to carry through work of this kind in a satisfactory manner, the sum of 40,000 kind in a satisfactory manner, the sum of 40,000 yen was drawn from the Government's Reserve fund and devoted to the carrying out of the original scheme. Well, it is now stated that in great haste the work of compilation was forthwith commenced by Messrs. Okada Seibi, Hoshina Köichi and m graduate of the High Normal School, who in the space of 3 or 4 months are said to have compiled quite a number of books. Care is taken, says the fiji, that the public shall not be in a position to critate the said to have compiled quite a number of books. fund and devoted to the carrying out of the original scheme. Well, it is now stated that in great haste the work of compilation was forthwith commenced by Messrs. Okada Seibi, Hoshina Köichi and m graduate of the High Mormal School, who in the space of 3 or 4 months are said to have compiled quite a number of books. Care is taken, says the fiji, that the public shall not be in a position to criticize these books before they are put into use in April next. Instructions have been given to toose only be entertained by persons who are grossly in the space of suppermentations as exercit. Edu
made by Germany and the United States, it has a thorough overhauling. In reference to the graduate of the space of the space of the space of the space of decreptinde. She has been pronounced to be an essentially compressed to think that their principal function is to develop represent her as in a state of decreptinde. She has been pronounced to be an essentially compressed to think that their principal function is to develop represent her as in a state of decreptinde. She has been pronounced to be each send to think that their principal function is to develop represent her as in a state of decreptinde. She has been pronounced to be pend and to think that their principal to thi concerned to keep their contents a secret. Educationists have reason for the greatest dissatisfaccationists have reason for the greatest dissatisfac-tion with the manner in which the compilation has been done, and the most probable outcome of the whole affair will be that prefectural councils will refuse to make use of the books which have been prepared, as the Tokyō Municipal Assembly has already done; and this makes it pretty certain that no Diet that may be convened will sanction the expenditure of Aconvenien the manner above described.

* * *
The *Jiji Shimpō* writes somewhat anxiously in reference to the proposed anti-Japanese legislation in America. It holds that the question calls for great watchfulness on the part of the Japanese authorities, as the labour party in America exercises enormous influence over the action of legislators, and hence it is that every now and legislators, and hence it is that every now and then great surprises are sprung on the public.

Any legislation that affected Japanese immigration in Hawaii would be a serious calamity, most of England's great men have been trained

do graduates of the Universities or of other for at the present time over 10,000 emigrants subordinate Government institutions. No names leave this country for the Sandwich Islands in Hawaii. Any laws passed in America which placed the Japanese on a level with the Chinese as labourers would be regarded as an insult to this country, says the Jiji: (Shinajin to doyo no these schools. The exceptions were William tori-atsukai wo ukuru wa, Nihonjin ni totte, kono Edmund Burke and Benjamin Disraeli. uye mo naki chijoku ni shite, kuni no taimen ni mo kwan suru koto nareba, sono hōan no seihi

A very able and interesting article appeared in the September number of the Taiyo, entitled "The New Tendency of Education in England," written by the head of the General School Business Bureau, Mr. Sawayanagi Masataro. There is no doubt that Mr. Sawayanagi is one of the ablest of the high officials of the Education Department. His rise to power was very rapid. When appointed to the Directorship of the Second High School in April, 1897, in succession to Mr. Yoshimura Toratarō, who had resigned on account of the disturbed state of the school, Mr. Sawayanagi, who had graduated in literature at the Imperial University 7 or 8 years before, was quite a young man who up to that time had been acting as Director of the Gumma Chiugakkō. His management of a difficult situation at the Second High School showed so much real talent that after a short tenure of office in Sendai, he was appointed Director of the First High School in Tokyō, a postwhich was only a stepping-stone to the headship of a Mombushō bureau. At the beginning of last year he was in England and the article before us gives his impressions of the present state of education in that country and dwells at considerable length on the radical change of opinion throughout Great Britain on educational questions. It is perhaps allowable to suppose that writing at a time when the abolition of the Japanese Education Department was under discussion in this country, Mr. Sawayanagi intended to draw a strong plea for the retention of the Department from the creation of a Board of Education in England not so many years ago and the extension of its powers still more recently. Be that as it may, Mr. Sawayanagi has, it seems to us, rightly guaged the state of public opinion in England on this question. We give below the salient points of his article. Prinicipally on account of the extraordinarily rapid progress made by Germany and the United States, it has permanently left behind in the race of nations can only be entertained by persons who are grossly ignorant of the trend of modern thought in England. For a time England did doubtless think that she could afford to disregard the progress made by other countries; but she no longer holds this opinion. What do we see to-day? Instead of rejoicing in "magnificent isolation" she is seeking the friendship of other countries and have the ing the friendship of other countries and has even pretty certain that no Diet that may be convened made an alliance with us. In industry, instead of will sanction the expenditure of 40,000 yen in doggedly keeping to her own ways as regards the manner above described.

The manner above described. manufactured, she has steadily adopted improve-ments borrowed from other countries. In commerce the trust system, or at any rate certain combinations of capital have become increasingly common. But the change in national ideas respecting education is still more marked. Up to the present time it may be said that in education the

may be counted on one's fingers. These consist ich Islands of 8 public schools* and two Universities of Japanese (Oxford and Cambridge). So famous have been erica which these public schools that it is said that since the year 1714, with three exceptions, all England's noted statesmen were educated in one of these schools. The exceptions were William Pitt, same may be said of the shining lights in other professions: they almost all have come from one of these schools. What to us Japanese is so remarkable about these schools is their thorough independence of the Government. The Government cannot interfere with them in any way. The Board of Education even is not at liberty to inquire into the curricula or the system of teaching followed in these institutions. It is stated that on one occasion the late Queen appointed certain commissioners to inquire into the teaching carried on at the Universities and ordered them to draw up a report. But on applying to the faculties of the various colleges for permission to collect the information required, the Commissioners were informed that on quired, the Commissioners were informed that on no account would they be allowed to make any inquiries and that no report would be furnished to the Government by the University faculties, and there the matter rested. The public schools, were they applied to, would certainly return the same answer. It is a striking fact that for ages England's greatest men have been trained in institutions which have neither been controlled nor even inspected by the Government. But within the past few years these schools have become the subject of severe criticism in the English press. The things said against them become the subject or severe criticism in the English press. The things said against them may be thus briefly summarized. It is affirmed that they are too exclusive, being run in the interests of the gentlefolk only. They are said to encourage extravagant habits in the scholars. They are alleged to be intensely and bigotable conservative to be altered are conservative. and bigotedly conservative, to be intensity and to ignore modern science and modern progress altogether. It is objected to the young men they turn out that they are all of one stamp like men taken out of a mould, that individualism is crushed by the inflexibleness of the system. But the most serious criticism of all is the allegation that the schools neither turn out real scholars nor do they succeed in making the boys trained there fond of learning. In recent years England's greatest scholars have seldom been trained at these schools. They have studied in Germany or elsewhere. The result of the whole discussion is that in the opinion of the most advanced of modern English thinkers these schools can no longer be run successfully on the old lines. They are behind the age and call for a thorough overhauling. In reference to the English Universities, we Japanese are accustomed teaching at the various colleges, especially on scientific subjects, should be thoroughly up to date and that the colleges should be supplied with all the latest appliances in order to teach efficiently.

In the matter of elementary State education a great change has come over the English public mind. The policy of non-interference has been abandoned and it is now declared to be the duty of the Government to devise a system of education for the poorer classes that shall be abreast of the times. For years it was the fashion to resent Government interference with education, but now the tendency is all the other way. The change may be Said to date from 1872, with the establishment of State primary schools and the creation of local School Boards to control them. But for some time these Boards were not placed under central control: in fact not

* The names of the schools given are Eton, Rugby, Harrow, Westminster, Winchester, St. Paul's, the Merchant Taylors' and the Charterhouse.—(WRITER OF SUMMARY).

until a Department of Education was created in connection with the Privy Council. This was followed by the creation of a Department of Science lowed by the creation of a Department of Science and Art in the Privy Council. It was not till the year 1899 that England came to the conclusion that State education demanded the creation of a new and separate Department of State, a get the present Board of Education was called into existence. The creation of this Board marks a new departure in English education, a tendency to britise all alementary education, a tendency to bring all elementary education under direct State control.

In connection with the proposal to abolish the Department of Education here, Mr. Sawayanagi adduces the fact that there are only four European countries which have no Departments of Education. They are Holland, Belgium, Switzerland and Portugal. These are comparatively small countries. In America there is no separate Department of Education in connection with the Central Government, only a Bureau, but this is because each State to a large extent looks after its own schools. Mr. Sawayanagi has much to say on the enormous interest taken in education by the press and by all public men in England. The excitement caused by the Education Bill passed last year and the heated discussion which took place in and out of Parliament was a revelation to Mr. Sawayanagi. Nothing of the kind ever happens here, says this keen observer. In England the Prime Minister undertook to defend the Bill in the House of Commons instead of leaving it to be done by an under-official. Whatever measure is brought forward here by a Department is considered to concern that Department only, and to awaken national interest in such a measure is extremely difficult; and as for the Ministers of State generations. ally, if it be a question of education, they usually treat the matter with utter indifference. There could be no greater contrast between two countries in the matter of education than is displayed by the attitude of the whole English nation to the Bill passed last year and that invariably shown here to educational questions by the bulk of the nation. Lord Rosebery's oppo-sition, which went to the length of telling people the new law was not really binding on them, astounded Mr. Sawayanagi, but he regards it as a fine example of the earnest way in which men fight for principles in the West. He goes into a number of interesting things connected with English life and English ways which took his fancy. But we have no space to follow him further. He concludes with expressing the conviction that England has just entered a new ducational era, that henceforward her progress in teaching every branch of useful knowledge will be equal to that made by the most advanced countries of the world.

Dr. Inoue Tetsujirō and Dr. Inoue Enryō have both contributed articles to the January number of the Taiyo in favour of war. Dr. Inoue Tetsu jiro's article is of great length. It discusses the whole situation in the Far East. We can do no whole situation in the Par East. We can do no more than jot down here the subjects treated by the learned Doctor, which will give a very good idea of the line he takes. (1) The writer proposes in this article to consider the current question from the point of view of progress of the Japan's civilisation, leaving its diplomatic, political, commercial, financial, legal, and military aspects to other writers. (2) faton's Situation Geography other writers. (2) Japan's Siluation - Geographical, ethnological and religious, and her situation as a highly civilised country in alliance with one of the most advanced of Christian countries. Her present situation is unique in the history of Her present situation is unique in the history of the world. (3) Japan's relation to Western countries specially to England and America. The benefits received from these country have been infinitely more than those conferred on them by us. (4) Japan's relation to France and Germany.—the benefits she has received from them in the matter of learning.

* The Doctor thinks it to be a fact of enormous significance that in the opinion of England's greatest statesmen Japan's non-acceptance of Christianity was no valid reason for refusing to enter into an alliance with her. That is a big stride in the advance of English public opinion.—(Writer of Summary).

Japan, their uncalled for and unfortunate alliance Japan, their uncalled for and unfortunate alliance with Russia against her in 1805 and the feelings engendered in the mind of the Japanese and in the mind of the mind of the states by European emigrants to the invasion of Europe by the Goths and Vandals in olden times, and the rush, he says, still goes on year stimulus to Japanese effort. As for Russian after year. He next discusses the peculiar causes rivilisation, it is behind that of the most advanced Western nations. Beyond the writings of Tolstoi there is little benefit that the Japanese learned world has received from Russia. (6) Our rela-tions with Russia have for some time past been growing more and more strained, and it is difficult to see how a conflict can be permanently warded off, considering that Russian ambition and Japanese interests are in direct antagonism to each other. (7) Russia may be regarded as a second China and by no means a very formidable enemy to deal with. (a) That country is in a very disturbed state bordering on revolution in some parts, so that the withdrawal of Russia's available forces from the home land would involve a terriuble risk to the State. (b) Russia's means of transport are very poor. One line of railway would in the event of a severe struggle with Japan prove quite in-sufficient. (c) She lacks facilities for repairing her ships in this part of the world. (d) She has an insufficient supply of coal. Victory in war does not depend on numbers by any means nor does not depend on numbers by any means nor on superiority in the matter of weapons, but principally on the personnel of an army. It is in this that Japan is stronger than Russia. (8) It is stated in certain Russian newspapers that have come to hand that one of Russia's objects in trying to annex Japan is to Christianize her. This is a rich joke after Russia's recent doings at Kishineff and the outrages perpetrated by her troops in North China a year or two ago. The notion of her adopting the rôle of a teacher of humanity to the lavanese is one ago. The notion of her adopting the rôle of a teacher of humanity to the Japanese is one of the strangest that I have ever met with. (9) Japan has been pronounced both weak and poor compared to Russia by certain critics. This is a mere assumption. Her strength in war has yet to be tested against that of Russia, but I have no apprehensions on that point. As regards poverty, the country is certainly poor. But is Russia very rich? If we are poor our habits are inexpensive, our food and clothing cost but little. We can support armies at a rate of cheapness that removes: support armies at a rate of cheapness that removes half of the disadvantages of proverty. (10) Japan nust maintain peace as long as possible. Let her not be the first to break the peace. She has held ont a long time. Let her continue to do so until she is attacked. If she fight, she will fight in the cause of justice, true enlightenment and fair play, and also in the cause of humanity.

Dr. Inoue Euryo is of opinion that Japan

should establish her pre-eminence in the Far East. But in doing this she must not depend upon force alone. India is not held by England by force afone. India's not need by England by force of arms, but by adroit administration of public affairs, by fair dealing, by strength of character. It is these things that make a nation strong. In Dr. Inoue's opinion what is needed to make Japan's influence thoroughly felt throughout the Eastern world is the adoption of measures to make her the centre of a great religious and ethical movement.

(1) A Confucian and Buddhist University be established in this country. (2) That Japan be made the centre of all Oriental learning and that an Academy of Learning be founded here with branches in Korea, Manchuria and Mongolia. (3) That a huge meeting of Buddhists be held in Japan, which all Oriental Buddhists be invited to attend.

In the Keizai no Nihon (No. 22) appears a very long and interesting article on "Emigration into the United States" by Mr. Motoda Toyojirō. The article opens with the remark that the Amerireceived from them in the matter of learn- cans are the most optimistic people on the facing. The political attitude of these countries to
sembles one that appeared in one of the November number of the Spectator re Tanmany Hall. If this were not so, says Mr. Mytoda, the tremendous mixture of races and the comparatively small amount of real assimilation which takes place would seem fraught with danger to the union of

the republic. Mr. Motoda furnishes tables showno space here. The compares the invasion of the States by European emigrants to the invasion of Europe by the Goths and Vandals in olden times, and the rush, he says, still goes on year after year. He next discusses the peculiar causes which in each Western or Eastern country result in this phenomenal yearly rush to the United States. Here is his enumeration under 7 heads. (1) Dissatisfaction with the political and social environment in which people find themselves in the old countries. (2) Religious intolerance, stupidity and narrow-mindedness. (3) Dissensions and jealousies caused by the mixture of alien races under despotic Governments, where the liberties of each race are constantly violated. (4) Inability to bear the heavy taxes levied in many old countries. (5) Haired of the conscription laws now in force in European states, which rob men of some of the best years of their lives without conferring on them any permanent benefit or preparing them them any permanent benefit or preparing them for subsequent duties. (6) Excess of population in the old countries. (7) The comparatively limited number of sources of wealth and the consequent difficulty of making a living. The three last causes may be said to influence Japanese emigrants, says Mr. Motoda. But he regrets that there should be any Japanese sufficiently disloyal to wish to escape the conscription laws. The Chinese and Japanese alike, he says, are drawn to America and American territory principally by the high wages to be obtained there, and most of America and American territory principally by the high wages to be obtained there, and most of them have no intention of permanently settling in a foreign country. Mr. Motoda next passes on to discuss the moral effects of this tremendous influx of European mal-contents, using the term in its very best sense. Though among all the nationalities represented there will be found some first class colleges. first-class citizens, the vast majority are ignorant, immoral and irreligious, occupying a very low grade among people who claim to be called grade among people who claim to be called civilised. According to an English emigration report that I have seen, says Mr. Motoda, for some years no less than 74 per cent. of the Irish emigrants were persons who had been in prison for some offence or other. The political effects of this mixture of multifarious races are diverse. To say that there is no such thing as an imperum in imperio in America would not be true. There are scores of undesirable combina-tions whose objects are unworthy if not tions whose objects are unworthy if not absolutely immoral and the Government is powerless to deal with many of these. For voting purposes people are guided solely by their individual interests or by ignorant prejudices. The number of foreigners who use their own languages and object to assimilation on principle is very large. Within the great American world there is the German world, the Italian world, the Austro-Hungarian world, the Irish world, and so on. The ignorance, the greed and the cliquism on. The ignorance, the greed, and the cliquism of the various emigrants constitute a danger to the stability of the republic which is recognized by many thoughtful Americans, observes Mr. Motoda. The real object of Mr. Motoda's article appears on the last two pages, where, with considerable show of reason, he accuses the American Government of gross unfairness to the American Covernment of gross annual mess to both Chinese and Japanese emigrants. From whatever point of view regarded, says Mr. Motoda, the mass of Oriental emigrants are infinitely better than the European scum which infinitely better than the European scum which finds its way to the American shores. They make better subjects, are guilty of fewer crimes and are on a higher plane of civilisation. Yet America goes on legislating against China and not infrequently against Japan, while it welcomes with open arms the riffraff of Europe, because such riffraff happens to be white or whitish or colors. Could any policy be more freelish or because stori rimar happens to be write on withinst in colour. Could any policy be more foolish or more unjust, asks Mr. Motoda. It amounts to this that the standard of the American Government would seem to be a skin standard. The white-skinned may enter, wicked and ignorant though they be; the yellow-skinned shall be proscribed, despite their many merits.

NEWS OF THE WEEK.

Thirty-two Chinese students arrived at Shimonoseki on Jan. 15th from Peking.

An American transport arrived at Nagasaki on Jan. 20th with 1,035 soldiers for home.

A union meeting of the Seiyu-kai and the Progressists is expected to be held in Tokyo on Jan.

The Japanese Consul at Lyons, under date of Jan. 16th, says that there is no change in the raw silk market.

Mr. K. Minami, President of the Hankaku Railway, died on January 19th at Osaka of paralysis of the beart.

The telephone between Nagasaki and Saseho, which is under construction, is expected to be completed this week.

Seventy-four Japanese residents, including nine infants, arrived at Nagasaki nom Dalny on Jan. 18th in a Russian steamer.

Owing to a heavy fall of snow trains on the Akita-Wada and Akita-Okubo railways have been suspended since Jan. 19th.

The Commercial Bank, Taipeh, Formosa, being unable to pay its depositors, decided on January 19th to declare itself bankrupt.

Six civil engineers and thirty workmen employ-ed by the Seoul-Fusan Railway Company will left Tokyo on Jan. 16th for Korea

Electors in Yokohama belonging to the Seigu-kai have decided to vote for Mr. Sudzuki Inanosuke in the coming general election.

The Heian Bank, Kyoto, held a general meeting on Jan. 17th, when it was decided to amalgamate with the Kitahama Bank.

Owing to scarcity of steamers, charter-parties, says the Jiji, have advanced in Kobe from 2.50 to yen 3.50 per month per gross ton.

The construction of the railway between Waka mutsu and Kitakata being completed, the line was opened on Jan. 20th for traffic.

The price of dynamite used in mining has advanced in Osaka and Kobe to yen 40 from yen 26.60 the ordinary rate. Stocks are scanty.

The Jiji's Kobe correspondent says that the Russian Government has chartered seventeen Norwegian steamers for use as transports.

The Nippon Cotton Spinning Company, Osaka, declared on Jan. 18th an interim dividend for the last half-year of 6 per cent.

Dowie, the Chicago faith-healer, has started on a round-the-world tour in company with some of his Zion Overseers. He visits Australia first.

Mr. K. Abe, sugar importer, Yokohama, on Jan. 18th asked the Municipal Office to accept his contribution of yen 10,000 towards the war fund.

Mr. T. Sakurai, Director of the Kobe Customs, left on Jan. 17th for Europe to inspect customs systems abroad as well as to visit the Panama Canal.

The Jiji states that an official of the Russian Treasury arrived at Nagasaki on Jan. 18th via Port Arthur. His business is reported to be the investigation of Japanese financial affairs.

The Asahi states that the German steamer Tai Lee which arrived at Yokohama on Jan. 11th from Hongkong, has been sold to the Chuetsu Steamship Company, Toyama prefecture, through Messrs. Becker and Company, No. 42, Yoko-hama. The paper adds that her gross tonnage is 1,301 tons and registered tonnage 826.

Gretschin and Marmsjuk, two of the men who were charged with complicity in the massacre of uninjured. Jews at Kishenev, have been convicted and sen-

respectively Twenty two others have been sen-tenced to terms of imprisonment ranging from six months to two years.

coolie who was working at the bottom was killed.

The U.S. squadron consisting of three battle-ships and four cruisers under command of Rear-Admiral Evans, arrived on Jan. 18th at Manila

According to latest official investigations, the number of dwelling houses and the population in Kanagawa prefecture were 164,806 and 996,735 respectively.

the College of Literature.

The Yorkshire, Canton Fire, and Hongkong Fire Insurance companies on Jan. 20th deposited yen 100,000 each with the Department of Agriculture and Commerce, through the Kencho.

Y. Otaki, a farmer living at the village of Kurokawa, Toyama prefecture, entered on the night of Jan. 19th a house where he had formerly been employed and murdered the head of the family. The culprit was immediately arrested.

Mr. Morita, Director of the Commerce and Industry Bureau, will pay a visit about Jan. 25th to the district of Kawamata, Fukushima Prefecture, to examine habutae silk which is now unpopular abroad in consequence of defective quality.

Countess Hirosawa died on Jan. 20th from congestion of the brain a few hours after being delivered of a daughter. The deceased lady was the second daughter of Viscount Yamao and was married in 1895. She was 27 years of age.

The 34th Bank, Osaka, says the Jiji, has ceived a telegram from its Kobe branch to the effect that Viceroy Alexieff and Baron Rosen are expected to hold a conference at Nagasaki and that Russia has decided to consent to the demands of Japan.

The Kokumin has a Mito telegram stating that the President of the Chamber of Commerce, and the chief clerk of the City Office were arrested on Jan, 20th in connexion with the charge against members of the Prefectural Assembly who are accused of accepting bribes.

Mrs. Kaneko, wife of an engineer in the service of the Toyo Kisen Kaisha, who arrived at Kanagawa from Shidzuoka by the 1.26 train on Monday, accidentally fell off the platform while alighting from a car, and as a result had both her legs broken and received some injury to her left She was immediately removed to the Juzen

With regard to the Nippon Yusen Kaisha's claim of yen 148,000 against the owner of the Russian steamer Progress, which collided with the Tokai Maru, with the result of the sinking of the latter, the Russian Consul at Hakodate, says the Asahi, presented a protest to the Court contending that the accident was due to the crew of the Japanese steamer.

Miss von Rheinbaben, daughter of the Finance Minister Baron von Rheinbaben, had a narrow escape from serious injury or death in Berlin on December 17th. She fell between two electric cars, An English naval constructor, Henry Davidson, of Newcastle-upon-Tyne, rushed to her assistance, and in pulling Miss von Rheinbaben out of danger was himself killed. Miss von Rheinbaben was

tenced to seven and five years penal servitude, ral meeting of shareholders on Jan. 17th when the accounts for the last half-year were submitted. The net income amounted to yen 148,596.25. Out of this yen 15,500 was set aside as reserve; yen 87,500 paid out as interim dividend at the By a landslide which occurred on Jan. 19th on rate of 15 per cent.; yen 11,600 granted to the hillside, near 724, Negishi, Yokohama, a employees as bonus; and the remnant carried a employees as bonus; and the remnant carried forward to the next account.

"Young Corbett" of Denver, featherweight champion, beat Hanlon of California, challenger for the title, on Dec. 30th at the Mechanics' Pavillion, San Francisco The fight was fast, A telegram from Fukuoka announces that the Hanlon receiving very severe punishment, though the sent mine owners in Chikuzen and Buzen pro- he sent the champion twice to the floor in the vinces have agreed not to sell their output to seventh round, and after appealing vainly to his seconds to throw up the sponge, the referee awarded victory to Corbett, the latter's opponent being then completely at his mercy.

According to the Official Gazette, Mr. Uchida, Japanese Consul-General at New York, sent a The German Minister on the evening of Jan. telegram under date of Jan. 15th to the effect 21st was to entertain Mr. Yamakawa, President that owing to the firmness of buyers, and to of the Imperial University, and the professors of heavy re-purchases, prices in the cotton market have advanced. Later the market fell as most of the sellers abandoned their speculative transactions. The market is over-shadowed by the Japan-Russian complication. Closing prices on the 15th for February delivery were 13.51 cents.; for March 13.72; for May 13.93; and for present delivery 13.80. The stock of cotton is calculated at 1,311,482 bales.

> G. Yamazaki, a transport agent, was arrested on Jan. 17th by a Shinagawa policeman on a charge of having laid stones on the railway at a point near Shinjiku, Tokyo, on the night of the sustained damage. It is reported by the Tokyo papers that this man's horse, drawing a waggon was killed by a train while passing a crossing on the railway, but the railway company refused to pay compensation for the horse on the ground that the fault was not due to the train.
> The transport agent therefore tried to wreak his

> Few men pass into retirement better earned than does Admiral of the Fleet Sir F. W. Richards, who recently celebrated his seventieth birthday, His record, says the Globe, is one full of good work, both on active service and in the discharge of those onerous and important duties which developed upon him as First Sea Lord of the Admiralty. His tenure of office in Whitehall synchronised with a time of great development in the Fleet, and it will be remembered that it was during his seven years at the Admiralty that the Special Service Squadron was called into being with such significant suddenness. His war service goes back to the time of Laing's Nek.

The share market which had been very shaky for several days slightly recovered on Jan. 2011, the greatest activity being shown in Osaka. The principal changes are as follows:-

Sanyo Railway Kyushu Railway Hokkaido Colliery	20th, Yen, 59.40	Closing price 19th. Yen. 58.20 54.60
Railway Tokyo Electric Railw Street Electric Railw Nippon Yusen Kaisl Tokyo Gas	66.70 vay. 83.10 vay. 72.00 1a 71.70	65.20 79.80 68.90 69.60 85.30

Although tailway travelling in Russia is slower than in any other country in Europe, there are more accidents on the Russian than on any other continental system. The average speed of passenger trains is thirty-six miles an hour, and that of a few of the so-called "fast expresses" forty-two miles. Approximately speaking, there are now about 29,000 miles of railway in European Russia. According to an official return, just published, the number of accidents last year amounted to 9,890. Of these, 1,212 were collisions, and 1,521 derailments. One thousand five hundred and twentynine persons were killed, and 7,908 injured.

The Hundredth Bank held an ordinary gene- The damage done to railway stock was estimated

Jac. 23

at 1,600,000 roubles, a paltry sum as compared with the terrible loss of life and the number of people injured. The greater part of the permanent way in Russia is laid without either chairs or fith plates, the clid and incourte method of sixty fish-plates, the old and insecure method of rivets and staples being still in vogue, a fact that largely accounts for the enormous number of accident.

EUROPEAN NOTES.

At the unveiling of a marble bust of Chaucer in the Guildhall Library London, on Dec. 9th, Mr. Alfred Austin, the Poet Laureate, pointed out that Chaucer anticipated by 500 years the opinion expressed by Captain Mahan on Sea Power, and also the talk about "A Fleet in Being."

The construction of tunnels along the Trans-Baikal Railway is reported to be causing the authorities a great deal of trouble. It is now stated that the electrical boring machines supplied by a foreign firm have proved to be unable to carry out the work. Thus, the constructors of the line have been compelled to entrust the work to hand labour by Italian workmen.

It is announced from Genoa, that, as a result of an agreement between the Gio Ansaldo Comof an agreement between the Gio Alsaluo pany and Messrs. Armstrong, Whitworth & Co., of Newcastle-on-Tyne, a new company has been formed to construct warships at Genoa, with a capital of 30,000,000 lire. It will be known as The company capital of 30,000,000 lire. It will be known as the Ansaldo, Armstrong Company. The com-pany's statute provides for the distribution of 5 per cent. of the annual profits among the em-ployees and hands of the shipyards.

Few more sensational schemes are recorded in the annals of crime than that laid to the charge of Angelo Vicchio, well known at Naples as a dog-fancier, journalist, and artist. It is alleged that he decoyed merich friend to his country house, extorted from him, under the muzzle of a revolver, a bequest of £40,000 and a confession of intended suicide, and then handed him over, bound, to a servant, who was to have drowned him is a half and handed him over. him in a bath, and hurled his body into the river. The man, however, set him at liberty.

A marriage which excited much interest was A marriage which excited much interest was celebrated on Dec. 5th at St. James's, Piccadilly, London, the bride being the Hon. Mrs. William Keppel, a sister of Lord Saltoun, and the bridegroom—Admiral Sir Henry Stephenson—First and Principal Naval A.D.C. and Extra Equerry to the King. Amongst those present in Equerry to the King. Amongst those present in the church was Admiral of the Fleet Sir Harry Keppel. Capt. Faussett, R.N., Equerry to the Prince of Wales, supported the bridegroom as best man. The bride was given away by her brother, Lord Saltoun.

Mr. Frederick A. Ingle, B.A. of St. John's College, Oxford, who has just been awarded the Senior Kennicott Hebrew Scholarship at the University, is probably the first Roman Catholic who has carried off that prize since its foundation. who has carried on that prize since its foundation. Mr. Ingle had a distinguished undergraduate career, winning both the Pusey and Ellerton Scholarship and the Septuagint Prize, and graduating with honours in the Final School. Since he

making an appointment. I attended, and after an examination, brief but searching, he informed me that I might consider myself engaged, subject only to an interview with a gentleman whom he had yet to see. I was naturally jubilant. But without reluctance, felt compelled to give the appointment to the rival candidate he had menappointment to the rival candidate he had inci-tioned, because not only did he apparently possess all my qualifications for the post, but one more to which I could certainly lay no claim—a knowledge of Chinese!"

With reference to the recent announcement that an order for locomotives for the Canadian Pacific Railway had been given to a German firm, a news agency has learnt officially that the Canadian Pacific Railway Company, requiring engines of unusual hauling power, and after specifications prepared by their own engineer, offered the contract to a Glasgow firm which had been in the habit of building locomotives for them. The Glasgow firm, however, owing, it is interesting to learn, to pressure of work already in hand, could not undertake the new contract within the specified time. Other British firms, it is equally instructive to know, were in the same position, and so the order went to Germany, where the time limit was not considered an obstacle.

Speaking in London on Dec. 7th Mr. Akers-Douglas, the Home Secretary, indicated that the Government are taking practical steps to deal with the alien problem. The nature of the prowith the alien problem. The nature of the pro-posed legislation will be outlined in the King's Speech when Parliament again meets. What he described as the "dumping of the undesirable" was he said, a growing evil. There were at present 286,900 aliens in the United Kingdom and during the last 20 years the increase in their numbers had been to the extent of 150,000. with the alien problem. numbers had been to the extent of 150,000. Of these 135,300 dwelt in London and 54,000 in One serious result was the over-crowd-Stepney. One serious result was the over-clowding and displacement of the native population. ing and displacement of the mimbers still further. The tendency was for these numbers still further to increase unless the immigration of aliens was these under stringent regulations. The time placed under stringent regulations. had come for stringent measures.

The new battleship Libertad, which Messrs. Vickers, Sons, and Maxim have built for the Chilian Navy, and which, like her sister ship, also building in England, has been bought for the British Navy, completed on Dec. 5th her long series of official trials. They were carried out under the direction of Admiral Simpson and the Chilian Naval Commission, with Mr. T. E. Vickers, C.B., chairman of the Vickers and Com-These trials consisted of lengthenpany present. ed runs at various powers. A 27 hours' test at ed runs at various powers. A 27 hours et al. 1734 knots proved exceptionally satisfactory, the coal consumption being 1.7 lb per i.h.p., while on a six hours' trial with six runs over the measured mile it was found that a speed of 20.2 knots had been obtained. This result dis-20.2 knots had been obtained. places from the position of honour, as the world's fastest battleship, the *Tracevitch*, a battleship built in France to the order of the Russian Government, which recently obtained just over 19 knots. The Libertad's rate exceeds that of a large proportion of the older cruisers in the great European navies. No ship of anything approaching her power of offence and defence has ever done as well as the *Libertad* by three-quarters of a knot. changes that occur in this community, and where all cases of want irrespective of creed or nationality are helped, large and sudden calls are frequently being made on the Association, and we earnestly beg that our list of subscribers may be enlarged. All donations of either money or clothing will be most gratefully received. All cases requiring assistance are thoroughly investigated by two members of the Committee and assistance given to the extent deemed necessary. The sincere thanks of the Ladies' Benevolent Association are tendered to the kind friends who have sent donations, to the King's Daughters' Circle for their generous yearly contribution towards the maintenance of a destitute sick woman at changes that occur in this community, and where ciation are tendered to the King's Daughters' Circle for their generous yearly contribution towards the maintenance of a destitute sick woman at the General Hospital until her death; to Colonel Ellis of the Salvation Army, for his assistance in caring for and helping to get positions for a number of destitute men who have applied to this Association; also to the fupan Herald for printing our last year's Report at reduced rates. It has been thought expedient to expend the G, or Gorman fund, for the education of the two younger boys, to enable then later on to support themselves, and they have been placed as boarding pupils at Mr. Bruce-Mitford's School. The fund brought forward from 1902 was yen 3,83,8.8. After expenses for 1902, we carry forward yen 3,545-35. An account of work done by the Ladies' Benevolent Association during the past year will be seen by the Hon. Treasurer's report.

CORRESPONDENCE.

THE DEADLY PARALLEL,

TO THE EDITOR OF THE "JAPAN MAIL." SIR.—The last three paragraphs (pp. 276 and 277) of Sadakichi Hartman's "Japanese Art" (1903) and the last paragraph of Ernest F. Fenellosa's article on "Chinese and Japanese Traits" in the Allantic Monthly for June, 1892, bear a most striking resemblance, as will be evident from the following parallel:-

"Thus, I believe that, "Thus, I believe that, theoretically and practically, it will be best for Japan to hold fast to her own ideals of Asiatic tradition. It is a solemn service which she owes to humanity. She is the last custodian of the sacred fire. She alone has the unspeakable advantage of seeing through the materialistic advantage of seeing through the materialistic shams with which West-ern civilizations delude ern civilizations delude themselves, while she ap-propriates their sounder materials to rekindle her flame. In bringing to pass the fusion of Eastern and Western types which, two thousand years after Alexander the Great car-ried the borders of Greece to India, becomes for a second time possible, and which shall create in both hemispheres a far more rounded civilization than either has ever known, Japan has the inestimjapan has the mesturi-able privilege of be-coming our most alert pioneer. Through her temperament, her in-dividuality, her deeper insight into the secrets of the East, her ready divin-ing of the powers of the West, and, more than all, through the fact that here, the spiritual factor of the problem, must hold the master key to its solution, it may be decreed, in the secret council chambers of Destiny, that on her shores shall be first creat-ed that new latter-day type of civilized man which shall prevail which shall prevail throughout the world for thousand e next tho

"Thus theoretically as well as practically, it will be best for Japan to hold fast to her own ideals of Asiatic tradition. It is a service which she owes to humanity. She is the last custodian of ancient Oriental culture. She alone has the advantage of seeing through the materialistic shams with which Western civiliza-tions delude themselves, and of appropriating only such material as may help to rekindle her na-

"The fusion of East-ern and Western ideas, which was accomplished two thousand years ago by Alexander the Great, who carried the borders of Greece to India, would become for a second time possible, and create in both hemispheres a far more rounded civili-zation than either has

ever known.

"Though her temperament, her individuality, her deeper insight into the secrets of the East, her ready divining of the powers of the West, and work thought hough and more than all through the fact that she en-joys the privilege of being a pioneer, it may have been decreed in the secret council cham-bers of dection that a her bers of destiny that on her shores shall be first created the new art which shall prevail throughout the world for the next thousand years."—Hartmann, in 1903.

Apparently, great minds do often run in the same cha Yours, &c.,

CUSTOMS DECISIONS.

Mr. Minakami, the Director of the Yokohama Customs, gave a decision on Jan. 15th on a protest instituted by Messrs Runge and Thomas, No. 90-c., Yokohama. The firm imported some imitation precious stones with certificate of origin, on which the appraisers imposed 30 per cent. advalorem duty in accordance with No. 470 of the general statutory traiff, but the importers the general statutory tariff, but the importers contended that the duty should be at the rate of To per cent., as the articles in question are made of glass. The protest, was, however, rejected on the ground that the enforcement of the conventional tariff between Austria-Hungary and Japan, which provides 10 per cent. ad valorem duty, has expired.

The same day, the Director of Customs renderanother decision on a protest filed by the American Trading Company, No. 28, Yokohama. According to the decision, the firm imported a certain quantity of gelatine, on which the authorities imposed 10 per cent. ad valorem duty under No. 136 of the tariff. The importers were not satisfied with the imposition of this duty, insisting that it should be levied in accordance with No.
443 of the same tariff, and that the article in question was common glue, and not gelatine. The protest was dismissed on the ground that it was gelatine in the nature of its refinement.

THE CANTON-FATSHAN RAILWAY.

Within the last two or three days rumours of a most alarming character have come to Hongkong regarding the progress of the work on the Canton-Fatshan railway. According to our information, the work is practically at a standstill on all the sections of the railroad. The natives are apparently bittedly opposed to the European venture, and, if all accounts are true, are ready to resist by force of arms the incoming of the foreigners. Europeans who have come down from the line lately all tell the same tale of the Chinese showing bad feeling toward the Westeners who are engaged on the line. The attack on one of the railway construction camps lately will be fresh yet in the public memory. On that occasion the matsheds were burned and all the tools and plant were destroyed. The Europeans were chased for their lives into the middle of the river and had most of their property destroyed. Now it appears that the people in charge of the construction of the line have been informed of an imminent rising against the whites there. Orders have been issued that no Chinese hare to be allowed in European houses there. It is an open secret that at Chinese New Year a rising may be prophesied in Canton similar to that which occurred a year ago. The rumour goes that all the Europeans in the neighbourhood of the new line are to be butchered. Naturally, the greatest possible precautions are being taken, and there is little fear workers being caught napping. It is an eloquent fact, however, that there has been a steady exodus of men from the railway working within the last week or so. The new arrivals in Hongkong give it out as a fact that trouble is expected, and that it will be serious when it comes, Work on the line is more or less disorganised owing to the recent looting of one of the camps, and it is quite on the boards that there may be a simultaneous attack on all the camps together. The workers have been ordered not to keep Chinese in their houses at all...

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

THE "KASUGA."

London, January 15.

The Japanese cruiser Kasuga has arrived at Port Said from Genoa.

ROOSEVELT SELECTS CONSULS.

President Roosevelt has already selected consuls for Mukden and An-tung. sends their names to the Senate directly Congress provides their salaries.

PROMOTION.

Later Mr. Townley, Secretary of the British The Tsaritza is suffering from Legation in Peking, has been transferred to The Court Ball has been postponed. Constantinople.

MOVEMENTS OF WARSHIPS.

The British cruiser King Alfred and the Russian cruiser Dimitri Donski are coaling

The Japanese cruiser Nisslun is passing the Canal.

The Russian battleship Oslyabia has arrived at Port Said.

AMERICA AND MANCHURIA

An official communication from Washington says that the establishment of foreign Consulates at Mukden, An-tung, and Tatung-kou will powerfully contribute towards ensuring the policy of the "open-door," whereunto America is irrevocably committed; it will also contribute to the integrity of ted; it will also contribute to the integrity of the faults of the fault China and the administration in central

RUSSIAN TROOPS.

London, January 15.
Two large Russian Volunteer steamers have passed the Bosphorus with troops for the Far East.

THE TSAR AND PEACE.

At the New Year's reception at St. Peters-burg, the Tsar said:—" I intend to do all in my power to maintain peace in the Far East."

DESPERATE FIGHTING IN SOMALILAND.

The recent action in Somaliland was fought at Jiddali. The enemy charged, advancing as far as the British square, only once, when 300 fell under the Second Sikhs' withering fire. Major Kenna pursued the survivors for four hours, slaying six hundred. The Mullah will possibly make a further stand, but not in the open.

THE "KASUGA."

London, January 16. The Japanese cruiser Kasuga has left

RUSSIA AND AMERICA.

The Tsar, speaking to the American Minister at the New Year's reception, renewed his assurances sent to Washington, that Russia would not hinder American rights and interests in Manchuria.

LIBERAL VICTORY IN ENGLAND.

London, January 17.
Mr. Ben Tillett, Liberal Labour leader, has been elected for Norwich in place of Sir Harry Bullard, Conservative, deceased.

RUSSIA'S OPINION.

The Koelnische's St. Petersburg's correspondent says that Russian official circles maintain that war is a long way off, and that grounds exist for a complete understanding by creating spheres of influence and a neutral zone in Korea.

BIG PURCHASES OF COAL AND WHEAT.

London, January 18. Japanese and Russian agents are buying all the available coal throughout the world. The operations have hitherto centred chiefly in Cardiff. Japan ordered 300,000 tons in She also England alone since Thursday. purchased 500,000 businels of wheat at . Winnipeg.

U.S. CONSULAR APPOINTMENTS

President Roosevelt has appointed Mr. J He W. Davidson, now Consul at Tamsui, to act as a roving commercial agent, with head-quarters at An-tung. Mr. Edward Morgan is appointed Consul at Dalny.

ILLNESS OF THE TSARITZA.

The Tsaritza is suffering from pleurisy

ADMIRAL KEPPEL DEAD.

London, January 19.

Admiral Keppel is dead.

THE BLACK SEA FLEET. Absolutely nothing is known at Constantinople of any application for the passage of Russian Black Sea fleet through the Dardanelles.

ITALIAN CONGRATULATIONS

The Italian Government has telegraphed to the British Government congratulations on the victory in Somaliland.

THE RISING IN GERMAN AFRICA.

Count Buelow, speaking in the Reichstag, dwelt upon the seriousness of the outbreak He said the fruits of ten years' labour have been destroyed. Reinforcements of troops and marines sail immediately ior the seat of

JAPANESE MINISTER TO MEET THE TZAR.

The Japanese Minister sees the Tzar today by invitation for the purpose of conferring.

DISASTER AT BLOEMFONTEIN.

London, January 20.

been destroyed at Bloemfontein, and 25 persons drowned, in consequence of heavy rains having burst a reservoir.

THE HEREROS' RISING.

A supplementary estimate of 1,500,000 marks has been submitted to the Reichstag for the purpose of dealing with the uprising in South-west Africa.

JAPAN'S LAST NOTE.

Later.

The Times understands that the Japanese note plainly intimates that it is the last communication Japan will address to Russia. It announces that Japan will wait only a reasonable time before taking steps to safeguard her interests. The note also invites Russia to formally recognize Chinese sovereignty in Manchuria, and signifies Japan's inability to accept the restrictions which Russia desires to place upon the strategic measures which Japan proposes to take in Korea. Japan also declines to entertain the idea of a neutral zone.

(RECEIVED AT THE LEGATION OF FRANCE.)

JAPAN'S REPLY

Saigon, January 16.
It is affirmed that Japan's reply to the Russian note is not an ultimatum but that it rejects the Russian proposals.

FRANCE AND SIAM.

The signature of the Franco-Siamese treaty is expected. It is said that it will confirm the convention of 1902 with certain modifications. It will regulate the conditions for the evacuation of Chantaboon and will replace on a perfectly amicable footing the relations between France and Siam.

RUSSIA'S REPLY.

Saigon, January 18.

M. Nelidorff, Russian Ambassador in Paris, has telegraphed to St. Petersburg the result of an interview that he had with M. Delcassé which will have a considerable influence on the reply that the Russian Government is to make to the Japanese Government. The reply will be made on Tuesday. The general impression is that war will be avoided.

THE CRISIS.

Saigon, January 19.
The news as to the Japan-Russia conflict is re-assuring.

(FROM THE "DEUTSCHE JAPAN-POST.") THE RUSSIAN BUDGET.

Berlin, lanuary 15.

The Russian budget contains no provision for any expenditures in Eastern Asia. Only for the Siberian Railway, especially for its extension round Lake Baikal, 17 million roubles have been allowed.

THE CHINESE TREATY WITH AMERICA

In Washington the American-Chinese treat has been ratified, by which Mukden and Antun in Manchuria are opened to the world's con President Roosevelt has appointed cor suls for these places.

GERMAN SOUTH-WEST AFRICA.

In German South-west Africa the Hereros hav commenced hostilities.

GERMAN FINANCE.

The budget committee of the German Di (Reichstag) approved of appointing consuls f New Orleans (Louisiana), Atlanta (Georgia), Sai Paul (Minnesota) and Seattle (Washington).

THE SIBERIAN RAILWAY.

To the Russian Railway Summer Time Tal the Siberian Saloon Express Train has been adde The journey from Alexandrowo (German bot One hundred and seventy houses have dary) to Dalny will take thirteen days only.

THE SITUATION.

Manchurian question is expected.

The cooperation of Japan and America in opening Manchuria has evidently made an im-

pression upon Russia.

The Cologne Gazette prints an article which mentions in most cordial terms the strong selfconfidence and quiet courtesy shown by Japan during all the negotiations.

THE PRUSSIAN DIET.

Berlin, January 17.

The Prussian Diet (Landtag) was opened last Saturday by Kaiser Wilhelm with a speech from the Throne. He said that, in consequence of commercial and industrial improvements, the financial situation of the country had improved, and a balance between receipts and expenditures and a brance between textens and expenditures could easily be made. A bill calling for funds necessary for the projected Rhine-Elbe-canal, leading to Hanover, and for the regulation of rivers in Silesia, to prevent inundations, will be introduced. The Government this time expects that an understanding concerning the canal bill will be arrived at.

THE FAR EAST.

"Ignotus"-the fictitious name of a secretary of M. Delcassé, the French Minister of Foreign Affairs—states in the *Figuro* that the peaceful influence of France is prevailing in Tokyo and St. Petersburg. The *Eclair* reports that before answering the previous Russian note England and France advised in Tokyo that Japan should continue the negotiations.

The peaceful words spoken by the Tzar to the Japanese Minister in St. Petersburg, are now confirmed by the Russian authorities. Viceroy Alexieff is expected to be recalled to St. Petersburg

THE PROSPECTS OF PEACE.

Berlin, January 19.

The peaceful New Year's remarks of the Tsar have made the deepest impression in Europe. nave made the deepest impression in Europe. Especially are the French papers full of praise. The Paris newspaper, Temps, says that Count Lamsdorff and M. Delcassé, the Russian and French Ministers of Foreign Affairs, are very much astonished at the publicity of the alleged intentions of intermediation. The German press is hoping that Russia will now accept the Japanese demands.

The report that Russia is sending men of war through the Dardanelles is wrong.

The Tsar's telegraphic answer to the New Year's congratulations from Viceroy Alexieff prays to God for peace and prosperity during the coming year. This telegram has given new hopes in Port Arthur for a peaceful settlement of the difficulties

GERMAN SOUTH-WEST AFRICA.

The riots in German South-west Africa have increased. Windhuk, the capital, is threatened. Several stations were taken by the insurgents. On the detached farms pillage and murder are the order of the day. The marine battalion is leaving Kiel for Africa to strengthen the colonial troops.

Chancellor Count Buelow in the Imperial German Diet (Reichstag) gave information regarding the Herero rising in German South-

There is no feasible cause why the riot should take such play and acquire such dimensions. The return of hard labour and industry of twenty years have been destroyed. Great anxiety exists as regards the safety of the white colonists, who are fighting desperately against the enemies out-numbering them considerably. The natives have profited by taking their chance when the governor with the greater part of the colonial troops had burried to the South to protect the colony against the resolution Regulary against. The colony against the revolting Bondelzwarts.

villagers in Okabandja and Karibito near Wind-Berlin, January 16.

The Paris Malin prints a report that AngloFrench pressure is being brought to bear upon Japan. It is doubtful whether this news is true.

As a result of the last Japanese note a climb down on the part of Russia in regard to the Manchurian question is expected.

Swakomund on the Sth of Edward Willedmann and Maribito near Windhuk are badly pressed and the capital, Windhuk, huk are badly pressed and the capital, Windhuk, are badly pressed and the capital, Windhuk, huk are badly pressed and the capital, Windhuk, are badly pressed and the capital, Windhuk, huk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital, with a windhuk are badly pressed and the capital with a windhuk are badly pressed and the capital with Swakopmund on the 8th of February, The German gunboat Habicht has left Capetown for At the Russian New Year's celebration (Jan.

German gunboat Habith has left Capetown for 14th) a long conversation concerning peace took place between the Tsar and the Japanese Minister.

Swakopmund. The Bundesrath (German Confederation's Diet) granted at once the amount ration's Diet) granted at once the amount required to cover the expenses of the expedition, There is no doubt that the Reichstag will do the same.

GERMAN SOUTHWEST AFRICA.

Berlin, January 10.

The German Reichstag has agreed to the credit demanded by the Chancellor for the overthrow of the insurrection in German Southwest Africa.

RUSSIAN OPINION.

In London it is stated that Russia, to avoid war, has decided to apply to the Powers. The Russian press is said to demand freer action concerning the Balkan Question.

GERMAN SOUTH-WEST AFRICA

Berlin, January 21.

From the place of insurrection in Gernan Southwest Atrica the following reports arrive: The German gunboat Habidt has landed a part of her crew at Swakopmund. They have arrived at Karibi. Otjimbingue is not exactly exposed to immediate danger. Omahuhu is be-sieged. The railway is destroyed, mostly by heavy rainfalls. The relief of Windhuk is now being prepared.

RUSSIA'S PEACEFUL DESIRES.

Russia in its differences with Japan does not desire any intervention by other Powers. The activity of the Russian ambassadors in Paris and London is explained by the wish of Russia not only to come to an understanding with Japan alone but also to make agreements with the other Powers too.

DEATH OF HERR MANNLICHER.

Ferdinand de Mannlicher, the inventor of the magazine-rifle named after him, has died in Vienna. He was born on January 30th, 1848, at Mainz, Germany.

(FROM THE "JIJI SHIMPO.") RUSSIA'S POLICY.

London, January 19.

Mr. Jenzahoff (?) a Russian tactician, having analysed the Russian military and naval power, has advised the Government to perfect its preparations for war and to gain time.

ARGENTINE WARSHIPS.
It is remoured that other Algentine warships have

And Other Itching, Burning, Scaly Eruptions with Loss of Hair.

Speedy Cure Treatment.

Bathe the affected parts with Hot Water and Cuticura Soep, to cleanse the surface of crusts and scales, and soften the thickened cuticle. Dry, without hard rubbing, and apply Cuticura Cintment freely, to allay itching, irritation, and inflammation, and soothe and heal, and lastly take Cuticura Resolvent Pills, to cool and cleanse the blood. A single set is often sufficient to cure the most torturing, disfiguring, itching, burning, scaly, pimply humours, eczemas, rashes, irritations, and chafings, with loss of hair, when all else fails.

The agonizing itching and burning of the skin, as in eczema; the frightful scaling, as in psoriasis; the loss of hair and crusting of the scalp, as in scalled head; the facial disfigurement, as in pimples and ringworm; the asvful suffering of infants and the anxiety of worn-out parents, as in milk crust, tetter, and salt rheum, — all demand a remedy of almost superhuman virtues to successfully cope with them. Such are the CUTCULA remedies, the purest, sweetest, most speedy and economical curatives for the skin, scalp, and blood ever compounded. Mothers are their warmest friends.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA CINTMENT for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby reshies and chafings, in the form of baths for annoying irritations and inflammations of women, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and many sanative, antiseptic purposes which readily suggest themselves, as well as for all the purposes of the toilet, bath, and nursery.

CUTICURA RESOLVENT PILLS (Chocolate Contert) are a new, tastaless, bruted liquid CUTICURA RESOLVENT, as well as for all other blood purifiers and humons cures. Put up in screw-cap pocket vials, containing 60 doses.

YOKOHAMA: SATURDAY, JANUARY 30TH, 1904.

MARRIAGE.

On Thursday, the 21st January, 1904, at the residence of Dr. A. G. Smith, No. 10 Bund, Yokohama, by the Rev. E. S. Booth, in the presence of E. C. Bellows, Esq., Consul-General of the United States, George Denison Morgan, of New York, to Miss Yuki Kato, of Kyoto, New York papers please copy.

DEATH.

At Okayama, on Jan. 24th, Mrs. HISA YAMADA, beloved mother of Mrs. Gauntlett, aged 58 years. At Shanghai, on the night of the 26th inst., CHARLES STANLEY Moss, third son of the late Chas. D. Moss, of Yokohama, aged 24 years.

SUMMARY OF NEWS.

Owing to a heavy snow fall the Buddhist temple Shinseiji, at Ogawa-cho, Kanazawa, collapsed on Jan. 25th.

An explosion occurred on Jan. 25th at the Komatsu coal mine, Fukuoka prefecture. Two workmen were severely injured.

THE Central Tea Guild received a telegram on Jan. 23rd from its branch at New York to the effect that the tea market was again quiet.

IT is rumoured in Peking that the control of the Russo-Chinese Bank is to be transferred from the Ministry of Finance to a Special Commission.

Miss T. Yasui, who has been engaged by the Siamese Court as an adviser for the proposed Peers' Female School, left Kobe on Jan. 24th for

Chamber of Commerce, and of the First Bank, who was suffering from severe illness for some weeks, is reported by the Nichi Nichi to be recovering.

IT is telegraphed from Otaru, that owing to a heavy snow storm, a junk capsized on Jan. 21st off Shikinai, with the result that seven fishermen were drowned.

A TELEGRAM from Shimonoseki states that the branch of the Bank of Japan received on Jan. 23rd silver coins amounting to yen 500,000 from the Osaka Mint.

MR. MOROI, Japanese Consul at Antwerp, tele-graphs that the committee for the International Sugar Industry will hold a conference on March

An official telegram from Formosa reports that

A LOCOMOTTY and two cars of a train on the Nippon Railway were derailed on the morning of Jan. 22nd at a point between Kariba. One person was injured. 22nd at a point between Kominato and

THE floor of the fourth-storey room of the Onoda Cement Company, Yamaguchi collapsed on Jan. 22nd with the result that a female worker was killed and three others were injured.

THE Sultan of Johore has gone to Europe with his motor car, chaffeur, and retinue of servants. He expects to be away about two years. From Marseilles he will travel to Paris in his car,

DURING the last voyage of the Italian sailing ship *Lothair* from Callao to Hongkong, fifty-five of her Chinese passengers died. Old age was reported to be the cause of death in each case.

According to official statistics, the number of suicides in Japan in 1903 aggregated 465—287 male and 178 female. There were also 217 in-stances of attempted suicide—109 male and 108

THE pilot's certificate of Capt. James, who was in charge of the M. M. steamer Australien, as pilot, when she stranded in the Inland Sea, has been suspended by the Osaka Marine Bureau for

A MAN armed with a sword early on the morning of Jan. 24th entered the dwelling of a merchant, at Kawasaki. Having tied up the family with copper wire, the intruder stole a number of articles.

A FIREMAN employed by the Tokyo Gas Company attempted to murder a companion on the evening of Jan. 13rd, inflicting severe injuries on the arm with a large kitchen knife. He was

accompanied by the Crown Princess. They will stay there during the cold season.

THE British steamer Afridi of 3,648 gross tons districts, severe subspace (whose Yokohama agents are Messrs Dodwell and January 21st. Yusen Kaisha. employed on the North China line.

BARON SHIBUSAWA, President of the Tokyo large cooking knife. Having been arrested, the the following day.

culprit was sentenced in the Chiba Court to death but he appealed to the Tokyo Appeal Court. In the latter Court, the appeal was rejected and the original sentence confirmed.

MARQUIS ITO, who has been staying in Tokyo for a few days by order of the Emperor, proceeded to his villa in Oiso on Jan. 21st. Count Katsura, the Premier, who has been indisposed is reported to have recovered.

THE Kokumin states that early on the morning of Jan. 25th two robbers entered the dwelling of Miss S. Ballard, living at Yarai-machi, Ushigome, Tokyo. Having tied up two female servants, they took away yen 3 and a gold watch.

MR. Mimasu, Japanese Consul at Seoul, tele-graphed on Jan. 25th that the reports published by a case of plague appeared at Tainan on Jan. 20th Japanese papers with regard to the riots at Tienand another at Taipeh on the following day.

The former case proved fatal.

Japanese papers with regard to the riots at Tienand another places are exaggerated. The fact is that only some ten thieves are causing the

THE recently-purchased Chilian battleship Libertad, now the property of the British Government, is to be named the Triumph, taking the place on the Navy List of the recently withdrawn ship of that name, which formerly did guard duty on the Pacific Station.

A forged ten yen note was found on Jan. 23rd in the shop of a tobacco dealer living at Kanasugi, Shitaya, Tokyo. A man looked about forty years old bought cigarettes of sen 20 and stoll yen 9.80. The counterficted note was later removed to the police station by the receiver.

A TELEGRAM from Taipeh, Formose, reports that the guards are searching at Kotosho for the natives who last month attacked an American ship that had taken shelter in the bay after a storm. More troops will be sent to the place within a few days to punish the tribe.

According to the investigations of the Kanagawa Kencho, deaths in this city in 1903 numbered 1,662 of which 855 were due to scrofulous complaints. This disease has been gradually increasing during the past few years. The present figures are 19.4 per 100 deaths, while in 1902 it was 15.7 per 100.

IT is stated by the Jiji that the steamer Seigi Maru (600 gross tons) went ashore on Jan. 22nd off Kafuri on her way from Nagasaki to Hakata, The hull was filled with water, the cargo being all damaged. She was built in 1864 in Scotland. The Tokyo Marine Insurance company insured

By the Siberia on Monday a whole batch of war-correspondents arrived. They included the novelist, Mr. Jack London, representing the arrested on the following night.

The Crown Prince who had been indisposed for about a week is reported to have recovered. He is expected to leave a shortly for Hayama are excepted by the Crown Princess. They will have recompanied by the Crown Princess.

According to telegrams from north-eastern THE British steamer Afridi of 3.648 gross tons (whose Yokohama agents are Messrs Dodwell and Company) has been chartered by the Nippon Yusen Kaisha. The Asahi states that she will be Masuke to Otaru with the result that four of the crew were washed overboard by the waves. Owing to the heavy snowfall, a school and two dwellings A ROBBER, H. Numano (31), was executed on at Shakotan, Hokaisal, a school and two dwellings at Shakotan, Hokaisal, a school and two dwellings of the night of Aug. 21st, 1900, the dwelling of T. Awomori and in the neighbourhood of Wakamamoto, a wealthy farmer, living at Tsuga, matsu was suspended on Jan. 21st, and between Chiba prefecture, and killed the latter with a Mure-Naoyetsu, Fukushima-Yonezawa, etc., on

THE SITUATION.

Friday, January 22.
We observe that some of our local contemporaries have assumed the correctness of a London telegram saying that Japan's note of the 13th instant contained a declaration that it was the last communication this Empire would address to Russia on the subject; that, failing a satisfactory reply, a measonable time would be allowed to elapse whereafter such measures as might seem necessary for the preservation of Japan's interests would be adopted, and that Japan objected altogether to the principle of a neutral zone. The exact contents of the Japanese note are still kept secret, but enough information is possessed to justify us in saying that the statements contained in the London telegram should be regarded with some incredulity. We do not think that the note was textually described as an ultimate communication, nor do we think that it contained any threat concerning recourse to active measures after the lapse of a reasonable time, nor do we think that the principal of a neutral zone was rejected. Beyond negations, however, we are unable to go, and we frankly confess that even these negations are not based on official authority. Two things, however, seem to be openly acknowledged and generally accepted as certain, namely, that Japan has never wavered in her moderate proposals and that Russia has hitherto treated them in an evasive manner. Japan has asked for one thing, and Russia's method has been to ignore Japan's askings and substitute askings of her own. That method does not conduce to a settlement, and the probability is that Japan's note of the 13th re-stated the issues in a much more insistent fashion than that

previously adopted.

The people of Tsushima are said to be making arrangements for the transfer of their old folks and children to Moji, Hakata and Shimonoseki in the event of an outbreak of hostilities. Tsushima, if it possesses great natural beauties, has the misfortune to be situated in the very centre of the probable field of operations, or at least, one of the probable fields. Its position inflicted great suffering on its inhabitants in the days

of the Mongol invasions.

The Wakamatsu Foundry is reported to be working day and night manufacturing rails for the Seoul-Fusan line. It appears further that whereas officers on the seconded list had been largely employed there, they have all been now withdrawn.

From Bakan it is stated that the passage

of ships has become remarkably infrequent. There are now, however, 14 steamers in the Strait all loading coal to fill Russian orders.

The Japanese residents of Fusan are making arrangements to organize a corps of volunteers in the event of an outbreak of hostilities. Their spirit is said be very high. They are taking various measures to assist the operations of Japanese war ships, and many of them have offered to contribute money.

rapidly at this juncture that what we write at one moment may be stale or worthless news a few hours hence. However, it is necessary to take that risk and to record things as they come.

The Chinese Representative in St. Petersburg is said to have reported to his Government that Russia, seeing the determined mien of Japan, has become desirous of tions of a peaceful settlement, Tokyo news-

sense to Mr. Kurino on the occasion of the latter's recent audience. Intervention is the next best thing to arbitration and such a suggestion as the above would well become a monarch so conspicuously favourable to peace as the Emperor of Russia. do not for an instant believe that any suggestion of the kind was made

The London Daily Telegraph's St. Petersburg correspondent has telegraphed (Asahi Shimbun) to that journal saying that Viceroy Alexieff recently addressed a memorial to the Throne. The views expressed by the Viceroy are said to be that Russia's geographical and military position ensure the ultimate accomplishment of her aims at a future date, and that from whatever quarter resistance then comes, it will be powerless to prevent the result. But at present preparations are incomplete in precisely the quarter where Russia's greatest strength should lie, namely, the army, and consequently the Viceroy recommends that the resources of diplomacy be employed to effect a temporary settlement so as to avoid an open rupture with any Power immediately. It is difficult to imagine that if such a memorial had been addressed to the Throne, its contents could have become so accurately known to any foreign correspondent. Therefore we take leave to doubt the Daily Telegraph's information, though its resemblance to the news sent by Reuter on the 22nd instant is other sources from St. Petersburg. sufficiently remarkable.

With regard to the question of M. Bezobrazoff and his patron the Grand Duke, the former of whom is in Italy and the latter in France, the Jiji Shimpo learns on good authority that the departure of the two men from St. Petersburg, though very significant in appearance, is not due to their having fallen into discredit with the Tsar, or to the defeat of the War Party The Nichi Nichi Shimbun, however, while not crediting any statement as to the fall of the War Party, believes that the Private Secretary and the Grand Duke are not in full agreement with their Imperial master, though our contemporary depre-cates the idea of basing any greatly pacific hopes on that hypothesis. The Grand Duke hopes on that hypothesis. has an excellent reason for going to Nice, his invalid mother being there.

Concerning Russia's answer; some folks in Tokyo confidently asserted that it had been received on the 20th instant, but considering that the translation of Japan's note and its transmission did not take place until the afternoon of the 14th, it would evidently have been most improbable that a reply could have reached Tokyo by the 20th. The 23rd or 24th is the earliest reasonable date. and we ourselves incline rather to the 26th

The Dempo insists that the official view is that Japan's demands must be conceded in their entirety or she will not desist from drawing the sword. But inasmuch as there never yet has been a pacific settlement without some concession on each side, the attribution of such sentiments to Japanese officials can scarcely be credited.

Saturday, January 23.

Events are likely to shape themselves so Tsar and Mr. Kurino, the Asahi Shimbun says that no news of anything of the kind says that no news of anything of the kind officially conveyed to Tokyo. Of course it is inconceivable that had the Emperor of Russia taken such an exceptional step, the Japanese Representative would have failed to report it, not after the event, but before it.

On the whole, despite the present indicainvoking the intervention of a third Power, papers appear to have little if any expectation last note.

and that the Tsar made an intimation in that that war will be avoided. Evidently an opinion prevails that if the Japanese Cabinet make the least concession, its immediate down-fall and even worse things must be immediately anticipated, whereas that Russia should wholly abandon her position is scarcely to be anticipated. We need not insist upon the self-evident proposition that whatever the Cabinet does will have the endorsement of the Elder Statesmen and the approval of the Sovereign. The Ministers of the Crown, the Genro and the Mikado represent a pretty strong combination, and though the nation has set its teeth-a result which we have anticipated for some time with no little apprehension-it is not to be believed that the moderation which has hitherto distinguished Japan will forsake her at the last moment. Yet all careful observers must fully appreciate that the situation bristles with difficulties and that Russia has allowed matters to reach a point whence peace can not be reached without an extraordinary effort.

Various statements are published about meetings of Russian diplomatic officials and naval and military attaches at the Russian Legation in Tokyo, and about private messengers. We often think that if so many false reports are circulated in Tokyo about the doings of Russian officials in that capital, not much reliance can be placed on similar rumours coming via Reuter and

Sunday, January 24.

From Peking the Jiji Shimpo's correspondent sends news that a very unsatisfactory state of affairs exists at Port Arthur. Frequent desertions are taking place, so frequent that the Viceroy has ordered all outward-bound vessels to be strictly searched. It is further stated that whereas the place was supposed to be provisioned for five years (!) the stock of supplies actually on hand would not last more than five months. This fact having been discovered owing to investigations recently ordered by Viceroy, several of the responsible officers have been severely punished. News of these disquieting conditions having reached St. Petersburg, the Government there will probably despatch General Kuropatkin to Port Arthur to make an inspection and to appease the anger naturally felt by the staff officers who find themselves in such a plight. We wonder whose imagination is plight. responsible for that story.

The Chinese Minister in St. Petersburg is said to have telegraphed to his Government that Russia is much hampered by prospects of trouble in the Balkan Peninsula, and that her policy in the Far East is correspondingly affected, those that advocate war with Japan having greatly weakened. Now is the time, the Minister thinks, for China to adopt a firm mien with a view to recovering the Three Provinces.

It is stated by the Nichi Nichi's correspondent that a great part of the Russian cavalry at Port Arthur is apparently preparing to march to Vladivostock. That would be indeed a strange movement at this season of the year.

Japanese newspapers allege that the Russo-Chinese Bank at Newchwang has stopped all loans and is taking measures to collect monies due to it as expeditiously as possible.

Berlin, according to the Jiji Shimpo's news, publishes St. Petersburg telegrams saying that Russia intends to postpone for an indefinite time any reply to Japan's

The Moscow correspondent of The Times wires to that journal that two of the Grand Dukes are urging the Tsar to declare war against Japan, and that His Majesty is

Tan. 30, 1904,

much perplexed.
Public opinion in England (Jiji Shimpo's telegrams) is unanimously persuaded that Japan is fighting on the world's behalf in the cause of civilization and progress.

The Asahi has a London telegram saying that a Council of State was held in St. Petersburg on the 20th instant under the presidency of the Tsar himself, and that the question of the answer to be sent to Japan was discussed. No decision was reached, there being a very marked conflict of views.

A few days ago it was announced that the Privy Council had examined and approved the draft of a law relating to marine defences. This law has now been pro-mulgated. It empowers the Minister of State for the Navy to stop all maritime conmunication and to adopt any defensive measures he may deem advisable at any place in Japanese waters. In the event of emergency similar power is vested in the officers commanding at naval stations. When places have been selected as within the zone of defence all passage of ordinary vessels will be interdicted from sunrise to sunset, and the prohibition will be extended to the night also in the case of naval ports or special ports. This law becomes opera-tive from the day of its promulgation and it embodies severe penalties for its violation.

Stocks and shares took an upward start on Saturday in Tokyo, but, so far as we can learn, this was due solely to Reuter's pacific news, which is virtually contradicted by his subsequent telegram. For he tells us this morning that Russia insists on the recognition of her own political and strategical influence in Manchuria with regard to all commercial concessions granted by China to foreign Powers. That would be an open declaration that the last shred of Chinese Sovereignty had been thrown away. Japan will never agree to such a settlement.

A news agency announces that although Japan did not fix any limit of time in her last note to Russia, she constructively reserved the right to set a limit according to her own judgment, and it may be taken for granted that the limit will expire, at latest, on receipt of Russia's next answer unless the latter be thoroughly satisfactory, which the agency does not expect it to be.

It is semi-officially denied in Tokyo that the Tsar conveyed to Mr. Kurino an expression of desire for the intervention of other Powers in the dispute between Russia and Japan.

It is stated that in spite of the 24th being Sunday the Emperor attended to business from 9 a.m. At 10.15 a.m. the Prime Minister, after an interview with the Minister of State for Foreign Affairs, proceeded to the Palace, and had an audience lasting for over an hour.

It is alleged that although the restrictions upon the publication of news relating to military or naval movements is carefully observed by Tokyo journals, the newspapers in the provinces are by no means so circumspect, their distance from the centre of delay is not to be attributed to any inspection enabling them to take much waiting for intervention. The measures greater liberties. The *Chuo Shimbun* says adopted by Japan for her own convenience that an Urgency Ordinance will probably be are not to be regarded by outsiders as proissued immediately for the purpose of check-crastination. ing this abuse.

Monday, January 25.

Telegrams from London to the Jiji Shimpo speak of the circular note addressed by Russia to the Powers with regard to Manchuria. The note has failed completely to satisfy England, and is regarded merely as a device for procrastinating events. The Times and the Morning Post recall the fact that Sir Nicholas O'Conor, when British Representative in St. Petersburg, obtained from the Tsar an explicit assurance about Port Arthur, which assurance was at once repudiated by the Russian Government on the ground that His Majesty's statements were not officially binding.

Rumours are said to be circulating in

Europe that Japan has landed twelve thousand men at Masampo, but of course the story is contradicted by the Japanese Legation in London.

The High Martial Council met in the Palace on the 25th instant in the forenoon, the Emperor presiding. There were present Field Marshal Marquis Yamagata, Field Marshal Marquis Oyama, General Barons Oku and Kuroki, General Count Nozu, Lieut.-General Baron Kodama, Lieut.-General Terauchi, Major-Generals Usagawa and Uyeda, Vice-Admiral Baron Inouye, Admiral Viscount Ito, and Vice-Admiral Baron Yamamoto.

Tuesday, January 26.
All kinds of rumours are circulating about the situation but we can not find that any of them are trustworthy. There is no evidence that Japanese public opinion places reliance on the peace rumours recently circulated.

Some interesting intelligence from Peking is telegraphed to the Jiji Shimpo. It appears that on the 24th instant M. Dubail called on Prince Ching and, having explained that the present strained situation was causing China perpetual solicitude and threatening at any moment to disturb the peace of the East, intimated that France was prepared to act the part of mediator not only between Russia and China but also between Russia and Japan. M. Dubail added that in this task France would undoubtedly be assisted by England and America. It happened that Prince Ching had become somewhat doubtful of Japan's programme. The fact that she had formed a programme and was quite resolved to carry it out, had been intimated by her responsible statesmen more than once, but the Prince, seeing that these intimations were still unproductive of active measures, had begun to query the issue. Accordingly he was not indisposed to listen to the overtures of Mr. Dubail, into whose words, for the rest, he read an expression of Russian desire. On the 25th therefore he sent Lien Fang to the British and American Legations to ascertain what attitude they were likely to take. But the result of Lien's mission was that neither England nor the United States was prepared to interfere at all. There the story ends. What course Prince Ching then adopted we are not told, but presumably he conveyed a refusal of M. Dubail's good offices.

It is officially denied, according to a news agency, that the Japanese Government intimated to Germany, Great Britain and America an objection to intervention. What it intimated was that the present

From the same source we learn that in end of this year,

Japanese official circles Russia's answer is not expected for some days, but no reason is assigned for the delay.

A telegram to the Jiji Shimpo from Peking says that Viceroy Alexieff has despatched a body of a thousand troops from Port Arthur to the northern frontier of Korea, and that some 80 Cossack troops from a place unrecognisable in its transliterated form have been sent towards Wiju. If Viceroy Alexieff contemplates making arrangements to guard the Yalu Valley at this season of the year, simultaneously with maintaining the integrity of his defences elsewhere, he has a hard task; and if he be really moving troops in that direction, he is not only inviting but actually challenging Japan.

On the 25th instant the Emperor summoned Counts Matsukata and Inouye to the Palace, and had an interview which is said to have related to finance. Meanwhile Marquis Ito has returned to Tokyo, and there is talk of a meeting of Elder Statesmen in the presence of the Sovereign.

At the regular Cabinet meeting on the 26th instant, Marquis Yamagata, Count Inouye and Count Matsukata were present.

There appears to be a growing impression that in view of the special importance of financial administration at this juncture, the present holder of the portfolio—Baron Sone—will give place to Count Matsukata. That would probably lead to a change of Premier.

Friday, January 29. Marquis Ito, Count Matsukata and Marquis Yamagata had audience with the Emperor on the 28th. It is understood that the questions discussed were with regard to the Cabinet and foreign affairs. The audience lasted from 10.30 a.m. till 1,20 p.m., and after it was over the elder statesmen went to the official residence of Marquis Ito, where the conference was resumed.

KOREA.

Saturday, January 23. It is reported from Seoul that the reform party—which appears to be regarded as the "American Section"—has offended the Emperor by the sweeping nature of its programme. His Majesty thinks that his prerogatives are threatened by the proposals of these innovators and he is accordingly about to effect a change of Cabinet. Prerogatives are fine things, especially when their exercise impedes reforms essential to the country's progress and safety.

Meanwhile things are said to be very quiet in Seoul. People's attention is devoted to watching the developments of the Russo-Japanese complication

Ausso-japanese complication.

Major Nozu has ceased to be Military

Attaché in Seoul and has been attached to
the Japanese forces in Korea, his place at
the Legation being taken by Major-General

On the 21st instant 50 engineers and 100 workmen, the first batch of men despatched under the provisions of the Urgency Ordinance of December, reached Fusan. Before proceeding to their stations on the railway works they were addressed by Mr. Furuichi, Engineer-in-Chief, who reminded them of the exceptional measures adopted by the Government to hasten the construction of the line and told them that, in view of the circumstances of the time, they must spare no effort to carry out the Government instructions, namely, to finish the line by the

Mimasu, the Japanese Consul at Fusan, who calls upon the Authorities to take efficient measures of protection, and declares that any failure on their part will be necessarily followed by self-protective steps on the Japanese cid-

French rifles through a London firm.

There has been a change of Cabinet in coul. The new Ministers are Pak Chong-Seoul. The new Ministers are Pak Chong-yang (Education), Cho Pyong-ko (Home Affairs) and Ming Yong-Chhol (Chief of Head Quarter Staff). Farther, Li Chi-yong, Minister of Foreign Affairs, receives the additional office of Chief of Gendarmerie, and Li Yong-ik, Chief of the Imperial Estates Bureau, the additional appointment of Min-ister of War. These changes are said to signify the fall of the pro-American party; that is to say, the fall of the reform party.

The Korean Government is said to be about to send an ambassador to Japan to convey officially the news of the Empress

Dowager's death.

The Jiji Shimpo has a telegram from Seoul saying that confidence and calm reign in imperial and official circles owing to the Government's final resolve to lean upon Japan. A curious estimate of the situation, in view of the wonderful declaration of neutrality. Nevertheless other Tokyo journals also publish statements to the effect that the recent change of Cabinet Ministers in Seoul has made for the strengthening of Japanese influence.

Tuesday, January 26. It is stated that the Korean Government's intention of proclaiming neutrality was kept secret from all the Powers-except such as were taken into official confidence-, and that, with the object of preserving secrecy until the end, a Korean official was despatched to Chefoo for the purpose of forwarding the intimation through the French Consul there, who is also Korean Consul. Rumour further alleges that the announcement has been duly received and aknowledged by the British Government, but that the Russian Government is dissatisfied with it. This last item of intelligence is at once mysterious and strange.

Wednesday, January 27 The Shogyo Shimpo seems to have despatched special correspondents to Korea. It publishes several items of news from them. One is that disturbances have arisen in the neighbourhood of the Chiksan mine

where the Japanese have a concession, and that constables (Japanese) have been sent from Chemulpo to the scene.

There are various accounts of Korea's strict-neutrality move. The general opinion seems to be that it is an outcome of the rollicy of perpetual neutrality constituted her. policy of perpetual neutrality conceived last year. It will be remembered that a section of Korean statesmen conceived the idea, some time ago, that all their country's dis-tractions and embarrassments might be terminated were it only converted into the Belgium or the Switzerland of the East.

Monday, January 25.
From Korea comes news that symptoms of unrest on the part of the population in the immediate vicinity of the Seoul-Fusan Railway have evoked a protest from Mr.

state policy might be carried out in the by the treaty, and were such a course perpresent instance. This conception is said sisted in, he must conclude that the Korean to have been fostered by the Belgian ad-Government deliberately intended to regard the immediate vicinity of the Seoul-Fusan Railway have evoked a protest from Mr.

French and Russian instructors. Indeed it The Dempo publishes a statement about phantasy, and that it has at its head the members:

many-hued Li Yong-ik together with Hyon
Song-kon who recently returned from a trip
to Russia. It was in consequence of the
French connections of the clique that Chefoo
and the French Consul were chosen for the
purposes of conveying the declaration of
neutrality to the Powers. Of course it is
firmly believed that Russian influence acted
an important part in the matter, since if

Korea like Japan, is suffering from exany failure on their part will be necessarily followed by self-protective steps on the Japanese side.

It is alleged in Seoul—fiji Shimpo's correspondence—that acting on the advice of Li Yong-ik, the Korean Government has purposes of conveying the declaration of neutrality to the Powers. Of course it is found to nurchase ten thousand stand of the liquid to the Powers. Of course it is found to the powers of conveying the declaration of neutrality to the Powers. Of course it is an important part in the matter, since if Korea really attempted to enforce her neutrality, there is obvious probability that she would come into collision with Japan. may be here noted that there is no truth in the statement recently telegraphed that the British Government had accepted the declaration with approval. The British authorities did nothing more than formally acknowledge receipt of the document.

Side by side with the above details we are told that credence should be placed in recent rumours as to the desire of certain Korean politicians to obtain the assistance of Russian troops. From several sources it is alleged that Hyon Song-kon made application in that sense during his visit to St. Petersburg and that he was told to address himself direct to Viceroy Alexieff, who would not be found reluctant. He therefore "looked in" at Port Arthur en route homeward, and obtained the Viceroy's assurance that the Russian Eagles should be seen in Seoul on the 20th of January-one account says the 2nd. The eagles did not make their presence, however, at the appointed date, and Li Hak kyun was accordingly instructed to proceed to Port Arthur to ask the reason why. Before he could start, however, the strict-neutrality farce was conceived and the mise en scene arranged.

Friday, January 29.

declaration of neutrality, there is a strong them badly and over-turned the car. Sub-party in favour of a Russian alliance, so far sequently a detachment of American marines as the borrowing of a Russian force to ensure the situation; and there is also a offices, arrived upon the scene, to the number strong party in favour of a Japanese alliance. of 23, including an officer, with fixed bayo-Indeed the Russo-phils are said to have nots, but their services were not required to actually concluded the necessary agreement, restore order. It is alleged that some whereas the Japanese section are disposed soldiers were among the riotous mob, but to wait until a Japanese army appears upon the rioters claim that they had no intention

have signified their approval of Korea's neutrality scheme.

Li Yong ik has resigned the supplementary office of Minister of War and has received an appointment connected with the Military
Staff. Yun Ungyol becomes Minister of
War. It is expected that Pak Che-sun, now
Korean Representative in Peking, will become Minister of Foreign Affairs, and that he will be succeeded in Peking by Min Pyonghyok or Song Ki-un.

The Italian Representative in Seoul appears to be taking a very strong line. recent application for a mining concession interfered to spoil the holiday.

on behalf of his nationals having been In the forenoon the usual on behalf of his nationals having been. In the forenoon the usual reception took rejected, he is said to have addressed a place at the Consulate-General and in the despatch to the Korean Government, devening a dinner attended by about seventy claring that whereas such concessions were was held at the German Club. Consul-General

Korea, like Japan, is suffering from exceptional cold, and great distress is said to prevail. Rumour says that in one house as many as nine people froze to death. It is harrowing to think of such suffering. The aggravating factors have been the depreciation of the nickel coins and the consequent rise in the price of commodities, a rise said to have been accentuated by the advent of foreign troops as Legation guards.

From Chemulpo comes news that Korea is in difficulties with her solitary war-ship. She can not pay the salaries of the officers and men, and local storekeepers refuse to give them credit. As a result of negotiations with the First Bank, five bags of rice

are said to have been furnished to the ship! A telegram from Seoul says that Russian engineers are busily surveying a line of projected railway from Wiju vua Antung and Takushan to Fuh-chow, which lies on the east of the Liaotung peninsula. Assuredly it is very difficult to discover in surveying the field of Russian activities, any indication, however small, of an intention to evacuate Manchuria sooner or later.

An official telegram received in Tokyo says that on the 24th instant at o a.m. a goods' cart drawn by eight Korean coolies was about to cross the line of the electric team when a car came into collision with it; one of the coolies was killed and one severely The remaining coolies aided by a News from Seoul indicates that political crowd which quickly came together, fell on confusion reigns. In spite of the dramatic the driver and conductor of the car, beat who were stationed in the electric railway of wreaking vengeance on the company's It is stated that Germany and Denmark employees, and that if they upset the car it was merely to disentangle the corpse of the dead man from among the wheels.

THE KAISER'S BIRTHDAY.

In celebration of the anniversary of the birth of the Kaiser, the German community of Yokohama observed Wednesday as a holiday. All German places of business were closed and there was a plentiful display of bunting. The weather was fortunately His fine, though intensely cold, and nothing

They shot a bolt in that direction, but it claring that whereas such concessions were was held at the German Club. Consul-General failed to reach the mark. Confronted, however, with the possibility of seeing their country again converted into a battle field, they thought that some part of the neutral-most-favoured-nation treatment guaranteed honoured.

CHINA.

Jan. 30, 1904.]

Saturday, January 23. Russia is said to have submitted certain demands to China in connexion with the latter's proposed declaration of neutrality. The first of the demands is that all foreign officers in the employment of the Chinese Government should be dismissed. second is that China should definitely state beforehand at what points she proposes to station troops and what their number will be. There are reported to be other demands, but their nature is not indicated by the Nichi Nichi's correspondent, from whose wire we take these facts. It appears to us extremely doubtful whether Russia has submitted any such demands. They would be gratuitously insolent. The St. Petersburg Government has no manner of right to prescribe beforehand to China what programme of neutrality she shall observe in a given con-

disbelieve the above news It is stated that Viceroy Yuan is occupied day and night making military preparations and that his duties are so onerous that he finds it impossible to respond to summonses addressed to him from the Court in Peking, where his presence is desired for consultative

adopted by China be deemed a breach of

neutrality, it would be time enough for Russia to protest. Therefore we wholly

Russian troops are said to be constantly moving towards Port Arthur. The telegraph further reports that five companies of Cossacks have occupied Haicheng, but that the statement as to the occupation of Fen-liwang-ching is not confirmed. On the 12th a transport reached Port Arthur from Odessa, carrying two thousand men.

Telegrams from Dalny and Port Arthur state that the vicinity of those places is overrun by bandits, and that the Russian Authorities are quite unable to preserve

On the night of the 20th, on the morning of the 21st, the new premises of the Russo Chinese Bank in Tientsin were destroyed by fire. It is stated that the building was very handsome and that it had been sumptuously fitted up. A few days more would have seen its occupation for banking purposes. The fire seems to have broken out in the upper storey and to have defied all efforts to grapple with it. There was insurance to the amount of 250,000 taels. Nothing is suggested as to the cause of the conflagration.

The Osaka Shosen Kaisha's S.S. Taika

Maru was destroyed by fire at a place about a mile above Wuhu. One telegram gives the name as Taitei Maru. The vessel's tonnage is stated as 2,240 tons. All the passengers were saved and there were no casualties among the crew. It is alleged that the fire had its origin in the baggage of a passenger. The engaged on the Yangtse service. The ship was

It is certain that, speaking broadly, the basic requirements of Japan at this juncture have been the recognition of Chinese sovereignty in Manchuria and the involability of korea. It is also virtually certain that the consummation of the latter object is not a serious difficulty. But as to the former, travellers by rail who arrive at Newchwang the embarrassing point is the form such recognition should take. Has not the problem been now solved? It appears to us that if Russia can. At this season the process is not easy.

either be inserted or fulfilled unless China's mitted against Japanese subjects in Liaotung, sovereign authority to make such promises were fully recognised. What more is needed? It is not to be assumed that Japan tween their country and Russia. intends to fight merely for the sake of saving keep Manchuria open to the trade of the world under China's sovereignty; that is to say, open to international commerce under conditions arranged takes a reasonable view of the situation.

And by such a method of accomplishment Japan would transfer from her own shoulders Powers in common the obligation of seeing that the newly acquired privileges did not become a dead letter. Possibly things have gone too far to permit such a solution, but

In 1899 the Japanese Government made a contract with Sheng I-fai, the gist of which was that during a space of 15 years the Hangyang Mine should furnish iron ore for use at the Wakamatsu Foundry. The contract was subject to revision every fifth year, counting from 1900, and there has been some anxiety as to the terms of revision in 1905. This matter has now been satisfactorily settled. The Chinese Government wanted three million yen and the Japan Industrial Bank has agreed to lend it at 6 per cent, interest for a period of 30 years, on condition that the Mine supplies ore to the Factory at the present rates until August 1905, after which, during a period of 10 years, the rate will be 3 yen per ton for first-class ore and 2.20 yen for second class. On the expiration of the ten-year period the rate will be subject to revision for the purposes of the next ten years, and similarly for the third ten-year period, and in the event of disagreement as to rates, the matter is to be left to appraisers. The Bank promises to pay one million yen at once, and the remaining two millions in two equal installments each at an interval of 3 months. Thus the whole 3 millions will be handed over in 6 months. It is further agreed that all payments made on account of ore shall pass through the hands of the Bank, and that, in normal circumstances, the Mine shall supply from 70,000 to 100,000 tons of ore annually at the rates now fixed, with liability to furnish 20,000 tons more in case of emergency. Thus the Bank is secured so far as the yearly payments of interest and sinking fund are concerned. The Mine and all its appurtenances are to be hypothecated as security for the debt.

Tuesday, January 26. It is reported from Liaotung that the Russians have begun to requisition horses in that district and that several have already

Many of the Japanese inhabitants of raise no objection to the carrying out of the conditions of the new commercial treaties, she will have practically acknowledged China's sovereignty in Manchuria. For the frying-pan into the fire, or westward to Manchuria from Peking and Tientsin.

treaties provide for the immediate opening of China proper. It is not surprising that in view certain places in Manchuria to foreign trade of recent events at Vladivostock and in view and residence, a provision which could not of the violent acts said to have been com-

明治计五年三月廿日第三種蘇氨物應可

The Asahi Shimbun publishes the text of China from being despoiled of her territory, the petition addressed by Japanese subjects Japan fights, or is ready to fight, in order to in Port Arthur, on the 11th instant, to keep Manchuria open to the trade of the Viceroy Alexieff, praying for protection world under China's sovereignty; that against the outrages to which they feared to com-be subjected, and also the text of the with Viceroy's reply. It does not appear from China and for whose satisfaction China the petition that the Japanese complained of alone is responsible. That is now accomplished, or may be accomplished if Russia was merely to be taken under the protection of the Viceroy in the event of war, or, if their withdrawal were considered necessary, that as long notice as possible should be alone to the shoulders of all the Treaty given to them. They admitted that they were living in Port Arthur for their own profit, but they pleaded that their presence was a convenience to the other inhabitants also. On the 13th instant the representathat there is an exit in that direction is very tives of the Japanese were invited to the conceivable. who assured them in the name of the Viceroy that their petition had been received with all courtesy and sympathy; that the Viceroy announced his determination to afford them the fullest measure of protection; that if any one laid so much as a finger on them he should be severely punished, and that they might pursue their avocations in absolute security. The civil governor, on his own account, added that the Japanese might rely on him to do everything in his power for their protection. It was this officer that invoked the prospect of the judgment of the hereafter in support of his own veracity. He appears, indeed, to have made a most remarkable oration, in the course of which he gave an account of his own career; detailed the success that had hitherto attended his efforts to preserve order in other districts; explained that his name signified "honest spirit"; that his parents had conjured him to live up to such a patronym; that he had always endeavoured to do so and would not now belie his record: that if any Japanese resident suffered outrage, he should at once communicate by telephone with him, the Civil Governor, who, although verging on old age, would forthwith bestride his steed and hasten to the rescue, and finally that the most stringent instructions had been given to the police, which instructions His Ex-cellency read aloud to his audience. This oration was doubtless made in all sincerity. Its vehemence must have greatly re-assured the Japanese.

Wednesday, January 27.
Tientsin telegraphs to the Asahi Shimbun that during the past week some 6,500 Russian troops have marched into New-chwang and that the Russian flag now floats over all the buildings. Newchwang also must be guarded, it seems. Newchwang, however, being in communication by rail with Port Arthur, this movement does not represent any special dissipation of force on Russia's part, whatever significance it may have in another direction.

Friday. January 29. Chang Chih-tung's departure for the Yangtse Valley where he was to have resumed the duties of his sometime viceroyalty, is said to have been deferred owing

advances and was collecting all its loans.

The time-expired men of the Russian

pension of all public works which are not of pressing necessity. These sources of repressing necessity. pressing necessity. These sources of re-venue, supplemented by voluntary contribu-tions, are expected to yield twenty million dollars annually, which is the sum required to meet outlays on account of extraordinary military preparations. But the fiji Shimpo's Peking correspondent, in sending this intelligence, alleges that, according to general the population is he opinion, such a source of revenue is too an immense legion. uncertain for the situation.

A warning is said to have been furnished of the dangers Russia would have to apprehend in connexion with her single line of railway did war break out. At twelve places in the line between Dalny and Tashi-kiao bombs are said to have been placed. Fortunately they were discovered before any casualties ensued. The outrage is attributed to Chinese coolies who have fallen into great distress owing to a sudden lowering of lave been sent to each correspondent inwages by the Russian Authorities. Great dividually. We can not agree that no numbers of these coolies were employed transporting goods between Newchwang and Port Arthur. But many of them have been thrown out of employment and the others find it difficult to support life on the pittance they are earning. If the greater part of the inhabitants of Manchuria were bent upon doing an injury to the railway, it would become a very precarious asset.

CHINA'S NEUTRALITY.

As to the limits within which her strict neutrality is to be observed, China evidently is still in doubt. The troops of Viceroy Yuan and those of General Ma Yuh-kon are to be sent—on have been sent, we can not ascertain which—to Shan-hai-kwan, but how far into Manchuria their sphere of operations to extend is a question still undecided. A very curious question, too, for, theoretiof Russian military measures outside the places in Liaotung actually leased to her, and outside, perhaps, the line of railway, would be a manifest defiance of China's neutrality, the Three Eastern Provinces being still, in name, a part of China's domi-nions. But China has to deal with facts not theories, and since she can not, for all her declarations, make good her professions of neutrality in their full extent, she must confine her ambition to such districts as Russia has not over-run or does not actually hold. The Liao River would be a clear and naturally defined line of demarcation. But would Russia respect it? The fact is that this problem is embarrassing for Russia She can not be indifferent to the close proximity of large Chinese forces on her right flank; forces that might at any moment, and would probably at the first symptom of a Russian disaster, throw their weight into the hostile scale. Over and above the duties of actual combat Russia has an immensely difficult task answer, but our inclination is to say that, on to their regular salaries, which are comparative perform in guarding the integrity of that single thread upon which her military potentiality in Manchuria depends, the long line send nothing. Speaking personally we ships, and in the circumstances now ex-

This tallies with recently received intelli- of railway. No asset is more valuable in should prefer to have the offending part gence that the Bank had ceased making war, no asset more vulnerable. She knows struck out and the residue wired at once, well what risks that line of railway involves, and she will try to keep even the strictly Railway guard, who were recently ordered neutral Chinese as far away from danger of the average sender's responsibility, home, are said to have been stopped enroute, our temptation as possible. Perhaps it is an all-or-none rule would probably work and to have been redrafted for a further to that desire that we should attribute moveperiod of service at the front.

The word productly with the obligation period of service at the front. Nichi Nichi Shimbun; namely, the crossing The Chinese Government has issued an of the Liao by a force of 200 Russians, edict directing an increase in the taxes on the occupation of a place on the western samshu and tobacco, and ordering the sus- side of the river, and the deflection of a considerable force towards the Shanhaikwan-Kinchow line. What army, we wonder, does Russia really command in Manchuria? If she has to guard the western, southern and eastern frontiers of an immense region, and at the same time to sustain herself and protect a single line of communications through a country where the population is hostile, her task demands

CENSORATE OF TELEGRAMS.

Some journalistic censure has been provoked, we observe, about the censorate to which telegrams to foreign newspapers are subjected at this crisis. A Kobe editor (Kobe Chronicle) complains that no public notice of such censorship was given, and expresses the opinion that notice ought to press-in which term are necessarily included all its representatives in Japanwas duly warned that from a certain date the publication of any details considered likely to compromise the situation would be illegal. What may not be published by journals circulating in Japan is obviously still less eligible for publication abroad, and if any correspondent of a foreign journal was surprised or shocked to find his telegram censored after the issue of the above notice, he must have been a very unreflecting individual. We are not writing without experience, for we ourselves have had four telegrams stopped in Tokyo. But we say deliberately that any complaint on such a subject strikes us as groundless. What are the rights or privileges of newspapers compared with the interests of a nation and the cause of peace? Newspapers do an abundance of mischief. They are the most effective existing instruments for promoting international ill will. No censorate of No censorate of their contents or of telegrams addressed to them can be too severe if it be honestly undertaken on behalf of the safety of a State and with the purpose of assisting to avert the horrors of war. As to the claim that notice should have been given to each cor-respondent individually, it appears to us quite extravagant. The business of a correspondent is to inform himself of the conditions under which his messages may be sent. If he sits and waits to be instructed, the greater simpleton he.

It can not be denied, however, that the details of procedure are open to discussion. If only one clause in a telegram be found objectionable, should that clause be struck out and the remainder of the message forwarded or should the whole be kept back? And when a message is not forward-ed by sentence of the censor, should the kaisha, in common with many other Japan-sender be informed or should he be left in ese companies, is in a sense cooperative: the dark? These are not easy questions to the employees receive a bonus in addition

but from the point of view of official responsibility and from the point of view not forwarded, it appears to us quite unquestionable that at least that measure of courtesy is due to newspaper correspondents. Nothing is more vitally important to them than celerity of despatch, and if for the sake of some particular item of news a whole budget is to be pigeon-holed, the sender being left to discover the fact two or three days or perhaps a week later-if at all-, then the telegraph becomes virtually useless for the transmission of journalistic news. We are persuaded that it is the desire of the Japanese Authorities not to exercise their power in a vexatious or needlessly obstructive manner, but truly it savours of mediceval methods that a telegraphic message should be quietly laid aside by a censor without any intimation whatever to the sender. This is especially true when we recall the fact that a correspondent is absolutely without any guide as to the nature of the matter he may or may not send over the wires. The veto against disclosing naval or military movements does not begin to cover the ground of censorial scrutiny as now exercised in Tokyo. All foreign newspaper correspondents—or nearly all—want to help the Japanese Government in this matter, not to embarrass it, and we may therefore be permitted to hope that the present very perplexing and inconvenient methods will be remedied.

Since the above was in type we learn that arrangements have been made to convey information to correspondents immediately on the stoppage of their messages.

THE NIPPON YUSEN KAISHA.

The Directors of the Nippon Yusen Kaisha have considered it advisable to address a circular to all the Company's branches and agencies pointing out that the error must be avoided of imagining that the employment of the Company's steamers in the public service will be a source of profit as was the case in the China-Japan war. There is a vital difference of conditions. At the time of the China-Japan war the Company was in receipt of a fixed amount of subsidy irrespective of the service maintained by it, and the temporary interruption of those services did not cause any interruption of the subsidy. But the present system is that the sums allowed by the Treasury are for services actually performed, and since the services cannot be performed owing to withdrawal of the steamers for other purpurposes, the payments from the Treasury necessarily cease. In addition to the loss of this important source of income, there is the fact that the steamers are chartered at very low rates, much lower than those now ruling in the open market. Thus from every point of view the Company will suffer heavily and its employees are warned to be prepared for the fact.

In explanation of this circular we may say that the plan pursued by the Nippon Yusen Kaisha, in common with many other Japan-

isting, the employees will probably find their yearly income reduced by some 30 per cent. These are the kind of sacrifices entailed on Yuan and General Ma is under orders the line of the Yalu would be a movement individuals by the prospect of war. In the case of a steamship company like the Yusen both Powers essay to effect military occupation of the place, a collision is scarcely to taneously with the close of the diplomatic complication, for the lines that have been completely commands the railway from interrupted require necessarily a considerable interval before they recover their previous state of prosperity.

A TERRIBLE TALE FROM YLADIVOSTOCK.

We are unwilling to credit the shocking reports coming from Vladivostock but they are too circumstantial to be altogether ignored and they have been made the theme of a leading article by the Jiji Shimpo. The main story is that on the 9th instant a party of Russian marines landed and deliberately proceeded to run riot through the residences of the Japanese. They broke into twentyfour houses, put women to shame, wounded old people and children, smashed furni-ture, stole valuables and behaved geneture, stole valuables and behaves a question of within her own exclusive sphere, and sacking a city in mediæval times. It is probably taking the opportunity, at the same time, to offer for Chinese instruction a same time, to offer for Chinese instruction a or three officers, that the civil officials made vivid object lesson as to the bearings of her no attempt to check these excesses, and that a reign of terror lasted for a whole day and night. We need scarcely say that the Fifi Shimpo asks what is to be expected by Japanese subjects in time of war if, while papanese subjects in time of war if, while China would involve some curious complications in the country westward of the Liao and northward of the Wall. But Russia, being herself nominally an adversaria, and Manchuria. These are the bare for and Manchuria. These are the bare facts as stated in Tokyo. We give them for what they may be worth.

Although Viceroy Alexieff has given al the assurances suggested by international courtesy with regard to the protection of Japanese subjects in the regions under his jurisdiction in the event of war, it is evident that Russian official tulelage can not be expected to extend efficiently to every part of those remote regions. The expectation therefore is that the Japanese Government will ask the Consuls of America, France and England to look after its people.

From Nagasaki comes news that 44 Japanese, including women (24) have reached that place in the Russian steamer Amur, having retired from Harbin and Dalny. A steamer is now on her way to Vladivostock and will doubtless carry away the greater part, if not the whole, of the Japanese colony

Japanese journals report that in the sequel of a squabble between Russian railway employees in a Japanese restaurant at Port Arthur, some altercation took place involving the proprietor, whereupon a party of railway guards surrounded the restaurant, and in the confusion that ensued several Japanese were robbed of money and valuables.

RUSSIAN MILITARY MOVEMENTS.

It is reported from Peking that seventy Russian soldiers have entered Kinchow. Kinchow is the point where the railway from Newchwang joins the Kaiping-Shanhaikwan line. Its occupation by a Russian force

to establish itself at Shankaikwan, and if Tientsin viá Tongku and Shanhaikwan to Newchwang, and seated at Shanhaikwan she would cut off all railway communication between the capital and the regions outside the Great Wall. At any rate the signifi-cance of this extension of her military sway at the present moment is very significant. One thing to be noted, however, is that such an immense expanse of region to be guarded can not but weaken her position strategically.

A telegram to the Nichi Nichi with reference to the above attributes the Russian movement to the prospects of China sending troops into the region outside the Wall for the purpose of enforcing her neutrality there. Russia is determined to show that she re-gards all places northward of the Wall as position in Manchuria. Every one must have foreseen, from the first, as was indeed pointed out in these columns, that the ed to refrain from making the situation so very irksome at the outset.

The Chinese Government, much alarmed at these doings, is reported to have sent Lien Fang to remonstrate with M. Lessar. But the latter replied that the advance of the Russian troops was only a tem-porary measure, and that it need not porary measure, and that it need not be regarded with any anxiety by China. The adjective "temporary" as applied to the military occupation of East-Asian positions by Russian forces seems rather out of place. At any rate the Chinese can not be blamed if they attach to the term a meaning different from its dictionary It will be remembered that when the problem of Chinese neutrality first came upon the tapis, the Russian Authorities were reported to have warned China that the occupation of certain places within her territory might be considered necessary, but that such proceedings would be friendly and ephemeral. Peking even was spoken of as threatened with occupation. Nobody treat-ed the rumour seriously at the time, but events seem to be verifying it. Of course, for reasons already assigned in these columns, the military command of the railway from Manchuria to China proper is important to Russia in the event of hostilities with Japan, but, at the same time, it is easy to appreciate that these excursions on the part of the Cossacks may have a diplomatic motive as well as a strategical. They serve usefully to remind China that she might do better by embracing the ills she knows than by fleeing to those she does not know.

Newchwang joins the Kaiping-Shannaikwan line. Its occupation by a Russian force means that Russia intends the whole of Manchuria to be under her military control, without any question of the Liao River or any other dividing line. The next problem is, will the Russian forces move down to Shanhaikwan. There is talk of their doing of the Yalu. Indeed the advanced guard of Thus from this first measure—the taxation

which Japan could scarcely observe with

SIR ERNEST SATOW ON MEDIATION.

The Jiji Shimpo's Peking correspondent has called on Sir Ernest Satow and sought his opinion about the mediation proposed by the French Representative. Sir Ernest ex-pressed very decided views. He said that he had had a visit from Chan Pei-hi and Fu Yufen, who suggested to him the advisability of mediation. His reply had been that so long as no request in that sense came from either of the principal parties concerned, mediation could not be thought of. Moreover, the policy of the Chinese Government was vacillating and uncertain. Chinese statesmen, for all their mental ability, were defective in action and allowed themselves to be swayed by every wind of doctrine. It was probable that the Viceroys and Governors, especially Yuan Shih-kai and Chang Chih-tung, would dis-approve of this idea of mediation entertained by the Central Government, and in the face

of their opposition success could not attend it.

It would seem from all this intelligence that France's effort to mediate has been a genuine thing, but that the route she has adopted does not lead to achievement. We have always hoped that France would act the part of a peacemaker in the last resort. It would well become her to do so, and her present Minister of Foreign Affairs commands But we greatly doubt whether previous reference to England or any attempt to obtain her cooperation, is the wisest preliminary. Certainly in view of the tremely cordial relations now existing between France and England, such a step on the part of the former is natural.
What is wanted, however, is the exercise of influence on the Russian Government to induce it to modify its demeanour towards Japan and to convey to it a truer sense of Japan's cardinal proposals. It is by Russia's action alone that the pro-blem can be solved. She has merely to pledge herself to carry out engagements which she was presumably sincere in making and to refrain from acts which would draw Korea into the vortex of the aggressive maelstrom. We fear that the day for compromise is irrevocably past. Such a day certainly existed two or three months ago, but it exists no longer. France, sincerely desirous as she surely is to avert war between her ally and the ally of her firiend-France's good offices can be best utilized at St. Petersburg.

FINANCIAL.

The Government's financial plan seems to be this:—A sum of 100 million yes will be raised at once by floating five-per-cent bonds at 95 with a redemption period of 5 years. This is the short-period loan recently authorized by Imperial Ordinance. Then, in order to provide funds for paying in terest and for ultimate redemption, as well as for the purposes of future loans, two means to those she does not know.

Meanwhile the telegraph (Asahi Shimbun) into the Treasury all the local land tax, in eaks of a corresponding extension of the

measure—an aggregate of 50 million yen approximately will be obtained. Counts Matsukata and Inouye, in whose moned Count Inouye and Count Matsulate to his presence and himself bespoke their good offices in the matter of finance. By these means the threatened Cabinet crisis has been averted and the bankers and has been averted and the bankers and capitalists have agreed to subscribe. The Mitsu Bishi Bank alone will take 20 inilions of the loan, it is said. There was evidently a moment's hesitation as to whether the Bank of Japan should be entrusted with the duty of apportioning the loan among all the principal banks. To such a course the bankers themselves would have assented. But a wiser plan has been adopted; namely, to invite subscriptions from the public at large, and to look to the Bank of Japan to supply any deficiency.

A collateral result of this financial programme is that the provinces of the Elder Statesmen seem to be now definitely fixed. Marquis Ito stands supreme as the source of Marquises Yacounsel in foreign politics. counsel in foreign politics. Marquises Yamagata and Oyama are the final advisers in all affairs of war; and Counts Matsukata and Inouye are charged with finance.

On Thursday the Prime Minister received a deputation of the leading bankers of Tokyo, Yokohama, Osaka, Kyoto and Osaka and diseased with them the rose.

Osaka and discussed with them the possibilities of raising a loan. He subsequently conferred with some leading men in the commercial and industrial world.

A striking example of confidence in the depressed state of the money market is furnished by the action of the Industrial Bank. It has announced an issue of a million yes worth of debentures of a thousand yes denomination, the rate of interest to be 5 yen, the period of redemption 30 years, and the subscription price par or over. We certainly did not imagine that money could be obtained on such terms in Japan. Not never loss and the Tourist Country of the Tour Not very long ago the Treasury offered its bills at 7 per cent. interest. Yet here we have the Industrial Bank offering five-per-cent debentures at par, and the President, Mr. Soyeda, is said to be confident that his operation will be successful. Why should five-per-cent. consols be selling at less than 90 when five-per-cent. debentures of a bank are bought at 100? The only ostensible reason is that in the case of the debentures the purchasers can be certain of getting back their principal undiminished, whereas, owing to the Government's unwise method of re-deeming its bonds, holders of the latter have no assurance as to the recovery of the full sum originally invested.

THE UNION JACK CLUB.

The subscriptions to the Union Jack Club works now being conducted by the Central Government and on administrative economies. From these sources a total of 50 millions is anticipated. Thus the Treasury would come into possession of a sury would come into possession of the past few years has been remarkable. It thousand year is needed to carry out the very thousand year is needed to carry out the very thousand year is needed to carry out the very thousand year is needed to carry out the very thousand year is needed to carr aggerated, but even if we put it at 50 cost some unproclaimed penelactor hearify half as much as the aggregate of the individual subscriptions, to say nothing of the trouble entailed upon the ladies have been circulated. It is alleged that capitalists have shown much reluctance acting. It is stated that Mrs. Warton, to subscribe so long as Baron Sone is in charge of finance, and that, consequently, country Makenhara and Inquire in whose model to make that was watcomed to give forthwith whatever is financial abilities the nation has absolute But the projectors must naturally be anxious confidence, have been obliged to step into that if the money goes forward in the names the breach. Osaka appears to have been of Yokolama and Tokyo, it should represent specially insistent on this point, and for a a collection made in the ordinary manner time the difficulty was likely to lead and not be indebted to an exceptional effort to the retirement of Baron Sone from the Cabinet. It is stated that the Emperor sum-doubt that when attention is drawn to the manner of Count Material forte this most worthy charity will evoke

" MUSIC AT THE CLOSE."

As Herbert Spencer lay dying he re-quested that music, which through all his many illnesses was always his solace, should be played to him, and the incident prompts Mr. W. G. Hutchison to turn up the *English* Illustrated Magazine for June, 1884, in which is printed an exquisite translation by the late George du Maurier of a lyric by Madame Necker, which runs :-

Kindly watcher by my bed, lift no voice in prayer, Waste not any words on me when the hour is

Let a stream of melody but flow from some sweet

player,
And meekly will I lay my head and fold my hands to die.

Sick am I of idle words, past all reconciling— Words that weary and perplex, and pander, and conceal;

Wake the sounds that cannot lie, for all their sweet beguiling;
The language one need fathom not, but only hear

Let them roll once more to me, and ripple in my

hearing, Like waves upon some lonely beach where no craft anchoreth;

That I may steep my soul therein, and craving naught, nor fearing,

Drift on through slumber to a dream, and through a dream to death."

table accounts for 1 072 only.	SO WE

This table accounts for 1,073 only, so we presume that it is not supposed to be quite complete. They are distributed among 45 educational institutions; the greatest num-ber (247) being at the Köbunsho-in, the next greatest number (127) at the Dôbunsho-in; and afterwards in order we find 103 studying to be officers in the army, 186 in preparatory military colleges, 40 at the Waseda University, 19 at the Imperial University, 25 in language schools, in the Law College and so on. All this intellectual activity ought to bring forth something. Yet what are a thousand students out of a population of 350 millions?

GERMANY IN THE FAR EAST.

Referring to the recent comments of journals on Germany's inter-Japanese national policy and to our appended remarks, the Deutsche Japan-Post has the following :-

the Deutsche Japan-Post has the following:—
So far the Mail. We must admit that it contains a grain of—an attempt at—honest estimation. Germany's geographical situation and the position she holds in European politics have certainly for sometime been drawbacks to us; but the true reasons are not these. Above all, however, all this has nothing whatever to do with the Japanese-Russian question. We have explained a thousand times that the whole thing does not concern us at all. We wish to be neither friend nor foe; we do not want to intrude. The times when the German Michael was good enough to offer his skin when two others cudgelled each other are past. We make our politics ourselves now.

each other are past. We make our politics ourselves now.

We should be glad if our English consins would at last recognise this. We cannot bear much grudge against the Japanese, to whom Europe is still somewhat far off, if they occasionally do not understand us. But we should like to advise them to be cautious. When big papers continually give out the key-note "against the Germans" and the little cooles sheets blow the same horn in the tone one can imagine, all sorts of hazy ideas take root in the minds of the public. Already, it has been reported III us, a coolle here in Yokohama remarked to German children that if war broke out, the Germans would be the first to come as they are the allies of Russia! We are certainly friends of a free press and open speech, but when in a country like Japan such opinions are called forth and fostered by the press, we must point to the responsibility that these people take upon themselves. They conjure the worst fate for their fatherland. If such a thing as was detailed some time ago in English papers were to happen again in Japan, the results could not be overlooked. That the affair would pass off as easily as in 1650 in the time of Iyeyasu is not to be imagined.

We translate these expressions of our conferences and the results and the second of the conference of the co

We translate these expressions of our contemporary's for the sake of securing to them greater publicity. But we must frankly say that the Japan-Post is a little disappointing in its explanations. The Japanese, we

Digitized by Google

believe, are just as anxious as the English to understand the Germans. For our own part, we find nothing less consistent with the fitness of things than that there should be any wall of emity separating Germany and England. It would serve a good end, therefore, did our German contemporary elucidate the perplexing features of German policy instead of relying solely on the discernment and intelligence of other nations. Neither can we pretent to admire the minatory tone of the Inparagraphs. Historically they are somewhat cryptic, for as Iyeyasus did in 1616, it can hardly be said that 1650 was in his time, nor do we associate the latter year with any event that finds an appropriate place in our contemporary's thesis. It might be supposed that the intention is to refer to either the proscription of Christianity or the expulsion of forcigners; but since cognate events are not more likely to cocur in modern Japan than the sky is to fall, and since also the connexion between such pages of history and journalistic criticisms of German policy is not evident, we abandon the problem as insolvable. The only thing made quite clear by our contemporary's writing is that the Germans desire to maintain a strictly neutral actitude in the purchase of complexed and the presence of complexed and the problem as insolvable. The condition of complexed the presence of complexed and the problem as the problem as insolvable. The condition of complexed the problem as insolvable. The condition of complexed the problem as the to maintain a strictly neutral attitude in the present complication, and that is primarily the point that evoked Japanese comment.

THE INDUSTRIAL BANK.

The Industrial Bank held its half-yearly meeting on the 25th instant, when the tollowing accounts were read and passed :

Brought over from last account	46,102 2,836
Total	
Net Profit	94,668
To Reserve for meeting Losses	1,909
To Rewards to officers	7,000
nually)	3,119

The meeting further adopted a resolution authorizing the issue of debentures to the amount of 41/2 million yen at a seasonable time, the details of the issue—with re-

servations that interest shall not exceed 6 per cent. and that the term of the loan shall not be more than 30 years—to be firsted by the Directors in conclave. It is understood that 3 millions of this loan are to be lent on the security of the Hanyang-iron-mine, as recently stated in these columns.

Mr. Soyeda, President of the Bank, in presenting the report, alluded to the dull state of the money market, but explained that you can be continued been obtained. There had been lent 1 1/4 millions to communal bodies, 3,570,000 yen to companies, and 4,590,000 yen to various industries, the total being about 10 millions. The Bank had boult for itself new premises covering 261 tsubo together with a strong from measuring 33 tsubo. The main partnamely \$1,237 yen—of the cost had been defrayed and the remainder would fall in the next term. At an extraordinary general meeting held some time ago, it had been decided to issue 5 million yen worth of dehench term. At an extraordinary general meeting held some time ago, it had been decided to issue 5 million yen worth of debentures, and 3 millions had been successfully floated, leaving 2 millions to be still issued. The neads of the time is been assumed as the substance. The gradual decay and, in the least half of 1902 to the last half of 1902 as a space of 1½ years, even here in this British Colony, British shipping is, and the Lusting in the last half of 1902, a space of 1½ years, even here in this British Colony, British shipping is, highest price touched in many years.

invited to enter his name among either the "Ayes" or the "Noes." The opinions The opinions of two b odies were clearly expressed— the Union Church Literary Club and the China Association. Both, were unequivocally in favour of the changes proposed by Chamberlain, and as the result of the prebiscite the following telegram was sent:
"Right Honourable Joseph Chamberlain, Brimingham. Five days plebiscite of merchants, backers, shipping representatives, and others, British Subjects resident here, taken here for or against your Fiscal Policy from Imperial not local stand-point. Result 392 for; 20 against.—Sir C. P. Charter, Hongkong." The Hongkong Daily Pess, writing on the day when the voting lists were to be closed, said :-

writing on the day when the voting lists were to be closed, said:—

The difference between the Briton at home and the Briton abroad is great. The fact that

"Home-keeping youth have ever homely wits" was stated by the immortal Shakespeare centuries ago, and despite the advantages of improved communication, the line still remains as true as when first written. Things that are obvious to the travelled Briton are not apparent, do not appeal, to the mass of the inhabitants of the United Kingdom, taken up as they are with their own parochial concerns. The little Englander is in a majority in many districts where Imperial questions are neither thought of nor understood. But the Briton who has lived in other parts takes wider views, sees more what is best for the Empire, and is better able to shake himself free from the trammers of local self-interest. Hence it is that the residents in Hongkong, although it is a free port, and practically much less affected than the Mother Country by fiscal changes, are able to come to a more rapid decision on the question that is now absorbing public interest in the British isles. It is not wonderful, therefore, that they should have long since ceased to make a fetish of free-trade, so hould have come to recognise that free-trade exists only in the imagination of the professed disciples of Cobden, and to be painfully cognisant of the fact that by clinging to this shadow they are in danger of losing the substance. The gradual decay and, in many cases, the total loss of many British industries is but too apparent to us here, though the people of Little Pedlington, who have been slumbering for the past half-century, may not be aware of the fact.

As for Hongkong. This is a free port, and we

circumstances.

Probably a great many Englishmen are thinking along the same lines as the editor of our colonial contemporary. It used to be our custom to say that America prospered in spite of protection. Now we are saying that England has prospered in spite of free trade. It were a poor kind of world if each generation had not liberty to contradict its predecessor.

LAST YEAR IN THE UNITED STATES.

Writing on January 2nd, the New York Commercial said :-

Commercial said:

The financial incidents of 1903 which stand out prominently may be briefly summarized as follows:

1.—The tremendous decline in the stock market, which for a part of the year overshadowed everything else. The depreciation in stock values amounted to between \$2,00,000,000 and \$3,000,000,000—a depreciation greater than ever occurred before in the history of the country.

2.—The withdrawal of the investing public from the stock market when enormous blocks of securities were placed upon the market. The public remained out of the stock market throughout the winter, summer and fall.

NOTES ON CURRENT EVENTS.

Lord Curzon has presented to Les Invalides Museum in Paris a complete collection of Indian Army medals dating from 1799 and extending to 1900. M. Delcassé has written warmly thanking His Excellency for his unique gift. With reference thereto The Times of Ceylon writes:—A complete set of Indian army medals since 1799 is a valuable gift, and it should not include any souvenir which France could consider distasteful. France's interest in India lapsed to all intents and purposes when the great Dupleix was recalled by Louis Quinze and left to die in penury with his ambitious dreams unrealised. The Revolution gave France little leisure to continue the hopeless struggle against Great Britain in India, and, when the Little Corporal was in a position to allow his ambition full rein, the prize was gone for ever. The exploits of the French ended in 1755, so the collection of medals which the famous French Military Museum has received will bear no record of La Bour-donnais' capture of Madras, nor of the exploits of Pitt's heaven-born general at Arcot and Plassey and elsewhere. The period from 1799 on has seen stirring times enough in India, but France has had no part in them, so that Lord Curzon's collec-tion of medals can only have a relative historic interest to her.

The tobacco bill of the United States has grown to enormous proportions during the past few years. According to Mr. Yerkes, craft than anything else." The facts are Collector of Internal Revenue, the American that Muroran is not a yard at all, and that people use more tobacco and snuff every year. While the men spend more money on tobacco, the women are doing a larger business with snuff than ever before. There were 310,654,639 pounds of tobacco and 18,840,747 pounds of snuff withdrawn from warehouses for consumption during the last fiscal year, not counting 8,345,217 pounds withdrawn for export, making a total of the two articles of 337,840,603 pounds used, against 328,464,428 pounds in the preceding fiscal year. A total of 6,788,754,108 cigars were withdrawn for smoking, an increase of 679,437,181 over the preceeding year. Cigarettes smoked during the last fiscal year numbered 3,254,-883,330, an increase of 357,213,403 over the year before. The increased use of leaf tobacco in ten years has been enormous. 1893 the total number of pounds of leaf tobacco used in the production of tobacco, snuff, cigars and cigarettes was 312,907,679. In 1902, the total was 427,553,964 pounds. The States of Missouri, North Carolina, Kentucky, Virginia, Ohio, New Jersey, New York and Illinois, in the order named, were the largest producers of both chewing and smoking tobacco. There was a total increase of 35,817,646 pounds in the materials used in the manufacture of tobacco and snuff as compared with the preceding fiscal year. The production of tobacco by the principal States was as follows: Missouri, 84,332,641 31,602,779 pounds, Ohio, 25,437,840 pounds; New Jersey. 21,229,084 pounds. There were 26,423 cigar and 517 cigarette factories in operation. Virginia manufacpounds of todacco. North Carolina makes havait attache in rokonama. It is alleged comparatively few cigars, putting most of that this man has been in receipt of very her manufacture into plug and other tobaccos. North Carolina, for instance, used information about Japanese fortresses and only 186,254 pounds of tobacco in cigars and made only 9,423,036 cigars. New Tokyo journal puts his property at a million Jersey produced more shuff than any other yen, and says that he would have effected is much larger than the increased over 10 per cent. since 1897, while in the same time the proportion of working time lost by organized wages earners has declined from 30.3 per cent. To 13.9 per cent. This, combined with the advance in rates of wages, yields an estimated increase in yearly earnings of 36 per cent., which

State, the total being 5,583,323 pounds, nearly one-third of all that was used.

The Prime Minister has quite recovered from his recent indisposition. He returned to his official residence on the 22nd instant.

This Company has just held its semi-annual meeting and decided to declare a dividend at the rate of 28 per cent, annually.

The Jiji Shimpo, while admitting that war is a terrible thing, believes that peace could not be purchased now except at the expense of a constant rivalry of armaments' expansion in the future between Japan and Russia. On the other hand, it is persuaded that to fight now will be to lay the foundations of a peace lasting for many years. The Kokumin Shimbun insists that Russia's pretended concessions are empty talk, as is proved by Reuter's recent telegrams, one of which represented her as willing to recognise China's sovereignty in Manchuria, while the next explained that the so-called sovereignty was to be limited by a free exercise of Russian strategical and diplomatic influence. Nothing coming from Russia can be trusted. The Japanese nation says the Kokumin.

Mr. F. J. Norman, writing in the Spec-tator, says that "Maizuru, on the Sea of Japan, and Muroran, in Yezo, are yards of secondary importance, and are mere coaling stations and harbours of refuge for small craft than anything else." The facts are Maizuru, according to the statements of British naval experts, is one of the finest harbours in the East, splendidly fortified and with a fine dock. That is a fair measure of Mr. Norman's general information about in Thibet are urging the Dalai Lama to things Japanese, especially the Japanese army and Japanese ideals, on which subjects also he descants in the correspondence columns of the Spectator.

The two new cruisers are expected to reach Yokosuka on the 10th of next month, Thibet has managed to prolong her anchorite approximately. The British and Italian existence beyond all previously imaginable crews will receive an ovation at the hands of limits, but her time has now come, and it the Yokosuka folk as well as at those of the Tokyo citizens. Many leading citizens of the capital have combined to organize a

On the 23rd instant the Red Cross Society's Committee of Succour in Case of effect that a Korean Envoy, bearing his War held a meeting and passed various Government's expressions of thanks for resolutions which, however, are not published.

Some changes of local governors are announced :- Mr. Yamada Haruzo, Prefect of Shizuoka becomes Prefect of Hiroshima; Mr. Kamei Eizaburo goes from Tokushima to Shizuoka; Mr. Yukatsugi Takejiro, Secretary of Tokyo Prefecture, becomes Prefect to Tokushima; Mr. Sugai Seibi, Prefect of Tochigi, goes to Ehime; Mr. Shirane Takeshi, Secretary of the Home Department, becomes Prefect of Tochigi, and Messrs. Tokuhisa and Matabe, Prefects pounds; North Carolina, 52,209,593 pounds; and Messrs. Tokuhisa and Matabe, Prefects Kentucky, 39,406,680 pounds; Virginia, of Hiroshima and Ehime, are placed on the 31,602,779 pounds, Ohio, 25,437,840 Retired List.

Japanese newspapers publish a story that the arrest has just been effected of one Takatured 460,702,354 cigars, using 4,096,602 hashi Monsaku, an interpreter to the Russian pounds of tobacco. North Carolina makes Naval Attaché in Yokohama. It is alleged Naval Attaché in Yokohama. It is alleged

his retreat to Russia long ago had he not been asked by his employers to remain a longer. That is probably embroi-The police are said to have been on little longer. dery. Takahashi's tracks for a considerable time, and his treacherous doings were known in Yokosuka. But the difficulty was to lay hand on proofs, and that has only just been accomplished. We presume that every military or naval attaché in a foreign country has his own private sources of information, but a source of supply for Russian uses is likely to be somewhat mai-odorous in public nostrils at present.

Though President Roosevelt moved with his accustomed vigour in the matter of appointing American Consuls to Mukden and Antung, he was not unmindful of the financial side of the question. We see by a Washington telegram of January 4th, that he directed the Assistant Secretary of State, Mr. Loomis, to recommend to the House of Representatives that the salary attached to each place should be 4,000 gold dollars a

KORFAN NEUTRALITY.

T is stated on good authority that Korea's took the form of a despatch written in the French language and forwarded to Tokyo, which place it reached on the 21st instant, by the French Consul at Chefoo, who is also the Korean Consul at that port. Further, the Korean Government does not appear to have availed itself at all of the usual diplomatic channel of communications, namely, its own Legation in Tokyo. The belligerent operations.

that but for Japan's championship Korea Japanese nation. would not now be in a position to make any independent declaration at all. And no one Kokumin Shimbun, the Jiji Shimpo, the Chuo the United States, the Standard of London, knows better than he that what threatens Shimbun, the Shogyo Shimpo and the and the Sun of Canada are obliged to disthe Korean peninsula to day is not Japanese Vomiuri Shimbun. Some of these journals continue new business as a consequence of aggression but Russian aggression. Yet he say much harder things than we have here the Order, has now, directly by his own counsel or in- set down; things which we suppress for the The retirement from any country of ese have the sense of proportion tolerably shuffling, and it evidently appears to them on the purely mutual principle, no policy-

mole-hills into mountains. Thus they have more unmanly than to stand vacillating in not allowed themselves to be excited about the presence of an enemy while he gets declaration of strict neutrality in the recent incidents in Korea. They are learn ready to fight. That was not the way of event of hostilities between Japan and Russia, ing, however, what to expect, and M. the Japanese samurai in old times. As PAVLOW may congratulate himself on having Count MATSUKATA said at a recent bangreatly helped to teach them. As for Korea, quet, the samurai never drew his sword her councillors have merely succeeded in without good cause, but once drawn rendering her ridiculous.

JAPANESE SENTIMENT.

LEADING Japanese journals seem to tions and are merely awaiting the word of place no confidence whatever in the pacific command. We ourselves believe that in despatch bore the signature of the Korean news coming from St. Petersburg. They Russia there is a strong party headed by Minister of Foreign Affairs, and its gist is declare that the nation and the world are the Tsan himself which favours a pacific understood to have been that since the utterly weary of this tergiversation. What settlement, and would make any reasonable complications between Russia and Japan Russia says she does not do and what she did not seem likely to yield to diplomatic does is never what she says. Every one of party did not assert itself sooner; did not resources, the Korean Government deemed her aggressive acts, every one of her unit necessary to announce its intention of peaceful steps, is heralded by a flourish of maintaining strict neutrality in the event of pacific and amiable trumpets. If she really desire a friendly settlement why does she It is a pity that the French language not accede to Japan's moderate and amicserved as a medium for conveying this in- able proposals? well developed. They do not magnify that of all unmanly acts nothing can be he never sheathed it without honour. For all practical purposes Japan may be said to have drawn her sword. Her navy and her army have completed their preparacommand. We ourselves believe that in sacrifice to secure it. The pity is that this assert itself in the days when an amicable arrangement might have been easily made. Precisely the same situation existed with regard to Treaty Revision. Excellent terms might have been obtained for the foreign communities had the negotiations been concluded while the Japanese were in a yielding mood. But the favourable time was allowed to slip away, or rather was frittered away in useless wrangling, and at the last an almost unconditional surrender was witnessed. Foreign States did not take Japan seriously. That seems to us to be just the error Russia has fallen into, and it must be now a source of sincere regret to a multitude of liberal minded and peace-loving Lussians.

THE INSURANCE QUESTION.

AS uncertainty seems to prevail regarding the attitude of life assurance companies towards the Order of the Imperial Japanese Government, calling for the deposit of reserves, an enquiry has been made which shows that the Equitable and the Mutual of

holder can have a greater or less right than another; and in the event of the insolvency of a company, its funds must be distributed with due regard to this vested interest of the general body of policy-holders Apart from this there is the vitally important question of the class of security in which the companies' investments are made; and it is an additional source of regret that the securities designated by the Imperial Government do not obtain from foreign companies the approval which possibly was anticipated.

Only one of the companies has given official notice of closing its business. But it is not to be inferred that others intend to comply with the Government order, the time limit of which is the 31st instant On that date it will be found that the companies referred to above have discontinued new business, and that they will remain solely for the purpose of doing gradually, and with due consideration for the convenience and interest of policy-holders, the business now in existence.

This situation is deplorable. The companies all complied with the requirements of law by making application for licenses-to carry on business, which were granted without reference to ulterior conditions; and it is not unreasonable to assume that, had the grant of a license been made conditional upon subsequent deposit of reserves, the companies would have then and there abstained from prosecuting their enterprise for exactly the same reasons as compel them to withdraw now.

It is rumoured that the Government will exact a deposit of yen 100,000 whether the companies continue new business or not. That course will certainly lead to fresh difficulties. The companies, it is understood, are not disposed to submit to any condition of that kind; and they are in a position to oppose strenuously any effort to compel the deposit. Whatever the result may be, it is certain that, pending a settlement, the interests of existing policy-holders will be of the companies already in force will be subject to partial extinction from lapse of policies due to confusion of circumstances: and the operations of these wealthy corporapeople, will come to an end.

PANAMA.

To later observers it will appear that the exists. Distinctions of clan have been wholly and the Philippines, and already makes itself felt forgotten in their case. Instead of being in the Far East, and in Europe. In the Chinese he knew. Well, prior to the publication of the struggles of the young officers to oust ing Europe from annexing any part of North or South America, the United States are by the essay in the Spectator we never heard of them, become the purest moonshine.

and beyond to the shores of Eastern Asia and Australia.

In view of this ambition, and these plans, one can readily understand the importance of connecting the Atlantic and Pacific Oceans by a waterway, for the use of the whole civilized world, but particularly for the United States. If the United States of North America wishes to establish imperialism as a reality on both oceans then their connection by water through the isthmus of Panama is a very vital question. the isthmus of Panama is a very vital ques-tion. The way around Cape Horne is long and dangerous, especially when the Straits of Magellan, by winter fog, are shrouded in midnight darkness. The overland route from New York to San Francisco, is expensive and for freight almost impractiable. What the Kaiser-Wilhelm-Canal is, in a small way, for the German empire, the Panama Canal will in a gigantic measure prove for North America. It will double the capacity of the American fleet. A glance at the map of the world will at once show us the great importance of the Panama Canal for the commerce of the world. The parrow confines of the Isthmus of Panama, only 46 miles between Aspinwall and Panama, strongly invite the making of a connection with the two oceans here. In this respect the enterprise is the first pendant to the Suez Canal, and it is remarkable that the creator of that was also the originator of the plan for piercing the Isthmus of Central America. Ferdinand de Lesseps organized, in 1881, a French company for this purpose with a capital of 800,000,000 francs. Most of my readers will remember how this Panama company was ruined in consequence of gross mis-management and the squandering of its funds. Already in 1889 the company had to liquidate, and disappeared in the sequel of a general public scandal, in consequence of which M. de Lesseps, the younger, was imprisoned.

Out of the chaos a second company came forth, in 1894, which has up to date completed about two-fifths of the work, somewhere near 20 English miles. Meanwhile the North American jingos had begun seriously to think upon this subject. The United States realized the great national and political importance of the enterprise and discovered that the Monroe doctrine would never allow that such a work should be placed would never allow that such a work should be placed in the hands of Europeans. In the first place the Nicaragua canal was "boomed" against the Panama project. Threats were made against the French plan by undertaking an opposition enterprise; these threats were no doubt the chief reason why the new Panama company offered to sell its entire interests to America for £8,000,000 or 40 million dollars. This brought the matter to its present position. For now the Union undertook the management of the enterprise, and the next step was to come to an understanding with Great Britain for my to February study too. with Great Britain, for up to February 5th, 1900, the Clayton-Bulwer treaty was binding. If the Stars and the Stripes were to wave alone over the Panama Canal then this treaty had to be abrogated. The Hay-Panneefote treaty took its place in 1900, in which Great Britain relinquished her rights of joint control, and the United States agreed to the neutralization of the Panama Canal after the style of the Suez Canal. This opened the way for the United States to negotiate directly with the Columbian Government with regard to a concession. The last act of the drama led to a periptive of complications, and at the same time settled the matter in the interests of North America, in a way so elegant that its like is seldom found in the history. of international intercourse. The United States, always holding in the left hand the threat of the Nicaragua Canal, offered with the right hand to the Columbia Government, for the Panama concession, the handsome sum of 2,000,000

proclaimed itself independent of Columbia; and that the United States, "after carefully examining" the wishes of the free citizens of Panama.

There being no remarks, had recognized the new Republic, and was con-centrating men-of-war from all directions in the vicinity of the canal. This was done, of course, for the purpose of "protecting its own citizens" and "to keep order." In this way the Gordian knot was cut in two. The new Republic at once sent a Minister to Washington, who accepted the North American demands in the lump. There-upon France, the next interested Power, also recognized the new order of things, while the other Powers held back, but of course no one protested.

In Bogota all these things produced great noise. The President of Columbia gave expression, in eloquent words, to the sacred rights of the "proud Columbian nation," and rattled his sword. He even appealed to the neighbouring free republics of South America,—among others to our old friend Don Castro of Venezuela, to help in this "holy war." An effort was made to buy arms in Europe, but failed in consequence of the empty state of the state treasury. No one took the statements of the Mestizian Republic seriously; and with the respectful pressure which the United States exerted, coupled with their great moderation, the noise soon subsided. Columbia will accept the reasonable offer of Panama to bear a part of the national debt, the interest on the same to be guaranteed by the United States, and thus this state revolution will remain what it is: a harmless comedy. To interested observers, the whole performance would seem ridiculous were it not for the fact that at the bottom lies a great work in the interest of civilization. The Panama Canal will unite the Atlantic with the Pacific ocean in a trip of 14 hours. Not only will Pacific ocean in a trip of 14 hours. Not only will it bring the Eastern states of the Union closer to the Western—Boston, New York and New England nearer to San Francisco—but also the whole of Europe, Great Britain, France, Germany and Russia will be equally benefited by the new sea-route. Even Eastern Asia, the islands of the Pacific and Australia will come nearer, by means of the Canal in a fashion as yet incalculable. That the result will ultimately exceed those of the Suez Canal there can be little doubt. For the Continents of our planet stretch from north to south, and therefore every opening from west to east shortens the way far more than from north to south. The more the Pacific, and the Far East gain importance in the trade of the world and the more the commerce of the Western Coast of America develops, the greater will be the importance of the new canal.

NIPPON RACE CLUB.

The annual general meeting of members of the Nippon Race Club was held on Wednesday afternoon in the Masonic Rooms, No. 78, Yokohama. Dr. Wheeler, Vice-President, occupied the chair and there was a good attendance.

The CHAIRMAN announced that the President, Sir Claude MacDonald, regretted exceedingly that pressure of business detained him in Tokyo.

At the request of the Chairman, the Secretary (Mr. S. H. Somerton) read the notice calling the

meeting.

The Chairman said the next business was the passing of the minutes of last meeting. As they were very voluminous and their reading would occupy a great deal of time he asked for a motion

that they be taken as read.

On the proposal of Mr. V. Blad, seconded by Mr. A. R. Catto, the minutes were taken as read.

The next business, the Chairman continued, was the consideration of the report and accounts for 1903. If any one present did not have a copy nama concession, the handsome sum of 2,000,000 for 1903. If any one present did not have a copy classes come up and fall out. If they had a pounds sterling, or 10,000,000 dollars. It was especially stipulated that North America should say that the secretary would supply the want. He might say that the report and accounts had already been approved of by the Permanent Committee. It was a very full and able report and be thought that by delay it could hold off the great Northern Republic, and in due time obtain a better offer. But suddenly the world was surprised by the But the Secretary would supply the want. He might definite skeleton programme and they found that export and accounts that the might definite skeleton programme and they found that supply the want. He might definite skeleton programme and they found that export and accounts accounts the already there were not sufficient horses they had to rearrange the whole programme. Mr. Techer asked had they not been racing the whole programme and they found that supply the want. He might definite skeleton programme and they found that supply the want. He might definite skeleton programme and they

There being no remarks,
The Chairman asked some one to propose their adoption,

On the motion of Mr. J. de Cuers de Cogolin seconded by Mr. A. R. Catto, the report and accounts were adopted.

The CHAIRMAN said the next business was election of the Committee. He asked Messrs A. J. McClure and S. Isaacs to act as scrutineers of the ballot and reminded those present that only full members could vote.

While the scrutiny was going on,

Mr. DUKE MARSHALL said there was a very general feeling at the last general meeting in favour of a fixed programme yet nothing at all had been done in the shape of fixing a pro-gramme so far as he knew and therefore he would like to ask the Executive Committee if there was any reason why something could not be fixed so as to provide classical races, for which he was perfectly certain owners would provide horses. He thought the same feeling must prevail now as at the meeting last year.

Mr. A. G. Morey Weale said he thought a fixed programme, if it could be carried out, was an excellent idea, but he was afraid that in practice it was not so easy. The Committee did not overlook the fact that m fixed pro-gramme had been referred to as a desirable thing, but on looking into matters they found it difficult to act. However he had no doubt that the in-coming Committee would give the subject their attention and if they should see their way to drawing up a fixed programme of the various classes coming forward and also dropping outfrom time to time it would be extremely satisfactory to owners, inasmuch as they would always know what they had to look forward to. retiring Committee found it a very difficult matter to carry through in view of the horses that remained over. He suggested that the incoming Committee might call a meeting of owners in order to ascertain the views of the latter on the point (Hear, hear).

Mr. Marshall said if that was the opinion of the Committee, as he thought it must be the feeling of the meeting then it would be as well to take it so as to strengthen the hands of the

take it so as to strengthen the hands of the incoming Committee.

The CHARMAN—The incoming Committee would be only too delighted if you call a meeting of owners and formulate something for them to go upon.

Mr. Marshall—I suggest that it is for the Committee to call such a meeting not for an individual member.

The CHAIRMAN said the Committee wanted to have the views of the owners.

Mr. Marshall said he should like to hear the

feeling of this meeting to strengthen the hands of the Committee.

The CHAIRMAN asked if Mr. Marshall put that

in the form of a resolution.

Mr. Marshall said he merely suggested it; he did not think they could pass a motion.

The CHAIRMAN said the meeting could not do anything unless some one proposed and some one else seconded a motion; then they could take a

Mr. MARSHALL-Well, I suggest it.

The CHAIRMAN—You propose?

Mr. MARSHALL—I propose.

While Mr. Marshall wrote out his proposal,

Mr. F. M. TEGNER asked what were the difficulties the Committee had to overcome in the

way of fixing a programme.

Mr. Weale said in having a fixed programme they had to define beforehand what races were to be allotted to certain classes but as he said before classes come up and fall out. If they had a definite skeleton programme and they found that

gramme would be an excellent thing if it could be carried out. There was a rule to be consider-

ed (28) which said:

"The Programme of the Spring and Autumn
Race Meetings shall be drawn up by the Executive Committee as soon after the previous meeting as possible. If owing to special circumstances it be found impossible to decide upon a definite programme within a reasonable time after a meet ing, a skeleton programme shall be published which shall be adhered to as closely as possible." Would Mr. Tegner propose to make an alteration in the rule so as to cover his fixed programme. Mr. Tegner said he would propose that the

Committee reconsider that rule and possibly have it changed so that a skeleton programme could be drawn up for three or four meetings. There was something published in the Japan Mail about the matter and he thoroughly endorsed the sugges-

tion there made.

Mr. Marshall here read his motion as follows "That the incoming Committee shall call a meet-

bility of framing a fixed programme.

Mr. Weale—Would you not say for how long?

Mr. Marshall said there was a very valuable suggestion in, he thought, the Japan Mail as to a fixed programme to be confirmed by the Pernanent Committee for a certain time, that confirmation to be renewed from year to year or for as many meetings as necessary. That would cover the difficulty.

Mr. DE CUERS DE COGOLIN having seconded Mr. Marshall's proposal it was carried, 18 supporting it and none voting against.

Mr. TEGNER read from the Japan Mail of Dec.

14th the following, which occurred in a letter signed "A.R.C.":

"It would be very much better to make provision in the rules such as the following:

"' The Permanent Committee shall have power to frame a skeleton programme, extending over a period of three or more years, which shall be adhered to as closely as circumstances will admit by the Executive Committee, who shall publish detailed programmes for the Spring and Autumn Meetings as early as they conveniently can before the dates fixed for such Meetings. Any changes in the standing skeleton programme found neces-sary by the Committee, shall be advertised for the information of members as early as possible." I thoroughly endorse that, added Mr. Tegner,
The CHAIRMAN said Mr. Marshall's motion

included all that.

Mr. TEGNER said certainly.
Mr. Marshall called attention to another point that had been referred to in letters, namely the weights. The racing public must surely know that they were racing exclusively under Yokohama weights, and he could see no reason why they should not be brought into line with racing practice in other centres. He did not want to be suggesting everything to this meeting, so perhaps some one else might have something to say.

The CHAIRMAN thought the incoming Committee

would take Mr. Marshall's suggestion into con-

sideration.

Mr. Marshall said there seemed to be some confusion as to the powers of this meeting. As far as he was aware the meeting had no power to propose or suggest anything whatever. For himself he saw no reason why they should not suggest but he saw no reason why they should not suggest but he saw no reason why they should not suggest but he really said the marking of if he recollected aright anything in the nature of a proposition was entirely out of place except as to the accounts.

The CHAIRMAN said yes, but he had wished to

The CHAIRMAN said yes, out he had wished to make the matter more emphatic, because a meré suggestion was apt to be forgotten by people.

It was announced that the ballot had resulted in the election of Messrs. V. Blad, D. Marshall, K. Mori, A. J. Easton, C. de C. Hughes, J. de Cuers de Cogolin, and F. M. Tegner.

The Chairman said that closed the formal business.

The Chairman said that closed the formal business of the meeting, but he thought they ought not to disperse without giving a very hearty vote of thanks to their late Executive Committee—a Committee that had done everything for the club, worked hard and worked well in their interests

(Hear hear, and applause).
On the motion of Mr. Barckay a cordial vote of thanks was accorded to the Chairman and the

proceedings terminated.

In submitting the Report and Accounts of the Nippon Race Club for 1903, the Committee are pleased to have the opportunity of congratulating Members on a prosperous year's working. The quality of the sport provided has distinctly tended towards improvement, and it is reasonable

to hope that with the increasing interest displayed in local Racing generally, this will not only be maintained but continue to still further develope.

Financially the Club stands on an excellent footing, and at the present rate of progress should shortly find its position independent of any possible contin-

gency.

MEMBERSHIP:—An accession of 28 Active and 19
Subscribing members to the Club roll has to be
recorded, bringing the total in each class up to 197
and 103 respectively.

By the decease of H.I.H. Prince Komatsu no Miya
the Club has been deprived of an illustrious Patron

whose place H.I.H. Prince Kan-in no Miya has graciously consented to fill.

In the same connection the Club has to regret the

loss by death during 1903 of some of its older ad-herents—notably that of Mr. N. P. Kingdon, tor many years one of the keenest and most prominent

herents—notably that of Mr. N. P. Kingdon, for many years one of the keenest and most prominent supporters of the local Tuif.

CLUB PROURERY:—Considerable improvements of different kinds have been effected during the past twelvemonth to the Club's property and buildings, which generally speaking are to-day in an excellent state of repair. Under this heading may be mentioned the erection of a new Tiffin Room, etc., which it is hoped has conduced to the comfort of Members and Visitors, the completion of uniform fencing round the Lawn and Weighing Enclosure, alteration to steps of the Grand Stand, etc., etc. The Executive have had under consideration further plans for an entire reconstruction of the older buildings which will be placed at the disposal of the incoming Committee. A plot of land adjoining Mr. Mottu's stables, about 100 fisubos in area, has been acquired on very cheap terms, and is available for building additional stalls when required Negotiations for the purchase of the straight on which "stands" for Japanese spectators have hitherto been erected were taken in hand, but unfortunately had to be abandoned.

PRIVATE ROAD:—This has been thoroughly repaired and sufficiently widened at the top to permit of a freer passage for vehicles.

The Kencho have been asked to draw up a complete plan of the Club's Property from official records, showing the boundary line of each lot purchased, rented, and/or loaned by the Imperial Estates Burcau, and have kindly consented to take the matter in hand.

STARTING GATES:—At the written request of numerous owners the use of these during the Autumn

the matter in hand.

STARTING GATES:—At the written request of numerous owners the use of these during the Autumn Training and Racing was abandoned. The two machines imported from Singapore, however, are still available if required.

CLUB VETERINARY SURGEON:—Following up the suggestion put forward in the last Annual Report, the Executive Committee engaged in July last the services of Mr. Harrison—a duly qualified Veterinary Surgeon of Sydney. Mr. Harrison's present contract expires in July next.

Surgeon of Sydney. Mr. Harrison's present contract expires in July next.

SUBSCRIPTION AUSTRALIAN GRIFFINS:—No pains have been spared by the Committee to ensure arrival of these within dates leaving reasonably sufficient time for training, but in spite of special arrangements for direct shipment, etc., the fact is apparent that only by ordering in advance of subscribers' requirements can this be made a certainty.

In the case of the Spring 1904 Griffins the Committee took steps accordingly, with the result that the new batch of Australians are due to reach here within the present month.

within the present month.

Advantage was taken of Mr. Kiss' recent visit to Japan to provide for a second means of supply should be at a second means of supply should be a second means of supply s

Japan to provide for a second means of supply should a change in the Club's present connection be at any time deemed desirable.

PONY AUCTIONS:—An agreement whereby Mr. J. W. Hall assumes charge for a term of five years of the Club's Auctions in place of his own was finally concluded in November, and will, it is hoped, prove

or the Chio's Auctions in place of ins own was infally concluded in November, and will, it is hoped, prove a beneficial step in the interests of sport.

RULES:—Various alterations, of which Members have already been apprised, were proposed and confirmed by the Permanent Committee in the Spring of 1903, and new books of Rules issued.

PRIZES:—The value of these has been increased during the past year to figures compatible with the resources of the Club and now stands at roughly yen 22,000 per annum.

His Imperial Majesty the Emperor by the gracious presentation of a Cup at both the Spring and Autumn Meetings again conferred a marked honour on the Club, which the Committee on behalf of the Members have to record their high appreciation of. The thanks of the Members are also due to individual donors of prizes.

Also to those gentlemen who in various official

Also to those gentlemen who in various official Also to those gentlemen who in various official apacities were good enough to lend the Committee valuable assistance during the Race Meetings.

Subscriptions and Vo. Books and found correct.

COMMITTEE ROOM: -For the purpose of establish of semi-official meetings the preservation of the Club's archives, etc., a room at No. 23, Water Street, has been leased to form the Committee's head

In accordance with Rule IV, the Committee now

GRAND HOTEL, LTD.

明治廿五年三月廿日第三世郭侯帝龍可

A WELL-DESERVED TRIBUTE TO Mr. EPPINGER. The semi-annual general meeting of share-holders in the Grand Hotel, Ltd., was held on Wednesday afternoon at the Hotel, Dr. C. H. H. Hall, Chairman of Directors, presiding. There were also present, Messrs. A. M. Knapp, E. V. Thorn, L. Mottet, R. Howie, M. Kaufmann, C. K. M. Martin, Jas. Martin, M. McDonald, and G. C. Booth, Secretary.

The Secretary having read the notice conven ing the meeting,

The Chairman rose and said: As we have had ample time to examine the Report and Statement of Accounts, we will dispense with the reading of them if there is no objec-tion. The result of the last half years tion. The result of the last half years Mr. Thorn thereupon proposed and Mr. working, now before us, confirms the indications Knapp seconded that Mr. E. B. S. Edwards be of the preceding twenty-eight half years, viz., appointed auditor.—Carried. of the preceding twenty-eight half years, viz., that the Hotel has sustaining power for very good that the Hotel has sustaining power for very good returns. This steady prosperity may be taken as a measure of the public appreciation of the entertainment offered. Several factors have contributed to the production of this good will, but I may say that the chief of them has been the atmosphere of genial welcome and home-like comfort with which the untiring efforts of the Manager have surrounded his guests. Really good hotel management is so quiet and unohture. good hotel management is so quiet and unobtru-sive in its methods that probably few who benefit by it realize the expenditure of mental and bodily labour, of patient self-control and earnest study, that is required to secure it. These we have had in generous measure from Mr. Eppinger almost since the organization of the Company, and if there were no natural limit to human life and zealous endeavour we might hope to continue in the enjoyment of his single management of our interests. But consideration for his age and health and for the increasing demands of a steadily growing establishment have suggested to the Directors and to the Manager the advisability of providing additional managerial services. The Board has therefore entered into an engagement for the services of an Associate Manager, who will assume the burden of direct supervision and thus afford a well-earned rest to Mr. Eppinger. The latter will, however, remain with us, for many years we hope, as Advisory Manager and give us the benefit of his long and varied experience. Captain Frederick Davies, who will soon join our staff as Associate Manager, is no stranger to this community, to the travelling public, or to the executive duties he is to undertake in the Hotel. As a commander in the Royal Naval Reserve and captain of one of the Nippon Yusen Kaisha's fine European liners, Captain Davies has made a reputation for executive ability and tactful reputation for executive ability and tactful courtesy that warrants expectation of success in a field that does not differ materially from the sphere in which he has won most hearty commen-dation. The air is so full at present of echoes and rumours of war and its effects upon trade and travel that our deliberations as shareholders would naturally include reflections as to the possible con-sequences for our business. Upon this topic, however, so fruitful of blind conjecture, it seems wise to preserve a hopeful reticence. Returning now to the Report and Statement, if there are any items concerning which members wish information before voting upon the accounts, I shall be glad to reply as I may be able, after a motion to adopt has been duly seconded. I beg to move the adoption of the report and accounts

Mr. A. M. KNAPP-I will second that proposal.

The next business was the election of Directors and the Chairman pointed out that as no nominations of new Directors had been received within the seven days required by their articles of association, the retiring Directors, Messrs. Kaufmann and Mottet would succeed themselves if they were nominated,

PAY-INSPECTOR MITCHELL McDonald-I nominate for re-election as Directors, Messrs. Kaufmann and Mottet.

Mr. E. V. THORN-I second them,

THE CHAIRMAN pointed out that according to parliamentary procedure a nomination needed no

seconder, Messrs, Kaufmann and Mottet were then declared re-elected Directors.

With reference to the remuneration of Directors, Mr. R. Howie moved that the Directors receive the sum of yen 500 per year each, with a bonus of yen 100 apiece.

Mr. KNAPP—Was that the amount voted last

The Chairman—Yes.
Mr. Knapp—Then I second Mr. Howe's motion.—Carried.

The CHAIRMAN announced that the anditor. Mr. Cox-Edwards, found that pressure of business prevented him from serving the company longer in that capacity, and as the Directors had received an intimation that Mr. E. B. S. Edwards would be pleased to act for them, the Directors had pleasure in submitting his name.

This concluded the business.

NIPPON BICYCLE CLUB.

The annual meeting of members of the Nippon Bicycle Club was held on Thursday evening at No. 42 Yamashitacho, Mr. T. M. Laffin in the chair.

The following were elected the new Committee for 1904:—President, T. M. Laffin; Captain, C. J. Helm; Committee, James Helm; B. Roberts; 1st Lieut, R. B. Deming; 2nd Lieut, G. Charlesworth; Hon. Sec. & Treas., R. Meikleiohn.

The report and accounts are as follow:-

Your Committee have pleasure in presenting to you the Seventh Annual Report and Accounts of the Club for the Year 1903.

MEMBERS.—The Members roll at date consists of 39 Active and 10 Honorary Members; during the year under review 28 New Members have joined

year under review 28 New Members have joined whilst 13 have resigned.

RACING.—It was again attempted to get up an Atternoon's Sports, but on account of the very few Racing Members, the attempt was abandoned.

CLUB RUNS.—The Runs were very well patronised during the early part of the Season, some of the Runs bringing out as many as 22 Members. Full particulars of these Runs are recorded in the Club's Log Book.

Book.

ENTERTAINMENTS.—The Members of the Dai Nipplon Sorin Club very kindly invited our members to a Garden Party at the Satake Garden at Mukojima which was indeed a very grand affair, particulars may be found in the Log Book. Our members in return gave a Picnic but on account of the unpropitious weather, this had to be abandoned and a tifain at the "Nisseiro" was given instead, where covers for some 90 members and invited guests were laid. The thanks of the Club are due to Mr. Laffin who so kindly supplied the Band for that day.

CLUB HOUSE.—During the Summer months our Captain, Mr. C. J. Helm, very kindly gave us the use of his Villa at Hommoku for use as a Club House, with facilities for lawn tennis and bathing, which were availed of by nearly all members, and our thanks are due to Mr. Helm for his kind accomodation, also to Mr. Ward for his donation toward buying furniture for the Club House. The opening day was attended by 42 persons including members and their friends. -The Members of the Dai Nip-ENTERTAINMENTS.

Accounts.—The finances of the Club still stand

Accounts.—The finances of the Club still stand on a very sound basis, the balance in the hands of the Hon. Treasurer being yen 63.73 which is considered very well, especially after the drain of yen 202.35 spent on account of the Club House. Committee.—With the powers vested in the committee at an extraordinary meeting held in January 1903, it was decided to invite Messrs. R. B. Deming and G. Charlesworth to join as Sub-Committees during the year just past. The retiring committee wish the Club every success.

DESULIORY NOTES ON SPORT.

A curious occurrence is reported from Moorfield, New South Wales, in the race for the Moorfield Handicap, value one hundred sovereigns. The judge's decision was a dead heat between three horses, and in the run off the three proved themselves so well matched that the result that the result have active a dead heat. was again a dead heat. Thereupon the owners agreed to divide the stakes. The time for the first race was 2 mins. 13 secs, and in the run off they covered the distance in half a second more time. Distance 1 1/2 miles.

This incident is probably without a precedent. A dead heat between three horses has often been recorded. The Caesarewitch in 1857 resulted in a dead heat between El Hakim, Prioress and Queen Bess. In the run off Fordham was put up on Prioress, ridden in the first try by Tankerley, and with the superior jockey she soon put paid to the account of the other two. Some years ago, at Sandown Park, a race resulted in a dead heat between two horses, Deuce of Clubs and Seasong. They ran it off, and again the judge was unable to separate them. As the owners would not divide, they were sent out for a third time, and Deuce of Clubs won by a head only.

Prioress was the property of Mr. Ten Prock the leader of the first American invasion of the British turf, and was trained by an American. In his "Recollections," Custance relates that Prioress was given a three mile sweat between the race and the run-off. The modern American trainer is not in the habit of giving his charges long sweats to any extent during training, and would be horrified at the idea of more than a very gentle exercise between a dead heat and a run-off.

Somewhat tardily, the Committee of the Nippon Race Club have allotted another race on the programme for All Comers, China pony class. In the skeleton programme first published, there was only one race for this class, and a handicap at that. The handicapper would have had a very invidious task in allotting weights to a field of ponies without seeing them run previously; and some being newcomers to Japan he would not even have performances at previous meetings to guide him. Somewhat naturally, several owners who had decided to import new China ponies, cancelled their orders, and it is now rather late to expect them to reconsider the matter, even if the two races were sufficient inducement

There is a proposal is start a one design class on Lake Chusenji, something after the style of the Larks, which have proved such a success in Yokohama waters. The Nantaisan Club had a certain amount of racing last season with 12 raters; but with boats of the dinghy type capsizes are so frequent on the Lake, owing to the vagaries of the winds from the surrounding hills, that it is proposed to try a safer kind of craft, and a broad heamed flast hottomed hoat like the Lake, design beamed, flat-bottomed boat like the Lark design should fill the bill, if some slight alteration could be made in the cockpit, to make them more suitable for ladies. Perhaps a combing, carried aft to the transom, would ensure a dry deck to sit upon. In any case, as the Lark does not heel over to such an angle as does the dinghy type, it is more comfortable to ride in.

The annual general meeting of the Yokohama Yacht Club is due shortly, and it will be interesting to hear if there are any prospects of racing

20,00

74.36

for the 39 rater class, now reduced to three yachts. It would be a pity to let the class die out altogether, but it has been threatened with extinction for some time past, and now that the Golden Hind and Haidee are out of it, the class

Yokohama yachtsmen and his many other friends will regret to hear that Mr. N. B. Morton, who so successfully sailed the Vixen in the 21 rater class, has returned to Yokohama in a very sad state of health.

FIRES.

Miyake-jima seems to have suffered terribly from fires this winter. A conflagra-tion on the 24th of December destroyed 40 houses out of 59 in the village of Iya-mura; and another conflagration on the 4th instant at Kamitsuki-mura reduced 94 dwellings to The inhabitants are said to be in ashes. great straits.

About 3 a.m. on Friday, fire broke out at the back of the bath-house Tsuru-no-yu, Chiyozaki-cho, Kitagata, Yokobama. A northerly wind prevailed and the flames spread immediately, destroying twenty-nine houses. The Bluff Police are investigating the cause, but it is believed to be negligence on the part of the bath-house

A telegram from Shidzuoka states that fire occurred on the night of Jan. 20th at the village of Nirayama, Idzu province, burning down fifty-eight buildings including five godowns.

K. Shimada (36), a farmer living at Osato, Saitama Prefecture, set fire to his own dwelling on the morning of Jan. 20th and committed suicide by jumping into the flames. The cause is report-ed to be a dispute with his son with regard to the

Another outbreak of fire took place early on the morning of Jan. 21st at the village of Aoshima, Shida district, Shidauoka Prefecture,

Aoshima, Shida district, Shidawa Feterate, destroying twenty-three houses.

On Sunday afternoon, about 2.30 o'clock, fire broke out in an upstair room of the Central Hotel' (formerly Hotel de Paris), No. 74, Yokohama, destroying the building. The origin of the fire is still under investigation by the police, but it is alleged to have been caused by an over-heated

Fire broke out on the morning of Jan. 22nd at the Ashio Copper Mine, destroying two machine rooms measuring over fifty tsubo. The loss is estimated at about yen 20,000.

On the same day, fire occurred at Niihara, near Mito, burning down fifty-eight buildings.

A telegram from Yamaguchi reports that a fire

took place on the night of the 22nd at Kushiga-

took place on the night of the 22nd at Kushigahama, destroying twenty-one houses.

In Tokyo, two fires are reported. One occurred on the night of the 21st in a shed in the compound of the hospital belonging to the College of
Medicine, Hongo. The flames were limited to
two sheds which were destroyed. The cause is
believed to be tobacco ashes left carclessly by
carpenters who were working in one of the sheds.
Another outbreak occurred on the following
morning at Minami-Odawara-cho, Tsukiji, destroying six houses.

On the night of Jan. 22nd a fire occurred at
Nezishi, burning down a Japanese house.

On the night of Jan. 22nd a fire occurred at Negishi, burning down a Japanese house.

On Sunday (Jan. 24th), about mp.m. fire broke out at Yawatabashi, Negishi, Yokohama, destroying two houses belonging to a farmer. The cause is reported to be negligence.

A telegram from Osaka states that an outbreak of fire occurred the same day (the 24th) in a school at Shimo-machi, Sennan, burning down the building.

the building.

A telegram from Takasaki states that fire occurred on the morning of Jan. 29th at Sayacho destroying over a hundred houses, including a

THE LAW COURTS.

BATCHELOR v. THWAITES.

This case, in which plaintiff claimed yen 2,500 and interest, was again brought on in the Yokohama District Court before Judge Vasuda, on Jan. 22nd, when judgment was delivered ordering defendant to pay plaintiff 1en 2,500 and interest at the rate of 5 per cent. per annum from September 18th, 1902, till the execution of judgment and to bear two-fifths of the costs, plaintiff to bear three-fifths of the costs

BREACH OF CONTRACT CLAIM.

Judgment has been given in the Tokyo Appeal Court in the case appealed by K. Yamada, sugar dealer, against Messrs. Simon, Evers & Co. In the Yokohama District Court judgment was delivered on June 15th, 1903, ordering the appellant to pay the foreign firm yen 1,597,17 for loss caused by breach of contract. The Tokyo Appeal Court has now quashed this judgment and disallowed the claim of the foreign company.

CLAIM ON SNAKE-GOURDS.

The hearing of this case, instituted by Z. Suzuki, snake-gourd dealer, against Messrs. Winckler and Company, No. 256, Yokohama, claiming yen 195.60 and interest, began on Jan. 22nd in the Yokohama District Court before Judge Yasuda. Mr. Fujiwara was present for plaintiff and Mr.

Nagashima for defendants.

Plaintiff's counsel stated that plaintiff on July Plaintiff's counsel stated that plaintiff on July 31st, 1903, sold to defendants 34 bales of snake-gourds and delivered the goods to K. Shiojima and S. Tanaka, two representatives of defendants at the warehouses, Midoricho. The total value of the goods was yen 395.60, of which yen 200 was paid by defendants on delivery of the goods leaving yen yet to 60 unpaid

the goods, leaving yen 195.60 unpaid.

Defendants' counsel held that the foreign firm did not purchase the goods in dispute.

Introducing five letters as evidence, plaintiff's counsel stated that Exhibit No. 1 was a contract made by Shiojima, Japanese Banto of the foreign firm, for the purchase of the goods, and Exhibit Nos. 2 to 5 were letters written by the same banto representing the firm confirming the fact of the

Defendants' counsel contended that Shiojima An outbreak of fire took place on the evening of Jan. 26th at Honcho, Tsushima, burning down over ten houses.

The Obihiro Local Court, Hokkaido, has been destroyed by fire, which broke out on Jan. 27th.

defendants were not liable. The man had since been discharged from the firm for a default.

Plaintiff's counsel asked the Court for leave to examine two Japanese, S. Tanaka and H. Sato, who attended to the snake-gourd business. The Court decided to do so on February 1st at 10 a.m.

CLAIM FOR FUNERAL EXPENSES.

The hearing of this case, filed by Mr. Chris Holgate against Mr. S. Gorman, claiming yen 75 and costs, was resumed in the Yokohama Local

and costs, was resumed in the Yokofiama Local Court before Judge Nagatsuka on Jan. 25th. Plaintiff was represented by Mr. Yano, and defendant by his daughter, Miss T. Gorman. Mr. Berenstein, No. 124, Yokohama, appeared as a witness.

At the outset of the hearing, Miss T. Gorman presented a police document in which, she stated, it was certified by the authorities that she was a

daughter of defendant.

daughter of defendant.

Mr. Berenstein being examined by the Court, stated that Mr. D. H. Harman died on Nov. 5th last at the General Hospital. With regard to the funeral expenses needed for the deceased, he did not know anything at all, but he remembered matters before the funeral. Witness paid a visit to Mr. Holgate, No. 81, Bluff, accompanied by defendant when the latter asked the undertaker to defray the expenses needed for the obsequies. to defray the expenses needed for the obsequies, for which defendant would be responsible, as the deceased was one of his relations. Witness did not remember whether defendant paid Mr. Holgate an advance on the expenses, which amounted to yen 75.

Cross-examined by plaintiff's counsel, the witness stated that defendant was one of his acquaintances. They kept a restaurant as partners for seven or eight months. He did not know to defray the expenses needed for the obsequies,

seven or eight months. He did not know whether the deceased and defendant were relatives.

Miss Gorman stated that this was the first time she had seen the witness. His statement was worthless. Her father was in Tokyo when the late Mr. Harman died, so that defendant could have been been accepted at the known of the later. not have been present at the house of Mr. Holgate, accompanied by the witness. Further, defendant did not know about the death until a lady informed him. The deceased and defendant were remotely related.

Plaintiff's counsel, summarizing a statement given by the witness, insisted that it was most trustworthy. Counsel added that the statement

is defence was too vague.

The Court adjourned the case till Jan. 27th when judgment will be given.

CLAIM FOR FUNERAL EXPENSES.

The case in which Mr. Chris. Holgate claims yen 75 from the defendant, S. Goorman, again came up in the Yokohama Local Court before Judge Nagatsuka on Jan. 27th when judgment was delivered ordering defendant to pay plaintiff the amount claimed and to bear costs.

P. SARDA v. M. A. RAZA.

The hearing of the case appealed by Mr. P. Sarda against Mr. M. A. Raza petitioning for the quashing of judgment given on Oct, 31st last in the Yokohama Local Court ordering appellant to pay respondent xen 51.54, began in the Yokohama District Court before Judge Kato on Jan. 28th.

Course for the parties made similar statements to those they made in the Local Court on Oct. 13th last, after which they entered into a brief discussion. It may be remembered that Mr. Sarda claimed yen 50 as the rent of a godown and on the other hand seized certain property of Mr. Raza. The latter, under a bailift's order, paid the claimed amount and yen 1.54 as costs on Jan. 15th. Mr. Raza subsequently petitioned in the Local Court to have the money returned which he had paid, contending that Mr. Sarda's which he had paid, confidently that Mr. Saida's receipt was unjust in accordance with Art. 703 and 704 of the Civil Code. Judgment was then given in favour of Mr. Raza.

The case was adjourned till Feb. 22nd at I have when judgment will be vendered.

p.m. when judgment will be rendered.

A rumour received in Calcutta from Darjeeling is that the Thibet Mission will encounter Russian Cossacks with the Thibetan soldiers, and that the

The Asahi announces that two Russians, who attempted to murder the captain of a Russian steamer by throwing him into the sea while the steamer was lying at Yamada, arrived at Morioka on Jan. 25th. They were removed to prison.

Among the singers at this evening's meeting of the Yokohama Literary Society will be Miss Lloyd Thomas, who has just returned from a lengthy visit to Europe, during which she won a silver medal in London in a competition of over Aoo vocalists.

The directors of the Tokyo Kangyo Ginko, the name of which is similar to that of the Nippon Kangyo Ginko (Japan Industries Encouragement Bank) were arrested on Jan. 14th on a charge of having forged 1,100 19th debentures of the latter bank and of having borrowed money on the

hension of the mill-owners as to the possible to the next account. scarcity of supply in future, the cotton market had advanced generally. The stock was calculated at 1,216,606 bales.

did not ask for any position of advantage over their foreign rivals, but they desired to be able to compete with them on equal terms in the home

An official order has been promulgated inti-mating that, by the King's command, all men at Portsmouth Naval Barracks are to wear the Victory's name on their caps. Hitherto the men have worn the name of Fire Queen, the Port Admiral's yacht. The new order has been given with a view of keeping the Victory as prominent as possible as possible.

A Hongkong sampan capsized in the harbour the other day carrying down into the water a 36 days' old baby. The little thing was tied to the deck of the boat and before it could be rescued fully five minutes elapsed. Yet on the police using the usual restoratives the baby came-to and next day looked none the worse for its long immersion.

The Niroku reports that the German Legation at Tokyo received on the evening of Jan. 22nd an anonymous letter, consisting of 18 sheets, written in Japanese, dealing with the complications in the Far East. It was immediately sent to the Department of War by the authorities of the Legation. The former ordered the gendames of the Kojinthia the first the total of the state machi station to find its writer.

According to a passenger who arrived at Shimonoseki on Jan. 24th from Dalny, over thirty Russian warships were lying at Port Arthur and four others were watching outside using their search-lights at night. Many of the Russian and Japanese residents are leaving there. Japanese workmen employed by the Russian authorities are in distress as their wages have not been paid by the latter.

The following is the copy of the cablegram despatched by the Committee of the Hongkong branch of the China Association to Mr. Joseph Chamberlain:—"Large majority of members Hongkong Branch China Association warmly support your fiscal aims. Consider reciprocal treaties absolutely necessary, failing which recommend adoption retaliation." The China Main understands that only two members of the committee voted pragnet the despatch of the message. mittee voted ngainst the despatch of the message.

The Osaka Shosen Kaisha held a general meeting on Jan. 22nd at the Public Hall, Nakanoshima, Osaka, at which the accounts for the last half year were presented. The net income was yen 278,517, to which the balance brought from the previous account, yen 206,543, was added. Of the total, yen 14,000 was set aside for the legal reserve; the same amount for bonus to employees; yen 275,000 as interim dividend for the shareholders at the rate of 5 per cent.; and the balance, yen 282,060, carried forward to the part account. ward to the next account.

The Nipport Industries Encouragement Bank held a general meeting on Jan. 15th at its office, when the accounts of the semi-annual business were declared. The gross income amounted to yen 1,007,288, from which yen 726,852 was spent as business expenses leaving a net profit of yen 280,436. The balance, yen 147,128, brought from the previous account was added to the net income making a total of yen 427,564. Out of this amount, yen 48,000 was set off as a reserve; According to the Official Gasette, Mr. Uchida, yen 12,000 was set on as a reserve; Japanese Consul at New York, telegraphed on of dividends; yen 162,500 as interim dividend at Jan. 23rd that owing to the pressing demands of the rate of 5 per cent; yen 28,000 as fees to spinners at home and abroad, and to the appredirectors; and the remainder was carried forward.

The late British Ambassador, Sir Michael Herbert, was a guest at a diener at one of the Clubs in Washington not many months before At the annual dinner of the Liverpool Ship-his death. He was one of the speakers of the brokers' Benevolent Society Lord Inverclyde, in responding to the toast of shipping interests, stated that British shipping laws were out of date. The time had come when the question of the navigation and shipping laws of the country may be faced and reconsidered. Foreign ships that came to British ports ought to be put in ex-

actly the same position as British vessels. They felt sure that a joke was intended, while others waited believing that the final touch was to come.
"I see you don't understand my joke," said the
Ambassador, taking in the situation; "I mean that he is engaged in cementing the good relations between England and America."

> Professor Vambéry contributes to Die Zeit an interesting article on the Tibet question, which he considers may easily lead to International complications next spring. With regard to Russia's aims, he remarks that her greed for territory has no bounds, while she now sees a further opportunity of striking a blow at her British rival. Professor Vambery thinks that Russia's open intervention on behalf of the Dalai Lama is out of the question, but he insists that Great Britain cannot permit any moral intervention on her part either -first, because Russian policy seeks to find in Thibet a point for attack on China; or, secondly, because Great Britain must not forget that Eastern Turkestan will sooner or later become the prey of Russia. In conclusion, can Great Britain allow Russia to strengthen the positions which the latter now occupies in Persia, in Afghanistan, and in the Pamirs, which are so dangerous to British interests. Little Tibet has been in British possession for fifty years, and Great Tibet may also become so, if Great Britain only wills it, and Great Britain must so will unless she wishes to lose India.

AMERICAN TOPICS

On December 48th it was announced in Chicago that "Armour has the wheat market under his thumb and is not in the business for his health."

The artificial, or, as it is technically called, synthetic, production of camphor, on a commersynthetic, production of campion, on a commer-cial scale, is in operation at a manufacturing plant at Port Chester, New York. The new artificial camphor is made from turpentine. Camphor is turpentine plus one atom of oxygen. By a somewhat complicated process this atom of oxygen is forced into turpentine, and artificial camphor, which differs in no way from the natural product, is obtained. It is said that by this proproduct, is obtained. It is said that by this pro-cess camphor can be produced and sold consider-ably below the prevailing price for the natural product. The yield of camphor is 27 per cent. of the weight of turpentine used; that is, from one hundred pounds of turpentine twenty-seven pounds of camphor can be made.

It is said that the Rooseveltian promunciation It is said that the Rooseveltian promunciation is rapidly becoming a fad in Washington. Speaker Cannon was in the chair recently, and Representative Mondell of Wyoming arose for recognition. Mindful of the President's pronunciation of the word "delighted" in greeting his guests, "Uncle Joe" said in his most urbase manner, "The gentleman from Wee-o-ming." The President is not responsible, however, for certain Senate vasaries of pronunciation which resident is not responsible, however, for certain Senate vagaries of pronunciation which led Senator Teller to describe his beloved West as the "pa-ra-ras," or Senator Pettus to refer frequently to the treaty of "New-Gren-a-day," with the accent on the first syllable, or Senator Lodge to invariably say "commit-tee."

Captain Robert L. Merriman, one of the oldest Captain Robert L. Merriman, one of the oldest and best known sea captains who ever sailed from New York, died in Alemeda, Cal., on Dec. 26. He was 74 years old and for 52 years was a ship master. Captain Merriman was born in Brusswick, Me., and when a boy became mate on a vessel which sailed from Portland. He rose travidly to the position of captain agency exercise. vessel which sailed from Portland. He rose rapidly to the position of captain and came to New York, where he was put in command of a ship in the East Indian trade. Among the vessels he commanded were the bark Undine, and the ships Lydia, Lorenzo, Marcia, Greenleaf, General Shenley, Aurora, Carrie Dove and Commodore T. H. Allen. He lost two of his ships, the Aurora, which was wrecked about 18 years ago in Calcutta, and the Commodore T. H. Allen. ago in Calcutta, and the Commodore T. H. Allen, which caught fire about two years ago, near Sandy Hook, while leading with a carge of oil. He was well-known in the Far East.

Details of 11 months' commerce of the year

of the groups into which it divides the imports.

Agricultural products, as a whole show an increase of \$74,000,000; products of forests,

\$10,000,000; products of the mines, \$8,000,000; manufactures, \$5,000,000, and iniscellaneous articles \$2,000,000. In the single group, fisheries, is shown a slight decrease of a little more than \$1,000,000. The figures for the month of \$1,000,000. The figures for the month of November show a marked growth in exports of manufactures, the total for the month being \$34,093,639, against \$30,513,512 in November of last year. Agricultural products also showed a marked increase in the month, the figures for November, 1903, being \$114,172,255, against \$83,035,850 in the same month last year. The increase in agricultural exports occurs chiefly in cotton, of which the value of the month's exports is unusually high.

Mr. Jesse Selegman, formerly a partner in the well-known banking house in New York bearing that name, died in Frankfort on December 27, aged 44.

According to the Scientific American, the dumping of garbage outside Sandy Hook is filling up the entrance to New York Bay so rapidly as to seriously menace shipping. A pilot recently reported 7½ fathoms where the chart calls for 11½ to 16. The new forty toot channel which the Government is dredging at great expense, will eventually be blocked up, unless some other than the present primitive method of garbage disposal is adopted by the city. As matters now stand it looks as if New York were undoing with one hand what she is doing with

The Northern Pacific Railway has secretly prepared to bore a two-mile tunnel through Cascade Monntains thereby saving 1,500 feet of climb and descent on all traffic crossing the Cascades. Surveys show that such a tunnel is pos-sible at a point in the Cascades three miles north of the present Stampede Tunnel. The saving in power thus effected will amount to more than \$1,000,000 per year on wheat hauled to the seacoast together with 50,000 carloads of lumber and shingles hauled east yearly from Puget Sound, and which are now carried up and dropped down a third of a mile more in crossing the Cascades than will be necessary by the new tunnel.

Fifteen years ago the site whereon the city of Oklahoma now stands was a stretch of prairie. To-day the city contains nearly 30,000 in-habitants. It owns its local water system and all of its streets are paved with asphalt. There are ten and a half miles of electric car lines. The Masons are building a new temple, and \$200,000 has been expended in erecting churches within last year. Several college buildings have been built and a \$35,000 Carnegie Library. Oklahoma City has four railroads and sixty-eight wholesale houses and forty-eight manufacturing establishments, with twenty-two newspapers. banks have deposits of over \$5,000,000. The eight

A trackless—or automobile—trolley line is now in operation at Scranton, Pennsylvania. The cars, or omnibuses, have bodies similar, although much shorter, than the ordinary trolley car, and will carry twenty passengers seated and fifteen standing. Power is obtained from two wires overhead, by means of trolley poles, which allow a turnout of fifteen feet on either side, so that the car can travel along anywhere on a space thirty feet in width. According to the Electrical World, this is probably the only trackless trolley line in the United States, and as such a free-running car requires twice as much power as a trolley car on rails, it does not seem probable that the system will be widely adopted.

One of the best evidences of the general prosperity prevailing in the United States last year was found in the phenomenal importations of diamonds and other precious stones entered at New York. That city is the chief port of entry

1903 have been made public by the U.S. Defor gems in America and from there the stones partment of Commerce and Labour through its are distributed throughout the United States. Bureau of Statistics. They show an increase in During 1902 General Mindil, the Government's practically all of the great groups into which the diamond expert examiner, reported that he appartment of Statistics. They show an increase in practically all of the great groups into which the diamond expert examiner, reported that he apparent and in all praised diamonds and other precious stones, of the groups into which it divides the imports. Including pearls, worth \$25,412,775.75, while in the calendar year of 1901 the examiner found the calendar year of 1901 the ex the catendar year of 1901 the examiner round precious stone values aggregating \$24,862,507.07. In addition to the foregoing figures Deputy Appraiser Wanamaker received last year in so-called "packed packages," imported by express companies and in packages passing through the mails, precious stones valued at about \$2,000,000. Altogether, the gem imports at New York last year footed up \$37,500.000, which was a gain over 1901 of \$750,000.

The Cripple Creek production record for 1903

Month.	Tonnage.	Gross value.
January	60,200	\$1,950,282
February		1,823,137
March	61,000	2,027,141
April	59,300	1,903,240
May	60,100	1,970,343
June	59,200	1,900,237
July	60,300	1,910,343
August	58,100	1,823,000
September	52,000	1,114,234
October	46,000	845,750

December	58,000	1,900,100

The strike started by the Western Federation of Miners in September is responsible for a shrinkage of \$2,000,000. But the union has been

Private cable advices to officials of the Standard Oil Co. affirm reports that the Deutsch-Amerikanshe Petroleum Gesellschaft, the German branch of the corporation, has succeeded in stablishing a working agreement with the rival Russian and Austrian petroleum cartels. For the last three years a bitter warfare has been waged between the German-American company and the Russian Naphtha Co, for control of the German market. Efforts to obtain a majority interest in the Nobel holdings in Russia were unavailable and the latter imitated the methods of the American company in selling directly to consumers. Although the compact now made between the American, Russian and Austrian petroleum interests is ostensibly confined to the direct exportation of Galician petroleum whereby the Standard Oil Co. receives half of the production of the Austrian cartel, the understanding is that this is the opening wedge for a more amicable relationship.

Canada, says Bradstreets, has completed the most successful year in her history. Trade from the first day of 1903 to the last of the year has been as steady and uninterrupted as it has been unprecedented. The increase in the foreign commerce of dented. The increase in the foreign commerce of the country and the expansion in its internal trade are equally striking. Sales of domestic and imported goods of all descriptions have increased enormously. Not only has the value of business increased, but profits have been generally better than in previous years. The insolvency record has been comparatively light, considering the increase in general business, and the smaller number of bankrupt stocks offering in the markets. number of bankrupt stocks offering in the markets belped to keep manufacturing and mercantile trade in a sound, healthy condition, while the fact that the consumption in many staple lines of manufacture has overtaken productive capacity has, by preventing overproduction, contri-buted handsomely to the same end. The ma-terial wealth of the country has been largely added to, as shown by the increase in the public deposits in the banks and other financial institutions, by the extension in old lines of business and the establishment of new concerns, the large investment made in industries connected with the development of the vast natural resources of the Dominion, and, lastly, by the addition to the population of the country of 125,000 to 150,000 first-class settlers.

FOOTBALL.

A game of football under Association rules was played in Yokohama on Saturday after-noon between Whites and Colours, the latter winning by seven goals to one. Most of the probable Interport players were on the winprobable interport players were on the winning side and the play at times was distinctly good. The men, however, would do better if they were keener on the ball, and more combination is also to be looked for if Kobe is to be defeated. This, of course, can only come with practice, and Yokohama has plenty of excellent was really strong which to make up a really strong material from which to make up a really strong eleven for the Interport match.

YOKOHAMA SEAMEN'S MISSION.

The following is the annual report of the Yoko-hama Seamen's Mission for the year ending Decem-

Der 31st, 1903:—

The Chaplain has much pleasure in presenting his Report for the Year 1903, to the subscribers and friends of the Mission. In reviewing the work of the past year, he finds much reason for thankfulness to God, in the continued blessing experienced throughout the year. A steady advance has been made in different departments of the work. Many improvements have been made in the accommodation for seamen at the Institute, No. 82-B Yamashitacho. Six bed-rooms have been comfortably furnished, and a new lavatory fitted up, which has added greatly a new lavatory fitted up, which has added greatly to the usefulness of the Mission. Close upon eleven hundred seamen were provided with lodgings for the night during the year. During August, a building was rented at No. 20 Kaigan-dori, close to the Nippon Hatoba, and fitted up for use as an Institute for Japanese seamen under the care of Mr. Sutejiro for Japanese seamen under the care of Mr. Sutejiro Kanaiwa, the Japanese Scripture Reader. It may be well to state here, that this new venture entails no charge upon our regular mission funds. We are greatly indebted to many kind friends in Tokyo, who supplied the funds for furnishing the Japanese Institute, and who also guarantee the rent, etc., for some time to come. Mr. Ernest James is the Hon. Treasurer of the Tokyo committee for collecting the necessary funds for this work.

The efforts of the Chaplain to provide healthy recreation for sailors when on shore leave have been largely availed of, and greatly appreciated. One party of 130, two of 100 each, and smaller parties, have been organized and personally conducted by him. The places visited being Tokyo, Nikko, Lakes Chuzenji and Yumoto, Miyanoshita, Hakone, and Atani.

The mission steam launch has been continously employed in her most useful work in the harbour, in the visitation of the shipping, and in conveying officers and men, to and from the various meetings others and men, to and from the various meetings and entertainments held at the Institute. Nearly five hundred year were contributed by seamen towards her running expenses during the year. Early in the year a change was made in a Japanese Scripture Reader. Mr. Sutejiro Kanaiwa taking the place of Mr. J. T. Kawana, who is now labouring as Catechist at St. Barnabas Church, Ushigome, Tokyo. Mr. Kanaiwa has proyed to be a very energetic and canable has proved to be a very energetic and capable

Many expressions of grateful recognition of our Many expressions of grateful recognition of our work from officers and men have reached us. Before leaving recently for Hongkong, Rear-Admiral Curzon Howe called and personally thanked us, and the next day sent an official letter which is given below. The Chaplain avails himself of the present opportunity to cordially thank all the subscribers and friends of the mission for their continued support, the local press for free copies of their papers and other kind favours, and all others who have contributed magazines and newspapers to the reading room, and clothing for distressed seamen.

CORRESPONDENCE.

A WARNING.

To the Editor of the "Japan Mail."

Sir,—"Boys will be boys," and I am ready to give a wide latitude to young school lads whose spirits and animal energy find vent in pranks and harmless "larks,"—but when they wilfully damage property or inflict injury on others, il is time they were restrained.

The local coterit of wild boy-hood rejoicing in the name of "Mitford's gang" have trouble before them, —unless their methods of "sport" are radically changed. So long as their attention was confined to stoning harmless dogs, and "potting at" innocent birds, one could perhaps tolerate the lads' somewhat bretal idea of "fun," but their latest development in this direction will have to be suppressed.

this direction will have to be suppressed.

Parties of "snipers" armed with cataputs delight to sling stones and shoot at passing horses, especially those being led by bettoes, and on a recent occasion I caught a young vagabond who had just driven a horse frantic by this method, until the kicking beast all but capsized a passing perambulator. One night a party of them stretched a cord across a dark portion of the road, and tripped up a poor old gentleman, against whom they had a grudge. The "old boy" was crippled for several days, but that only added to the "sport,"

Last evening at 6.15, as I turned down the "Bluff

boy" was crippled for several days, but that only added to the "sport,"

Last evening at 6.15, as I turned down the "Bluff Garden lane," I detected 12 or 15 members of the "gang" hiding in the shadow of Mr. Brady's house, and I heard one of the "gang" remark,—"Lucky we didn't do it then, eh?" Anxious to discover what "it" might be, I "laid low," and had not long to wait before the young villains emerged from their hiding, and rolled across the dark part of the road, a heavy telegraph pole, which had been lying in the gutter along Brady's fence. They placed it directly across the road, so that any carriage or riki passing down the lane would have crashed into it. Had the Strauss carriage been but a minute later, the two horses would have been lamed for life, and the occupant of the carriage would be in the doctor's hands this morning. A bicycle or riki would have been sufficiently serious. The 12 or 15 young gentlemen (save the mark) then coolly walked along the Bluff, in the direction of Hegt's Hill. It took me all the energy I could muster, to get the pole back into the gutter again, and then I set off in pursuit. I have secured the names of the ringleaders, and am inclined to publish the same,—but desist, out of consideration of mothers and sisters of the young villains. The young rascals are being watched, and will be able to investigate the interior desist, out of consideration of mothers and sisters of the young villains. The young rascals are being watched, and will be able to investigate the interior of the Police Station before long, as these menaces to public life and safety will have to be dealt with in an effective way.

Thanking you for allowing this space for a word of warning to the public who traverse the Bluff road after dark.

Yours faithfully,

RUSSIAN AIMS IN THE PACIFIC.

Moscow, December 5.

If I am not much mistaken, it appears to lack recognition in England, as elsewhere—at any rate, by the great public—that the question for Russia in the Far East to-day is not one of territory or extension of commercial activity; it is another bid for the completion of an ambition as old as Peter the Great. Russia has undertaken to accomplish on the Pacific what was denied her, at various periods of her history, successively in the Baltic and North Sea, and in the Mediterranean, and is now being guarded. Russia has undertaken to accompiss on the Facine what was denied her, at various periods of her history, successively in the Baltic and North Sea, and in the Mediterranean, and is now being guarded against in the other remaining outlet, the Persian Gulf. But there is still the Pacific, and Russia's object in the strenuous efforts she has made and is making to secure herself there, is not the customary territorial aggrandisement, but the more menacing ambition to become one of the great and, if pussible, all but the greatest Sea Power in the world. We are so accustomed to regard Russia as the nation of an innumerable army, we have so long known her as indifferent to ships and sallors, that perhaps it has escaped notice how vigorously of late years the idea of Naval power has been propagated in the country. It is not a new idea, of course, but like most other things of worth in Russia, dates from Peter the Great. At intervals Russia has made efforts to get to the open seas, but has never succeeded. The Japan-Chinese War opened the way to some daring and brilliant Russian statesman, and for half a dozen years past all the resources of the Empire have been steadily directed towards the Pacific. With what object? Assuredly none of those as assiduously promulgated by Russia; not in any disinterested 'civilising mission in the Far East;' not with the unselfish desire to provide the 'commerce of the world with a short cut across the hemispheres; not to champion the cause of the white man against the 'yellow peril.' Yet all these high-sounding 'missions' have been set forth as Russia's objects in spending upon an impracticable railway across two continents more treasure than is wasted in many a modern war. What Russia aims at, and what Russia, up to a few months ago, thought she had all but secured, is

more treasure than is wasted in many a modern war.

What Russia aims at, and what Russia, up to a
few months ago, thought she had all but secured, is
a position which will enable her to become as great a
Power at sea as she is on land. The feverish energy
which she has shown in getting together a formidable
Fleet in the Far East, the special attention of late given
to the whole question of Russian shipping, all this
might be thought, and has been stated, to be merely
a natural expansion of national energies. But what
is to be said of the intense fervour of patriogism which might be thought, and has been stated, to be merely a natural expansion of national energies. But what is to be said of the intense fervour of patriotism which has been forced upon the Russian people, as usual from above, on every possible occasion for five years past, precisely on the point of Russian Naval prowess? Readers of The Mandard will remember the Imperial eulogies on the gunboat affairs at Taku, and the bushels of rewards given. The last few days have provided another opportunity for rousing Russian enthusiasm in the direction of the Navy, namely, the fittieth anniversary of 'the glorious victory at Sinope,' when eight Russian line of battleships and some frigates gloriously annihilated an equal number of Turkish ships of less than half the Russian rating. There can be no doubt as to the object of Russia's Rulers in forcing public attention towards her Naval prowess. The Russian knows all he wants to know about land-power, for he is liable to serve in the Army individually. But, up to a very short time ago, very few Russians had the remotest conception of the meaning of sea-power. No one who was in Russia during the Spanish-American War will forget the amusing obstinacy with which Russians insisted that America had still her work before her, long after the rest of the world, better acquainted with the meaning of sea-power, had pronounced the matter practically settled. The annihilation of the Spanish Fleet at Manila made no impression at all here, whereas the first few skirmishes on land in Cuba formed for the Russian a satisfactory basis of argument. But since those days a change has been coming over men's Russian a satisfactory basis of argument. But since those days a change has been coming over men's ideas, and perhaps the Russian is not so very far behind the rest of the world in his estimate of seapower as he was, say, ten years ago. The transport of the British legions to South Africa completed his enlighterment.

It is time, therefore, that the public outside Russia should familiarise themselves with the idea that Russia is no longer merely the bear, for she is acquiring some of the capabilities of the whale. In the recognition of this threatening possibility by the responsible Ministers of several European States we may probably see the real reason for the very remarkable approchement which has taken place of late between precisely those Powers who would least of all care to have their already vast Naval responsibilities increased by the entrance into their ranks on equal terms of another Great Power. What Russia threatens in the Far East is an Imperial Navy. Her resources in men are inexhaustible, and her history shows that, whatever be the state of abject poverty of the people, their Rulers have never failed to find money for purposes.

of Imperial aggrandisement. It is this threatened metamorphosis of Russia into an amphibious Great Power which is really the question of the present century. If Russia can keep Port Arthur, she will, in course of time, crack Korea between the two nut-rackers. If diplomacy or war drive her back from Southern Manchuria, leaving her only her railway direct across to Vladivostock, but depriving her of the Southern branch from Kharbin to Port Arthur, then her ambition will be checked for a number of years, Vladivostock to being a favourable take-off for her plunge. In those years the United States will complete the Panama Canal and entirely revolutionise the maritime conditions of the Pacific. Russia's opportunity will once more, as in the Baltic, as in the Mediterranean, have been missed. If the pressure put upon her in the Far East now robs her of her fancied prey, the whole wrath of Russia will fall upon England alone, since the only outlet to unfrozen seas then left to the 'Colossus of the North' will be via the Persian Gulf, for which we have made ourselves responsible. For this purpose we are now taking our precautions in those and other regions likely to feel the weight of Russia's resentment for the wrecking of her plans in the Far East.

this purpose we are now taking our precautions in those and other regions likely to feel the weight of Russia's resentment for the wrecking of her plans in the Far East.

Whatever may be the facts of the case, the Russian certainly blames England for all these failures. During the crisis of the 'Chinese trouble,' the bombardment of Blagovésensk, and the events which followed, a very highly-placed official remarked to a friend of mine that it was only because England was employed in the Boer War that Russia ventured to advance so far into China. Now the Russian Press is carefully instructing public opinion that it is only. England which is 'bounding on Japan and China' to undo all that Russia has accomplished for herself in the Far East. The usual threats of pressure on the Indian frontier are again being paraded. The Orenburg-Taskhend Railway, of which less than fifty miles are completed out of six hundred, has been represented as already prepared to tulfit the object for which it is intended, of pouring troops on to the Indian frontier, in conjunction with the Trans-Caspian line. In short, the customary language is being used to which the Russians invariably resort when they fear that England is against them. Curiously enough, this language alternates with the no less customary suggestions for an Anglo-Russian understanding, the ultimate end of which is to be the hegemony of the civilised world. It is characteristic of the Russian idealism periodically to revert back a century or so, to days when England and Russia really did have a common aimagainst Napoleon. But then, and later, England learned sonnewhat of the inner meaning of Russian understandings. Yet the Russian sees nothing impracticable in a firm union between the England of to-day and the medieval ideas of Government, of right and justice, and a hundred other corner-stones of society, which obtain in the Russia of to-day. Further, the Russian has not yet learned to a speniet when he was a strong Naval Power in Pacific waters would provide the foreign

Century, as she fulfilled it in the Sixteenth, by holding back the flood-tide of heathendom from the Christian culture of the West. As the Cossack turned back upon itself the conquering wave of the Tartar peril, of the later Mohammedan peril, so let the Cossack in our day fulfil the destiny he is best fitted for, by saving the Christian world from all apprehension of another Mongol cataclysm. There can be no cause of offence in such in suggestion, for have not the leading organs of St. Petersburg repeatedly urged upon Japan the advisability of joining Russia, who will then help them to work out their Continental ambition at the expense of England in regions which offer much more tempting prey than the comparatively bare lands of the North? Japan has been told that Formosa is an excellent base for either commercial or military attack upon the English hold in China. rormosa is an excellent base for either commercial or military attack upon the English hold in China, and encouraged to hope for Russian aid if she took this view. Russia is sometimes charmingly naïve, but there is ever deep purpose behind her seeming innocence.—The Standard.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

JAPANESE WARSHIPS PASS PERIM.

London, January 21.

The Kasuga and Nisslan have passed Perim.

MR. CHAMBERLAIN'S CAMPAIGN.

Mr. Chamberlain delivered a great oration in the Guildhall, London, on the 19th January. The place was crammed with peers, commoners, leading bankers and merchants

RUSSIAN WARSHIPS.

The Russian cruiser Aurora, the transport Orel, the collier Saratoff and nine torpedo boats have entered the Suez Canal.

The cruiser Kubonitz remains at Port Said.

THE THIBETAN EXPEDITION.

London, January 22.

Various reports are arriving from Darjeeling, stating that the Thibetans are becoming truculent, and that the Lamas declare that they will appeal to Russia if the British advance continues. It is believed in several quarters that fighting is likely in the early

THE RUSSO-JAPANESE NEGO-TIATIONS.

It is stated by high diplomatic authority that an important advance has been made toward a pacific settlement. The peace party has gained the ascendency in Russia in consequence of emphatic representations by certain influential Ministers regarding the unpreparedness of Russia for war. Russia, therefore, replies to Japan in a wholly conciliatory spirit. Russia is prepared to recognize the autonomy and integrity of Korea, and to address a note to the Powers recognizing Chinese sovereignty and integrity in Manchuria. Japan, however, desires the formal embodiment of the latter principle in a special agreement between Russia and Japan.

JAPAN'S IRREDUCIBLE MINIMUM.

London, January 23.

Though there has been no actual offer of mediation, Japan has informed the Govern-BRITISH MINISTERIAL TROUBLES. ments at London, Berlin, and Washington that mediation is not acceptable.

Viscount Hayashi, referring rumours that Japan would modify her demands, has declared that Japan from the first asked an irreducible minimum.

RUSSIAN WARSHIPS.

Aurora and six destroyers have sailed from Trade; is imminent, as a protest against Suez. The battleship Oslabya and the Mr. Balfour's endorsing the Chamberlainite transport Saratoff will be docked at Suez. One destroyer is disabled.

NEW GOVERNOR OF THE STRAITS. Sir John Anderson has been appointed

Governor of the Straits Settlements.

RUSSIA'S ANSWER.

London, January 23.

It is stated in St. Petersburg that a reply has been drafted and approved. It courte-ously but firmly insists that whatever commercial concessions are granted, Man-churia must remain amenable to Russian influence, politically and strategetically.

THE KOREAN DISTURBANCES

London, January 24.

The American Minister in Seoul, Dr. Allen, has cabled to Washington that there are continual disturbances throughout Korea, and that Japanese have been attacked in several places.

The appointment of Major-General Ijichi to the Japanese Legation in Seoul is believed to have been made with the view of his

London, January 25.
A protracted Cabinet Council was held on Saturday.

THE BALKANS.

Later.

Reuter's agent, telegraphing from Sophia, says that news has been received from the frontier that the Turkish authorities are concentrating masses of troops on the Bulgarian

The Turkish representative has refused during the past few days to vise the pass-ports of Bulgarians going to Turkey.

KING EDWARD'S CLEMENCY

London, January 26.

Colonel Lynch, the leader of the Irish Colonel Lynch, the least the brigade in the Boer Army, has been re-Telegraph understands that the King inter-vened in Lynch's behalf in recognition of the demonstrations of loyalty received by His Majesty while visiting Ireland.

RUSSIA'S REPLY.

In St. Petersburg it is not expected that the reply will be presented to Japan's Note for some days.

THE NORWAY FIRE

The town of Alesund, Norway, has been almost completely destroyed by fire. population of 12,000 are homeless, and owing to the severity of the weather the conditions are terrible. Two German Atlantic liners have gone to afford relief and shelter.

ANOTHER CABINET COUNCIL.

Another Cabinet Council was held yesterday. It lasted nearly four hours,

THE RISING IN GERMAN AFRICA

News from Damaraland continues to be very grave. Several attempts to relieve Okahaneja have been made, but they have been repulsed with heavy loss. Five of the settlers with their wives and children have been murdered.

London, January 26.

The Daily News learns that as the result of the recent prolonged Cabinet meetings, the resignation of the Marquis of Lansdowne Secretary of State for Foreign Affairs; the Marquis of Londonderry, President of the Board of Education; and the Rt. Hon. The Russian cruisers Dmitri Donskoi and Gerald Balfour, President of the Board of fiscal policy generally to displace his own.

DEATH OF WHITTAKER WRIGHT.

London, January 27

Whittaker Wright, the promoter of the Globe Finance Corporation and other wildcat speculations, was sentenced to seven years penal servitude. After the sentence he collapsed and died in a few minutes.

CABINET CHANGES DENIED.

The statement of the Daily News, with regard to Ministerial resignations, is untrue. THE QUESTION OF MEDIATION:

A RUSSIAN MOVE.

London, January 28. Reuter's Agent in Peking wires that China invited the support of the Powers to attempt to mediate between Russia and Japan.

The Times' Peking correspondent confirms

the above.

France is reported as being willing to use her good offices in an endeavour to arrange a modus vivendi with the assistance of

directing any Japanese military measures England and America.

England and America.

In reply to Prince Ching's communication the British and American Ministers, acting in agreement, explained the difficulties of mediating at the present juncture.

Prince Ching admits that the suggestion to invite the mediation of the Powers emanated from the Russian Minister, the object of the move being evidently to impress the Chinese in favour of Russia.

WHITTAKER WRIGHT'S SUICIDE.

Later.

The post mortem examination of the body of the late Whittaker Wright showed that death was due to a dose of prussic acid.

OUTBREAK IN THE BALKANS. A Bulgarian band, consisting of 1,000 men, crossed the frontier near Kalanka, exchanging shots with the Turkish outposts, which retired to a fort. The Army Corps at Erzeroum is hastily mobilizing.

(FROM OUR CORRESPONDENT.)

FIRE IN KOBE.

MR. BERIGNY'S HOUSE DESTROYED.

Kobe, January 28.

The residence of Mr. Th. de Berigny at Kitanocho-yama was destroyed by fire at eleven o'clock last night. The flames are supposed to have originated in a bathroom upstairs, and the house and its valuable contents are almost a complete loss, though some of the books were saved, thanks to the fact that several guests were in the house when the fire originated.

(FROM THE "DEUTSCHE JAPAN-POST.") THE REVOLT IN GERMAN SOUTH WEST AFRICA.

Berlin, January 22.

Owing to the insurrection in German Southwest Africa the whole country east of Karibib is unsafe. Many families are fleeing to Swakopmund. Assistance for the threatened stations is on the way.

KOREA'S NEUTRALITY.

Korea has declared in Europe that she will be strictly neutral.

THE SITUATION.

In London as well as in Paris it has been declared that a Franco-English intervention is only possible if the same is desired by Japan.

SOUTHWEST AFRICA.

The troops for Southwest Africa have departed from Wilhelmshafen. Colonel Duerr, commander of the marine infantry at Kiel, made a powerful valedictory harangue.

DEATH OF HERR MAYBACH.

The former Prussian Minister of Railways, Albert de Maybach, is dead, aged 81 years.

THE SITUATION.

Berlin, January 23 The Westminster Gazette learns from a diplomatic source that Russia, instead of arranging a reaty with Japan, wishes to render a circular note to the Powers containing her declarations concerning Manchuria and the neutral zone in Korea. These ideas have up till now only been ventilated confidentially in London.

PRINCE ADALBERT.

It has been expressly stated in Berlin that Prince Adalbert's trip to China is not an act of diplomacy nor made at the instigation of the Kaiser, his father; the Prince is only following the ordinary course of military service.

RUSSIA'S REPLY.

Berlin, January 24. . Reports from St. Petersburg say that the Russian answer to Japan will be given in a few days. Here no sympathy exists for a congress nor any desire for intermediation whatever.

BIG FIRE IN NORWAY.

Berlin, January 25. The city of Aalesund, situated on the coast of mid Norway, has been burnt down entirely. There is great distress. Thousands of people are without a home. The German Emperor imwithout a home. The German Emperor immediately ordered the big armour-plated cruiser, *Prince Heinrich* to go to the place and to give every help. The North German Lloyd, and the Hamburg America Line also sent ships to render assistance.

RUSSIA'S REPLY.

Berlin, January 26. The Russian answer to the Japanese note has not yet been given. In Berlin the confident hope is increasing that Japan will receive satisfaction from Russia and thereby be able to honourably avert war. Japan is acknowledged to have attached it future policy to Korea and Manchuria by the firmness of its attitude.

THE BALKANS.

The relations existing between Turkey and Missouri, British steamer, 1,827, Bruce, 22nd Jan. Bulgaria are again strained. The Bulgarians are Portland, Oregon, via Tacoma, Wash., General making military preparations for the spring. Turkey has asked for support from Russia and

BELGIUM AND GERMANY.

King Leopold of Belgium has paid a visit to the German Emperor. It was only an act of courtesy. Germany does not intend to enter any anti-English agreement concerning the Congo

GERMAN AFRICAN TROUBLES.

Despatches from German Southwest Africa report heavy losses on the side of the German Colonial troops. The attempt to relieve the threatened stations proved unsuccessful, Several families of farmers have been murdered.

DEATH OF DUKE FREDERIC OF ANHALT.

Duke Frederic of Anhalt has died. He was born on April the 29th, 1831. His successor is his second son, the hereditary Prince Frederic, born August 19th, 1856.

GERMAN AFRICAN TROUBLES.

Berlin, January 28. According to news from German Southwest Africa, the Hottentotts called Bastards have taken Otjimbingue. Sixteen Germans have been murdered, and seventy are missing.

NAVAL PROMOTIONS.

The Rear Admirals Fritze and von Prittwitz-Gaffron (the latter commander on the East-Asiatic station) have been promoted to Vice-

THE CROWN PRINCE.

The German Crown Prince has accepted the honorary presidentship of the Prussian Military League.

RUMOURS.
Rumours that Dr. Stuebel, the director of the German colonial department, will resign, have probably been caused by the reports coming from Africa. They seem to be premature.

NORWAY'S THANKS.

In the Norwegian parliament the president gave a speech expressing the thanks of the whole Rumour Ru

nation to Kaiser Wilhelm for his energetic help rendered to the city of Aalesund when on fire. Yesterday, in honour of the German Kaiser's birthday, all Norwegian cities were flagged. King Oscar of Sweden and Norway sent to the Kaiser the newly founded order of the Norwegian Lion. The Kaiser is the first knight of this order.

FOR BABY'S SKIN SCALP AND HAIR

Semething for Mothers to Think About

EVERY CHILD born into the world with an inherited or early developed tendency to distressing, disfiguring humours of the skin, scalp, and blood, becomes an object of the most tender solicitude, not only because of its suffering but because of the dreadful fear that the disfiguration is to be lifelong and mar its future happiness and prosperity. Hence it becomes the duty of mothers of such afflicted children to acquaint themselves with the best, the purest, and most effective treatment available, viz., THE CUTICURA TREATMENT.

Warm baths with Cuticura Soap, to cleanse the skin of crusts and scales and soften the thickened cuticle, gentle anointings with Cuticura Ointment, to instantly allay itching, irritation, and inflammation, and soothe and heal, to be followed in the severer cases by mild doses of Cuticura Resolvent Pills (see below), to cool and cleanse the bloed, are all that can be desired for the alleviation of the suffering of skin-tortured infants and children and the comfort of worn-out, worried mothers. A single set is often sufficient to cure when the best physicians fall.

Millions of Women Use Cuticura Soap

Assisted by CUTICURA OINTMENT, for preserving, purifying, and beautifying the akin, to cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for actioning, whitening, and soch tang, and sore hand, for baby rashes, tuchings and chafings, in the furm of battle for annoying irritations and inflammations, or too fre or offensive perspiration, in the form of washes for ulcerative weaknesses, and for man sandays, antisopide purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the totale, bath, and nursery.

CUTIOURA RESOLVEST PILLS (Chosolate Coated) are prepared to meet the wants of delicate women, and sensitive children, and are pure, sweet, and tasteless. They are beyond question the most successful blood purifiers and humour cures yet compounded.

CUTIOURS ERREDIES are sold throughout the world. Australian Depot: B. Tuwes & Co., Sydney. British Depot: T.-E., Charterhouse Rq., Longton. Prouch Depot: J. Rue de le Paix, Pada. Fortum Dabu and Chur. Rais Proca. Rosten, U. S. A. "All about the Skim." Free.

YOKOHAMA: SATURDAY, FRBRUARY 6TH, 1904.

SUMMARY OF NEWS.

Owing to damage caused to the reservoir, the water supply of Osaka has been temporarily

A Nikko telegram under date of Jan. 30th states that Chuzenji lake is now completely frozen over, the first time in sixteen years

THE Shimonoseki branch of the Bank of Japan received on Jan. 30th ninety-eight cases containing notes from its head office.

A workman employed by the Tokyo Electric Light Company was electrocated on the evening of Feb, and while repairing a pole.

THE report of the alleged resignation of Mr. Soma, President of the Yokohama Specie Bank, is contradicted by the Nichi Nichi.

Owing to a heavy fall of snow, some hou collapsed on Jan. 20th at the Arakawa Mina, Akita prefecture, and seven persons were killed.

A CASE of small-pox was found on Jan. 29th on the Koyo Marn at Shimonoseki. The patient is a fireman. The steamer underwent disinfection.

THE Chinese Government asked the Osaka Mint

be completed next month.

A TELEGRAM from Nagasaki states that the Yusen The nominal editor of the Yokohama Shimpo Kaisha intends to charter a British steamer (about 2,700 gross tons) which is lying at Saseho.

Eighteen hundred tons of rails manufactured at Shimonoseki by the steamer Fushiki Maru for DR. R. TAKAYAMA, vice-president of the Hama-

MR. FURUICHI, President of the Seoul-Fusan Railway Company, has arrived in Korea accom-panied by an engineer and other persons, number-ing a hundred and thirty.

The dead body of a man, about 23 years old, was found at a landing place at Shirobe-gashi Nihonbashi, Tokyo. The coroner ascribed death to be due to the cold.

Mr. T. Marsut, and other merchants of Tokyo. have applied to the Kanagawa Kencho for permission to construct an automatic tramway be-tween Dzushi and Hayama.

Ir is reported by telegram from Nagasaki that 1,200 tons of coal, 158,180 feet of telegraph wire and 750 feet of marine cable were shipped thence on Jan. 30th for Port Arthur.

JAPANESE gold coins amounting to jen 850,000 were exported to Shanghai on Jan. 29th. Another shipment amounting to yen 500,000 was made to San Francisco the following day.

A STEAM launch collided with a lighter on the night of Jan. 29th on the canal at Akashi-cho, near Shimbashi, Tokyo, with the result that the latter sank. The sendo were saved by the launch.

A woman of about twenty-seven years of age was found on the night of Jan. 20th on the Nippon Railway. She was run down by a train at a point

LI Atkow, a Formosan, of Ako district has been executed in jail, having been sentenced to death by the Tainan. District Court on a charge of having attempted to cause disturbances and acquainted with the Russian, Chinese and Korean of having attempted to cause disturbances and instigated rioters.

THE Jiji states that Mr. T. Okazaki, Osaka, has purchased a British steamer of 2,606 tons. He took delivery at Kobe. It is added that she was constructed in 1883 by Messrs, Armstrong and

THE dead body of a woman of about tweny years old was found on Jan. 31st on the sea-shore near the Yokohama Dock Company. She had written a letter addressed to her parents. cause is not known.

Owing to heavy gales a junk of 193 koku was wrecked on Jan. 29th off Omaesaki point, Idzu province. The crew, consisting of four men, were saved by the steamer *Urato Maru*, which fortunately was passing the scene.

A FEMALE passenger on the steamer Kwanon Maru fell into the sea on Feb, 2nd at a point off Sugita while on her way from Tokyo. The steamer stopped and a boat was immediately lowered to save her, but she disappeared

THE Jiji's Osaka correspondent states that Mr. Ginsburg has chartered sixteen ships of 1,500 to 2,000 tons at Shanghai from Germans or Norwegians. These ships will be employed to carry coal from Moji or other ports to Port Arthur.

EIGHTY Japanese arrived on Jan. 20th at Nagasaki by a Russian steamer from Vladivostock. A

through the Masuda Company to cast three telegram has been received at Nagasaki to the million pieces of one sen copper. The coins will effect that over a hundred others left Vladivostock the following day by another Russian steamer.

> was punished on Jan. 29th in the District Court with a fine of yen 20 on a charge of having published the names of steamers which have been chartered by the Government.

> DR. R. IARAYAMA, VICE-president of the Halla-matsu hospital, Shidzuoka prefecture, attempted to commit suicide on Jan. 30th by cutting his throat with a pair of surgical scissors. He was staying in a boarding house in Hongo, Tokyo.

A MAN employed by a rice dealer, T. Ono, living at Kakigaracho, Tokyo, committed suicide on Jan. 28th, hanging himself with a cord. It is said that he embezzled over yen 300 belonging to his employer and his offence was found out.

THE First Bank held a general meeting on Jan. 28th, when it was announced that the net income of the last half year amounted to year 352,220. Out of this yen 225,000 was set aside as interim dividend at the rate of 41/2 per cent.

During the month of January Japanese gold coins amounting to yen 6,722,200 were exported from Kobe. The Kokumin adds that in the same month last year the value of gold coins exported amounted to yen 65,300 only.

WITH regard to the steamer Taikyo Maru, which recently took fire on the Yangstze, the Osaka Shosen Kaisha received on Jan. 28th a telegram from the surveyor that there was no expectation of repairing the hull, and the company resolved to abandon the vessel.

He states that small-pox is very prevalent in Vladivostock and is extending to Korea. He ordered the sanitary officials to pay strict attention to crews of vessels arriving from these places.

> AT a conference between the American ambassador, Mr. Choate, and the officials of the Home Office in London on Jan. 4th, final arrngements were made for the release of Mrs. Maybrick, who was convicted of poisoning her husband and sentenced to imprisonment for life. She will be liberated in April,

> A YOUNG man living at Kita-Adachi, Saitama, murdered his mother-in-law, on Jan. 31st by beating her on the head with a log. He then set fire on the head with a log. He then set he to their dwelling and subsequently attempted to commit suicide by jumping into a well. He was saved by a fireman. The cause is reported to have been a dispute.

THE SITUATION.

Saturday, January 30

Japan appears to have intimated that she finds the delay somewhat irksome. It is believed, however, that not many days will now elapse without a definite sign and that Monday or Tuesday next will see the arrival of the reply. Tuesday in each week is the day when the Cabinet holds its regular consultation in St. Petersburg, and there is just a possibility that the answer may be held back until its final form has been once more considered. There are conflicting rumours as to its nature. Some think that the Russian Government has decided to accept Japan's proposals, seeing in them the most acceptable exit from a troublesome situation and having no desire to provoke a war. Such a course would do great credit to Russia. But there are also forecasts that the old contention will be maintained with regard to Manchuria, namely, that it is, in effect, a territorial conquest of Russia's and that, consequently, she is neither bound by any treaties made or promises given before her occupation was effective nor does she be under any obligation to listen to the intervention of a third Power. Should the latter line be taken, war must follow, for the Japanese are absolutely determined not to abate anything of what they consider essential to the maintenance of peace. Easier terms of arrangement might certainly have been made last November. But Russia mistook the strength of Japan's purpose and perhaps under-estimated her capacity.

The telegraph repeats the recently denied story that Russia is pressing Turkey to allow the passage of the Dardanelles by war-ships, but that Turkey remains firm. Reuter told very can some time ago that nothing whatever was known in Constantinople as to this particular explain. form of Russian activity.

A rumour comes from Kinchow to the effect that the Russians are constructing some permanent buildings under pretext of requiring them for the purposes of a cemetery but in reality with the intention of applying them to military uses. What Russians are these was wonder. The publications are those was wonders. Russians are these, we wonder. The public has been informed within the past few days, first, that 70 Russian soldiers had reached Kinchow and secondly that they were only on their way thither. Now we have some band of Russians engaged building a mortuary chapel there.

of uncertain tenure between the Liao River and the Great Wall.

The Chuo Shimbun's Seoul correspondent

sends intelligence that Russia appears to be shifting the centre of her military gravity in Manchuria from Liaotung to Harbin. she be, it must be confessed that the indications of such a movement are not perceptible to ordinary onlookers.

Monday, February 1. We need scarcely say that no credence seems due to the Daily Graphic's positive assertion about Russia's answer having been tommunicated in gist to Mr. Kurino and by him forwarded to Tokyo on the 27th ultimo. Were it an answer of the nature alleged, the Russian Government would not have adopted that channel of conveyance. Probably the Graphic's statement had its origin in the fact that on the 27th ultimo Mr. Kurino is said to have visited Count Lamsdorff and intimated the Japanese Government's desire

for a speedy reply.

The Nichi Nichi Shimbun says that a long telegram reached the Russian Legation on the evening of the 29th ultimo. If that be so, the conference of statesmen on the 30th may, perhaps, be explicable. But the Kokumin says that the answer will probably be deferred for 4 and 5 days more and we are disposed to accept that estimate.

Prince Ching now denies emphatically that he endorsed M. Dubail's offer of media-He alleges that he merely conveyed to the French Representative a suitable acknowledgment of the latter's kind intention. How this is to be reconciled with the circumstantial accounts previously received of the Prince's action, we can not

On the 30th ultimo a meeting of states-men took place at the Minister President's house. It seems to have lasted from halfpast nine in the forenoon until six o'clock in the evening. Marquis Ito and Marquis Yamagata were present most of the time, as were also Admiral Yamamoto and Baron

The Nichi Nichi Shimbun publishes a singular telegram from Peking. It says that the Representatives of the United States and of Japan, having addressed themselves to the Chinese Government with the object Our readers doubtless remember that of getting preparations made for carrying out rumour spoke recently of a movement of the treaties in the matter of opening Mukden, Russian troops from Port Arthur in the Tatung and Autung, have received answer direction of Wiju on the Yalu. It seemed a that so long as Manchuria is in Russia's difficult task to march troops from Liaotung military occupation, China is powerless to to the Yalu at this season of the year, give effect to that provisions of the treaties. though, for the rest, the operation would be that reply, if authentic, inaugurates a easily explained by assuming that an curious complication. Was China merely advance from northern Korea into Manplaying fast and loose with the Powers churia would be part of Japan's military when she concluded a treaty which she churia would be part of Japan's military when she concluded a treaty which she programme in the event of war. However, knew herself to be incapable of carryit now appears that there has been a confusion of place-names. The characters plead that the Powers were playing with her read "Wiju" should have been read "Ichow," which is a place lying westward the they exacted promises which they is the of the Liao River. At present the story fact is that China is almost hopeless. If runs that 200 Cossacks arrived in Mukden she foresaw that she could not give effect to on the 22nd instant, and having taken post these promises, why did she make them? session of an inn by the simple process of And if she acknowledges her incomdriving out the lodgers, spent the night petence to discharge the most rudimentary there. Next morning they marched towards functions of sovereignty in Manchuria, as Ichow, whence three battalions of Chinese well as her reluctance to make any troops, constituting the garrison, retired at effort for the re-assertion of her rights, their approach. It is evident that Russia why does she continue to claim will rest on the shoulders of Russian offinitends to have a clearly defined western the one and to deny the loss of the frontier whether for the purposes of the other? She is an invertebrate State, maintenance of neutrality or for belligerent and the sole refuge she seems to discern operations. There is not to be any area from her own spiritlessness is to set the Authorities, acting in obedience to suddenly

Powers fighting over the reversion to her property.

In this context we may note a telegram published by the Kokumin Shimbun from Peking. It says that the news of possible Russian concessions such as may avert war between Russia and Japan, has been received very strangely in the Chinese capital, and that should the present complication end without war, Japan's political position in Peking will be greatly compromised. We do not think that any credit attaches to such talk.

Tuesday, February 2.
The Jiji Shimpo, while denying the correctness of the Daily Graphic's very positive allegations about Russia's reply, and while predicting that the reply is not likely to be received before the 5th instant, re-expresses its often enunciated opinion that Russia is seeking not a peaceful settlement but leisure to make ready for war. It may be anticipated, therefore, that her next note will be couched in terms so guarded and so courteous as to compel a further interval of negotiation although conceding nothing of importance. The *Jiji* further thinks that in consequence of communications of a collateral nature which have already passed between St. Petersburg and Tokyo, Japan finds herself under inevitable restraint as to taking active measures. We can not agree with our contemporary's view that Russia does not desire peace. There may be, indeed we may certainly say that there are, many Russians anxious to put this matter to the test of war, but that the Tsar and his most trusted advisers truly wish for peace we can not doubt. It can not be ignored, however, that Russia is in a difficult position. Her easiest exit would have been by the route of mediation, and she has attempted to take that route, unsuccessfully but not insincerely. A task of great perplexity devolves on her statesmen. They can not forget that they speak for a great empire, and that their country's prestige forbids too conspicuous sacrifices.

Wednesday, February 3 The Novoe Vremya, according to a telegram in the Jiji Shimpo from London, has an article contending that Russia can not possibly come to an agreement with Japan about Manchuria. It is noteworthy that, whether or not the Novoe Vremya is entitled to the semi-official character usually assigned to it, its utterances throughout this complication have been, on the whole, of a very belligerent nature.

London sends news (fiji) that in the event of war General Kuropatkin will be commander-in-chief of the Russian forces in the field.

The rumour continues to circulate that merchandise traffic on the Trans-Asian Railway was to be suspended from the 2nd instant. We can only repeat that no intimation of such a measure has reached the postal authorities in Japan, and nothing seems less probable than that the Railway Management would allow the transmission of mail matter to continue from this country viâ Siberia were the regular service of trains suspended. The usual mails were made up in Tokyo on the 31st ultimo and forwarded to Nagasaki that night. Should it prove that this routine has been suffered to proceed unchecked although an immediately impending interruption of the transport facilities was known at Dalny, a great responsibility

received orders from St. Petersburg, are working day and night to complete their military and naval preparations, and that the crisis is expected to come within the mext twenty days.

Peking also sends intelligence of a similar import. According to this source of au-thority, Russia has purchased and is purchasing large supplies of Kaiping coal, and is contracting with a British firm in Newchwang for a quantity of Japan coal. In Peking the view said to prevail is that every day's delay tells against Japan. That is true in a military and naval sense, but it was true six months ago also.

Another batch of Japanese fugitives left Dalny for Nagasaki on the 30th ultimo. On arrival at Nagasaki they stated that two regiments of Russian troops lately set out from Port Arthur for some unknown destination, and that four regiments were moving thence towards Liao-yang. Troops to replace these were coming daily to Port Arthur, and a regiment of Cossacks were also en ronte. In consequence of these various movements, traffic on the line was blocked for the general public.

These fugitives added that not more than 100 Japanese subjects remained at Dalny and that these, having completed their preparations for departure, would doubtless leave by the next steamer.

The Toyo Kisen Kaisha's steamships Rohilla and Rosetta have been recalled from their voyages to Manila and Hongkong.

Japanese journals allege that at the recent meetings of bankers and business men in the capital, Baron Komura deemed it expedient to offer some explanation of the situation, from a diplomatic point of view. Concerning what he said the Chuo Shimbun gives a circumstantial account. It is to the effect that Japan's proposals were, first that Russia should recognise China's sovereignty in Manchuria, should restore to her the administration of the three provinces, and consider the should agree that all the Powers have equal commercial and industrial rights in Manchuria; secondly, that Russia should recognize Japan's political influence over the whole of Korea. To this Russia replied that she agreed to recognise all commercial privileges hitherto acquired by the Powers in Manchuria under treaty with China, and that, with regard to Korea, she would recognise Japan's influence in the regions southward of the 39th degree of latitude provided that all the district northward of that line were declared a neutral The Japanese Government announced its inability to accept this programme and thereupon Baron Rosen asked for a delay, on the ground that the question would be submitted for deliberation by ■ high council of state in St. Petersburg on the 28th of January. Japan now awaits the decision of that council which is expected by the 4th instant at latest.

Thursday, February 4.
On the eve of the arrival of Russia's reply it seems idle to speculate about its We note, however, that some Tokyo journals, relying on information alleged to have been forwarded by Mr. Kurino from St. Petersburg, speak of the reply as unquestionably unfavourable and predict the immediate issue of a statement by Japan to the Powers, preluding independent action to secure her interests. Others, however, affirm that the complication will end in a virtual exchange between Man-been transmitted in gist by Mr. Kurino, and the part of outsiders. The King's speech is churia and Korea. Meanwhile it is note-are found to be quite unsatisfactory. Our probably not altogether welcome in this worthy that the Tai-Ro Doshi-kai deems contemporary's version is that, with regard country since it seems to suggest mediation,

field for the purpose of protesting against any patch-work peace. It held a meeting on the the precise policy that ought to be pursued, according to its opinion. It is also note-worthy that military preparations are more open than ever. The reticence imposed by the Press Regulations prevents us from being explicit, but it is permissible to say that no practical evidences of any belief in a pacific settlement are apparent.

On Wednesday the five Elder Statesmen-Marquises Ito, Yamagata and Oyama and Counts Inouye and Matsukata-met at half past nine a.m. in the residence of the Prime Minister, who also was present, as were Baron Komura, Baron Yamamoto, General Terauchi, Admiral Saito, Admiral Viscount Ito, General Baron Kodama, and Major-General Ishimoto. During the progress of Minister of State for Foreign Affairs proceeded to the Palace and made a report to Staff and the Naval Department, who went ference was thus brought about. Another the Japanese Representative in St. version connects the affair solely with the burg has twice asked for expedition. relations between the Cabinet and the Elder Statesmen. The plain fact is that the secret

The Privy Council met on Wednesday to service in time of war. The Minister of Korea. (2) That recognition is unlimited Communications attended and offered some in Southern Korea. middle of March if necessary.

Friday, February 5.
In the sequel of the Council of Elder Statesmen and Cabinet Ministers held on the 3rd instant, it was expected that a conference in the presence of the Emperor would take place on the 4th, and the expectation proved correct. Rumours vary as the Sovereign's presence. Some say that financial questions occupied attention; some allege that the situation was the topic. latter view seems to us more probable than the former.

itself called upon once more to take the to Korea, St. Petersburg is willing to recognise Japan's commercial and industrial influence but will not recognise her political and instant, and elaborated a programme of influence; and that with regard to Man-the precise policy that ought to be pursued, churia Russia will acknowledge any treaty privileges hitherto acquired by the Powers, but will discuss with China and with China alone the question of restoring the administration of the three provinces. Japan, on the other hand, asks for the recognition of her commercial and political influence throughout the whole of Korea, and asks also that the treaty privileges acquired by the Powers in Manchuria shall be acknowledged to acquire their validity from China's sovereignty. In the face of such an answer, the Japanese Government, according to the Chno, sees plainly that a pacific settlement is quite hopeless, and is consequently preparing to address an ultimatum to Russia, and to resort to free action. We (Japan General Ishimoto. During the progress of Mail) would point out, however, that the the conference the Prime Minister and the answer described by our Tokyo contemporary, so far from embodying even a shred of concession on Russia's of concession on Russia's part, evinces greater obduracy and less liberality than the Emperor, after which they returned to the Council, which was subsequently attended by several officers of the Head Quarter repeated declarations coming from St. to and fro. Various rumours are circulated with regard to the subjects discussed at the meeting. One confidently affirmed story is that Baron Rosen addressed a long confidential communication to Baron transplants of the and instantial to the property of the and instantial to the rationals of the rolong delay. Petersburg and Paris that the drafters of Komura on the evening of the 2nd instant; that it indicated clearly the nature of Russia's pending reply; that the reply ed in on the 13th of January, a week after is unsatisfactory; that Baron Komura passed the news to the Elder Statesmen and his colleagues, and that the content of the receipt of Russia's second reply, and Russia's answer to it has not yet come though 23 days have elapsed and though ed in on the 13th of January, a week after the receipt of Russia's second reply, and Russia's answer to it has not yet come though 23 days have elapsed and though the Japanese Representative in St. Peters-

The Nichi Nichi Shimbun translates from German papers of the 12th a summary of a statement, said to be official, of Russia's second reply. The points are :- (1) Russia consider the draft of regulations for a postal recognises Japan's influence in all respects in It has been decided that all measures having reference to taxation for war purposes shall be deferred until the meeting of the Diet. We never had any doubt that such would be the decision. The taxation question does not in any way affect the immediate raising of money for pressing needs. What the revenue from increased taxes would be devoted to is the service of the debt now incurred, and that is not a matter of urgency. An extraordinary it is stated that this fourth declaration was subsequently supplemented by an explanation that Japan shall not build any large town or undertake any defensive works. (4) There shall be a neutral works. (4) There shall be a neutral tending to a distance of 50 kilometres from either bank, and within that zone neither Russia nor Japan shall carry out any defendes works. (5) As to Manchuria, while the immediate raising of money for pressive works. (5) As to Manchuria, while the Powers shall be duly recognised, Russia is unable to enter into any negotiations with a third party. From the same source moiddle of March if necessary. restriction that Japan shall not build any planation that since neither Russia nor Japan possesses any proprietary rights in Manchuria, it is out of the question for them to enter into any agreement about the future of that region. They might as well discuss the disposition of territory in the Philippines or Australia.

This last declaration evidently amounts to to the matters discussed on the 3rd and in an indirect but very unequivocal acknowledgement of China's suzeranity.

Lord Lansdowne referred to Japan, of course, when he informed the House of Peers that one of the Far-Eastern disputants does not want mediation. What Japan It is very confidently affirmed by the desires is that her case should stand on its Chuo that although Russia's reply has not own merits. She is prepared to defend its been officially received, its contents have justice and she deprecates all interference on but we can not suppose that His Majesty had any such intention.

CHINA.

Monday, February 1. There is talk of a change of Commissioner of Customs at Newchwang. The present holder of the office is a Russian subject. His appointment provoked some hostile criticism, but doubtless Sir Robert Hart took the common-sense view that so long as Russian influence remained paramount at the port, a Russian would be more likely than any other national to manage things smoothly. It is now stated, however, that owing to the interference of the Russian Authorities, which a Russian subject is naturally unable to resist successfully, the duties of the post can not be performed with integrity, and the Russian incumbent has asked to be relieved. He will probably be replaced by Mr. E. Gilchrist from Canton.

A disturbing rumour comes from Tientsin in part at all events, by the hope of breaking to the effect that Viceroy Yuan finds himself down China's obduracy in the interval. at variance with the Central Government on the question of the new training school as well as in relation to other matters that concern China's military preparations. So acute have these differences become that there is talk of the Viceroy's resignation. That would be calamitous for China at present, Viceroy Yuan being one of the few statesmen she possesses who have proved their ability to deal with an emergency.

As the same time news arrives that the Viceroy has ordered 20,000 Mauser rifles through a German firm in Tientsin.

Tuesday, February 2. On the 30th ult., says an Asahi telegram municated to him a statement as to the junction with Viceroy Chang. course of the negotiations with Russia, urged that no time should be lost in issuing a notification for the opening of Mukden, Antung and Tatung as provided by the new have been placed in position by the Russians commercial treaties. The United States at Harbin. This news comes from fugitives commercial treaties. Minister has preferred a similar request, who have arrived in Peking. Prince Ching, it is alleged, replied that inquiries had been addressed to the Governor-Inere can be little doubt that the Governor-General will avow himself incompetent to give effect to the proposed arrangement pending the withdrawal of Russia's troops. That is China's game; a sufficiently legitimate game after all, and we can not wonder if she plays it for all it is worth.

The report of the Directors of the National Bank of China, Ltd., which was presented, to the thirteenth ordinary annual meeting of shareholders held in Hongkong on Satur-day, shewed that the gross profits for the year ending December 31st, 1903, were, including \$15,613.80 brought forward from last year, \$291,885.87 which, after deducting all charges, allowing for bad and doubtful debts, and writing \$5,000 off furniture account, leaves a net profit of \$162,574.80. This the Directors proposed to deal with as follows:—To pay a dividend of \$2.00 per share (in London 3/6) absorbing \$80,906.00, to place \$60,000.00 to reserve, and to carry forward \$21,668.80.

Russia; an article so immoderate that we Mukden. But as the latter city would railway stations, etc. The regulations are refrain from giving even the gist. The scarcely be regarded as an asylum, these article appeared on the 9th of January, and Japanese, together with those (300) in diseases of the lungs are contagious.

Sietas & Co., a German firm doing business considerable apprehension. Sietas & Co., a German firm doing pusiness considerable apprenension.

It does not appear that the much-talkedin Dalny and Port Arthur as well as in the Chefoo, are said to have announced that they would no longer print such a tempestuous sheet. Chefoo finds itself in the condition of the storm-beaten tea-pot, and a condition tea-pot, an great many people are made merry.

Thursday, February 4. We take the following
The Kokumin Shimbun has a telegram king and Tientsin Times: from Peking to the effect that the ProRussian party in the Chinese capital includes some unexpected persons and that their activity has been great of late. Their object is to induce the Chinese Government to approach Russia with proposals for an independent settlement of the Manchurian problem. Such a settlement, if effected with China as an assenting party, would put an end to the Far-Eastern question for the moment, and it is shrewdly conjectured that the procrastination shown by Russia in dealing with Japan's proposals has been inspired, ing with Japan's proposals has been inspired,

that Viceroy Yuan has been summoned to Peking, and that the postponement of Viceroy Chang's departure for the Yangtse Valley, which was to have taken place on the 26th ultimo, is attributable, not be illness as has been stated, but to the inexpediency of his absence just as the Russophil tendency is becoming pronounced.

It will be remembered that there was talk of Viceroy Yuan resigning his duties in connexion with the organization of the northern army, owing to dissatisfaction with the methods pursued in Peking. Apparently his Excellency actually tendered his re-On the 30th ult., says an Asahi telegram from Peking, the Japanese Representative the Court has refused to accept it, and has called on Prince Ching, and having comordered him to continue the work in con-

Friday, February 5.

The defences of the rear face of Vladivostock are said to be now complete, the work General in Mukden, and that pending his having been pushed on rapidly. All fuel reply no definite step could be taken and all skins usable for clothing purposes

The mounted bandits in Manchuria are rumoured to be singularly active. In the neighbourhood of Harbin they are committing frequent depredations even in broad daylight. One band of them is said to be

in possession of artillery.

The fugitives from Harbin report that forged rouble notes are largely in circulation there, and that no efforts are made by the Russian authorities to suppress them,

the publishers of the journal, Messrs. H. Tsitsihar and Hailar (200) are in a state of

We take the following item from the Pr

THE INSURANCE QUESTION.

From statements published in Tokyo it appears that up to the 1st instant, when the term expired for the payment of deposits by foreign insurance companies doing business in Japan, only one life company, 2 fire, 1 marine and one marine-fire paid in the required deposits. Four have announced the cessation of further business and out of the 44 remaining companies, two or three are believed to be awaiting the result of the negotiations while the rest have resolved to suspend operations. A rumour had prevailed that some exit from this most unfortunate impasse would have been devised before the close of January, but that hope has not yet been fulfilled.

The following has been placed at our disposal:-

- Memorandum of an arrangement as to deposits from foreign Life Insurance Companies, brought to Mr. Griscom by Mr. Ishii of the Poreign Office on February
- (1) A petition should be presented by each of the companies concerned for exemption from the deposits equivalent to the legal reserve fund in consideration of a single deposit of yen 150,000
 - It should be stated in the petition that of the above mentioned sum, yen 100,000 shall be deposited within a week, i.e., on or before the 9th February, 1904, while the balance, i.e., yen 50,000, shall be deposited within six months.
 - Those who have not made deposits within the two periods fixed in the preceding para-graph shall not be allowed to make any new contracts.

PRECAUTIONS AGAINST PNEUMONIA.

The Department of Home Affairs has issued a series of regulations to prevent the spread of pneumonia. One of the main spread of pneumonia. or to prevent the sale of implements for points insisted on is the provision of a forging. That is a courageous tale.

From the same source we learn that there which spittoons are to be duly disinfected, are over a thousand Japanese residents in and no one will be allowed to spit except Harbin, and that they recently applied to into a spittoon (dake). Explicit directions the authorities for protection in the event of an outbreak of hostilities. The reply was these residence are given as to the manner of disinfecting an outbreak of hostilities. KOREA.

Saturday, January 30.
The Minister of Finance, Chhim Sanghun, has resigned, and is succeeded by Li Yong-ik, who seems to be very powerful in Seoul at present.

Workmen for the Seoul-Fusan railway are beginning to arrive in large numbers from Japan. It is stated, however, that the programme of finishing the line during the course of the present year will prove scarcely feasible, a year and a half being the mini-mum period contemplated by the experts recently despatched from Tokyo,

It has been decided to add another line of telegraphs to those already existing in Korea. The line will be from Chemulpo to Fusan via Seoul. There is already I line on that route, but it is found insufficient to meet the exigencies of the moment.

Monday, February 1.

The wind of peace is said to have reached coul Within the past few days diplomatic circles there are reported to have exchanged their previously interested, if not excited, demeanour for one of nonchalance. tainly does appear from the various rumours circulated that Russia's intentions are sincerely pacific. At the same time we can not but observe that the stories sent across the wires during the past few days about the nature of the St. Petersburg reply are effectually discredited by the latest news, namely, that the reply was to have been drafted after the council of ministers and high dignitaries on Thursday last. And then if the former very positive allegations prove to have been untrustworthy, who shall say that Reuter's latest about the special council is more worthy of credence? There is a story in circulation to the effect that King Edward has interested himself most actively in the cause of peace, and has addressed communications direct to the Tsar on the subject. The King's great hope is that there shall be no outbreak of war in Europe during his reign, and as he finds in the Emperor of Russia a man sincerely imbued with the same sentiment, these two monarchs ought to be able to accomplish much We may add here that during the past week the feeling in certain circles in Tokyo has been distinctly more hopeful. At the same time the difficulty of Russia's position is fully appreciated. For some reason which we can not venture to analyse she appears to have under-estimated not only Japan's resolve but also Japanese belligerent capacity, and the Japanese, on their side, have been on either side has become very difficult. We must frankly say that if the mental attitude of some European nationals in Tokyo may be taken as an index of Russia's mood hitherto, there is plenty of warrant for thinking that St. Petersburg's eyes have been closed to the truth. Supreme contempt for the Japanese army and navy when pitted against connexion with a scheme for the issue of the forces of any European Power and indignant resentment against this empire's assurance in venturing to assert itself so resolutely -these are the sentiments most en evidence. Speaking plainly, it has all been a surprise that intelligent Occidentals issued in Encland. to us: a surprise that intelligent Occidentals ously different—that intelligent Occidentals should remain so strangely ignorant of the

people among whom they reside, and we are the situation. The Russian Minister is reinclined to think that not merely the presented as having replied that nothing was Russians in Manchuria but also the Russians in St. Petersburg have been hitherto labouring under similar misapprehensions, and that, partly owing to that reason, the situation has thus drifted into its present perilous state. The Tsar and the leaders of the peace party in the Russian capital are, however, quite sufficiently magnanimous to prefer reasonable concessions to the horrors of war. That confidence has been gaining ground steadily

Peking and New York both telegraph that a Russian force—estimated at six thousand men-has started from Dalny and Port Arthur for the banks of the Yalu. Our readers will recognise this rumour as an acquaintance of some days' standing. it may be true, none the less. If Manchuria is to be held in a military sense against all invasion, the Yalu line is one of the most important defensive positions.

We used to hear a great deal about the Yalu Valley and the timber-felling operations there, but the subject has of late dropped out of the field of public obser-vation. Attention is re-called to it by news that the three-cornered company of Koreans, Chinese and Japanese who have hitherto been struggling against the Russian mono-poly, have now handed over their concession to a Japanese subject named Shiki Shintaro; and that a guild called the Shiki-gumi has been organized with a capital of 90,000 yen. What Mr. Shiki paid for the concession we are not informed. Active operations in the lumber business are to be commenced by the new guild next month.

from Fusan to the effect that Mr. Furuichi thoroughly content with its own policy, and, and his colleagues have decided to carry the Seoul-Fusan railway along a line which will avert all necessity for tunnelling. This necessitates the surveying of a new route, and nine survey parties have been organized to carry on the work expeditiously.

It is reported that Korea has already wearied of her fleet; her solitary war-ship, a converted merchantman. An American citizen is negotiating for its purchase, and only the question of price now remains to be settled.

Tuesday, February 2. Japanese newspapers state that the new Korean Minister to China, Min Yong-chol, and the Minister to Germany, Li Keungradually driven to place their backs im-movably against the wall. Thus concession political influence in Seoul, are hastening to leave their country and sequester themselves in foreign capitals since they foresee that the Government's declaration of strict neutrality will plunge Korea into serious difficulties and embarrassments.

It is stated that Li Yong-ik's appointment to his post of Minister of Finance is in nickel notes. Correspondents of Tokyo journals, in sending this news, affirm that should such a scheme be carried out, its financial effects will be disastrous. It was bad enough

needed to secure peace except the withdrawal of all Japanese soldiers from Seoul. Another report alleges that M. Pavlow has privately intimated to the Emperor that in the event of Korea joining hands with Japan, of which result there seemed to be some prospect, he should not hesitate to "take the course indicated by his fixed policy." We can not attempt to expound the significance of this cryptic utterance. Perhaps the Emperor understood. Perhaps M. Pavlow never said anything of the kind.

Wednesday, February 3. Seoul reports that Min Yon-Chol has left that city for Port Arthur, and that his mission is believed to have the purpose long spoken of, namely, to conclude arrangements with Viceroy Alexieff for the employment of Russian troops as protectors of Korea. Min is the official who recently returned from a trip to St. Petersburg where he is supposed to have submitted this protection programme for approval, and to have been advised to carry it to Viceroy Alexieff. Rumour has been very persistent in his case. Should he and his Imperial master be so foolish as this step would indicate, they are going out to meet national effacement, for by estranging Japan to cajole Russia they will ensure their country's loss of independence in all events.

Japanese journals state that Korea's announcement of strict neutrality was formally acknowledged by England, France, Germany, Italy and Sweden, but the acknowledgement did not embody any in-dication of assent or approval. Nevertheless the Korean Government, misconstruing
The Asahi Shimbun publishes a telegram this action on the part of the Powers, is expecting to be able to act the part of a mere onlooker whatever complications ensue, is giving itself no more concern about such troublesome questions as the opening of Yong Am-pho and Wiju. In fact the impression among newspaper correspondents appears to be that Korea has got out of hand altogether. We should hesitate to pronounce any opinion as to the sentiments with which Japan regards that state of affairs but no one can entertain much doubt as to the lesson it teaches.

It is stated that the Korean envoy who is en route for Japan carrying the Emperor's thanks for Japan's expressions of sympathy on the occasion of the Empress Dowager's death, is also entrusted with the mission of endeavouring to bring about the return of the refugees. the return of the refugees. As to this latter point we observe that the Korea Review continues to insist on the expediency of refusing asylum to these pediency of refusing asylum to these political plotters. Within limits, we can not but agree frankly with the Seoul periodical. The trouble is, how should the thing be accomplished. Would it be wise or right for Japan to signalize herself by disregarding an international principle to which the most civilized Powers of the West carefully adhere? In the interests of neighbourly friendship it would be an excellent thing were these mischief-brewing refugees packed off to their own country, but one wants to learn the process.

The Chuo Shimbun's Seoul correspondent says that Japan's inaction, especially in the matter of sending troops, is having an indeparture of these men from the scene being, in the correspondent's opinion, a sign that Japanese influence is on the wane. But we have never heard it suggested that Li Meun-thaik was pro-Japanese. On the contrary he has always been held up as pro-Russian. Probably these reports from Seoul must be taken as largely tinged with the subjective element. It is not the Koreans that are injuriously influenced by Japan's military inaction; it is the Japanese residents that find their jingoism disappointed.

Thursday, February 4 The proposed departure of Min Yonghwan and Li Keun-thaik for Washington and Berlin respectively has been indefinitely deferred. In the case of Min Yong-hwan the reason assigned is his mother's illness, but Tokyo journals allege that the appointment of these men to foreign posts having been due to the decadence of the Russo-phil party which they represent, and having been, in effect, a measure for securing their personal safety in the event of war, so the cancelling of their appointments means that the pro-Russians have raised their heads again. Russians nave raised their neads again. In fact it is confidently alleged that Li Keun-thaik, with the assistance of Kil Yong-chu and Kang Sak-ho, has managed to retrieve the situation for his fellow-thinkers. Korean politics are a purelle Semanaday we pressure holds the puzzle. Somebody, we presume, holds the thread of the labyrinth, but to the outside public it is all a tangled maze. However, there can not be any doubt about the belief that the pro-Russian party of Seoul politicians are recovering their influence.

Mr. Furuichi, Chief Engineer of the Seoul-

Fusan Railway, arrived at Fusan on the 2nd

In our last issue we epitomised telegrams showing that the Emperor and his entourage were congratulating themselves on the success of their neutrality scheme, and were looking forward to the pleasure of occupying a safe seat on the opposite bank of the river while the conflagration of war raged on the other side. To-day the telegraph says that the neutrality manœuvre having provoked ridicule only at the hands of the foreign Powers, the statesmen who advised that course are now in disgrace, and the Court has reverted to its habitual mood of trepidation.

A party of Korean rioters attacked the workshops of the Seoul-Fusan Railway at Chhon-an in Chung-chhong-do on the 1st instant, but were repulsed without any

difficulty.

Friday, February 5.
Later news says that the band of rioters one, who resisted with violence, was killed.

The Seoul authorities are said to have received news that Russia has increased and is increasing her forces on the northern bank of the Yalu, and that there is much military strength along the Korean frontier, but that justice. kind of story has done so much deceptive

concession. The Russian Representative in Seoul is said to have officially complained that the people about Chasong are indiscri-

minately felling trees whereas the whole district is included in the Russian monopoly. The Korean Government's reply is not yet but what transpired is not announced. public property.

THE FINANCIAL QUESTION.

Saturday, January 30.

Japanese newspapers give the gist of statements made by the Premier, the Minister of Foreign Affairs and the Minister of situation the speeches were colourless, the only point of interest being Baron Komura's statement that the conditions proposed by Japan were in no sense extravagant, being directed merely to support the country's honour and secure peace. As yet, however, Russia had not given her assent.

Concerning the main purpose of the meeting, namely, the raising of funds to meet emergencies, the thirty-two bankers in attendance seem to have been unanimously willing to cooperate to the utmost of their The only point raised by them was stic loan, the utmost care should be taken to avoid any needless disturbance of market conditions, to which end the period, rate of issue, rate of interest, time of subscription and so forth should be fully discussed by those most interested. In view of these very natural observations a meeting of business men was arranged for the 29th. universal belief is that the Treasury will experience no difficulty in getting all the money it wants. This method of taking every step in consultation and cooperation with the leading bankers and business men

is the best way to secure success. The only question about which there seems to be some possible divergence of views is connected with taxation. quarters it is anticipated that the Government will have recourse to an Urgency Ordinance for sanctioning the measures it contemplates with regard to the land tax, the income tax, and the sugar tax. against such a course considerable objection is advanced. It is contended that in such matters every possible effort should be made to seek the advice and consent of the people's representatives. The general elections are to take place on the 1st of March and it will therefore be within the Government's power to summon an extraordinary meeting of the Diet in April; that is to say, less than three months hence. A delay of three months in collision with a posse of Japanese police sent out from Fusan. Five out of the eight rioters effected their escape, two were arrested out from April, and no noteworthy loss with the first of April, and no noteworthy loss w effected their escape, two were arrested, and be entailed for the Treasury by postponing other hand, should the route of urgency ordinance be chosen, the Diet will inevitably of the Yalu, and that there is much activity in the neighbourhood of Musan on the Tumen. In brief these rumours point the attitude of the people's representatives towards a war undertaken in the cause of towards a war undertaken in the cause of the selected that Marquis Ito It is alleged that Marquis Ito endorses this view-as to the unwisdom and duty during the past six months that a needlessness of an urgency ordinance,—and great deal of confirmation is needed. Another complication seems to have Baron Sone, attribute to him an opposite arisen in connexion with the timber-felling opinion. We have little doubt that the

On the evening of the 29th ultimo the bankers of Tokyo met at the Mitsui Club in response to the invitation of the President of the Bank of Japan. There were also present Counts Matsukata and Inouye. Both of these statesmen addressed the meeting. Count Inouye spoke twice. His words were Finance at a meeting of leading bankers most inspiriting and earnest, and he declared held in the Premier's official residence on the his intention of sparing no labour to assist 28th instant. It need scarcely be said in effecting satisfactory arrangements. Mr. that in their relation to the diplomatic Toyokawa, of the Mitsu Bishi Bank, said that he and his colleagues were only too ready to assist. All that they stipulated was that this important financial operation should be conducted in the manner best calculated to avert disturbance of the money market. The President of the Bank of Japan gave full assurances on that point, and after Mr. Sonoda Kokichi had addressed the meeting, calling for vigorous action, it was decided that the loan should be issued at 95; that the rate of interest should be 5 per cent.; that the period of re-payment should be 5 years, and that, so far as the situation permitted, the that in undertaking a transaction of such money should be called up in small install-importance as the floating of a large doments. A committee of three was appointed to conduct negotiations with the various The Committee consisted of Mr. banks. Sonoda Kokichi, President of the Fifteenth Bank, representing Tokyo; Mr. Matsumoto Jutaro, representing Osaka; and Mr. Tanaka Gentaro, representing Kyoto.

Tokyo journals discuss the question of funds for war but their estimates vary so greatly that they are evidently without definite information. They agree as to one point, however; namely, that it would not be wise to change the system of taxation through the medium of an urgency ordinance. There is no pressing need for recourse to increased taxes. All the money required can be obtained without difficulty by recourse to the special capital funds, to the monies in the special accounts and to loans. In view of the possibility of summoning the Diet in less than two months, the Cabinet would be acting unwisely did it meddle with the taxes without awaiting parliamentary consent.

Perhaps it may be useful here to state a few figures about which some misapprehen-

sion seems to exist. The amount of the land tax levied by the Central Government during the present year is 47 millions, in round numbers, and this will be reduced next year (April 1st 1904 to March 31st 1905) by 10 millions in consequence of the reversion of the rate to its original figure. The amount of the land rates—that is to say, the land taxes levied by the communes for local purposes—is 1st of April, and no noteworthy loss would by the communes for local purposes-is be entailed for the Treasury by postponing over 31 million yen. Therefore, if the recuperative operations until May. On the Central Treasury took one half of the local rates and also continued to impose the land ordinance be chosen, the Diet will inevitably tax as at present, an additional income complain that it has been needlessly slighted, of over 25 millions would result. The and the world will have an opportunity of income tax represents 71/2 million yen and forming an erroneous judgment concerning the sugar tax 7 millions. Whether these could be raised so as to yield another 10 millions we do not know, but unquestionably the income tax is far below the figure it ought to yield if incomes were reported with

even approximate accuracy.

Some journals laugh at this financing. They call it mere cheese-paring, and allege that were a really strong Cabinet in power, the country would be asked for 300 millions out 100 and would readily give them. in the day.

Since writing the above we learn that the Surely that is hysterical criticism? give them. Treasury is under no necessity to ask for more than it immediately wants.

It is expected that the Government will cent.) would mean a gain of 4 million yen on that amount. As to the annual consump- has met with approval. It seems to tion, it is about 12 million yen worth, and silly and precipitate application. were 80 per cent. added to the selling price the gain would be 9½ million yen. Thus the total increase of revenue to the Treasury would be 131/2 million yen.

There has been a rumour of late that the Bank of Japan was engaged in collecting fifty-sen pieces, foreseeing the need of silver for war purposes, and replacing them by one-yen notes. The Bank emplratically denies the story. Its officials explain that if any scarcity of 50-sen coins be observable in Tokyo, it is due to an exceptional demand for them in the provinces, and that, as to one-yen notes, any issues recently made have been devoted solely to replacing old notes, many of which had become unusable.

It appears that the loan of a hundred millions will be collected in seven monthly installments commencing in February and ending with August, the month of June, which is the time of semi-annual balance, being omitted The bonds will be of 4 dimensions, 5,000 yen, 1,000 yen, too yen and 50 yen, and the amount to be paid on application will be 2 per cent. It is expected that the Tokyo bankers will take 70 millions and the Osaka and Kyoto bankers 30 millions. Of course the Bank of Japan is included among the Tokyo institutions, but the present forecast is that in spite of the Mitsu Bishi's remarkable promise of 20 million yen, the Fifteenth, or Nobles, Bank, of which Mr. Sonoda Kokichi is President, will be found to be the largest subscriber in

Already the voluntary contributions to the war chest aggregate, it is said, from seven to eight hundred thousand yen. If hostilities actually commence the amount would soon be doubled or trebled. It is a drop in the ocean certainly, but it shows the colour of the water. For the nation knows that it will presently be required to pay all the town needed by the Transverse. the taxes needed by the Treasury.

THE KOREAN ASSASSINS.

assassins of U Pom-son commenced in the Hiroshima Court on the 2nd instant. It will be remembered that of the two prisoners, one, Ko, was condemned to death by the Court of First Instance, the other, No, to imprisonment for life. In the Appeal Court the Public Procurator contended that both sentences should be reduced by one degree, and counsel for the prisoners insisted that Ko's offence would be fully met by imprisonment, and that No should be acquitted altogether. An interesting feature of the trial was that a speech in behalf of the studied law. Appeal Court's judgment does not appear to be yet fixed.

KOREAN STUDENTS IN JAPAN AND NEUTRALITY.

reatly increase the selling rate of tobacco. Korean military students in Japan addressed Eighty or a hundred per cent. is spoken of to the Government in Seoul a petition in the as the increment. There are 5 million kwan of tobacco now lying in the Government services ought to be directly available, and godowns, and the proposed increase (80 per that, consequently, they desired to return services ought to be directly available, and that, consequently, they desired to return home. It is alleged that this application has met with approval. It seems to us a very silly and precipitate application. Perhaps it should be associated with Korea's specious scheme of neutrality. As to this neutrality question, the story now current is that Korea's idea is likely to add another clause to international law. What she contemplates is not national neutrality but imperial pale of fighting, seeks merely to place his own palace and person in that desirable situa-tion. Every one will hesitate to accept such a bizarre version of the little empire's latest departure. Side by side with these rumours comes a statement that a hankering after the presence and protection of Russian troops continues to occupy the breast of a certain section of Korean officialdom, and that the present programme is to send a party of the Peddlers' Guild to escort a Russian detachment from Antung across the Yalu and down to Seoul. One Kil Yong-chu is men-tioned as the most prominent figure in this enterprise. What Korea may congratulate herself on having accomplished is that she has furnished fresh proofs of signal incompetence to manage her own affairs.

THE AFFAIR OF THE BANK OF JAPAN.

It will be remembered that on the 28th of December some sensation was caused by news that a sum of thirty thousand yen had disappeared in the operation of paying it over the counter of the Bank of Japan. Several officials of the Bank were immedi-Ar. Totsuka Kei, Chief Secretary of the Suito Kyoku (cashier's bureau). On the 28th instant Mr. Totsuka was summoned to the office of a police magistrate and closely questioned. It appears that, being a very nervous man, he did not endure the ordeal successfully and some of his statements were found to be contradictory. His attempts to correct them did not obtain the magistrate's approval, and on returning home his mind was so much dis-turbed by the thought of being unjustly suspected that he cut his throat, dying inmediately. He left a document declaring his innocence in most earnest terms, and The appeal in the case of the Korean indeed we fail to see why any serious suspicion should attach to him seeing that the actual perpetrators of the theft have been apprehended.

It appears, after all, that the secretary of the Bank of Japan who recently committed suicide, was the original plotter of the robbery of thirty thousand yen. His examination by the police had made it quite plain that his guilt could not be further concealed, and in despair he made away with himself. Public sympathy with the man seems to have been misplaced. Ono Shinji, who is accused was delivered in the Japanese language by Li Myon-wu, who had come
from Korea to discharge the duties of advocate. Li was educated in Japan where he
studied law. The date for delivere of the
without a vocate discharge the delivere of the
without a vocate. The state of the studied law. The date for delivery of the without a very much heavier expenditure.

RUSSIAN PREPARATIONS, ETC.

We read in vernacular journals that the Korean military students in Japan addressed to the Government in Seoul a petition in the military strength in East Asia. Reuter has sense that at this critical moment their litter of the control of the peaceful announcements from St. Petersburg it is noticeable that to the Government in Seoul a petition in the military strength in East Asia. Reuter has just told us of the probability that ordinary traffic will be temporarily suspended from the 2nd instant on the Trans-Siberian line in order to facilitate the transport of troops and stores. Supplementing this news comes intelligence from Chefoo that a full division of troops is being moved eastward from Russia and that the leading battalion has reached Lake Baikal. The telegram adds that a number of waggons and cars have been sent from Port Arthur to expedite the coming of these troops. Of course it does neutrality. In short, the Sovereign, instead not follow that because Russia crowds of seeking to place his country outside the re-inforcements to the front she means war. It would be her plain duty to take every possible measure for strengthening her position pending a settlement of the out-standing questions with Japan. Indeed her warlike preparations are in themselves an instrument for securing peace. But we must be prepared to find that these preparations, taken in conjunction with the delay she has always made and is still making, in formulating her answers to Japan's proposals, are viewed by this country in a sinister light. The Japanese naturally observe that Russia's reply is embodied not in the politely ambiguous words her statesmen utter but in the military and naval preparations that she perfects. We can only say that probably no Power circumstanced as Russia is would act differently so far as these preparations are concerned.

In this context we may quote another telegram (Asahi) to the effect that work is proceeding vigorously at Dalny on the construction of eighty new buildings to serve as barracks. All this, of course, renders the process of evacuation, if evacuation is ever to take place, a more and more improbable matter. Put in a nutshell Russia's action has been a flagrant violation of treaty engagements and of her own voluntary assurances, and, on being challenged to respect them, she has made a strenuous exhibition of preparations in the contrary sense. Thoughtful onlookers are not insensible to the great difficulties of the choice she has been required to make, but it must be confessed that the showing is very bad, and that if she attaches any value to that important asset, international credit, it is time for her to change her route.

A telegram to the Asahi says that three regiments of infantry set out three or four days ago from Nicholisk for the northern frontier of Korea. It must be an arduous undertaking the moving of troops over long distances at this season, especially in such exceptionally severe cold. And the puzzle is where they can find shelter on the northern frontier of Korea. The Chinese inhabitants probably suffer most, after all.

During the past four or five days the Manchurian railway has been carrying coal, it is said, to the exclusion of all other merchandise. This tallies with the recently received report that Dalny and Port Arthur

were suffering from scarcity of fuel.

The exodus of Japanese subjects from Liaotung continues steadily. Wei-hai-wei seems to be receiving the worst class of these

fugitives.

Three hundred Cossack troopers have arrived at Sim-min-chin on the west of the Liaotung peninsula.

It is stated that the Russians in Port Arthur regard a naval conflict as inevitable

resign themselves to be blocked up in Port Arthur and Vladivostock, which would be almost as humiliating a state of affairs as actual defeat. Naval authorities allege that the Russian vessels are for the most part unfit for rapid manœuvres at sea, the want of docking facilities having reduced them to a disadvantageons condition. Some allege indeed that this defect is so serious as to preclude the possibility of an engagement in the open, at least without incurring heavy risks. Be that as it may the position of the Russian navy is not favourable at present. The fleet may be said to be divided into three parts, of which one, constituting the bulk, is at Port Arthur, a second is at Vladivostock and the third is en route from Europe. declaration of war in the near future would give a marked advantage from that point of view to the swift, homogeneous and concentrated Japanese fleet.

The Amur, which left Dalny on the 30th ultimo, had on board 200 Japanese subjects retiring from that place.

The Chinese Northern Squadron, which consists now of four vessels, has been ordered to leave its berth under the guns of the Yangtse forts, and to proceed to Taku. It this squadron had anything like the strength or dimensions it possessed before the annihilating process off the Yalu and in Weihaiwei, it would be an important factor in the situation.

It is stated that in view of the protracted character of the Russo-Japanese negotiations and the improbability of any satisfactory settlement, influence is gradually accruing to the Chinese advocates of direct negotiation with Russia for a pacific settlement of the Manchurian problem. We have been favoured with that rumour frequently, and thoughit comes to-day through the Kokumin, we can not think that credence attaches to it considering that the crisis between Russia and Japan is now on the very eve of a rup-ture or an arrangement. Chinese statesmen are thoroughly conversant with the facts of the situation. It is improbable that they have lost patience at the eleventh hour, or are losing it.

The Asaki Shimbun has a brief telegram from St. Petersburg saying that Russia is about to make the needed concessions, and that shares and stocks have suddenly risen.

The following telegrams have been received officially in Tokyo and given out to the public :-

t. Houses for billeting Russian soldiers are being hastily prepared at Kaichow, Haicheng, Liaoyang, and other places. At Liaoyang over a thousand carts have already been requisitioned; and a hundred or two of them were daily de-spatched for the transportation of ammunition and provisions to Feng-huang-cheng.

2. The Russians have commenced the transportation of their troops to the Yalu; their movements had become very active at Liaoyang. It was reported that on the 1st and 2nd instant two companies of the Fifteenth Regiment, which were stationed at Yinkow left Liaoyang as also four companies of the Ninth Regiment which had come from Port Arthur.

3. All the powerful Russian men-of-war at Port Arthur, with the exception of one which was under repair, left that port on the 3rd inst. Destination unknown.

4. The Japanese Commercial Agent at Vladivostock received the same day a notice from the Commander of the Garrison at that port to the effect that from the orders he had received he might have at any time to proclaim a state of siege at Vladivostock, and accordingly desired the Com-

in the event of war. That is true, we imaleventual departure of his nationals from the port, model for all time. The Mikasa is a fine gine, unless indeed the Russian squadrons adding at the same time that if any Japanese vessel certainly. She and her three consorts repair to Habarovsk.

Read cursorily these telegrams seem signitroops for protecting the railway and guarding the points where the main roads from eastern Manchuria emerge on the Mukden-Liaotung line. Activity of transport opera-tions between Lioyang and Feng-huang-cheng—a town lying a little northward of the Yalu-is certainly significant as indicating a plan to occupy the Yalu district in force, but so long as only half a dozen companies of infantry are involved, the incident is trivial. As for the departure of the fleet from Port Arthur, it can mean nothing particular, since there is nothing particular for the fleet to do. On in exceptional times ordinary events and acts are apt to incite extraordinary inter-

JAPAN'S NEW BATTLE-SHIPS.

with Messrs. Vickers, Maxim and Company. lowest tender was that of Messrs. Vickers, Maxim and Company, but the Armstrong count, the two proposals may be said to have been identical. All the others were distanced. Originally the intention was, we believe, to order one vessel at once, and to invite fresh tenders for the second in March; but it may be presumed that the Naval Authorities thought they could not do better than by accepting the Armstrong and Vickers tenders forthwith and placing two orders without delay. An order for the armament of one ship had already been given to Messrs. Armstrong & Co. last autnmn, and as uniformity of armament is a matter of prime importance, we presume that the same firm will be invited to arm the second Whether Reuter is quite correct ship also. in his details as to tonnage and speed we are not in a position to say. But it would seem that the Japanese Naval Authorities are following a principle the wisdom of which may fairly be doubted. They are having their new ships built down to the level of their old. It is a high level, assuredly, and, at the same time, there is no denying the fact that marked superiority on the part of two or three vessels in a squadron does not materially increase the efficiency of the whole as a fighting unit. But evidently if that doctrine be unreservedly followed, there would be no progress: a fleet would always remain at the same dead level. A truer principle would be to build constantly the best that can be built, thus securing a steadily progressive standard of excellence. By degrees the older ships must drop out of use, and it will then be distinctly disappointing to find that the standard they represented is the standard of their survivors, neither better nor worse. In short, this plan of procedure Vladivostock, and accordingly desired the Commercial Agent to make preparations for the and that a ship like the Mikasa furnished a suit.

adding at the same time that if any Japanese vessel certainly. She and her three consorts wished to remain, they would be ordered to represent a distinct advance on the Fuji and Yashima type. But they would not represent any such advance had the Department, ficant, but analysed they amount to very little. The preparation of barracks at Kaichow, Haicheng and Liaoyang is merely lowever, that the new vessels possess some a measure connected with the distribution of features constituting a signal advance, and that rumour is wrong in classing them with the Mikasa. There is talk now, we under-stand of ordering two more line-of-battle ships. Three was the original total of the third period programme.

Since the above was in type the naval authorities are understood to deny that any orders have yet been placed. But it is only a question of time, we imagine.

RETURNING PROSPERITY IN GERMANY.

nothing particular for the fleet to do. On the whole we must not forget what has often waiting, the crisis in German industrial been urged in these columns already, that prices, which began in the Spring of 1901, is apparently past, and a general recovery, which bears all the outward indications of permanence, has set in. To what extent the prices of the prosperous period which preceded the collapse have been regained is best illustrated by stating that the average Reuter informs us that orders for two market price of twenty-two standard innew battle-ships have been placed by Japan dustrial stocks on April 17, 1900, when the with Messrs. Armstrong and Company and general prosperity reached its height, was 276.74, while the average quotation for the It has been known for some time that the same stocks on September 26, 1901, when commission would probably go to these the low point of depression had been touched, two firms, but for reasons not immediately was 154.55, which contrasts with 176.81 on explicable some delay took place. The December 31, 1902, when recovery had definitely begun, and 208.91 on November 20, 1903, when the effects of returning activity tender differed so little that when a slight had become manifest. According to the Hon, additional displacement was taken into account, the two proposals may be said to General at Berlin, "this recovery may be ascribed to two or three primary causes, the first being the fact that the negotiations between Germany and the several European governments over the commercial treaties based on the new German tariff are understood to be progressing favourably. several of the leading Secondly, that electrical manufacturing companies—which have recently combined to avoid competition-have secured some important contracts for lighting and power plants, street railway installations, etc., in foreign countries, notably Mexico and South America. Many of these orders have been taken at what would seem in America low prices, but the German electrical industry is enormously developed, is equipped with upto-date machinery, has an abundant supply of cheap docile, skilled labour, and can turn out electrical machinery, cables and all that class of work at minimum cost. Finally, there is behind the present recovery the natural fact that the crisis of panic, doubt and suspicion has run its course. German exports in most lines are steadily increasing, and their farreaching merchant marine, backed by the enterprise, the thorough, skilful methods of their merchants, salesmen and capitalists in remote countries, combine to secure for German manufacturing exporters a constantly widening market for their products. As a people they understand the ethics of foreign commerce; they educate their young men for it, and make a systematic study of the wants and tastes of alien people and the best methods of supplying them.

The officials of the Department of Finance nor worse. In short, this plan of procedure have decided to present ten per cent of their would be wise solely on the hypothesis that salaries towards the war funds. The officials of

MELBOURNE AMENITIES.

When the refined representatives of the Labour Party in Melbourne undertake to bait a gentleman, the scene is lively. Something of the kind occurred in the Town Hall must not be judged by standards he did of that city on the evening of the 10th of not seek to emulate. He could no more of that city on the evening of the 10th of not seek to emulate. He could no more December when Sir Malcolm McEacharn have painted a 'Crucifiction' or a 'Last attempted to address the electors of Australia's metropolis. Sir Malcolm is ■ gentleman if ever there was one, but that he can pay back a rough in kind was proved on and colour other painters have excelled that occasion. It appears that he was not Whistler; but as the master of pure line and allowed to speak two consecutive sentences without interruption of the most disorderly side with this we may quote an extract from nature. Screams, incoherent yells, cat-calls, abusive epithets, ribald choruses, stamping and shuffling, every form of vulgar obstruction was essayed. When the stoutobstruction was essayed. When the stout- to truth of mass. His first aim was to obtain hearted Scot realized that nothing resembling the appearance of life; accuracy of proportion fair play was intended by his audience he seemed a secondary consideration. Each let them have it pretty plainly. "Larripainter had his type which he idealized more kins" and "Curs" were the opening epithets or less, his idealism not being confined to the bestowed on them, and the retort coming the physique and even to the anatomy of his "your're a smooder," Sir Malcolm remark-figures. If the details of the drawing violate ed that all he wanted now was someone accepted canons, complaint is silenced by the to call for three cheers for anarchy. Pandemonium let loose ensued, and in an interval of comparative calm the speaker expressed an abstract opinion that a lot of his hearers ought to be in the circus, which appreciation elicited the chorus of a music-hall ditty and three lusty cheers for socialism. Presently one of the audience, conceiving the notion one of the audience, conceiving the notion that he was entitled to special attention from the platform, called out, "Why don't you, talk to me." Sir Malcolm had a good reason. "Because," he said, "you are more fit to be in a pigstye than anywhere else except jail," which explanation he subsequently supplemented by dubbing them pale-face pettifogging little larrikins." Women were conspicuous among the howlers, and two of them, each carrying a baby, pressed to the front, shook their fists at Sir Malcolm and shrieked threats. In short, he had a veritable ovation, and a most honourable ovation too, for the worst disgrace an honest candidate could incur would be to receive the applause of the labour party in Australia; the party that is doing its level best to ruin the country.

WHISTLER AND JAPANESE ART.

In Mr. A. S. Eddy's work on Whistler there are some appreciations that have great interest for students of Japanese art. "Whistler," we read there, "opened the notions the everlasting convention that serves for a face in Japanese art seems hopelessly monotonous. To them our painstaking characterization of the features and peculiarities of each person is no art at all, but grotesque caricature; it is the subordination of art, which is of universal interest to the eccentricities of the individual, which are of local interest. In Whistler's art one despair—these are all absent; his art is pure

Times, for instance, says:—

was di
and serene. It is works are to painting

"Railway collisions are preventable, as every rail-

what the 'Ode to a Grecian Urn' or 'A Midsummer Night's Dream' is to poetry, and hence in human interest they fall far short of the tragedies, the epics, the romances of literature and art, and they Judgment' than he could have carved the 'Moses' or written 'Hamlet.' In every sense save that of abstract beauty of line and colour other painters have excelled colour-harmonies he is supreme." Side by a recent essay on Japanese Pictorial Art:—
"The Japanese artist, to whichever of the schools he belonged, sacrified truth of detail accepted canons, complaint is silenced by the sense of life that pervades the whole; by the perfect naturalness of every attitude, every movement every feature; by the eloquence with which the character of the objects speaks from the picture. In short, accuracy sacrificed to the individuality that everything in nature possesses,—the individuality which, in actual experience, impresses itself upon the attention of the observer and excludes all thought of linear exactness or anatomical truth. Kyosai used to say exactly what Véron has said, namely, that nothing FIRST BATTLE MAY OCCUR WITHIN TWENTYin nature pauses to be portrayed; that there is motion everywhere,--if not actual motion in the object itself then motion of the light falling on it or of the atmosphere surrounding it; that without elasticity of line the sense of life can not be obtained and that extra large type, double-leaded, was used elasticity of line is incompatible with what in describing how Mr. Oscar K. Davis, the classicists call strict accuracy.

AMERICAN RAILROAD WRECKS.

The last week of 1903 will be "a black week" in the calendar of American railroads and theatres by reason of the great loss of life which occurred. Putting aside the Chicago horror, we find that three rail-way disasters alone involved the loss of one hundred lives. On December 21st ten persons were killed and thirty injured in a disaster in Kansas caused by an open switch; on the 23rd sixty-five were killed door of the East to the painters of the West and many injured in the wreck at Con-and showed them how they might paint nellsville, Pa, where a fast express after the manner of the best there is in the ran into some timbers dropped on the Oriental world, and not only retain, but actrack from a freight-train; and on the centuate, their own individuality." That, of 26th twenty-two persons were killed and course, is a mere generalism. But Mr. Eddy becomes presently more explicit. "Whistler's art," he writes, " was as devoid of sentiment as that of a Japanese. To our Western one of the trains. Nor do these disasters right across the American continent from stand alone. shows that in the year ending June 30, 1903, ture of the Siberia. Repeated breakdowns there were 5,219 railway collisions of all and heavy snow-storms in the East put the in which 321 passengers and 3,233 employees was made up after leaving Chicago, but at were killed, and nearly 46,000 (mostly employees) injured. The Commission remarks that this record is a disgrace to the American four hours. must not look for any solution of the prob-lems of life, for any sign of the emotions ing that American railroads should be run writers of the Call had other things to

road manager well knows. There are no railway collisions in England, because the law compels the use of an efficient block system. It is as practicable to enforce such a law in the United States as in Great

to enforce such a law in the United States as in Great Britain, but it is not easy to pass such a law while the railroad corporations are permitted by the people to fill the Senate, the House, and the lobby at Washington with their attorneys and agents.

"The disgrace to the American people lies in their careless toleration of the political activity of corporations deriving the right to exist from the public and enjoying special privileges, presumed to he granted in consideration of service rendered to the public. It is a reproach to the nation that, instead of governing its corporate creatures, it tolerates their meddling with government in any particular."

THE YELLOW I RESS OF SAN FRANCISCO.

San Francisco must be feeling rather aggrieved at the continuance of the Japan-Russian negotiations. On January 8, The Call, by the aid of inch long black letters,

WAR BEGINS WITH MOVEMENT OF RUSSIAN CRUISERS TO INTERCEPT A JAPANESE SQUADRON OFF KOREA.

Then followed this telegram:

Port Arthur, Jan. 8 (via Chefu). "Several warships left at midnight to reinforce cruisers sent out for the purpose of intercepting a Japanese squadron of four ironclads, which, it is said, is now approaching Korea to stop six Japanese coal-laden ships from Japan, destined for Port Arthur, and to cancel their charter to a Russian firm."

In the same issue the heading of another column ran:-

FOUR HOURS.

WASHINGTON OFFICIALS EXPECT NEWS OF A CONFLICT

These head-lines were followed by much matter of a most thrilling description, while the special correspondent of the New York Herald and The Call caught the Siberia, which steamer, contrary to all precedent, had been held back in order that he should reach the Orient. As the Call modestly

Although it is the rule of the Pacific Mail Company never to hold any of its sleamers on any account, Mr. Harriman, realizing the great necessity of Mr. Davis getting to the Orient as soon as possible, gave The Call the assurance that the Siberia would not

The Call the assurance that the Siberia would not sail from this port without its correspondent.

In the meantime Harriman wired all of the train dispatchers along the route taken by the overland to give her a clear track over everything. It was just 8.55 when the huge locomotive drawing the train bearing the special correspondent drew up at the Oakland pier, panting, seemingly from sheer exhaustion, from its rapid run down from Sacramento. Special agents of the Southern Pacific and Pacific Mail companies met Mr. Davis at Port Costa and arranged to get his baggage off in a rush and convey it to the waiting tug.

Mr. Davis we learn after wading through

one of the trains. Nor do these disasters right across the American continent from stand alone. The report of the Interstate Binghampton, N.Y., and he should have Commerce Commission, just made public, been in plenty of time for the regular deparkinds (about 14 a day) in the United States, train back twelve hours. Much of this time

which control human conduct—for love and with more regard for the lives of passengers occupy their attention and so the "dogs of hate and fear, for hope and ambition, for and employees, and the press takes up the war" were temporarily withdrawn from the the tortures of jealousy or the bitterness of cry most strenuously. The Washington trail and the imminent breaking out of war was dismissed for the moment from their

BRITISH SENTIMENT TOWARDS JAPAN.

The Jiji Shimpo has a telegram from London to the effect that in England a London to the effect that in England a feeling of dissatisfaction is created by Japan's inaction. People begin to think that she is stout in appearance and weak in fact. Our contemporary is evidently disturbed by this news. It attaches to it importance which is news. It attaches to it importance which is scarcely deserved, we think. The disquieting inference is that the Englishmen may come to credit Japan with solicitude for Korea's fate only, and seeing that Manchuria does not bulk largely on her political horizon, may begin to ask themselves what advantage they derive from the alliance. must remember that England has not the least idea of expecting to reap from the covenant advantages to the sowing of which she has contributed no aid. So long as Great Britain does not range herselt definitely on Japan's side in the quarrel, the British Government and the British nation will not expect Japan to be guided by any considerations except those relating to her own in-terests. They will not expect her to fight single-handed for the rendition of Manchuria and for the conservation of China's integrity if she can find in another direction compensation such that, when supplemented by the profits of peace, it would fully balance the potential gains of war. As in Japan so also in England, and, for the matter of that in the Occident generally, there must be many people who think that Japan would have done better for herself had she drawn the sword three months ago. But that is only a material view. It takes no account of the immensely valuable moral asset that Japan has gained by patience, the asset of the world's endorsement. To have fought three months ago might have been to find a line of less resistance in the fighting, but Englishmen, or at least the thinking section of them, are not so unreasonable as to deny Japan's right to choose her own times and seasons for operations which concern Japan alone. It is not in the disposition of Britons to expect ains which they have not helped to acquire. Whatever comes out of the situation in the way of the preservation of commercial freedom, will be so much clear profit to England, and if she can acquire material profit by payment of moral coin only, she will be doing very well.

WAR EDITORS CLUB.

Without attracting any special attention, there has been organized in Tokyo an association calling itself the "War Editors Club." We do not know who may be its leaders or what numbers are borne on its roll. On the 28th instant the Club held a meeting and unanimously passed a re-solution to the effect that the time to fight was fully ripe and that the hesitation of the Government to appeal to the sword was a blunder injurious to the interests of the nation. Apparently the Club intends to send a deputation for the purpose of waiting on the Ministers of War and of the Navy, and presenting this resolution, which will also be communicated to the public at large by means of a circular. The Gunji Kisha Club would appear to be small and comparatively insignificant coterie, but the view embodied in its resolution is certainly endorsed by many Japanese and has been openly that there is great scarcity of coal for fuel stated by not a few foreign publicists, and that a sharp rise of price has taken place. Nevertheless there is good reason to believe that patience and moderation will be rewarded.

COMPRADORE YUAN.

News from Shanghai says that a warrant has been issued by the Chinese authorities high officials that they fail to employ the for his arrest he remains on board the Hakuai under the protection of the Japanese Consul. We can not discover any indication of the nature of the charge on which the a summary of the recently concluded trial warrant is based, and this mystery furnishes we take the following . food for the usual rumours about Russian

The Japanese Consul-General at Shang-hai, Mr. Odagiri, having refused to back the warrant for the arrest of Mr. Yuan, formerly compradore of the Russo-Chinese Bank, and Yuan, having prudently refrained from quitting the shelter of the Japanese flag flying on the Hakuai Maru, is said to be on the eve of setting out again for Japan.

VLADIVOSTOCK.

Eighty Japanese who reached Nagasaki on the 20th ultimo by one of the East-Asian Railway Company's steamers were fugitives from Vladivostock. They included 30 women and 15 children. their report the vessel was nearly two days getting through the ice, which now extends to a distance of some 14 miles from the mouth of the harbour, and has to be twice attacked by the ice-crusher before a temporary passage can be effected. They say that four Russian men-of-war are ice-bound in the port, and that their officers spend their time sleighing and otherwise amusing themselves without any indication of getting ready for war. The town seems to be in a somewhat disorderly condition. Burgla-ries are frequent, and since the Japan-Burglaese residents are regarded as a legitimate prey, many of them have received injuries. There are about 3,000 Japanese subjects in Vladivostock, and it would be impossible for them to get away at a moment's notice in existing circumstances and with such scanty steamship accommodation as that now offering. They are nevertheless holding themselves in readiness to depart by the first opportunity should hostilities break out. In Kirin also preparations for flight have been made. A few days ago the Nippon Yusen Kaisha sent up the Company's services are temporarily suspended, and it is understood that all possible facilities were to be given by this vessel for the purposes of the withdrawal of Japanese residents.

Some time ago Vladivostock sent news to Europe that peace was certain. Now it announces that war can not possibly be avoided. The world is waiting to hear particulars of the behaviour of Vladivostock towards its Japanese residents. savagery already reported in outline be confirmed by detailed accounts, the place will have earned an unenviable reputation.

It is stated that the harbour at Vladivostock is now completely frozen and that the docks are unusuable.

From Dalny and Port Arthur comes news

KISHINEFF AND THE YANGTSE VALLEY.

It is a common charge against Chinese forces at their disposal for the protection of foreign life and property. Scarcely an antiforeign riot has ever occurred in the Middle Kingdom without provoking that criticism. But if the fault could on any occasion be justly laid at the door of the Chinese, it seems to be attributable even more unequivocally to the Russian authorities in connexion with the Kishineff trial. From

M. Schmidt, the former mayor of the town, and Mr. Kush, an engineer, both declared that any tendency the lower classes of Christians might have had to regard the Jews as Pariahs was due to the special legislation to which the latter were unjected. M. Schmidt also stated that throughout the course of the riots the police and the officers in charge of military patrols refused to intervene on behalf of the Jews patrols refused to intervene on behalf of the Jews on the ground that they had received no orders to that effect, and the administrator of the properties of monasteries in Bessarabia testified that his reiterated appeals to the police to protect the Jews had been in vain. A Jew named Baranovitch, whose son had been brutally murdered before his eyes, said he had fallen in tears at the feet of a police officer named Solovkin, and, having led him to the place where the bodies of his son and another man were lying in pools of blood, had besought him man were lying in pools of blood, had besought him

police officer named Solovkin, and, having led him to the place where the bodies of his son and another man were lying in pools of blood, had besought him to protect the survivors. Solvokin did not raise a finger to help the Jews. Baranovitch's description of the murder of his son produced such a profound impression on the Court that it had to adjourn for an hour.

Several police officers gave evidence. One, Vitkovsky, testified that, in answer to his question as to what he was to do, Colonel Khanghenkoff, of the gendarmeric, said, "Let the Jews help themselves; we cannot help them." A police officer named Blagoy declared that he had seen a company of 200 soldiers assisting the rioters and carrying off their share of booty.

As to the part played by the Governor two witnesses, a staff surgeon named Dr. Muller and a well-known Kishineff advocate named Königsschatz, both testified that they had appealed to General von Rasben to intervene but without result. General Beckmann said that when the riots broke out he had at his disposal 5,000 men, quite sufficient to have put an end to the disturbances, but he received no orders to act. It was only, he said, when the Governor grew alarmed for the safety of the Christian population that he took measures in allay the fury of the mob.

FACTORY GIRLS FUND.

The following subscriptions have been received in response to an appeal published in the Japan Mail on January 22nd, in aid of the work among Factory Girls in Japan, and are hereby acknowledged with thanks. The funds will be administered by Miss Holland

A BUDDHIST PRELATE AND THE WAR.

Mr. Ota, of the Shin sect, who stands at the head of the Buddhist priests in Vladi-vostock and Siberia, has addressed to vostock and Siberia, has addressed to Viceroy Alexieff a letter with reference to the protection of the six thousand Japanese subjects now residing in Siberia. The letter expresses full confidence that the Emperors of Russia and Japan will do everything in their power to avert war, but should recourse

to arms become unfortunately inevitable, Mr. Ota recalls the Christian precept "love your enemies," and trusts that the Viceroy, who is a Christian, and the Russian officers and officials, under his command, who are Christians, will practise this fine rule in their demeanour towards the Japanese who are now peacefully pur-suing, and would fain continue to pursue, their avocations in Siberia. He conjures the Viceroy to authorize them to convey explict assurances on this point to the followers of Buddha in Russia's East-Asian dominions

NOTES ON CURRENT EVENTS.

The office of the Niroku Shimpo was the object of a fierce attack on the night of the 27th instant. Some forty men surrounded the place, smashing everything they could lay hands on. One of the men in the office was slightly hurt, but fortunately the raid took place after office hours so that the staff were absent. Some arrests have been made, but they have not helped to elucidate the motive of the trouble. The Niroku itself thinks that the matter was connected with the pending general elections, and that the men who did the wrecking were merely hired for the purpose. Our contemporary complains that the police showed themselves very perfunctory. No instance of such violence has ever failed to elicit a smilar accusation.

A correspondent signing himself a "Constant Reader" of the Japan Mail, writes us asking whether we have any knowledge of the clause in the Franco-Russian Convention referred to in the following extract from the Echo de Chine of 23rd instant :-

Echo de Chine of 23rd instant:—

"There is one clause in the Franco-Russian treaty of alliance * * * This clause is little known to the general public. It is textually couched in these terms: 'If one of the two Powers is attacked the other contracting party is bound to assist the Power attacked The contracting party is in no way bound to assist the Power if the latter is the aggressive party "(Art. 3, Paris A & E).

The journal adds: "This is clear, and explains the attitude taken by Russia. Bound by the Franco-Russian treaty, France, if she wishes to keep her engagements, which no one doubts, must move with Russia in the case of Japan declaring war against Russia, but she may remain neutral if Russia is the first to declare war against Japan."

The Japanese inhabitants of Korchakoff have applied to be placed under the protection of the Russian military bureau in the event of war. To this application the local authorities responded at once, and the bureau in question undertook the duty with the utmost willingness. This comes from the acting Japanese Consul at Korchakoff.

What the Hongkong Daily Press has to say about the present crisis is this:—

The Russian Press has, of course, done its best to represent the Japanese nation as one of Jingoes and fire-brands. But where has been the justification? No Western Power could have conducted the nego-No Western Power could have conducted the negotiations with more dignity and moderation. If what is meant is that Japan did not "climb down" and accept whatever Russia was kind enough to concede, then words have acquired a new signification. Japan has certainly not acted the despicable part of prostration before Russia for a small bribe. She has not been terrified by tall talk about vast numerical superiority and hopelessness of resistance. And yet she is not fighting her own cause alone, even though in Corea she is chiefly concerned. Therefore when the time comes we cannot believe that she will be found alone or that in isolation she will be allowed to sink from the ranks of Great Powers, to become a helpless spectator of Russia's predominance throughout Northern Asia.

crisis. He reminds them of the strategical importance of Tsushima, and of the fact that the islanders have often had to suffer on account of that position. To-day they are compara-tively well protected by ships and fortresses, but it can not be denied that in the event of hostilities between Japan and Russia Tsushima would probably be in the very centre of the field of operations. The Count therefore exhorts his sometime vassals to do their duty with manly patriotism. That is in brief the gist of the document.

An English provincial newspaper recently published the following advertisement:—

Wanted, a really Plain, but Experienced and Efficient Governess for three girls, eldest sixteen; Music, French, and German required; brilliancy of conversation, fascination of manners and symmetry of form objected to, as the father is much at home, and there are grown-up sons.—Address, "Mater,"

The Westminster Gazette wonders how the much-at-home father will like this "really plain" statement of a want of confidence in him. But is it not going a little too far to say "symmetry of form objected to"? Why not advertise for a deformity at once? Besides, who would answer such an advertiseof one of the grown-up sons.

Marquis Tokudaiji has been laid up for some time, a severe cold having developed symptoms of inflammation of the lungs which threatened to prove dangerous. Under the able care of Dr. Baelz the Marquis is now convalescent.

The Kumano Maru, which arrived at Nagasaki on the 30th ultimo, reports that sympathy with Japan is extraordinarily keen in Australia. In Sydney, Melbourne and other chief cities, hundreds of men have offered their services as volunteers. Japanese Consul in Melbourne finally found it necessary to advertise the fact that volunteers could not be accepted. At Manila also the Kumano found that sentiment ran no less high in Japan's favour.

The Minister of State for Communications has decided that, as a temporary measure, all the ports in the empire shall be open to foreign-owned vessels chartered by Japanese subjects or by those possessing the qualification of Japanese legal persons. Application must be made through the local authorities of the place where the charterer is domiciled. The object of this permission is to relieve the inconvenience caused by the withdrawal of many steamers from the regular cabotage.

Chefoo correspondents persist in stating that many desertions are taking place from Port Arthur owing to apprehensions of war. They now add that the Viceroy has appointed two officers to deliver lectures to the men on the necessity of fighting Japan.

The latest development of the spy game is said to be a Russian Lieut.-Colonel called Kotsebu (?), who has been arrested in Chita ou a charge of giving information to the Japanese. He has gone home to Russia in handcuffs.

Many of our readers who have read with melancholy interest the accounts of the Chicago fire will learn with satisfaction that the charges made against the police in con-nection with that dreadful occurrence as to ill-treatment of the bodies of those who

on Jan. 6th-the fire took place on Dec. 30th-in which special reference is made to those officers who were called to the scene and there is not in it the slightest suggestion that bodies were despoiled while under the protection of the police. It is not for one moment to be supposed that if anything of the kind had been detected or even suspected such a journal would have winked at it. Not a few of our readers will learn with some sense of pleasure that the reports sent over the telegraph were greatly exaggerated.

The present severe weather is driving many of the lower classes to desperate deeds in order to obtain food, and the burglar class particularly are having their ranks consi-derably enlarged. It therefore behoves residents to be careful of their doors and windows, especially those living in outlying districts. On Monday night the house of Mr. C. B. Bernard at Negishi was entered by some of the enterprising fraternity and a quantity of clothes were stolen.

At last an arrangement has been effected for a parcels' post between the United States and Japan. The want of this facility has and Japan. long been felt by the public, but there has ment? Perhaps the whole thing is only satire—at "Mater's" expense—on the part owing to the fact that the carriage of all parcels in the States is undertaken solely by private companies. That difficulty has how been overcome, and we presume that the opening of the post will soon be officially announced.

Japanese 4-per-cents have fallen to £74.10s. in London, being a decline of £3.15s. as compared with the quotation a week ago. The 5-per-cents are quoted at £85.7s.6d., being a fall of £2.12s.6d. during the week. On the contrary, the Tokyo stock market shows a slightly firmer tone.

One of the notable effects of the work in South Africa of the late Mr. Cecil Rhodes has been the practical doubling of the price of diamonds in the past twenty years. The diamond mines of Kimberley, which began operations in 1871, were at first owned and worked by a number of different companies. In 1883 the production of diamonds in the Kimberley district amounted to 2,413,953 carats, yielding £1 2s. 8d. per carat. It was about this time that Mr. Cecil Rhodes conceived the idea of consolidating the various diamond mines in the Kimberley In 1888 the amalgamation was practically completed, and since that year the De Beers Consolidated Mines have controlled the diamond output of the world. The most striking result of this amalgamation has been the practical doubling of the price of diamonds. The output of diamonds has shown practically no increase during the last twenty years. The output in 1883 was 2,413,953 carats, while the production in 1903 was only 2,400,000 carats. By restricting the production the De Beers syndicate has succeeded in greatly increasing the price of the gems. The average price per carat received by the company last year was £2 4s, against £1 2s in 1883.

Sir John Anderson, K.C.M.G., who has ust been appointed Governor of the Straits Settlements, replacing Sir Frank Swettenham, is an official who has spent the whole of his service years in the Colonial Office. Born at Gartly, Aberdeenshire, in 1858, he was educated in the famous university of the granite city of the north, where he took Count So, the former feudal chief of Tsu-shima, has addressed a circular to his some-time vassals in connexion with the present Northwestern Christian Advocate published graduate of his year. Entering the Colonial

Office as a second class clerk in 1879 he served in various departments, rising at length to the post of Secretary. Meantime, in 1887, he became a Bacon Scholar of Gray's Inn and a year later won the Inns of Court studentship. A few years of comparative obscurity passed and then in 1891 he was appointed Joint Commissioner with the late Sir J. F. Dickson to enquire into certain matters connected with the Supreme Court of Gibraltar. Next year he was appointed private secretary to Sir Robert Meade, and was attached to the staff for the Behring Sea Arbitration in London and Paris, which took place in the years 1892-93. In 1896 he was promoted 1st class clerk in the Colonial Office, and in 1897, principal clerk, which year also saw him made secretary to the conference between Mr. Chamberlain and the Colonial premiers. When the Duke and Olonial premiers. When the Duke and Duchess of York paid their visits to the Colonies in 1901, Mr. Anderson, who had already received the C.M.G., was appointed the representatives of the Colonial Office on their Royal Highnesses' staff, and on his return to England he received the K.C.M.G.

We have received a small pamphlet entitled "An Appeal to all who have a heart for their fellow-brings. Factory Girls' Life in Japan." At the bottom of the pamphlet appear the words, "Printed and presented to the ladies engaged in this noble work by F. Schroeder, Editor Eastern World." The pamphlet is simply a verbatim reprint of an article published in these columns on January It has been taken from the Mail by Mr. Schroeder without any reference whatever to its source. If the re-printing of the article and its circulation as a pamphlet promote the cause of charity in any way we have no manner of objection to Mr. Schroeder's process, but it is an amusingly impudent process, for all that.

Presumably the censorate of the press has been relaxed, if not wholly abandoned, for in the editorial columns of a Kobe journal there has appeared an article—subsequently copied by a Yokohama contemporary-which violates the regulations in the most flagrant manner, and yet does not appear to have evoked any censure.

Mr. Jack London, the well-known novelist, now turned war-correspondent, got into trouble at Moji by taking a photograph of coaling operations. A fine of 5 yen was the ultimate punishment, but we fear that Mr. London suffered much inconvenience on account of his inadvertent breach of regula-

Inquiries having been addressed to us concerning the security that trans-Siberian mail-matter enjoys against invasion by the Russian censorate, we have sought information from the postal authorities. Their statement is that absolute security should be obtained by the methods in vogue. All mail matters are sifted before leaving Nagasaki, and are divided according to the countries of their addresses, so that Germany's mail, France's mail, and the United King-dom's mail each has its own special bag in dom's mail each has its own special bag in which it is sealed, and the bag is supposed to be left unopened prior to arrival at the capital to which it is addressed. Besides, a further precaution is adopted. To the processing authorities in each capital as long as possible from the enemy. post-office authorities in each capital a uniforms, cannon, guns, etc. They have iversity, no one, we can be quite sure, will list is sent of all the matters in its bag, and come to an agreement in so far as the shin-the possibility of anything being abstracted ing of steel is concerned; and cannon and messrs. Murdoch and Yamagata. But it will be a life of comparative solitude, for the auditions we seem to reflect by implication on the finish. But it is not the same with the concerned and important of the residue of the Russian carriers. That colours used to make carriages caisens and numbered by a few hundreds—a book of the

Russia's censorate of mail matters is proverbially severe, and that its severity is likely to be increased at this juncture.

Dr. Albert Ernest Jenks, chief of the Ethnological Survey, has just returned to Manila after a highly successful trip through and across Mindanao, on which Mrs. Jenks accompanied him, being the first white woman ever to cross the little known and much seared Lanao lake region. Dr. Jenks made four contracts, to have as many dis-tinct groups of Mindanao peoples taken to the big Exposition in St. Louis this spring, and gathered much information which he will be very useful to him in the work of directing the operations of the survey among the wild and savage tribes which inhabit the great island. He also collected a number of fine weapons, principally bolos, krises, barongs, a kampilan, and a queer head-knife or sword "used generally only when the Moro who wields it wants a head in a hurry and at one stroke." In speaking of the "white tribes" of Mindanao, Dr. Jenks said to a Cablenews reporter that he believed the mystery was solved by the old and perfectly well known scientific theory of the albino freak. He saw a white Moro who had almost white hair, doll-baby blue eyes and almost no eyebrows. merely an ordinary Moro, born of an aldine Moro mother and a brown father, and the Professor scouts the theory that there is or was any verisimilitude in the theory that the white children of whom there are three so far as can be learned, are descendants of captured white women from the old days of foreign commerce, working hand in hand, the Moro pirates.

The Nisshin and the Kasuga arrived at Singapore on the 2nd. They are expected to come thence direct to Japan without calling anywhere, so that they ought to reach Yokosuka about the 16th. It has been almost decided that the entertainment given in welcome of the officers and crews shall be under the auspices of the Tokyo Municipality.

From the San Francisco Chronicle's re-cord of California for 1903 it appears that \$18,000,000 in gold and \$860,000 in silver were produced by her mines. The orange crop reached a total of 32,000 cars of 360 boxes each, against 24,000 cars last year. Two thousand cars of last year's orange shipment went from northern California. Lemon shipments reached 3,850 cars of 312 boxes each. Other products were as follows: Wine, 32,000,000 gallons; brandy, 5,700,343 gallons; walnuts, 11,500,000 pounds; almonds, 6,000,000 pounds; beans, 117,500,000 pounds; salmon, 3,420,000 cases; wheat, 9,517,000 centals; barley, 9,850,000 centals; fuel oil, 23,000,000 barrels, worth 75 cents a barrel at tidewater; prunes, 115,000,000 pounds; peaches, 30,000,000 pounds; apricots, 19,000,000 pounds; raisins, 112,000,000 pounds; canned fruit 2,600,000 cases; wool 22,500,000 pounds, and beet sugar, 15,400,000 pounds.

" For a considerable time," says the Revue

And if we are to credit an interesting item of news that comes from England, we have been making a mistake in chosing for this purpose neutral tints, such as grays and browns. Starting with the fact that in nature great masses of uniform colour are much more conspicious than a mixture of different tints, an English officer conceived the idea of painting the mounts and caissons of certain pieces of field artillery with stripes of red, blue, yellow, etc. The experiment succeeded perfectly. The troops sent to look for this multi-coloured battery did not begin to distinguish it until they were with-1,000 yards of it. On the other hand pieces painted a uniform neutral tint formed a large dark spot, visible from a distance and the more easily when the ground was clear. What shall we think now of the discredit showered on the vari-coloured uniforms of the Scottish troops and in general of the use of bright colours for military uniforms?'

THE BOOKSHELF.

A History of Japan during the Century of Early Foreign Intercourse, by JAMES MUR-DOCH in collaboration with Iso YAMAGATA.

PRIOR to the Meiji Era the most interesting period of Japanese history was that between the middle of the sixteenth and the middle of the seventeenth centuries. For it was then that there appeared on the national stage a host of never-to-be-forgotten men from Hideyoshi and Iyeyasu to Konishi and Ishida, and it was then that foreign creeds and attempted to establish themselves in the Far-Eastern islands. With this period Messrs.
Murdoch and Yamagata deal, and we may say at once that no section of Japan's annals has ever been presented to the outer world with so much accuracy and in such detail. What the authors planned as their scheme of procedure was to sketch two great contempora-neous movements, displaying their con-nexions and interactions; namely, the movement towards national centralization under military sway, which was consummated; and the movement towards foreign intercourse under religious impulse, which was defeated. It is difficult to tell two stories simultaneously. Even in novel-writing such a task is seldom successfully accomplished, though the author has the great advantage of unchanging characters and generally unvarying scenes. In history where new actors constantly appear upon the stage and new routes have to be constantly taken, the dual narrative can scarcely fail to be confusing, occasionally at all events. We can not say that Mr. Murdoch has been conspicuously happy in holding the threads of histwotales always free from entanglement. There are times, also, when one would gladly exchange his analytical narrowness for a little synthetic breadth. But these defects are noticeable chiefly in the earlier sections of his work Later on when great events make lucid land-marks, he carries the reader smoothly along and produces impressions worthy of the subject. In a certain sense such a book is a labour of love. It will live. Of that there can be no doubt. For until some heroic scholar undertakes to reduce to practical dimensions the vast pile of materials now in process of collection at the Imperial Unbona fides of the Russian carriers. That colours used to make carriages, caissons, and numbered by a few hundreds—a book of 750 is not our intention. The simple fact is that other war material invisible at a distance, ample pages treating of history pure and

simple, and that too the history of mediæval fore our eyes with fine realism, and are of a fourteenth and acts as such." Fime and again in Japan. Therefore Messrs. Murdoch and Yaniagata can not look for any reward beyond the sense of having bestowed an incalculable benefit on all earnest students, whose gratitude they will have to the full.

Commencing their story proper with the year 1542, the authors are obliged to convey some idea of what had gone before. They do so in an introductory chapter which, to our thinking, is one of the best in the book. For it embodies in comparatively brief compass a most compendious and clarified ac-count of the essentials of Japanese history from the time when Kyoto became the capital to the birth of Iyeyasu. Thus equipped, the reader finds no difficulty in following the subsequent chapters and in understanding the nature of the task of military centralization achieved by the partly successive, partly cooperative, efforts of that immortal triumvirate, Nobunaga, Hideyoshi and Iyeyasu. Mr. Murdoch is a man of frank bias. He makes not the slightest attempt to conceal or cloak his anti-Christian convictions, and if any reader expects to find in this history carefully reasoned justifications of the Christian propagandists' work or forcible condemna-tions of the sufferings to which they were subjected, he will be disappointed. The narrative of Murdoch and Yamagata is constructed and directed to prove that Christianity, dressed in the garb of iconoclasm, intolerance and savage zeal which it wore when presented for the first time to the Japanese, could not have failed to shock and deter them and even to react upon foreign intercourse generally. We believe that judgment to be in the main correct. Indeed, we have never been able to see that any other inference could be drawn from the facts of Japanese history. But we confess that Mr. Murdoch's presentation of the picture is so strenuous as to provoke a sense of opposition. Nor is his style always free from extravagances which not only verge on vulgarity but also insult the gravity of his subject. He tells us, for example, that a certain part of one of removed from the culture and refined man-Froez' annual letters is "a mild example ners of those of the interior that they seem of priestly assurance and ecclesiastical cocksuredness "; that " Sumitada, in making the best of both worlds, with the worthy missionaries as henchmen, attained a larger measure of success than has fallen to the majority of the sinful sons of men who have essayed ing-the practice of the art"; that "Matsukura thes was brought up in the piping times of peace when the mere fact of being one's father's son was itself a high claim to the pestiferous serve to convey some idea of the scope and incense of intriguing sycophants," that a quality of Messrs. Murdoch and Yamagata's certain statement by Almeyda "sounds "History of Japan." They promise to consuspiciously like a sample of the nauseous tinue the work, and we trust that they will conventional trash which constitutes a por- be as good as their word, for if they give us tion of the stock-in-trade of that toadyism another volume of such quality as the one and flunkeyism ever ready to discover bib-and-porringer prodigies in the families of ledge of Japan's story will be vastly im-the great or the wealthy from whom favours proved. The book, we may add, has been the great or the wealthy from whom favours might be expected," and so on. It is a pity that the reader's attention should be jarred from time to time by these disorders of style, or that his assent to propositions showing elaborate marshalling of evidence should be deterred by outcroppings of pre-judice, on the part of the marrator. But hostile criticism is exhausted there. These minor defects can not greatly diminish our admiration for a work every page of which evinces excellent industry of research and reference, and adds largely to the world's knowledge of mediæval Japan. Very often, too, Mr. Murdoch's descriptions are vivid and realistic. His accounts of the battle of Seki- matist—"Russia is the biggest anomaly of the Of immemorial pasts—wan, winged array gahara and the siege and capture of Osaka nineteenth century: to all intents and purposes in Sweeps ever mutely onward without rest. Castle bring those epoch-making events be- intellectual development she belongs to the

nature to attract the least enthusiastic reader reading the sad record of Leo Deutsch's experiof Japanese history. Summing up the lessons of Sekigahara, where Iyeyasu deliberately ran a tremendous risk, Mr. Murdoch says:— Knowing what we know, Iyeyasu's resolution and procedure clearly vindicate (indi-cate?) that his head was set upon the shoulders of a genius. It must not be forgotten that Iyeyasu was no mere medley of isoly as a soldier but as a master of men."

and Yodogimi-new lights and shadows are cast. Incidentally some very interesting appreciations of the Japanese are found. For example, Cabral, the Vice-Provincial, after ten years' experience in Japan of the sixteenth century, is quoted as saying that "the Japanese, being naturally haughty and to such a fate. Perhaps he may have been too headstrong in his early youth and found himself committed to participate in deeds sciences human and divine, quickly abuse them and come to despise Europeans"; and Froez, in one of his remarkable letters, writes:—"In truth these people both in goodness of nature and excellence of wit, and Froez, in one of his remarkable letters, writes:—" In truth these people both in goodness of nature and excellence of wit, surpass many nations of our Europe (be it said without offence to them). And if the Portuguese merchants entertain a less exalted opinion, or express themselves less enthusiastically about the Japanese, it is merely because their intercourse is confined to the people of the ports, who are so far little short of rustics to the latter. Accordingly the people of Kyoto generally term them savages in contempt, although indeed, the people of the sea coast are very far from being destitute of courtesy and good-breed-It seems not improbable that were these observers alive now they might be indisposed to modify their verdicts.

These references, brief as they are, will now completed, the foreign public's knowprinted at the office of the Kobe Chronicle, printed at the omce or the recommendation and this part of the undertaking is thoroughly good. Many well designed maps help to elucidate the text, and there is an index which leaves something to be desired. The history is sold by Messrs. Kelly and Walsh

THERE must be a very considerable degree of truth in the recent remark of a European diplo-

ences in the prisons and courts of Germany, Russia, and Siberia, one is forced to the conclusion that fact is, more often than not, stranger than fiction. If seems scarcely possible in these days that a man can be arrested at Baden, upon mere police suspicion, kept in goal many months without being brought to trial, extradited to Russia on one specific charge but tried and condemned on quite another, and ten that Iyeyasu was no mere medley of isolated capacities, but a definite, a distinct, a far-reaching and a versatile idiosyncrasy. The art of war is only one among the arts that contribute to empire, and while in that he was proficient, he was by no means so unintelligent as to fancy that that alone was the only factor of importance in the struggle for place and power. * * * At this supreme crisis of his life Tokugawa Iyeyasu did indeed venture on a bold risk; but the result amply testified to his ability not merely as a soldier but as a master of men." Several fallacies hitherto accepted as truth
by casual readers of Japanese history are exposed in this accurate work, and upon several

the very classes that are the mainstays of the governments of all other portions of Europe.

Mr. Deutsch tells his story very quietly, very simply, but the entire absence of sensationalism wins over the reader to his side. tented members of the body politic. Mr. Deutsch and his fellows, men and women, are the intellectual flower of the diversified Russian races, and one day the great blind governmental machine will recognise it. Will it awake to the fact in time: or will it allow things to go on till we shall see in Russia a counterpart of the French Revolution? If the deep-seated discontent, now kept down with an iron grip, ever reach that point we shall witness, we fear, such an upheaval and such a catacylsm as never the world has yet gazed upon.

We commend Mr. Deutsch's book to the attention of our readers, and cannot help extending to him our congratulations that he is now, after all those bitter years, in the safe asylum of Swit-Art these but years, in the sale asylum of swizzerland. His account of the Blagovestchensk Massacre, of which he was an eye-witness, is very impressive in its simplicity. After reading it one wonders on what the Russians base their belief that they are better liked in China than any other western race? Their record in northern Manchuria is written in blood and fire; blood wantonly charta is written in 0100d and fire; 0100d wathomy spilled, fire ruthlessly applied, and if the Manchurians have a spark of feeling left within their breasts the memory of what Russia has done to them will assuredly be cast-up against her on that great settling-day which seems to be rapidly drawing near.

On the 1st instant at 7 a.m. a fire broke out in the residence of the Rev. Mr. Wood in Tsukiji. The origin of the trouble was a defective stove-pipe in the third storey.

Ample assistance was forthcoming, but nothing could be done to save the house. The building was insured, but not so the contents, and Mr. Wood suffers heavy loss.

Details of the fire that destroyed Mr. Th. de Berigny's house on the Hill at Kobe on Wednesday night show that the outbreak occurred in the bathroom where a fire had been prepared to heat the morning's bath. So quickly did the flames spread that though there were several guests in the house practically nothing could be saved. One or two items of furniture were carried out of the house but the loss may be described as complete. Mr. H. C. K. Newman, who resided with Mr. Berigny, lost all his property, which, unfortunately, was not insured. The servants also lost their effects. The house, which belonged to Mr. Berigny, was insured with the National Assurance of Ireland for yen 10,000, but it is stated that this sum does not cover Mr. Berigny's

THE ASIATIC SOCIETY OF JAPAN.

minutes of the last meeting had already been published, and would therefore be allowed to stand without reading. He said that it gave him very much pleasure to introduce to the audience Mr. Kawaguchi of Tibetan fame. Tibet is a country in which none of us would like to live, before the world to-day. Mr. Kawaguchi is so well known as an entertaining lecturer and Mr. Guy also an able interpreter, that he might be excused for not taking any time and for introduc-ing Mr. Kawaguchi at once.

Mr. Kawaguchi expressed great pleasure in addressing the audience. He begged to thank Mr. Gardiner, Chairman of Committee, for inviting him, and the auditors for their presence. He then delivered his lecture in Japanese, stopping at intervals for Mr. Guy to interpret it in English. From notes made on the English interpretation,

the following summary has been prepared.

Mr. Kawaguchi had in mind to go to Tibet in 1893, but actually left Japan in 1897. The country which we call Tibet is not so designated. a Tibetan would reply that he is Poi. Two explanations are offered for this term. (1) The inhabitants of India say that it is the region whence their three of four great rivers flow down into India, giving life and prosperity. These rivers are gods, and their source must be where the gods dwell, their most sacred home—Boda, which is corrupted into Poi. (2) The Tibetans assert that their ancestors were divine people who called spirits from six different sources: from fierce beasts, beasts which eat no food, ordinary brutes, men, heaven and hell. They were the Poi. The word "Tibet" is of Persian origin, meaning high land. In Japanese writing, the character means (1) West, (2) godown, (3) earth. The term Tibet or Tobet used by Japanese is an imitation of the foreign word. The name of the country known to its inhabitants is Poi, and concerning that country the lecture treats.

Mr. Kawaguchi left Japan in June, 1896, and went to Darjeeling, India. He had selected that place to study the Tibetan language, on account of recommendations from Indian students in Japan. At Darjeeling, he passed one and one half japan. At Darjeeling, he passed one and one-half years studying the language. In 1899, he left Darjeeling and went to Nepaul. It would have been an easy journey to go direct to Lhassa. But, in order to avoid suspicion and discovery, he chose a circuitous route. He sought his inform ation concerning roads from beggars. Beggars do not usually follow direct routes, and so their knowledge best served his purpose. He went first to Buddhagaya, thence to Khatmantu, where he spent some time studying routes. He proceed ed north-west around Manasaruwane Lake. With guides and porters, he rounded this lake in fifty days and came to Rho Esalon within fifty miles of Lhasa. Having met soldiers here, he stopped at Rho Tsalon for one year and studied the routes. It is a roadless country. The people direct the inquirer, not by pointing out a roadway, but by saying that at a certain place a hermitage would be found. He dared not make direct inquiries, but had to proceed cautiously and piece together a circuitous route, arrived after fifty days at the City of Lhassa. His servants had been troublee, and so he sent them back. Thus, carrying his 60 to 80 pounds of baggage and traversing mountains covered with snow, he entered the City of Lhassa alone.

In looking over Tibet from the mountains, Mr. awaguchi was much surprised by the view. Kawaguchi He had expected to see a great plain; there stretched away a broken series of mountains and valleys. This part of the trip was made in A general meeting of the Asiatic Society of Japan was held at the Parish Building, No. 54 and valleys. This part of the trip was made in them noodles chiefly and the months of June and July—a season when the Tsukiji, on Wednesday, January 27th, at half past three o'clock. The previous announcement that a lecture would be given by Rev. Ekai that a lecture would be given by Rev. Ekai to imagine the rigours of winter. There were have the trip tans and in them noodles chiefly and valleys. This part of the trip was made in sold. Noodles with a little meat added would be a Tibetan feast.

Most of the people in Lhassa are of course frequently fell during the night. This enables us to imagine the rigours of winter. There were number of four or five hundred, about two many streams and rivers to cross. In the absence hundred Cashmerians and many Chinese. Tibether Tibetans "had attracted a large audience." of bridges or ferries, the traveller could only retain in many respects resemble Japanese, but in waters. He had many mishaps. On one occasion, strong contrast with Japanese are their creater.

he was borne away by the torrent and lodged in banks of snow and ice. His benumbed body was restored by being placed between two sheep and subjected to the influence of their warmth.

Lake Manas Narako, as is well known, as the highest in the world. In India, it is believed to be the source of four great rivers, among them being the Ganges and the Bramaputra. But, in circumventing this lake, Mr. Kawaguchi discovered that it is not the source of any river. Near by is a second lake around which Mr. Kawaguchi ssed, in order to reach the public road. is in fact no road, no labour having ever been spent either to make or to repair it. It is merely a sort of trail from which yaks and travellers have worn the grass. At intervals of about fifty miles on this path, there are villages. Here there are houses, although ordinarily the Tibetans live in tents made of yak cloth. In this region, the air is extremely carefied. The traveller suffers have is extremely rarefied. The traveller suffers, has difficulty to breathe and even spits blood. While Mr. Kawaguchi had in mind to go to Tibet in dimensity to breathe and even spits blood. White 1893, but actually left Japan in 1897. The rounding the mountains, a great misfortune overcountry which we call Tibet is not so designated by its inhabitants. In their language, the land is called Poi Poi. If asked about his nationality, a poor priest—set upon him and robbed him. They took his baggage, took everything, save his books and some money which was concealed inbooks and some money which was concealed inside of his clothes. Alone in the mountains, with only snow for food, drink and bed, he wandered for three days. On the third day, hungry, faint, almost blinded by the bright glare of the snow, he was found by a large Tibetan and taken to the Tibetan's tent. While resting and recuperating there, he was bitten by a dog. This new misfortune obliged him to remain there a long time to recover. Leaving this place, he was taken into the caravan of a large merchant and by an easy journey came to the village of Haruzei, thence Lhassa was easily reached. It was now July 21st, 1901. (Through error, the date is July 21st, 1901. (Through error, the date is stated as March, 1900, in an article written by the lecturer for the *Century Magazine*). The climate is comparatively mild in central Tibet. In summer the thermometer rarely registers more than 80 degrees. There are no cold winds, such as blow in Tokyo. On arrival in the City of Lbassa, Mr. Kawaguchi took lodging in the Sera School. Although many things might be said concerning his trip, it is most interesting to speak of Lhassa

The architecture of Lhassa is typical of that in all Thibet. The temples are built of stone. Their mofs are flat and covered with a cement-like submoss are flat and covered with a cement-like sub-stance. The general form is castle-like. The houses are mostly constructed of a sort of adobe sun-dried bricks. They are lighted from above, by means of a kind of sky-light without glass. In the better homes, the ceiling is covered with a white cloth. They have no floors, natural earth serving instead. But in the corner of the room there is a carpet, where they sleep, sometimes also sit, and whither they always show guests. In material and finish, the houses are rough. Timmaterial and finish, the houses are rough bers and boards are not planed or polished.

The name of Lhassa signifies "Country of God." Looked at from a distance, it also may give tha, impression. But a single close view shows that it is a misnomer. It is in fact a very dirty place'
The streets are narrow and filthy. The shops of The streets are narrow and filthy. The shops of the city are of two sorts. One kind is similar to those of Japan—a room with the side open and the wares exposed to view from the outside. The other variety is simply stands or places in the The usual size of m shop is about twelve feet—twenty or twenty-five feet would be very large. In them, are sold cloth, butter, tea, flour, Chinese breads and native products generally, also some foreign things (not specified). Some foreign food-stuffs are imported from India; but they are very dear and only the rich can afford to buy them. Restaurants exist and in them noodles chiefly are sold. Noodles with a little meat added would be

occupied the Chair. He announced that the waters. He had many mishaps. On one occasion, strong contrast with Japanese are their great

stature and their filthy habits. Their indifference to dirt may be indicated by saying that a Tibetan's ideals of cleanliness are the Chinese! Tibetans represent themselves as being very religious. They pretend to be devout Buddhists. gious. They pretend to be devout Buddhists. If asked about their purposes or desires in life, they would reply that their one ideal and their one desire is Buddha or to realize Buddhism. For this, they work, live, steal. But this is mostly pretence. Outwardly they appear calm, mild and simple; but inside they are harsh and

Tibetan customs are many and curious. Among Allocan customs are many and curious. Among the most interesting of them is the marriage ceremony. In Tibet, the rule is polyandry, but polygamy is occasionally met with. For example, if there be a family of five sons, all together take one wife. The eldest is then called "father," and each of the others is called "uncle." On the other hand, if there be a family of three daughters and no sons, all three sisters take one husband. In the latter case, polygamy arises; but this is not so frequent. Marriages are ar-ranged by an intermediary or "go-between" with the parents of the bride or brides and groom or grooms. The girl is not consulted in the matter, although she is to become the head of the new house. When the arrangements have been completed, the parents give the girl oil and hair ornaments and let her wash her hair. At other times, the hair is not washed. In fact, there is very little washing done in Tibet. There it is considered an honour never to have washed. The parents tell the girl that she is to go to a certain place as bride. Her wishes are not consulted and she has no say in the matter. Finally, the friends of the bride and of the groom come to the bride's home and stay all night. The members of each group banter those of the other and urge them to drink, banter those of the other and urge them to drink, Should one drink too much and fall asleep, custom allows the other group to take from him some article to be next day ransomed by the owner. On the following day the bride bids farewell to the family gods—"the gods of happiness." She must persuade them to stay there and not to follow her. In order to convince them, she calls on them to witness the feast prepared for them. She tells them that they are surrounded with abundance and care, whereas the place to which she goes is poor and miserable. Then the bride, abundance and care, whereas the place to which she goes is poor and miserable. Then the bride, with the two groups of attendants, sets out for her new home – the home of the groom. If she pass through a village on the way, it is permissible for the villagers to steal the bride and require a ransom for her. This is justified on the ground that she is without gods and accompanied by demons. Her passage thus through the village will bring it ill-luck. The ransom money is required to appease the gods. When the bride arrives at her future home, the gate is closed against her. The groomsmen are now before the against her. The groomsmen are now before the against her. The groomsmen are now before the gate. Thus accompanied by demons, the bride cannot enter. The groomsmen are provided with a pyramid of flour encased in dough. This is thrown by one of them at the bride, and the breaking of it drives away the demons. and the breaking of it drives away the demons. If the bride's attendants catch the one who throws the magic pyramid, he is obliged to pay a penalty. The bride now asks for the gate to be opened. The request is refused until she pronounce blessing on the gate. Then the gate is opened, all enter and the ceremony is ended. Among the Tibetans, there are four different forms of funeral ceremony. They arise from the Indian proverb that man comes from four elements; viz., earth, water, fire, wind. According to the first ceremony, the bones are crushed, the flesh is cut in pieces, the body cooked and fed to dogs, birds and eagles. According to the second ceremony, the body is the second ceremony. According to the second ceremony, the body is burned, consumed by fire. This is not common, but is sometimes practised. In the third cerebut is sometimes practised. In the third ceremony, the corpse is thrown into one of the great rivers, after having been decapitated and dismained to thank Mr. Kawaguchi in behalf of all who were present for his interesting lecture, and body is buried in the earth. This method is rarely employed—only when the other ceremonders are inconvenient. Music and literature among Tibetans are at a very low stage. They answer privately after the meeting any questions have but a single musical instrument. It is that might be asked. The meeting was declared similar to the samisen. Tibetans sing and dance. similar to the samisen. Tibetans sing and dance. adjourned,

Dancing is done with the feet not with the whole body. Some strike with the right, some with the left foot, and, what is peculiar, all do it precisely left foot, and, what is peculiar, all do it precisely alike. Their songs are of two kinds. Common songs deal with love, bravery, unusual exploits. Priestly or religious songs are prayers to Buddha. Mr. Kawaguchi chanted a sample of each, and they were respectively rendered into English thus: (1) "Yara, yara," (this; is only a prelude) "As the azalea blooms all over Tibet, but the red, beautiful and sweet-scented ones bloom only up on the hills, so perhaps my lover's face is beautiful." (2) "In my heart is prepared the lotus seat. O Buddha, the real source of Buddhahood, give me thy protection; and make me that my body, heart and month may perfectly perform their duties!"

Many persons ask how Mr. Kawaguchi's iden-tity was discovered in Lhasa. It happened thus. tity was discovered in Lhasa. It happened thus. Mr. Kawaguchi went to a certain shop to buy soap—the only shop in Lhasa where good soap could be obtained. The soap merchant looked him closely in the eye. Mr. Kawaguchi had know this man at Darjeeling. He himself had been closely shaven at Darjeeling, while at Lhassa he wore a heavy beard. But he perceived that he was probably discovered and went quickly away. Being later obliged to have more soap, he returned to the same shop. The merchant would not sell him soap, but fixed him in the eye and asked "Do you know me?" Mr. Kawaguchi could not lie, and so he replied "Yes." Thereupon, the merchant took him into the merchant's house, placed him on the highest seat, then asked his house, placed him on the highest seat, then asked his (the merchant's) wife, "Do you know this man?" After closely regarding him, the wife replied "No." This shows how perfect was the disguise penetrated by the merchant. The merchant said "This is the Japan Lama." Mr. Kawaguchi knew that it was dangerous to remain in Lhassa, if his presence was known. But the merchant promised before the gods that he would not tell that Mr. Kawaguchi was a "Japan Lama." However, this merchant was sent to India to buy iron, and there heard that the Japanese were good and had the same religion as the Tibetans. On his return to Lhassa, this merchant, without evil inten-tions, told the head merchant that a "Japan Lama" was in Lhassa. Later, the head merchant, in an interview with Mr. Kawaguchi, said: "You are not Tiberan, Chinaman, Indian or European; what land do you come from?" Mr. Kawaguchi had in mind to say that he was a Chinaman, But the soap merchant, who was present, forestalled him by saying that this was the "Japan Lama" The head merchant reported the fact to the brother of the Great Lama. The head merchant also wished to protect Mr. Kawaguchi. But the Dalai Lama learned that the "Japan Lama" was the learned doctor at the Sera Collatina was the learned doctor at the Sera Col-lege of Priests, who was about to receive favours and important promotions. The facts became generally known and created an uproar in the city. Mr. Kawaguchi knew that it was danger-ous to remain, and so he fled the city, May 19th, 1902. Fortunately there was then a great religious festival at Lhassa, -a fact which facilitated his escape. On leaving Lhassa, Mr. Kawaguchi took the most direct route to Darjeeling, and, having passed through seven perilous places arrived in July safely at Darjeeling. While there, he sent back to the Dalai Lama a petition in behalf of the friends who had been kind to him at Lhassa. But news of the recent expedition to Tibet cause him to fear that he may be suspected to have been a spy and that therefore his bene-factors may be questioned with exceptional severity. From the King of Nepaul, Mr. Kawaguchi received as a present forty-one bibles or sacred books. These he has lent to a school. But the many other curious objects there on view

from Tibet to Japan, arriving here last May.

The President of the Society said it only remained to thank Mr. Kawaguchi in behalf of all who were present for his interesting lecture, and

EDUCATION IN THE PHILIPPINES.

In the whole course of American occupation of the Philippine Islands there is nothing more in-teresting or gratifying to all persons concerned than the educational movement organized there. This movement ought to be studied by all classes of Japanese officials, for the very beginning of this movement shows how the American idea of individuality and necessity can over-ride red-tape and prove that "where there's a will there's a way." During the period of Military Govern-ment, General Otis, realizing the importance of establishing public schools as soon as possible, and having no other resources at hand, detailed army officers for this work. After these officers had opened and equipped 120 schools they wanted good English teachers but could not get them so they in turn detailed regular U.S. soldiers for the time being to teach English. These facts are unique and interesting and show commendable resourcefulness. An extract from the report of Captain Echols gives us a point about teaching English:

To teach English to the natives a knowledge of Spanish or Tagalog is not necessary. I at one time had charge of 4,000 American Indians with six Government boarding schools. Not a child could speak a word of English on entering the schools, and in three months from entrance these children could speak it fairly well and this was accomplished by teachers utterly unfamiliar with any one of the numerous Indian dialects."

To read such a statement must make many a Japanese high school boy green with envy, for after years of poring over conversation-books and pocket dictionaries under Japanese teachers he is compelled to turn his head to one side thoughtfully and say "once more please," whenever he is spoken to in ordinary English by an American or Englishman. In the English by an American or Englishman. In the Philippines now they have a public school system that is reaching out into every part of the islands. They have one General-Superintendent with a salary of \$6,000, a number of division superintensalary of \$6,000, a number of division superintendents paid from \$2,000 to \$2,500, and over 1,200 American licensed English teachers drawing salaries from \$75 to \$125 per month, all in U. S. money. For English instruction these teachers take the children in hand as soon as they enter school, and they also form the Filipino teachers into classes for English instruction. Here are two vital points for language educationalists to two vital points for Japanese educationalists to consider well. Suppose Japan would employ one or two competent American or English teachers for each of her large primary schools throughout the Empire and let these teachers have charge of the pupils when they first enter school, and at the same time let them form English classes among the teachers for one hour a day. Who would be able to predict the result in ten years? It is confidently predict the result in few years? It is confidently predicted that in five years from now there will be five times as many people in the Philippines speaking English as Spanish after three hundred years of Spanish rule. And if things go on well we will find in another generation an English-speaking nation right here in the Far East.

There is another fact that will prove to be one of the most important and far reaching undertakings yet inaugurated. This is summed up in the policy of the educational department and stated by the General Superintendent thus: "Wherever a school for boys is established it will be the policy of this department to establish one for girls of this department to establish one for girls, either in a building near the boys' or under the same roof as the boys' school, but completely separate, with its own entrance and playgrounds. Indian education in the United States was not successful until just as good arrangements were made for the guls, the mothers of the coming generation." So the Philippine Islands will be the only place in all Asia and one of the few places in all the world where the girls will have establishment and maintainance of private schools.

Here is another lesson in liberality for Japan. Money is going to be liberally expended, the best teachers, text books, and materials are going to be used, the system is going to be extended throughout the islands and made compulsory as far as possible and as soon as expedient. With such an educational policy laid out for them by a responsible and competent Government the a responsible and competent eventiment the Filipinos ought to count themselves a happy and a fortunate people. There may be just a little too much Yankee push and perfection in it all for the average Filipino, but it will give him a fine chance to show what is in him and what can be made of him.

WILL PATTILLO.

" AN EVENING WITH SULLIVAN,"

Last Friday the Yokohama Literary Society scored another decided success at the Van Schaick Hall with "An Evening with Sullivan," arranged by Mr. W. Karl E. Vincent. There was a very large attendance. In opening the proceedings the President expressed the regret of the Committee that severe colds, due to the present very bitter weather, prevented Mrs. E. C. Irwine, Miss H. Lloyd Thomas—whom, he said, many were eager to welcome back to the local concert platform after her well-merited successes at home—and Mr. B. C. Foster from being present and fulfilling their promises as set out in the programme. He hoped they would all have a speedy recovery and that later in the season the Society would have the pleasure of hearing them. Meanwhile volun-

that later in the season the Society would have the pleasure of hearing them. Meanwhile volunteers had come forward at the last moment and thus some of the blanks would be filled. The Society were lucky in having such loyal friends and their hearty thanks would be due to Mr. Somerton ere the evening closed for the large share of the programme that he had voluntarily undertaken.

Part I. began with the Overture from the "Tempest" music, which was among the first productions that came from Sullivan's prolific pen. It was brilliantly played by Mrs. Arthur Bellamy Brown and Mr. W. Karl Vincent, and the audience warmly returned their thanks. Mr. S. H. Somerton, who, though suffering from a heavy cold, has seldom been heard to better effect, followed with "The Sailor's Grave," and gave place to a quartette—"Hush Thee, my Baby "—sung by Miss Vincent, Mrs. W. Kirkland Wilson, Messrs. H. E. Hayward and W. Kirkland Wilson, This was given very effectively and was greeted with load applause.

Wilson, Messrs. H. E. Hayward and W. Kirk-land Wilson. This was given very effectively and was greeted with loud applause.

A sketch, or rather short biography, of Arthur Seymour Sullivan, by Mr. Vincent brought the first part to a close. The speaker told of Sullivan's birth in London, of Irish and Italian parents; of his early passion for music and his precocious mastery of all the instruments in a military band, of which his father was the conductor; of his education as a Child of the Chapel Royal; of his winning the Mendelssohn scholarship, which enabled the budding genius to finish his musical education at Leipsic; of his return to England and his almost sudden coming to the front as a composer; then of his meeting with Mr. W. S. Gilbert and the outcome of that acquaintance—the long series of Gilbert and Sullivan operas; finally of the other classes of composition upon which Sullivan's fame will equally rest, his sacred music, the cantatas, "The Golden Legend," "The Light of the World," etc. Mr. Vincent then entered in to a short exposition of the resums for Sullivan's popularity and con-Mr. Vincent then entered into a short exposition of the reasons for Sullivan's popularity, and concluded with references to the last days of the composer's life and his funeral in St. Paul's Cathedral—an honour that had been nobly won.

The President, at the conclusion of the address, drizzling rai moved a vote of thanks to Mr. Vincent, which tive teams:-was very heartily accorded.

St. Joseph

The second part of the programme, following the verture—"In Memoriam," most sympathically The second part of the programme, following the Ch. Oberlein (capt), D Curtius, Full Backs; H. overture—"In Memoriam," most sympathically Jubin, Ch. Horns'ein, W. Watt, ½ Backs; E. rendered by Miss Moulton and Miss Griffin—was Andreis, Wm da Costa, J. Botelho, Geo. Walker, devoted to vocal selections from the Gilbert and M. Luther, Forwards. (Subs.) P. Holm and J. Sullivan operas, as set forth below. We might da Costa, Jr. mention that Mr. Windett was recalled and had to sing over again the last verse of his song; Bishop, A. Worden, Full Backs: C. Bagnall, G. like honours being accorded Mr. Mann for "Take Upton, W. Stone, ½ Backs; S. Vincent, A. a pair of Sparkling Eyes," and Mr. Brady for Scott, M. Worden, A. Gorman, W. Gray, Forhis selection from "The Cheiftain;" while Miss

Leach and Mr. Somerton's duet from "Ruddigore" was set down by many as one of the daintiest things in the whole programme. Mr. Somerton's rendering of " $H\alpha$, jolly Jenkin" was a capital performance.

YOKOHAMA AMATEUR ROWING CLUB.

The annual general meeting of members of the Yokohama Amateur Rowing Club was held on Monday evening at the Masonic Building, No. 78, Yokohama. Mr. H. C. Litchfield, President, 78, Yokohama. Mr. H. C. Litchfield, President, occupied the chair and there was a large attendance.

The CHAIRMAN, having announced the objects of the meeting, read the report and concluded by moving the adoption of the report and the passing of the accounts. He was informed that some remarks had been made as to the holding of the meeting. The Committee knew very well that there was a rule to the effect that the meeting should be held in January. But the last week in January was rather crowded. The financial year did not end until Dec. 31st and there was always great difficulty in getting the accounts wound up and finding an auditor who had some time at his dis-posal to examine them; then when they were made up and audited and the report was prepared the Committee had to select a suitable evening for the holding of the meeting, for it could only be held in the afternoon or evening. So they found in the last week of January that there were engagements for Wednesday of another club, for Thursday of another club; Friday was a mail day, and Saturday was a half holiday, of the pleasures of which they did not wish to deprive the young members of the Club at this time of the year. So that left them the last day of the month, the zist, a Sunday. He would of the month, the 3rst, a Sunday. He would not say anything about Sunday because he might be treading on somebody's toes—but Sunday was the only available day, and to use the language of charter parties and bills of lading they had to get as near January as they conveniently could, and they therefore selected the 1st of February, and this was their meeting for the year.

Mr. H. Y. IRWINE, referring to a statement in the report that no extraordinary outlay for boats was anticipated and that a few sets of oars and sculls had been ordered from England, asked for what boats were these intended.

Mr. M. SCHELLENBERG said they were for the four oars and for the double sculls, the latter

Mr. IRWINE said there was only one set of oars for the single scull boat used in all interport races, and those oars were in a very poor state. He proposed that to stimulate racing in that branch another single scull boat should be imported so that it be used in races here and if occasion arose be lent to Kobe, who always complained and with justice that their boat was inferior. This year he thought the state of the accounts would

justify the outlay.

In reply to a question the Captain, Mr. F.

J. Hall, said the cost of a new single scull would be four to five hundred dollars.

Mr. IRWINE said there had been no single scull

racing since Mr. Mottu stopped five years ago. He did not propose of course that the boat should be got solely on Kobe's account.

Mr. Schellenberg said these boats were costly and suffered greatly out here.

Mr. IRWINE said the present one had been four ears in use. Mr. SCHELLENBERG pointed out that it had

practically only been used by Mr. Irwine, others not being allowed.

Mr. IRWINE remarked that of course it was

right that none but members accustomed to them should be allowed to take out such boats. His proposal finding no seconder, however,

The CHAIRMAN put the report and accounts to the meeting and they were passed.

Certain amendments brought forward by the

Committee with reference to the proposing and seconding of candidates were then adopted.

The ballot for officers resulted as follows: President, H. C. Litchfield; Captain, F. J. Hall; Secretary, O. Strome; Treasurer, F. H. Abbey.

The announcement of these names was received

with applause.
The Committee, in addition to the above, were elected as follows: Messrs. H. E. Hayward, W. Goddard, M. Schellenberg, and Rev. W. Weston.

This result was also greeted with applause.
The Chairman thanked the members for their attendance and the proceedings terminated.

The Committee have pleasure in presenting to the Members the Thirty-Second Annual Report of the

ACCOUNTS:—These show a Credit balance of yen 1,064.25 which, it may be stated, is the most successful showing for the past six years. Out of the Balance the Committee recommend that the sum of yen 500 be devoted to the paying off of Eathing Barge Debentures.

Barge Debentures.

ROWING:—The rowing season of 1903 has in some respects been disappointing and in others very satisfactory. Rowing in the Seniors has been a great disappointment, both in the Spring and Autumn Regattas, the entries for the Senior events showing lack of interest amongst Senior oarsmen. In the Autumn Regatta two only turned out in each of the Proposents for Senior Royers and entries for the others. two events for Senior Fours, and entries for the other Senior events showing the same slackness. The Club, however, is to be congratulated on the healthy state of Junior Rowing, large entries for all events being the rule; the races were well contested and the best sport of the season was furnished by the Junior

crews. The Committee trust that this angurs well for Senior racing of the future.

The Annual Interport Regatta was held at Kobe on June 6th, and the Club is to be congratulated on their representative crews winning the Interport Fours, Paris and Double-Sculls, there being no event for the Single Sculls on account of Kobe not having a representative to meet Yokohama. Yokohama thus won every Interport event at the Regatta, a record in Interport Regattas on an opponent's course.

record in Interport Regattas on an opponent's course.

BOATS:—No extraordinary outlay under this heading is anticipated for 1904. All the boats are in good serviceable condition, they have been thoroughly overhauled, and with the exception of the new Double-Sculls have all been repainted; the Double-Sculls are still in excellent condition and require no attention. Your Committee are pleased to be able to report that two of the old Fours were disposed of during the year for yeu 90 each. A new stock of Oars and Sculls is required and an order for three sets of oars for the fours and three pairs of sculls has been sent to Messrs. E. Aylling & Sons, of Putney; this will mean an outlay of about yeu 180.

SWIMMING:—The Aquatic Sports were held as

SWIMMING:—The Aquatic Sports were held as usual, and provided a most interesting afternoon's

BATHING BARGE AND LANDING STAGE:-The new Bathing Barge is in good condition and beyond a new coat of paint for next season no expenditure will be necessary. The Landing Stage will require a small expenditure for repairs to prevent leakage. Both Barge and Stage have been hauled up at Cook's Yard, Honmoku, for the winter.

HOUSE AND PROPERTY:—During the early part of the year it was found that the roof was leaking and badly in need of repair. Tenders were invited, contracted for and the work completed; this necessitated an extraordinary expenditure for this account for the year, but the property is now in good condition, and no further expenditure is anticipated during tood.

good condition, and no further expensions and incipated during 1904.

During the season the Committee lost the services of Mr. F. Lammert, owing to this gentleman leaving Yokohama. The Rev. W. W. Weston was induced to accept a position on the Committee, and his advice was invaluable in the selection and training of the Interport crews.

JAPAN BREWERY COMPANY, LIMITED.

The sixth ordinary general meeting of share-holders of the Japan Brewery Co., Ltd., was held on Monday afternoon at the offices of the com-There were also present Messrs. W. R. Bennett, H. J. Snow, L. J. Healing, M. Russell, T. B. Glover, O. Haynemann, C. B. Bernard and J. H. Dinsdale (Secretary).

The Secretary having read the notice calling the meeting, the minutes of the last general meeting were taken as read, on the motion of Mr. Healing, seconded by Mr. Snow.

The Chairman said—This is the sixth general

meeting of the Company and the first one at which a statement of accounts from 1st January to 31st December has been presented. It is a source of pleasure to the directors that the year has been such a successful one and they congratulate the shareholders on the favourable result. tulate the shareholders on the favourable result. The gaining of the only Honorary Medal for Beer awarded at the Osaka Exhibition has been a great help to the Company, and has enabled our selling agents to increase their sales. The export business has largely developed at all China ports and Manila, and as the beer continues in favour, there is no reason why this trade should not con tinue to increase, unless interfered with by the outbreak of hostilities. The Government tax is a heavy charge on the profits, amounting to a larger sum than the net result, but notwithstand-ing this, a fair return is shown on the paid-up capital which, I hope, may be at least maintained. Owing to severe competition, it has been im-possible to raise the price of beer and for some time to come, there does not appear to be much chance of accomplishing this. Last August we paid an interim dividend of yen 2.50 per share, and we now recommend yen 6.00 per share as a final dividend for the year. The net profit amounts to yen 101,793.10, and these two divi-dends will absorb yen 76,500,00, or 17 per cent, per annum on the paid up capital. You will see from the accounts that it would have been possible for us to have divided a larger sum amongst the shareholders, but we thought it desir-able to build up the reserve fund as much

as possible, and we have therefore proposed that yen 25,000 be carried to that account, bringin it up to yen 110,000. In our opinion the reserv it up to yen 110,000. In our opinion the reserve fund is a very important account, more especially in view of the fact that we are working on a very small capital. Last summer the demand for "Kirin" was so great that it was with great difficulty we filled orders, and it may become a question, later on, whether an extension will not be necessary. Nothing will be done in this direction without careful consideration, but should it be decided to enlarge the canarity of the Breit be decided to enlarge the capacity of the Brewery, it will become imperative to issue either more debentures or raise fresh capital. The Managing Director has left for England on a short leave of absence, but expects to return to Yokohama by the middle of May next. For the present I am, as Chairman, taking over his duties. With these few remarks I propose the adoption of the report and accounts for the year.

Mr. Snow seconded and the motion was carried. On the motion of Mr. Healing, seconded by Mr. Bennett, Messrs. Jas. Dodds and O. Haynemann were re-elected directors.

Messrs. F. J. Hall and J. F. Cox Edwards were re-elected auditors, on the motion of Mr. Russell, seconded by Mr. Healing.

Mr. Healing said he thought the general meeting would be more largely attended if it were held in the Settlement.

The CHAIRMAN replied that that question had been considered by the Directors, and they thought it was better to have the meeting at the brewery, so that shareholders might see their property. Mr. Healing's suggestion, however would be borne in mind by the directors.

The CHAIRMAN announced that the dividend warrants would be issued the following day, and the meeting dispersed.

Your Directors have now the pleasure of presenting herewith, the audited Accounts for the Year ended 31st December, 1903.

Deliveries for the period under review have been the largest since the Company started, both in home consumption and export.

It will be a satisfaction for Shareholders to know

At the Osaka Exhibition, "Kirin" was the only beer awarded an honorary medal.

The profit on Working Account for the Year after providing for all liabilities, ample depreciation to Machinery. Buildings, and Plant, and carrying over all Stocks and Stores at actual cost, amounts to yen 101,793.10.

Your Directors consider this a fairly good result, considering that the sum of yen 113,959.28 was paid to the Government for Beer Tax during the twelve

Competition has been very keen, but your Directors are glad to say that "Kirin" continues to grow in favour.

An Interim Dividend of yen 2.50 per share was paid last August, which absorbed yen 22,500, and after deducting this sum, there remains to the Credit of Profit and Loss Account for distribution, yen or Front and Loss Account for distribution, yen 83,670.73, which your Directors propose to divide as follows:—

To Final Dividend	for the year ended 31st	
December, 100	3. Vett 6 per share on	Van
9,000 shares (Fr	ree of Income Tax)	54,000.00
" Keserve rund	******************************	25,000 on
" Carry forward	***************************************	4,670.73
		83,670,72

The Reserve Fund with this addition will amount to 1en 110,000.

The present Directors of the Company are:
Messrs. Jas. Dodds (Chairman), T. B. Glover, O.
Haynemann, C. B. Bernard, W. R. Bennett and F.
S. James (Managing Director).
Under the Articles of Association two of these
gentlemen, viz:—Messrs. Jas. Dodds and O. Haynemann, retire, but, being eligible, offer themselves for
re-election.

The Auditors of the Company are Messrs. F. J. Hall and J. F. Cox-Edwards, who resign in accordance with the Articles of Association, but offer themselves for re-election at the recommendation of the

JAS. DODDS, Chairman, F. S. JAMES, Managing Director. J. H. DINSDALE, Secretary.

YOKOHAMA MEN'S READING ROOM ASSOCIATION.

The annual meeting of the above association took place on Tuesday evening in the Rooms, No. 82 Main Street. Rev. Dr. Dearing occupied the chair and there was a large attendance of

The Chairman having in introductory remarks congratulated the members on the healthy and natural growth of the institution, the various reports were adopted-that of the Hon. Secretary 2 p.m. to Baron Rosen.

n the motion of Rev. E. S. Booth seconded by Mr. Russell; and that of the Hon. Treasurer on he motion of Mr. Frank Booth seconded by Mr. Villondaki.

The Board of Direction was elected to consist of Messrs. Macbeth, Wallace, Villondaki and Devin.

Rev. E. S. Booth was elected Honorary Chair-nan, Mr. Jas. Macbeth, Hon. Treasurer; Mr. R. Wallace, Hon. Secretary; and Mr. W. R. Devin, Hon. Librarian.

The meeting adjourned with a vote of thanks

SECOND ANNUAL REPORT.

The Members of the Board of Direction of the Yokohama Men's Reading Room Association have much pleasure in presenting their second annual

report.
The past year has been one of increased success, and sustained interest, which has amply justified the expectations of the promoters.
The Board of Direction has had II meetings for transacting the business of the Association, and considering matters of interest to the members. The work has been carried on as formerly by several standing committees.

work has been carried on as formerly by several standing committees.

The new "Rooms" have been found very convenient, and have answered all the requirements of the Association. The furnishings, however, still leave much to be desired. The funds of the Association have not yet warranted the Board of Direction going to the expense of having a lavatory fitted up, but this and other much needed furnishings and improvements should be instituted as early as the Association has sufficient means in hand.

The quality and quantity of reading matter supplied in the Reading Room has been much appreciated. The Honorary Librarian has made arrangements by which members may take home for perusal, magazines, &c., which have been on the table for a certain period. This privilege has been much appreciated, and taken advantage of by the members.

members.

The list of periodicals has been revised for the coming year, embodying recommendations of the Hon. Librarian which are the results of his observations of the tastes and desires of the members. The volumes in the library now number 64, 29 having been contributed during the year, for which the thanks of the Association are due to several dunors.

The roll of actual members now contains names

There has been an attendance at the rooms during the past year of 5,400, an average of 450 per month. This compares very favourably with last year, the average then being 275 per month. One member of the reception committee has been on duty each evening to look after the interests of those pre-sent. While the rooms are used by members before office hours in the morning and after dinner in the evening, as well as occasionally during the day, yet the rooms are most popular from the time of office closing in the afternoon till dinner, and the largest

attendance is usually at this time.

One social afternoon was held during the year with

One fireside lecture was given with an attendance

Two Ping-pong tournaments have taken place with

Two Ping-pong tournaments have taken place with 16 and 21 entries respectively.

A new feature in the life of the Association has been the debates which have been arranged by the Literary Committee. These debates are likely to become, in the future, quite a feature of the Association. Altogether 5 have been held during the past year and the meetings have been well attended and troops enjoyable.

year and the meetings have been well attended and most enjoyable.

Another new departure has been the supplying of light refreshments in the rooms. These refreshments have been supplied to members at little more than cost; nevertheless this has become a slight source of revenue, and it is hoped that this department will be further developed and extended in the future.

On reviewing the work of the past year it is grati On reviewing the work of the past year it is gratifying to note the interest which has been displayed by the younger members. Still as an association of this kind depends entirely for its success on individual efforts, it is hoped that each member will feel the responsibility which rests on him and do his utnost to promote the wellfare of the Association.

For the Board of Direction

R. WALLACE, Honorary Secretary.

According to Tokyo papers, the Russian Lega-tion in Tokyo has received several lengthy telegrams from home since Jan. 29th. M. Harmand, (Nob the French Minister, paid a visit on the 30th at tions.

ENTRANCE TO KOTO GAKKO GRANTED.

On several occasions during the past four years efforts have been made to obtain for the graduates of Christian schools of a certain grade the privi-lege of entrance to Koto Gakko: i.e. schools preparatory to the University. Those interested in these efforts will learn with pleasure that the privilege has now been granted by the Depart-ment of Education. To many this is of sufficient importance to warrant a brief statement of the essential facts in the history of the case.

In 1899 what is known as Instruction No. 12 was issued under the sanction of the Minister of Education. Prior to that time Meiji Gakuin, Aoyama Gakuin, Doshisha, and perhaps other schools, had been granted Chu Gakko (Middle School) licenses; but as Instruction No. 12 forbade all religious instruction and services, "even outside the regular course of instruction," those who hold to the principle that schools carried on by Christian instruction and services. tian missions should be avowedly Christian institutions were forced to surrender the licenses along

with their attendant privileges

In the hope of obtaining relief, a petition was presented to the Minister of Education requesting that the Instruction might be restricted in its application to such Chu Gakko as were supported by public funds. That petition the Minister felt by public lunds. That petition the Minister left himself unable to grant; but some time afterwards regulations were issued by which the graduates of such schools as Meiji Gakuin were allowed the privileges of those of Chu Gakko regarding admission to Koto Gakko though the schools were not allowed the name Chu Gakko. schools were not allowed the name Chu Gakko.

This concession on the part of the Department of Education was understood to be and was accepted as a final settlement of the question; but during the spring of 1902 new regulations were issued requiring the graduates of all schools excepting Chu Gakko to pass a special examination, in addition to the examination required of graduates of Chu Gakko, in order to enter Koto Gakkō. Also a fee of five yen was to be paid for this special and preliminary examination.

This was a manifest injury to Meiji Gakuin and similar schools; and accordingly shortly after the new regulations were issued, Dr. Ibuka, Mr. Honda and Mr. Kataoka laid the case before the authorities and endeavoured to obtain relief. In addition to this a letter was addressed to the Minister of Education, signed by representatives of Meiji Gakuin, Aoyama Gakuin, To-hoku Gakuin, and Doshisha, and designed to bring the matter to his attention from the point of view of foreigners deeply interested in the welfare of the institutions affected by the regulat tions. This request was received with great courtesy and with something of encouragement for the future; but for the time being the Depart-ment was unable to comply with it. Dr. Ibuka and Mr. Honda therefore decided to make an attempt in another direction; and in this they were successful.

Included in the Government system of education are a number of Semmon Gakko: i.e. schools which prepare students for a profession without the necessity of their passing through tht University. Among these are the Commercial College, the Foreign Languages School, the Agricultural College at Sapporo, one or more Polytechnic Schools, and a number of Medical Schools. In fact, these are the schools which a considerable number of the graduates of Meiji Gakuin and similar institutions prefer to enter; but until recently they were open only to the graduates of certain Government schools and to students passing special examinations. After a painstaking presentation of the case by Dr. Ibuka and Mr. Honda, the regulations for entrance were changed so as to include "graduates of schools re-cognized by the Minister of Education as equal or superior to Chu Gakko." The first Christian schools to obtain such recognition were Meiji Gakuin and Aoyama Gakuin. Subsequently it was obtained by Doshisha, Tohoku Gakuin, and perhaps others. It has also been granted to the Chuto Kwa (Middle Department) of Gakushin (Nobles School), and to several Buddhist institu-

But the privilege of admission to Semmon

Gakko was not only valuable in itself. As Semmon Gakko no less than Koto Gakko belong to the Government system of education, and as the grade of scholarship for entrance is the same for both, the privilege of admission to one was logically a promise of the privilege of admission to the other. Accordingly towards the close of last year Dr. Ibuka and Mr. Honda called upon Mr. Kubota, the present Minister of Education, who promised to inquire into the matter. Subsequently they called upon Mr. Koba, the present Vice Minister, and also upon Mr. Matsui, the Director of the Semmon Gakko. These gentlemen told them that the request would be favourably considered; and on January 25th of this year there appeared in the Official Gazette a regulation extending the privilege of entrance to Koto Gakko to m graduates of schools recognized by the Minister of Education as set forth in Article VIII, No. 1, of the regulations for entrance to Semmon Gakko.

This gives to such schools as Melji Gakuin, Aoyama Gakuin, Tohoku Gakuin and Doshisha, all the privileges of Chu Gakko. They have besides, within certain limits, greater freedom than Chu Gakko in determining their curriculum. Such action on the part of the Department of Education is also evidence that it is coming to set a higher estimate than formerly upon the value of private schools, and that it consents to recognize their right to freedom in the teaching of religion. Looking to the future of Japan the importance of the adoption of these principles by the Department can hardly be over-estimated. On the other hand the right of Christian schools to do their work without restriction puts upon them a new responsibility to do it well. WILLIAM IMBRIE.

AN HOUR'S HAPPENINGS.

There is in the Fukuin Shimpo a charmingly suggestive description of a street crowd in Tokyo. To most foreigners the clamour of such a scene is like that of Babel, but in this description the writer makes us see what he saw and hear what he heard. We hear the common speech of the people andlike that which we hear in some parts of London -it is not easy to understand. The scene is described somewhat as follows:-

It was on Saturday, the asst of November, at twenty minutes past three in the afternoon. we were turning a corner of Enoki Cho in Ushigome, all of a sudden we were startled by a great noise. Looking to see what the matter was, behold a huge pine tree some forty feet high and so large that three men could scarcely encircle its trunk. The tree was on wheels drawn by some score of men crying Eiya! Eiya! as they pulled

But one of the branches reached so high skywards that the tree could not pass under the telephone wires. Then there began a great bustle and a clamour for ladders or poles or something to get the wires out of the way. While this was going on business men and jinrikisha men, and cart-pullers, and apprentices, and students—people of all kinds and sorts— stayed their steps there. They were struck with wonder at the grandeur of the tree, the vigour of the work-men, and the greatness of the undertaking. All were waiting open mouthed to see how this great tree, with branches spreading out like the tentacles of a huge cuttle-fish, could be made to pass under the wires.

"What a great pine! Where are they taking

"Don't you know? Worse luck for you."

"Do you know, then?"
"I should say I did. It's for Tanaka, the
Minister of the Imperial Household. But it's

curious to be taking a big fellow like this to a country place like Mejiro."

"So it is, indeed. It's different enough from a ten sen* pine that you got for two sen on a festival night."

* In speaking of money the peop'e use the old terms,—ryo for yen, ikkwan for ten sen, nthyaku (mon) for two sen, etc. In like manner not many years ago in the United States people still spoke of sixpence, and ninepence, to designate 12½ cents and 16\frac{3}{2} cents.

Dividend of Nippon Railway Co.

Lividend of Nippo

"Don't talk nonsense. Look at them now There are five men on the cart to lead the others and there must be forty or fifty besides. How much do you suppose it costs? Not less than 20 or

30 yen a day." "
"H'm! and besides the pine is not to be had

for nothing."

"For nothing! Of course not. What do you think of giving 5,000 yen for it? A foolish thing to do isn't it?"

A young fellow with a towel over his shoulder was talking thus with a man who seemed to be a jurikisha puller. Suddenly there pushed in between them without any ceremony, or by your leave, a being who, but for her hair, would have been taken for a man. Her face was like leather and her overlanging forehead some five inches wide. Licking her upper lip and turning up her nose she said:

nose she said:

"I don't know whether he's a Minister, or who he is, but I know that my children got into trouble with the policeman just because their kite string got tangled in the wires. And now they won't fly their kite that they like so much."

We were struck with a deep feeling and turned away without a word. When a Minister's constraints are considerable of the structure of the structure

cerned no one is censured for putting up ladders and poles. It is the children of poor parents who are scolded for tangling their kites in the wires. F. M.

FUNERAL OF MR. C. S. MOSS.

The funeral of the late Mr. C. S. Moss took place in Shanghai on January 28. The deceased was a son of the late Mr. C. D. Moss of Yokohama and was a member of Victoria Co., No. 7, S.F.B. and A. Co. S.V.C. The funeral cortege started from the Nursing Home at 3.15 p.m. in charge of the Chief Engineer, being preceded by an escort of Sikh troopers, Volunteers, the Tor-rent and Deluge Fire Companies, and the Town Band, followed by the Mih Ho-loong truck draped in black, on which rested the coffin, and over which the deceased fireman's helmet was displayed. There was a large number of wreaths. The truck was drawn by members of Victoria Co., then came the chief mourner, Sir Hiram Shaw Wilkinson. There were also present Mr. W. Wilkinson. Inere were also present Mr. W. Harris, H.B.M.'s Board of Works; Mr. J. Stern and members of the staff of Messrs. Reiss & Co.; Messrs. E. J. Cooper, W. E. Keay, C. M. D. Davidson, Rose, J. Groundwater, J. Smedley, and other friends of deceased's family. The different fire companies in numerical order followed by a large number of proiders in severe. followed by a large number of residents in carriages brought up the rear; the procession passed through Range, Szechuen and Nanking Roads to the Bubbling Well cemetery, where a number of people were waiting. The Rev. C. J. F. S. Symons, B.A., delivered a touching address at the chapel, the service at the grave being very impressive Shanghai Mercury.

THE GERMAN EMPEROR'S SPERCH.

联治 计五单三尺 传日 第三端底 植物技术

The remarks made by The Times on the Kaiser's Waterloo speech are to be commended to the perusal of those that condemned the comments recently published in our own columns. An indiscretion on the part of the Emperor is not so extraordinary as to be altogether unexpected, but that it should find detenders surprises The Times, we think, says what there us. is to be said and says it with moderation and good temper:

good temper:—

On Saturday the German Emperor made his first public speech since he underwent an operation for an affection of the throat on November 7. The re-appearance of so notable a character on the world's stage was awaited in this country with sympathetic interest; and even those who are least inclined to approve the policy of William II. would in ordinary circumstances have greeted with genuine pleasure the first sign that his manifold energies had only received a temporary check. The hundredth anniversary of three Hanoverian regiments was a natural occasion on which to refer to the former connexion between the British and Hanoverian Armies and to the good service done by the German Legion, recruited largely from Hanoverians, in the Peninsular War. The army order read by the Chief of the Emperor's Military Cabinet, Count von Hulsen-Haseler, to the regiments on parade referred to the battle honours of the German Legion in terms to which Englishmen, when due allowance is made for the difference between English and German idiom, would be ready to subscribe. The defence of La Haye Sainte by 400 men of the German Legion under Baring was an exploit which ranks among the proudest feats of arms, and its tactical importance in the great battle of Waterloo has certainly not been overlooked in this country. We are not disposed to belittle the part played in the Napoleonic wars by the Hanoverian subjects of George III. and other non-British elements in the British Army, and the Emperor's army order would, if it stood alone, have commanded general assent. But the Emperor's speech at the banquet which followed the parade contained a sentence which, whatever the intention of the illustrious speaker, can only be described as unfortunate. His Majesty drank to the health of the German Legion "in remembrance" of its incomparable deeds, which, in conjunction with "Blucher and the Prussians at Waterloo, saved the "British Army from destruction." If we are not disposed to undervalue services of Germans in British pay, we are On Saturday the German Emperor made his "Blucher and the Prussians at Waterloo, saved the British Army from destruction." If we are not disposed to undervalue services of Germans in British pay, we are still less inclined to forget what we owed to the support of our allies in the three days' struggle which finally freed Europe from the terror inspired by the name of Napoleon. The debt has been acknowledged from the first. The Duke of Wellington, in his official despatch from the field of Waterloo, wrote, "I should not alo justice to my own feelings or to Marshal Blucher and the Prussian army if I did not attribute the successful result of this arduous day to the cordial and timely assistance I received from them." No foreign soldier was ever honoured in this country as Prince Blucher was honoured, and all responsible British historians have done full justice to the decisive action of his army. But, with all respect, we venture to maintain that to speak of saving the British Army from destruction is an absurd over-statement. At the lowest computation the honours were easy when the Prussians first came into action, and though without Blucher's support Wellington could not have turned a stubborn defence into an irresistible advance, yet destruction cannot be said to have been impending at half-past 4 o'clock on June 18. William II, has, no doubt, only given the weight of his authority to a theory which is current in his Empire, but the word "destruction sounds strange in the mouth of the grandson of a British Queen, of a British Field-Marshal, a chivalrous soldier, and a close student of military history. In reviving the memory of a former brotherhood in arms, it may have been His Majesty's intention to efface the recollection of the language used throughout the Hoer war by his subjects when speaking of British officers and soldiers—language which was so feebly repudiated on one occasion by his present Chancellor. If this be the case, it can only be matter of regret that His Majesty has chosen words which cannot but grate on English ears, and that he ha 1,560,000

THE LAW COURTS.

LIBEL CASE.

Mr. Geo. Syme Thomson, representative in Yokohama of Messrs. Dodwell and Company, L'td., has filed a libel case in the criminal section of the Yokohama District Court against Mr. K. Maejima, editor, and Mr. T. Wada, publisher of the Yokohama Shimpo. The trial of the accused was to have compensed on Jan.

publisher of the Yokohama Shimpo. The trial of the accused was to have commenced on Jan. 29th, but was postponed at the request of counsel—Messrs. Vamada, Koide and Inouye—who were not prepared to go on with the case.

According to the complaint, which was presented on Dec. 7th last by Mr. R. Masujima representing the plaintiff, the journal published on Dec. 4th a statement which reported that a foreign firm employing six steamers carried to America Japanese girls of ill-fame without passports.

CLAIM FOR SNAKE-GOURDS.

The hearing of this case, instituted by F. Shi midzu against Messrs. Winckler and Company chaiming yen 195.50, was resumed in the Yokoharua District Court before Judge Yasuda on Feb. 1st.

Plaintiff's Counsel applied to the Court for permission to make a correction regarding the number of snake-gourds set out in the complaint.

The Court granted permission.

Defendants' Counsel extended the statement which he presented to the Court at the previous which he presented to the Court the previous hearing, with regard to the man who supplied the gourds to the defendant firm, stating that the firm purchased gourds from a dealer named M. Katayama, and not from plaintiff.

Having presented a pass-book, plaintiff's Counsel held that plaintiff supplied the merchandise to Messrs. Winckler and Company on July 31st last when the foreign firm confirmed their receipt with an office stamp.

Two Japanese M. Tanaka and K. Sato were

examined as witnesse

M. Tanaka deponed that on behalf of plaintiff, Z. Shimidzu, w banto in the employ of Messrs. Bethell Bros. No. 70, Yokohama, witness enquired of Messrs. Winckler and Co. on July 30th last ed of Messrs. Winckler and Co. on July 30th last whether they would purchase snake-gourds at sen.000 per piece for 3rd class, 714 pieces in all; sen.019 and class, 1,774; sen.09 1st class, 2,940; and sen.039 choicest, 7,220—making 395.50 in all. The effer was accepted and the whole of the gourds were delivered at the godown of Messrs. Winckler and Company. The gourds were inspected on Aug. 3rd when the business was settled. He received, also, on behalf of plaintiff, yen 200 on account from K. Shiojima, chief banto of the firm. The witness remembered that the of the firm. The witness remembered that the payment was made by cheque drawn by Messrs. Winckler and Company. The balance, yeu

payment was made by cheque drawn by messis. Winckler and Company. The balance, yen 195.50, was still unpaid.
Cross-examined by defendant's counsel, witness stated that he did not know whether plaintiff sold similar merchandise to the same firm on other occasions. Witness did not know the broker, M. Valtacka and did not receive yen 200 from this Kataoka, and did not receive yen 200 from this broker. Plaintiff was a banto in the employ of broker. Plaintiff was a banto Messrs. Bethell Bros., No. 70.

K. Sato, another witness, stated that he carried a letter from plaintiff to Mr. K. Shiojima, which note asked for payment of merchandise furnished to the foreign firm. The date was about Aug. 3rd but witness did not exactly remember. The following day he again carried a similar letter to Shiojima for a similar purpose. The banto of the firm did not give a decisive reply. Of the 31 bales of snake gourds, five bales were removed from the compound of Messrs. Bethell Bros. to defendants' godown. The five bales were carried by a coolie, Kyugoro.

This coolie was examined as a witness. He stated that he removed five bales of an article on Betheil Bros to Messrs. Wincker and Company, He did not know what was in the package.

Defendant's counsel introduced in Court a Produce Purchase Book and a Cash Book which

The Court gave consent to examine Katayama only.

was adjourned till February 15th The case at to a.m.

P. SARDA v. M. A. RAGH.

The hearing of this appeal case, in which appellant/petitions for the quashing of the judgement given in the Local Court ordering him to pay respondent yen 51.54, came up again in the Yokohama District Court before Judge Kato on Feb. 2nd when judgement was delivered rejecting the appeal and ordering appellant to bear

K. SHIMODA v. F. RETZ.

The hearing of this case, in which plaintiff petitions for the return of various gold coins, valued at yen 305, deposited with defendant, began in the Yokohama District Court before Judge Kato on February 4th.

Mr. Ideura was present for plaintiff and Mr. Nagashima for defendant.

Plaintiff's Counsel stated that plaintiff borrowed yen 300 from defendant, offering various gold ed yen 300 from defendant, offering various gold coins—I piece of old Japanese 20 yen gold, I new Japanese coin of 10 yen; 3 U.S. \$20; one U.S. \$5, and one each of Great Britain, France, Germany, Austria-Hungary, Russia and Spain—as guarantee. The borrowed money was paid back on December 12th last but defendant had not returned the guarantee.

The Court required plaintiff's counsel to certify the value of some of the foreign coins which were omitted in the complaint. The Court also reminded plaintiff's representative that the coins were the object of dispute and as he was unable to state their value, the case must be adjourned. Counsel promised the Court to insert the proper values in the complaint before the next hearing.

MR. DAVIDSON ON MANCHURIA.

Mr. J. W. Davidson, the well-known author who has for some half score years been United States Consul of the whole of Formosa, and who is now officially nominated to the newly established Consulate-General at Antung has been interviewed in England. We extract the following from an exchange :

an exchange:—

Mr. J. W. Davidson, United States Consul at Formosa, has just arrived in England, after a four months' tour in Manchuria and Korea. Every assistance was given to Mr. Davidson, who had a special saloon car, which was stopped wherever he pleased. The Consul did not confine himself to the railway rotte in Manchuria, but visited every city and village of importance in the whole country. From Formosa Mr. Davidson went first to Japan, thence to Korea and to Peking, and afterwards to Port Arthur. There are, he said, in reply to questions put by a Renter representative, many misconceptions about Manchuria. Within a very short time the country will be independent of all outside sources for both flour and beef. Another misstatement is that the

July 31st last from the compound of Messrs. Hour and beef. Another mistatement is that the Bethell Bros to Messrs. Wincker and Company, He did not know what was in the package.

Defendant's counsel introduced in Court a but one building, viz., the Russo-Chinese Bank at Produce Purchase Book and a Cash Book which showed that the foreign firm purchased the goods in dispute from M. Katayama and paid him in full for them. Counsel asked the Court for leave to examine M. Katayama and K. Shiojima as within the condition two years ago, but not to-day.

I must keep away from politics, but the general impression I gethered was that Russia would give Japan a free hand in Korea in return for similar privileges in Manchuria. There is an idea that the Impression is gethered was that Russia would give Japan a free hand in Korea in return for similar privileges in Manchuria. There is an idea that the natural outlet for Japanese surplus population is Formosa, but this can never be. Formosa is a tropical country, and the large Chinese population is supported entirely by agriculture. Japanese are unable to work in the fields exposed to the tropical sun. On the other had, Korea is the natural outlet for Japan's surplus population for two reasons. The climate is more like that of Japan, and the dulness and comparative stupidity of the average Korean enable the Japanese to compete more favourably with him than with the keen and industrious Chinaman of Formosa. Regarding Russia's strength in Manchuria, every place of importance on and off the railroad is kept by troops, whose number, inclusive of the garrison of Vladivostok, is not less than 200,000. It is a fact that the Russians are occupying every city of even the most trifling importance in Manchuria, but except for a few inunigrants who have commenced farming on a very small scale near Hailar, the old Mongolian capital in Northern Manchuria, there is no evidence of any attempt to bring immigrants into Manchuria for the purpose of the occupation of agricultural lands. There is maprit of commercial unrest as to the future of the country. I found in the remoter cities that the Russian shop-keepers were very doubtful as to the duration of the occupation, so much so that they refused to invest heavily in commercial enterprises. The Russian position along the line of railway is, however, quite another matter, and splendid cities are springing up along the track. From a commercial standpoint Harbin is the foremost. But three years old, this place has a Russian population exceeding 40,000, and in its rapid growth and general social condition resembles very closely a "boom" mining town in America.

America.

The new town of Port Arthur is being constructed on lines which will make it the most attractive residential city in China. The Government Board requires that every building erected shall have architectual beauty, and the Chinese are not permitted to live or build in the new town. The result is that the city, which already has a population of 20,000, is one of exceptional beauty. The Russian Viceroy told me that he had encouraged the construction of retail shops in Port Arthur so that the soldiers might be able to buy in a cheap market. It was, however, his intention that Dalay should be the great commercial and manufacturing city, and and all applicants who wished to erect factories in Port Arthur were always told that they must be built in Dalany. One point that will favour the eventual success and prosperity of Dalay in that the Custom House well be established there, or close by, and that while the Government can at any time close Port Arthur to all foreign shipping, the assurance has been given that Dalay will always remain open. One small steam tug could easily keep the harbour free of all ice.

Turning to the outlook for British and American trade in Manchuria, the Consul said:—The occupation of Manchuria by Russia will not so seriously affect British trade as American trade, for the reason that the products at present shipped into Manchuria from Eugland are not largely produced in Russia, whereas, in the case of American goods, the four original tients are those of which Russia is a natural iron England are not largely produced in Russia, whereas, in the case of American goods, the four principal items are those of which Russia is a natural and large producer. These items are kerosene oil, cotton goods, floor, and lumber. The production of wheat in Manchuria is increasing to a phenomenal degree. Consequently flour mills are springing up everywhere, and the city of Harbin aloue will from the beginning of 1904 produce 800,000 lbs. of flour daily. Regarding the lumber trade, it has been stated that the Yalu timber concession was arranged by Russia for political purposes only. While there may be some suggestion of truth in this it is an interesting fact that the Yalu Lumber Company is so large and successful a producer of lumber that the demand in Manchuria formerly filled from America. Is now being met entirely by this company. The commercial operations of this so-called political concern are very real, for, unaided, it has practically destroyed the American trade. At present a saw mill is in course of erection which will be the third largest in the world. largest in the world.

follows: Sciyu-kai, Messrs. S. Fhara, S. Isobe, and S. Kuridzuka; Progressists, Messrs. K. Hato-yama, S. Tsunoda, N. Seki, S. Hoshimatsu, and K. Oishi; Liberals. Mr. S. Nishiyama; and non-party, Messrs. G. Fukuchi, U. Taguchi, T. Takanashi, S. Miwa, T. Akiyama, and K. Hayashi.

To make preparations for welcoming the foreign officers who are on the new warships Nisshin and Kasuga, over a hundred gentlemen, including Governor Sufu and Mayor Ichihara, held a con-ference on Jan. 29th in the Yokohama Chamber of Commerce, the Mayor presiding. Governor Sufu, Mayor Ichihara and Messrs. K. Otani, S. Hiranuma, J. Kimura, S. Kurusu, and F. Watanabe were elected an executive committee, and the promoters decided to spend ven 7,000 as ex-penses. The place and date for welcoming the guests will be fixed by the executive committee.

The Rev. Arthur H. Smith, D.D., the well-known issionary and writer, who is a keen observer of Chinese matters, says, in a recent issue of the Congregationalist, that it is difficult to discover that the Chinese have learnt anything during the last eight years; "nearly all her strong men have disappeared, and in the supreme crisis of her fate she is left without a corporal's guard of states-men." One of the principal features in the situation is the utter insincerity of most of the case) is that nothing gets done.

New Guinea is going through troublous times just now. An Adelaide despatch of the 5th Jan. gives the following two items of news:—News has been received from New Guinea of the disastrous ending of the Anglo-Australian Exploring party. The leader of the expedition, Miller, is dead, and several others of the party are missing. A portion of the party has arrived at Mount Leonora.—New Guinea natives have attacked and massacred two Europeans, two Chinese, and longing to the New Guinea Company. On the same day an attack and attempted massacre was made at another station. A punitive expedition subsequently shot down 25 of the hostile natives.

AMERICAN TOPICS.

According to all accounts, the Argentine Republic is now harvesting a record-breaking wheat crop. It is estimated at 85,000,000 centals, 62,400,000 centals of which will be available for export. The largest wheat croppreviously harvested was in 1900, when it reached 60,000,000 centals.

track and 186 miles of subway yet to be constructed before grade tracks are totally abolished.

Miss Ruth Cleveland, the eldest child of Mr. Grover Cleveland, died at the Cleveland home in Bayard Lane, Princeton, N.J., on January 7th. The cause of her death was heart failure brought on by a mild attack of diphtheria. She had been ill only four days. Ruth Cleveland was born at No. 961 Madison Avenue, New York, then Mr. Cleveland's home, on Oct. 3rd, 1891.

The Historical Society of Massachusetts has appealed to Congress to save the hulk of the old frigate Constitution—"Old Ironsides"—from de-Mr. Uchida, Japanese Consul-General at New struction. She is now lying in the White Star York telegraphed on Jan. 30th that raw silk line dock at Charlestown, Mass. The petitioners which was in a dull state had revived slightly. mission as a training ship, so that she may be stationed at suitable times at various points along the Atlantic seaboard as a reminder of what the Navy formerly achieved through her for the country.

The Tokyo candidates in the coming general General of the United States, there were a greater follows: Strucker Masser F. Physical States of smallpox and a linear follows: Strucker Masser F. Physical States of smallpox and a linear follows: Strucker Masser F. Physical States of smallpox and a linear follows: number of cases of smallpox and a heavier mor-tality among the patients in Philadelphia during the week ending December 19th than in any other city in the world except Rio Janeiro, during a corresponding period either in November or December. Ninety cases and twenty-two deaths were reported in Philadelphia during the week named, and there were ninety-nine cases and fiftynine deaths in Rio during the week during November 29th.

> Wall-street practically has lost one of its most interesting characters. Mr. Russell Sage, although still insisting upon visiting his office once twice a week, has departed from his lifelong or twice a week, has departed from his hielong habit of arriving there daily with clock-like regularity, regardless of weather conditions, and, in fact, is now seen in Wall-street at infrequent intervals. He has gradually withdrawn from participation in great financial affairs, only at the earnest solictation of his friends and Mrs. Sage, but the trusted employes who have served him many years still handle the loan business on the Stock Exchange. Mr. Sage, who is 87 years old, spends most of his time in his new Fifth-avenue some, and is said to be in his usual state of health.

During the year just closed 37,000 emigrants left Germany for the United States. Since 1900, when the number was 20,000, it has steadily risen. situation is the utter insincerity of most of the Only German subjects are included. Emigration agents expect that during 1904 the stream of emigrand in the way of all reform, and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reform, and the result (as expect that of all formstand in the way of all reform, and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reform, and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reform, and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the result (as expect that during 1904 the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the stream of emigrants from Germany will exceed that of all formstand in the way of all reforms and the stream number applying for passes to leave the country is extraordinary. Among the Slovacks of the Western Carpathians entire districts are being depopulated. The German Government is building still more extensive barracks for the thousands who pour through Berlin to Hamburg and Bremen, while the great steamship companies are doing the same thing at these ports. The North German Lloyd and Hamburg-American lines expect to ship nearly one quarter of a million emigrants during March, April and May.

Mr. Marshall Field has put the quietus upon the effort to create a boom in his behalf for the Deenor to create a boom in his behalf for the Democratic nomination for President. South Bend, Ind., furnished the starting point of the boom, which had its birth in an editorial in the South Bend Times, saying: "A movement is on foot among Western Democrats to start a Presidential boom for Marshall Field. The claim is made that Marshall Field could carry Chicago by a majority of 50,000, and that this would assure him the State of Illinois in the electoral college. There is every of Illinois in the electoral college. There is every reason to believe that his nomination would prove satisfactory to the business interests of the East, and that he could count on carrying New York and Jersey. A Democrat by nature, choice and education, he would, as President of the United States, and the Minister of Finance, accompanied by the new Manager of the Yokohama branch of the Russo-Chinese Bank.

Chicago has planned 848.05 miles of elevated give the country an administration such as Samuels at the country and administration such as Samuels of the railway tracks and 537 miles of subways within J. Tilden would have given it, had the will of the its boundaries. During 1903, 500.68 miles of people prevailed in 1876." "It is useless to disconstructed, leaving 347.19 miles of elevated sider such a thing."

CORRESPONDENCE.

LORD KELVIN'S BELIEF.

(To the Editor of the "Japan Mail.")

(To THE EDITOR OF THE "JAPAN MAIL.")

SIR,—Because the great majority of the readers of your journal are interested in the thoughts of thinkers, may I trouble you to insert the following short extract from the columns of an English paper? Lorit Kelvin had received a letter asking his opinion on some questions as to the authority of the Bible. His refly is published in a recent issue of the Guardian. He says: "I have never read theological books myself, being wholly occupied with science, which I find full of the evidence of God. And I find no reading of theological books needed to keep me contented with the religion of my childhood. There is, I know, the 'Life of George J. Romanes,' who had great intellectual difficulties, but became a believer in Christ, during the last years of the his life."

To well-informed foreigners living in Japan there is nothing new in the fact that Romanes and other persistent seekers after truth became believers in Christ, even though through "great intellectual difficulties"; nor in the fact that Lord Kelvin and many other living scholars are satisfied with the faith of their childhood. But since some Japanese, influenced over-much by the reaction from superstition toward materialism in this land are in danger of being led to believe that men of intellect in the West have given up their early faith, it is well to keep the facts before them.

Yours, with sincere thanks,

Yours, with sincere thanks

ONE WHO WANTS TO KNOW. January 27th, 1904.

MISCHIEVOUS SCHOOLBOYS.

To the Editor of the "Japan Mall."

Sir.—A letter appeared in the columns of your Wednesday's issue complaining of the conduct of certain boys attending my school, whom the complainant somewhat offensively describes as my "gang." Your correspondent is presumably an unattached member of the police force who has made a special study of schoolboy criminology for some time past, or he may be some self-appointed mentor of youthful morality who has more than a nodding acquaintance with every "harmless dog "that has been stoned and all the "innocent birds" that have been slain in this neighbourhood during the last few years of grace. Be that as it may, he has in this instance at least allowed his zeal to over-step his discretion, for his letter contains so much exaggeration and misrepresentation, and the insinuation, left to be instilled into the public mind that an awful state of brutal villainy exists among the boys of this school, is so essentially false, that I must perforce put the sober light of day and common-sense on the products of his imagination—heated doubtless by the excitement attendant on the detection and pursuit in the hours of darkness of these brutal malefactors, whose names only his consideration for their mothers and sisters makes him forbear from revealing to an outraged public.

I will not, sir, attempt to justify such a villainous proceeding as the laying of a pole across a lane To the Editor of the "Japan Mail."

revealing to an outraged public.

I will not, sir, altempt to justify such a villainous proceeding as the laying of a pole across a lane after nightfall. It is an improper and foolish thing for even high-spirited boys to do, and the offenders have suffered due punishment for their heedless and discreditable conduct. I will, however, show that your correspondent has the failing of the proverbial "hobby," for he does not scruple to stretch a point or two to make out the blackest case he can against the victims of his zeal. the victims of his zeal.

the victims of his zeal.

In the first place, sir, the number of the malefactors is stated by your correspondent to be 12 or 15. It was, in fact, 7—and they did not all have the privilege of belonging to my 'gang.' But in the excitement of the chase such a slight miscalculation excrement of the chare such a sign discalculation is intelligible. But what is not intelligible is that your correspondent should declare—and "X" no doubt is an honourable man—that the said pole was laid across the darkest part of the pole was latin across the darkest part of the road, when it was under the full blaze of an electric light. There happens to be one at the corner. This is unfortunate for the veracity of your correspondent, but it really is the case. Under the circumstances the worst that could have happened circumstances the worst that could have happened would be that the bettoes of some approaching carriage would have had to descend and remove the offending log before being able to proceed. This would no doubt have led to some dreadful language the nart of the bettoes and some righteous inon the part of the bettoes and some righteous in-dignation on the part of the occupants of the carriage, and would surely have afforded some wicked amuse-

his letter than his anxiety for the legs of local horses. Thirdly, sir, your correspondent, after prefacing his remarks with a distinct though uncivil reference to the school over which I have the honour to preside, proceeds to enumerate specific acts of misdemeanour connected with the use of the catapult and the tripping up of an elderly gentleman. It is unfortunate for the credit which he doubtless wishes to be attached to his letter that the incidents referred to occurred some two and some three years ago. It is palpably to his letter that the incidents referred to occurred some two and some three years ago. It is palpably absurd, as it is gossly unjust, to catalogue all the offences which youthful exuberances have committed in this place during the past three years and, by insimuation, lay them at the door of a school which has existed but a single year. It is against this wholesale misrepresentation of facts on the part of your correspondent, this tarring of a particular school with his malicious and defaming brush, that I wish emphasically to protest. phatically to protest. I am, Sir, faithfully yours,

CHAS. E. BRUCE-MITFORD.

January 28th, 1904.

TO THE EDITOR OF THE " JAPAN MAIL.

Sit.—"X.'s" letter (in your correspondence of the 27th inst.) has amused me because I am a father of one of the so-called "Mitford's Gang." It is headed "A Warning" but surely there is nothing of such a serious nature as to warrant this rushing into print when the practice of a few box s.

serious nature as to warrant this rushing into print about the pranks of a few boys.

Perhaps "X" when he was a boy never had a catapult and never did anything that he writes about; if so, I can quite understand his "lying low" to watch the boys. This "lying low" does not appeal to me, for his plain duty as a "Man" was to stop them from doing wrong.

I am writing simply as a lover of boys and a believer in their inherent good qualities. I know they are full of wickedness but they do not deliberately desire to bring grief to any one.

In my opinion "X" should have taken stronger private steps to mitigate what he considers an evil.

private steps to mitigate what he considers an evil. Let me recommend him that on any future occasion when he sees boys pursuing a wrong course not to "lie low" but jump out like a man and stop them. It would do the boys more good and save himself a lot of time in composing letters to the Press.

Yours faithfully,

(TO THE EDITOR OF THE "JAPAN MAIL")

(To the Editor of the "Japan Matt.")

Sir,—May I express my appreciation of Mr. Mitford's letter, which, however, would have been more acceptable and convincing had he taken his own advice, and adhered more closely to the path of veracity. There is no need to quibble over trifles,—but I cannot modify any of my previous statements, with the exception of the number of lads. They certainly did not manifest any anxiety to be correctly counted, and it is more than likely that I overestimated. estimated.

estimated.
From Mr. Mitford's solemn declaration that the pole in question lay in the full blaze of the electric-light at the corner, I am led to infer that be was present on the occasion,—of which point I was not previously aware. Had he then exercised his pedagogic precision he would have been forced to admit that it was sufficiently far down the lane to be in the shadow of the corner house. However, I have no desire to turn him or his statements to ridicule, as I by no means harbour the malice towards his scholastic institution that his letter implies. On his scholastic institution that his letter implies. On the contrary, I have a full appreciation of the excellent educational work he is doing, while his apparent disciplinary power (both in and out of school) is decidedly commendatory.

The paternal "T" also reads what is not written,

if he construes my letter into praise for the milk-sop youths who lack both energy and "spunk." But

Fixil is wrought by want of thought As well as want of heart,

and the high-spirited lads of whose inconsiderate pranks I complained, will not make any the worse men if they are restrained from indulging in such "larks" as those referred to by

Yours faithfully,

Yokohama, January 30th, 1904.

TO THE EDITOR OF THE "JAPAN MAIL."

Sir,—In your issue of the 1st inst., "X" disclaims any desire to quibble over "trifles," but false insinuation and misrepresentation of facts, where the reputation of a more or less public institution like a school is concerned, do not fall into this category. They are the stuff of which libel is made.

and would surely have afforded some wicked amuse, lare the stuff of which libel is made.

The relative position of the electric light and the least degree probable that there would have been broken legs of horses, mangled human beings and a sudden demand on the medical resources of any powers of observation in the space of a few the community? All these horrible "might have beens" would suggest themselves only to one who has allowed himself to the carried away by his official, to know where it was placed) could not fail to be or officious, zeal, or who has some other motive for under the light from the corner lamp and in no quail. I am ready for the entire "gang" at any

shadow whatever. If "X" cannot see this, I recomshadow whatever. If "X" cannot see this, I recommend him to go to school again. I have a vacancy in my "gang," and we shall be pleased to do our best to get some more "precision," pedagogic or otherwise, into his cranium. He would, moreover, thus be in a position to give full scope to the new and approved policy of "lying low" and watching school boys from behind hedges, and so contribute materially towards safety of life and limb in the persons of those who traverse the Bluff road after dark. "X" denies his motive to be one of malice towards this institution. Why then his offensive references to it? The boys of my school non-ore rejoice in the name of a "gang" than he does in that of a canting humbug. Such an epithet, indeed, suggests itself for one who, under the cloak of zeal for the public welfare, deliberately tacks on to a recently opened school all

who, under the toan deliberately tacks on to a recently opened school all the youthful misdeeds of the past three years. I speak with authority when I say that the parents of the pupils, as well as the gentlemen referentially connected with the school, take the strongest exception to his

ed with the school, take the strongest exception to his insulting language.
"X's" rushing into print, however, may have been the outcome of indignation at an unfortunate catastrophe which, it is said, befel him in the fulfilment of his arduous and self-appointed task. Rumour has it that, in the hot pursuit of the malefactors—"tell it not in Gath "—his nether garments came to grief over that invention of the evil one, barbed wire. In the name of my "gang," I extend to him our heartfelt symoathy.

In the name of my "gang," I extend to him our heartfelt sympathy.

It is now fairly obvious that the real explanation of the whole matter is that "X" has for some years past been collecting in his slop-pail of youthful criminality all the misteeds of young Yokohama. He looked round for some one at whom to throw the contents, and took it that a newly started school with an untarnished reputation would do very well for a target. "Slight discrepancies of time and circumstance did not trouble him. These were mere "trifles" as long as the contents were got rid of. Meanwhile, there is some consolation in the probability that we shall be spared for a season, while his slop-pail is refilling.

I am, Sir, faithfully yours,

CHAS, E. BRUCE-MITFORD.

CHAS. E. BRUCE-MITFORD.

(TO THE EDITOR OF THE "JAPAN MAIL.")

(10 THE EDITOR OF THE "JAPAN MAIL.")

SIR.—The repulsive vituperation by which Mr.

Mitford attempts to support his quasi dignity,
prompts me to trouble you once more,—not with a
view of defending my position in any way, or of
prolonging the arguments (which are certainly getting too high-toned and personal to interest your
readers further), but to bring this correspondence to
a conclusion.

sting too high-toned and personal to interest your readers further), but to bring this correspondence to a conclusion.

So far I have purposely refrained from "showing him up" as fully as his extraordinary attitude deserved, for it is decidedly a mischievous act to bring a schoolmaster into ridicule. He has discipline to maintain in his establishment, and to ridicule him and his statements coram populo would at once impair the respect and obedience due to him from his pupils. Even now, although he no longer deserves such consideration, I refrain from further exposures.

I recognise that my object has been fully achieved. I desired to call attention to the menace to public life and safety arising from the cowardly, if not criminal, pranks of a certain coterie of boyhood rejoicing in the name of "Mitford's gang." I am not to be blamed if they have already earned that sobriquet, neither am I responsible to the Principal of the school to which they belong for any opinion I may form of their behaviour. Moreover the Master of a day school is not to be held accountable for the pranks of his pupils out of school hours. The Principal in question, however, assumes an absolutely uncalled-for role as defender of the lads in question, and after unreasonably accusing me of defaming his scholastic institution, gives expression to his feelings in a series of disgustingly vulgar misrepresentations,—which are too pregnantly eloquent of the nature of the tuition disseminated at his academy to call for any effort on my part, even were I actuated by the malica so falsely attributed to me.

His kindly (?) suggestion that I might attain to a higher level of rectitude by applying for the vacancy in his "gang" merits the retort, that the lowest forms of ignorance would be preferable to the style of education exemplified by his recent exhibitions of scholastic courtesy.

The last-but-one paragraph in to-day's effusion of sour levels are the retort of the reduced of the set of the style of scholastic courtesy.

of education exemplified by his recent examinous of scholastic courtesy.

The last-but-one paragraph in to-day's effusion of our local exponent of pedagogic dignity is too disgusting to merit more than a denunciatory reference. If the "young gentlemen" attending his institution are trained to follow such argumentative tactics, they will soon merit a second epithet in addition to that which they long since have horse.

Digitized by Google

time,—even though their ranks be marshalled by the "mighty Mitford leading on." Doubtless Mr. Mitford has long since exercised his

Doubless Mr. Millord has long since exercised his pedagogic perspicacity sufficiently to discover my identity, as I am well-known to the young miscreants whom I chased on the night referred to,—but to obviate any indecision he may have on the point, I have much pleasure in appending my name to this letter,—so that the matter can be thrashed point, I have much pleasure in appending my name to this letter,—so that the matter can be thrashed out more effectually and satisfactorily than through the columns of the Press. For, far from having exhausted my ammunition, I have so extensive a supply of facts that I could maintain a fusilade for an indefinite period, my "magazine" being well replenished by numerous letters from parents, etc., who favour me with their views on the matter. In this connection the paternal "T" may rejoice to know that his young "hopeful" is steadily developing in those "manly "forms of recreation which his fond father desires to encourage, for, one of his latest devices is to deliberately spray peas into the faces of passing ladies, in which form of gentlemanly "sport" he is apparently defended by the Principal of the scholastic institution he attends. He will receive very different treatment at my hands the next time I catch him.

Therefore,—with a poorly suppressed smille at the attitude of the heroic pedagogue screening himself behind the formidable array of scandalised dignitaries "referentially connected with the school,"—and with the expression of the wish that their names might have been appended to this last effusion of

and with the been appended to this last effusion of their protege (in order to show their full endorsement thereof) I again thank you for allowing the ventilation of the matter and beg to subscribe myself.

CLARENCE GRIFFIN. Yours gratefully. (alias " X.")

TO THE EDITOR OF THE "JAPAN MAIL."

Sir.—I observe with satisfaction that my last letter has had the effect of "drawing" your worthy correspondent "X." I congratulate him on having at length summoned up the moral courage to append his name to his contemptible attacks on this school. This serves my purpose better than any words of mine, for the public will now know exactly how much value to attach to his effusions. They will be able to put their finger on the weak point of an eccentric but well-meaning nature and to recognize in his hysterical declamations the much-to-be-pitied outpourings of a monomaniac. The only matter for regret is that such people should be allowed to roam about at large, flinging their irresponsible villifications at all and sundry. They ought to be put under at all and sundry, some form of restraint.

some form of restraint.

My sole object in writing in the beginning was to show up the misrepresentations and falsehoods X's original letter contained. But it is really unnecessary that I should say more, the revelation of X's identity does the rest for me. His affected "zeal" for the public safety so little harmonized with his methods of slandering a school, whose successful rise he has been viewing with a greenly jealous eye, that I was not far out in suggesting that he might be aptly described as a canting humbing; now that he has come out from beneath the veil of anonymity under which he was hiding, I will take a more charitable view and include him in that class of people whose mental balance is upset in one particular direction.

direction.

He gives harmless exercise to this little weakness in the keeping of a "gang" of his own—of a sabbatarian character—the ludicrous parodying of Sunday School hymns coming readily to his piously indignant lips. We can leave him to this innocent pursuk—always hoping that he will teach his pupils, oo Sundays at least, not to bear false witness against their neighbours—and he on his part might leave the conduct of educational institutions to those who know something about the business, and the well-being of school-boys, in their leisure hours, to the really responsible people, their parents.

sponsible people, their parents.

Further ink I will not waste over him and his reak of insanity.
I am Sir, faithfully yours,

CHAS. E. BRUCE MITFORD.

Yokohama, February, 4th 1904.

"AN APPEAL."

To the Editor of the " Japan Mail."

(foreigner), came to me and asked whether Ihad any copies left. I said I had not, I had printed 190 copies which I had sent to Mrs. MacArthur with my compliments. He then said he wanted a copy to give to a Japanese Christian worker who would probably contribute. In reply to my question how much he himself had given, he said he could not afford to give anything, he, etc., etc. Well, we have all heard the story at some time or the other, and yet he is a man of property that would be unlimited wealth to my modest desires. Thus you see we all have our own ways to work in the vineyard, and, with the object in view, I trust you will pardon me for taking a seedling from yours without the intended and due acknowledgment. (foreigner), came to me and asked whether I had any acknowledgment

I am Sir, yours truly, F. SCHROEDER. Ed. Eastern World.

Yokohama, February 4th, 1904.

"ROOSEVELTIAN PRONUNCIATION."

TO THE EDITOR OF THE "JAPAN MAIL.

SIR.—Your recent statement in your American Notes that "Rooseveltian pronunciation is rapidly becoming a fad in Washington" brings up the question of the pronunciation of the name of "the attenuous-President." But few persons, even Americans, get it right.

cans, get it right.

Several years ago, just after Mr Roosevelt's election as Governor, Dr. J. M. Buckley, Editor of the Christian Advocate, in view of the different pronunciations of the name of the new Governor, wrote to him asking how he pronounced it. The reply was published and it was to the effect that he pronounced it in three syllables,—giving the first syllable the sound of the flower, rose.

AN AMERICAN READER.

Yokohama, February 4th 1904.

THE LATE ADMIRAL KEPPEL.

Those who read only the other day of the death of Admiral Sir Henry Keppel will be interested by the following:—"The Court Circular of 14th Dec. almost as it were affectionately records that "The Venerable Admiral of the Fleet the Hon. Sir Henry Keppel had the honour of being received by His Majesty to-day, and remained to luncheon." "Venerable," with a capital V, is a title which has hitherto been reserved for archdeacons, and in bestowing it upon the oldest officer who serves His Majesty, the Court Circular which, as everyone knows, is issued under the supervision of the highest authority, has transferred to the Navy a dignity hitherto only known in the Church."

The following is taken from the Singapore Free Press:—A certain energetic and greatly respect-ed old Singaporean who recently returned from ed old Singaporean who recently returned from England tells a good story, even though it be a little bit against himseif. He had managed to bring about a meeting between those two old Singapore friends, Admiral Sir Harry Keppel and Mr. W. H. Read, C.M.G. Now, as a result of the natural effux of time and the growing infirmity of over ninety-four years, the old Admiral is not so quick at comprehending conversation as he used to be, while for a similar reason, Mr. W. H. Read's beaving is nothing like so good as it was. used to be, while for a similar reason, Mr. W. H. Read's hearing is nothing like so good as it was. Our friend sat on a sofa between the old veterans and did all his best to act as intermediary and interpreter, and to keep the conversational ball rolling. This process, however, did not always meet with the success it deserved, and there ensued a good deal of "cross questions and crooked answers." Sir Henry Keppel puzzled his old head over it a bit, and then broke out into laughter, saying "I tell you what it is, B., it is time for all three of us to be put into a lunatic asylum!" The story is too good to lose.

To the Editor of the "Japan Mail."

A telegram from Hiroshima—published in the Japan guestion was taken from the Mail, in which it appeared as "Communicated." Whether the words "Reprinted from the Japan Mail." were added to the original copy or not, I do not now remember. At all events they were intended to be inserted, so that I am always overburdened with work.

I am happy to say at the same time that in at least one instance the pamphlet has been successful. Yesterday, the 3rd inst., a Christian gentleman value of the Mail of A telegram from Hiroshima—published in the Jiji and Asahi—states that N. Yamamoto (37) living at Sendagaya, Tokyo, was arrested on Feb. 2nd at the Kure Naval Station on suspicion of being a spy in the service of the Russian Government. He was seized while attempting

THE STRANDING OF THE " AUSTRALIEN."

The text of the judgment of the Marine Court of Enquiry, Osaka, concerning the stranding of the M.M. steamer Australien has now been made public. We append a translation taken from the Kobe Herald:—

M.M. steamer Australien has now been made public. We append a translation taken from the Kobe Herald:—

Accused.—Henry David James, British subject, No. 26, Yamoto-dori, Nichome, Kobe. The Osaka Marine Court of Enquiry has investigated the accusation against the above mentioned person with regard to the grounding of the steamer Australien.

The accused (H. D. James) is in possession of a pilot license for Tokio Bay, Nagasaki, and the Inland Sea, and he boarded the M. M. Company's steamer Australien (2,900 tons), which is registered at Marseilles, France, and left Kobe for the south on the 26th September, 1903. The ship was piloted through the Inland Sea with the intention of proceeding to the Mutsure Islands, Nagato province. On the 28th of the same month, at 3.47 a.m., the ship was headed for Sazai Cape, Mumajima, in order to pass through the middle channel of Kurushima Strait, Iyo province, by sailing parallel to the south-eastern end of Oshima, at a distance of about three-quarters of a knot. The high was clear and the wind was from the South at the time. The tide had just begun to ebb, and the ship was steaming at the rate of 15.5 knots per hour. At 3.55 a.m., the ship was within three-quarters of a knot from Sazai Cape, and the helm was ported in order to enter the channel. The helm was turned at 4.05; but the ship did not obey the gear, and, it having been noticed that the vessel was turning in the other direction, an order was given for the helm to be fully ported. As the danger was turning in the other direction, an order was given for the helm to be fully ported. As the danger was turning in the other direction, an order was given for the helm to be fully ported. As the danger was turning in the other direction, an order was given for the helm to be fully ported. As the danger was turning in the other direction, an order was given for the helm to be fully ported. The momentum of the ship and the tide carried the vessel ashore to the west of Sazai Cape at 3.57, and the keel was considerably damaged. The

Court.

The Court finds that the accused was in fault in the time and manner of his attempt to pass a narrow channel and that he should incur a penalty for neglect of his duty. The Court holds that the accused is accountable under Art. 19—1st clause—of the Law regarding pilots, and that he is punishable under Art. 2, 2nd clause, of the Law regarding the Punishment of Seamen, as provided in Art. 21, of the former law. The Court has thereupon found the accused to be in fault and sentenced him to have his certificate suspended for two months. Costs of the Court, amounting to yen 7.50, are given against the accused.

The foregoing sentence was delivered at the Osaka Marine Court of Enquiry on the 25th January, 1904. Riji-kan Nonomura Wakakato conducted the en-

S. OSHIMA, Chief Judge. K. FUJIOKA. R. HIDAKA.

THE NAGASAKI HOTEL COMPANY.

The fifteenth half-yearly general meeting of the Nagasaki Hotel Company was held on Friday at 4 p.m. at the Nagasaki Hotel. Mr. E. Ringer, Chairman of the Company, presided and there were also present Dr. R. I. Bowie and Messrs. T. A. Glover, Dow, Smart, Carnduff, Mansbridge, Inman, Buckland, and Measor.

The notice calling the meeting and the minutes of the last general meeting having been read and passing the meeting the

The notice calling the meeting and the minutes of the last general meeting having been read and passed, the chairman, after asking the shareholders present to take the Report and Accounts as read, stated that as he had been away for a considerable portion of the past six months he would, with their consent, ask Dr. Bowie to explain matters to the

consent, ask Dr. Bowie to explain matters to the meeting.

Dr. Bowie then spoke as follows:—In accordance with Mr. Ringer's wishes I will endeavour in a few words to explain to you the present position of the Company. We are all aware that the condition of affairs in the hotel, as well in all business, has been very bad during the last six months, not only has there been a decrease in the receipts but there has been an increase in the expenditure as compared with the half year ending 30th June. We had hoped that the late manager, Mr. Bay, would bring the expenses well within the receipts but unfortunately that did not prove to be the case and the result is that there is a difference of yen 8,000 in the working accounts of the present and last balance sheets. Your Directors have frequently discussed the present state of affairs and the best plan to be adopted to

remedy them. As you are aware we were unable to pay the interest on Debentures due on 1st January and under clause to we are allowed six months in which to do this. We have taken legal advice on the subject and the lawer is of opinion that we should carry on business for this period and if there is no improvement then the Debenture Holders will have to be consulted. We have made a change in the management of the hotel and have appointed Mr. Smith, from the United States, who has had considerable experience in taking charge of hotels in a similar position to ours and has been successful in putting from the United States, who has had considerable reductions in expenditure and we hope, though a similar remark has been made before, that in this case we shall be successful. Should any gentleman wish to ask any questions I shall be pleased to answer them.

A general discussion then took place regarding the financial position of the hotel. Dr. Bowie then moved that the accounts be passed, this was seconded by Mr. T. A. Glover and carried unanimously. The chairman stated that the next business was the election of a Director as, according to the Articles of Association, he was due to retire. Mr. Dow proposed that Mr. Ringer be re-elected; this was seconded by Mr. Buckland and agreed to.

Dr. Bowie moved that Mr. W. M. Wood be appointed Auditor for the ensuing year; this was seconded by Mr. Buckland and carried.

A vote of thanks to the Directors, proposed by Mr. Mansbridge and seconded by Mr. Dow, was passed unanimously and the proceedings terminated at 5 p.m.—Nagasaki Press.

TELEGRAMS.

(REUTER'S SPECIAL SERVICE.)

BRITAIN AND THE SITUATION.

London, January 29.

Mr. Akers-Donglas, Home Secretary, speaking at Swansea, said the Government would continue to do all it legitimately could continue a configuration of the second continues as towards promoting a pacific settlement, but if its hopes were disappointed it would fulfil On the recommendation of the British to the letter its treaty obligations to its War Office Committee, the Government,

RUSSIAN COUNCIL MEETS.

The Grand Duke Alexandrovitch presided yesterday at a special Council at St. Peters-Lamsdorff, the Minister for War, the Minister for Marine and others. It is officially announced that the object of the Council was to find means of peacefully settling the dispute with Japan. It is expected that the Grand Duke will frame a report to be submitted to the Tzar and that the reply to Japan will be despatched on Saturday.

ALLEGED INCREASING GRAVITY OF THE SITUATION.

London, January 30.

The Daily Graphic says that despite the previous evening's telegrams from St. Petersburg, it is able positively to affirm that Russia's reply was completed on Wednesday and approved by the Czar. It has not yet been despatched, but its substance was communicated to Mr. Kurino, the Japanese Minister, who telegraphed it to his Government, by whom it was conveyed to the friendly Powers yesterday.

The reply is courteously worded but absolutely refuses to reinsert the word "China," previously struck out in the clause of the drast treaty whereby Russia and Japan agree to respect the integrity of China and Korea.

It is anticipated that the official presenta-tion of the reply will be followed by the withdrawal of M. Kurino and a notification by Japan that she has no alternative but to take up arms in defence of her interests. Later.

the reply will not be transmitted until next week, owing to the great care necessary for completion (? compilation).

fortnight officially communicated to the the course of the Russo-Japanese negotia-Powers a statement of their positions regarding some points at issue, is known.

THE "GRAPHIC'S" STATEMENTS.

London, January 31.

The Daily Graphic adheres to its statements despite numerous assertions emanating from St. Petersburg to the effect that an early settlement is expected.

[We helieve the *Graphic's* statements to be quite baseless—ED. J.M.]

ANOTHER BYE ELECTION.

A Liberal has been elected for Aylesbury. ACTIVITY AT SIMONSTOWN.

There is unusual activity at Simonstown. A British warship is taking in large quantities of coal and ammunition.

THE TRANS-SIBERIAN RAILWAY.

It is stated in St. Petersburg that traffic in merchandise over the Trans-Siberian Railway will be provisionally suspended on Feb. and in order to leave the line free for the conveyance of troops and stores.

NEW JAPANESE WARSHIPS.

London, February 1.

Vickers, Sons, and Maxim, and Messrs Armstrongs and Company received orders on Saturday to proceed with the construction and complete equipment of two new Japanese warships with the greatest possible speed. Each ship is to be of 16,400 tons and have a speed of 19 knots, while they will be more heavily armed than the best British warships

BRITISH ARMY REFORM.

On the recommendation of the British with the King's approval, has decided to appoint an Army Council framed on the model of the British Board of Admiralty. The office of Commander-in-Chief ceases to exist. The new post of Inspector General is to be created, whereof the principal duty will be to inspect and report upon the efficiency of the military forces. This officer will be under the control of the Home Government.

MACEDONIA.

London, February 2.

The Macedonian situation appears to be entering upon an acuter phase. It is re-ported that the relations between Hilmi Pasha and the European assessors are the reverse of cordial.

KUROPATKIN.

It is reported that in the event of a Russo-Japanese war the command of the Russian land forces will be entrusted to General Kuropatkin.

BRITAIN AND ITALY.

The Anglo-Italian arbitration convention has been signed.

JAPAN DETERMINED.

A Japanese official in London, who is acquainted with all details of the negotiations etween Russia and Japan, has stated in an interview with Reuter that Japan is deter-mined to insist upon binding written written guarantees with reference to Chinese sovereignty in Manchuria. She might, he said, agree to modifications on other points, but without this, no matter what other concessessions may be made, Japan will break the negotiations and peace will become impossible.

THE KING'S SPEECH.

It is announced in St. Petersburg that HIS MAJESTY'S DEEP CONCERN FOR PEACE.

London, Feb. 2nd, 2.50 p.m. The King's Speech, delivered at the open-ing of the British Parliament to-day, said

That both Russia and Japan within a that His Majesty watched with deep concern tions. "The disturbance of peace," the King continued, "could not but have deplorable consequences. Any assistance my Government can give to promote a pacific solution will be gladly afforded."

RUSSIAN MILITARY MEASURES.

London, February 3.

A Russian army order of January 21st increases the strength of the infantry reserves. It is stated in St. Petersburg that 5,000 troops are expected shorly at Vladivostock to strengthen the garrison there. All reserves in the Far East will probably be mobilised soon.

OPENING PARLIAMENT.

The King, accompanied by the Queen, the Prince and Princess of Wales and the Duke of Connaught has opened Parliament in full Mr. Balfour was absent owing to instate.

THE TZAR'S ANSWER.

It is stated in St. Petersburg that Russia's reply to Japan will not be sent for several days and that there are still points which remain to be settled.

BRITAIN AND JAPAN.

London, February 4

The House of Lords has voted the Address in reply to the speech from the Throne. Lord Lausdowne, being asked whether Britain offered some offices in relation to the situation in the Far East said it was undesirable to offer offices unless it was known that they were desired. It was an open secret that one of the disputant does not want mediation.

THE THIBET AFFAIR.

In reply to Lord Spencer Lord Lansdowne promised to lay on the table papers relating to Thibet and said the noble lord would then learn the true origin of the mission, which was political not military.

MR. CHAMBERLAIN'S ASPIRA-TIONS.

Lord Lansdowne did not conceal his sympathy with Mr. Chamberlain's aspirations to draw the parts of the Empire closer, but said the Government recognised the difficulties and only showed common prudence in declining to be rushed.

GRAVE NEWS.

It is announced in St. Petersburg that Russia's reply will be delivered on the 6th. News from St. Petersburg says that the General Staff has authorised Viceroy Alexieff to declare war and to open hostilities, if circumstances indicate the necessity. An Imperial manifesto declaring war is expected to follow sharply, if Japan rejects the arrangement proposed in Russia's

(RECEIVED AT THE LEGATION OF FRANCE.) FRENCH CRUISER FOR THE FAR EAST.

Saigon, January 31.

The armoured cruiser Sully is starting from Toulon to join the Far Eastern Squadron.

TRAFFIC ON THE SIBERIAN RAILWAY.

Saigon, February 1. It is denied at St. Petersburg that mobi-

lization measures have been ordered. Nevertheless commercial traffic on the Trans-Siberian Railway will cease from to-

[With regard to this it is to be observed that no intimation of any such stoppage has been received by the Japanese postal authorities.—Ed. J.M.]

RUSSIA'S REPLY.

Saigon, February 2. to Japan towards the middle of this week.

RUSSIA'S REPLY.

Saigon, February 3rd. It is stated that Russia's reply to Japan contains concessions of a nature to satisfy It has been communicated to several Chancelleries and creates the impression that war will be avoided. The reply will be handed to the Government of Japan on Saturday next.

THE ANGLO-ITALIAN CONVENTION. colonial troops.

The arbitration treaty between Great Britain and Italy has been signed.

MAGAZINE EXPLOSION

A dynamite magazine has exploded at Lahore in India, killing forty people.

KING EDWARD'S SPEECH.

Saigon, February 4. The speech from the Throne at the opening of the British Parliament declares that the Government will do everything in its power to aid a pacific solution of the crisis in the Far-East.

(From the "Deutsche Iapan-Post.") ALLEGED PACIFIC INTENTIONS.

Berlin, January 29.

A meeting of ministers is to be held to-day in St. Petersburg under the presidency of the Tsar, when the Russian answer to Japan will be formulated. All previous reports concerning the same are therefore apocryphal. The views of the Tsar and of Count Lambsdorff are of a most peaceful kind. Russia prefers an understanding with Japan to any other policy in Eastern Asia.

THE KAISER'S BIRTHDAY BANQUET. At the usual banquet held by members of the German Reichstag on the occasion of the Kaiser's birthday, the president, Count Ballestrem, gave a speech giving some very interesting data concerning the last illness of the Kaiser. When receiving the President and the two Vice-Presidents of the German Reichstag, the Kaiser mentioned that he himself for two months was unaware of the nature of his disease, and he put off the operation until he had seen the Tsar, as, supposing his case might turn out fatally, he would have had the consola-tion of leaving to his son most amicable relations with his neighbours. Later on it was ascertained that his illness was of a harmless nature.

DR. SI UEBEL.

Berlin, January 30.
The resignation of the German colonial direct tor, Dr. Stuebel, is neither desired by himself nor by his chiefs The rumours are only printed at the instigation of the colonial press.

MACEDONIA.

The assistant for the Macedonia gendarmeric has been nominated, according to the wishes of the reform Powers, by Germany. He is Major von Alten, Prussian artillery.

GERMAN SOUTH-WEST AFRICA.

GERMAN SOUTH-WEST AFRICA.

Berlin, January 2.

The German gunboat Habicht has sent the following report from Swakopmund, German South-west Africa:—At Okobond, fell fighting the Railway Secretary Rock and the farmers Kur and Spockkamp. Omaruru was attacked on the 27th of January by a strong force of negroes, but they were repulsed. From Otjimbingue no news, probably the place is besieged 'The rebuilding of the railway at Karibib has begun and is progressing, as the rain is diminishing. gressing, as the rain is diminishing.

GERMANY'S NEUTRALITY.

The news printed in the London Daily Mail that according to American papers Germany is delivering war materials to the Russians at Port sidelivering war materials to the Russians at Port arthur, has been officially declared untrue. The meutrality of Germany is as much in favour of Japan as of Russia. The visit of the German decreaser Hansa to Port Arthur has no political significant on the property of signification.

RUSSIA AND THE SHIP BUILDERS.

The Russian Government has rejected several The reply of Russia will be transmitted offers from shipbuilders of various countries. The report that Russia has made an offer to buy some Portuguese warships is wrong.

KING LEOPOLD'S VISIT.

King Leopold of Belgium left Berlin well satisfied with his reception. Political arrange-ments were not made between the two monarchs.

THE BONDELZWARTS SURRENDER.

Berlin, February 3.
From Swakossmund, German Southwest Africa it is reported :- The negroes called Bondelzwarts surrendered themselves to the German

GERMANY AND NEUTRALITY.

Berlin, February 3.

The German authorities have most emphatically protested against the nonsencical Anglo-American reports that Germany is sending war materials or even soldiers to Port Arthur to help Russia. The German cruiser Hansa was at Port Arthur from the 20th to the 23rd of January on its usual service trip, without any order for Russia.

GERMANY AND THE FAR EAST.

Berlin, February 4.

Germany did not receive the information reported by the "Agence Havas" as having been sent to France, England and America concerning Russian concessions. Germany has therefore nothing to do with any influence exercised by other Powers over Japan.

THE BONDELZWARTS SURRENDER.

Colonel Leutwein, the Governor of the German South-west African colony, reports that the Bondel-zwarts on the Southern boundary have surrendered, handed over their rifles, delivered up the guilty parties, and transferred the crownland to Ger-many. Colonel Leutwein is marching via Nolloth to Swakopmund, where he is expected to arrive on the 5th of February. He will then restore the northern parts of the colony. In Germany it is not intended to send out more reinforcements to Africa. The enemy has retired from Otjimbingue.

THE CONGO

The Kiwu Lake boundary question (between The Congo State and German East Africa) was not settled at King Leopold's visit to Berlin, the scientific researches concerning the exact boundary being incomplete.

PRINCE BORIS.

The Bulgarian Crown Prince Boris reached, on the 31st of January (18th of January as per old calendar) his tenth year. He was heartily com-plimented and decorated on that day by the Tsar and the German Kaiser.

Skin-Tortured Babies AND TIRED MOTHERS Find Comfort in Cuticura

INSTANT RELIEF and refreshing sleep for Skin-tortured Babies and rest for Tired Mothers in warm baths with Cuticura Soap, and gentle anointings with Cuticura Onthers, the great skin cure and purest of emollients, to be followed in severe cases by mild doses of Cuticura Resolvent Pills, to cool and cleanse the blood. This is the purest, awestest, most speedy, permanent, and economical treatment for torturing, disfiguring, itching, burning, bleeding, soaly, crusted, and pimply humours, eczemas, rashes, irritations, and itchings, with loss of hair, of infants and children, yet compounded.

MILLIONS USE CUTICURA SOAP

Assisted by CUTICUEA OINTMENT, for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, for baby rashes, itchings, and chafings, in the form of baths for annoying irritations and inflammations, or too free or offensive perspiration, in the form of washes for ulcerative weaknesses, and for many sanative, antiseptic purposes which readily suggest themselves to women, especially mothers, and for all the purposes of the tollet, bath, and nursery. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic tollet soap, however expensive, is to be compared with it for all the purposes of the tollet, bath, and nursery. Thus it combines in One Soap at One Prace, the Best skin and complexion soap, and the Best tollet and Best baby soap in the world.

CUTICURA RESOLVENT PILLS (Chocolate Conted) are a new, tasteless, brated liquid Cuticura RESOLVENT, as well are a rown courses. Put up in scrow-cap pocket vials, containing 60 doses.

CUTIOURA REVENUES are said throughout the world. Australian Depots R. Tours: & Co., Sydney. British Depots S'-86, Charterhouse Sq., London. Frunch Depots S Ene de to Paix, Parts. Portun Dano Ann Cham. Chris. Bally Portun Batton II S. A.

EXCHANGE.

Yokohama, February 4.

London silver $\frac{7}{18}$ lower and China sterling quotations $\frac{7}{18}$ to $\frac{1}{18}$ lower have caused local rates on China to rule firmer, other rates being irregular both for Bank and Private paper.

" FAIS CE QUE DOIS: ADVIKNNE QUE FOURRA!"

NOTICE TO CORRESPONDENTS.

No notice will be taken of anonymous correspondence.
What is intended for insertion in the "JAPAN WARKLY MAIL," must be authenticated by the name and address of the writer, not for publication, but as a guarantee of

good faith.

It is particularly requested that all letters on business be addressed to the MANAGER, and Cheques be made payable to same; and that literary contributions be addressed to the EDITOR.

YOKOHAMA: SATURDAY, FEBRUARY 13TH, 1904.

BIRTHS.

On the 9th instant, at No. 7 Bluff, Yokohama, Mrs. H. C. Gulland, of a Son.

At No. 127-D Bluff, Yokohama, on the 10th Feb., the wife of L. E. MCCHESNEY, of a Son.

SUMMARY OF NEWS.

THE station master of Kawasaki was run over and killed on the morning of Feb. 8th by a train from A QUANTITY of Chinese silver coin valued at

JAPANESE gold coins amounting to yen 200,000 were exported on Feb. 6th for Hamburg by the

A LONDON telegram to the Hongkong Daily Press says that Mrs. Maybrick was released on the last day of January.

According to latest investigations, Japanese at Vladivostock number 2,996 persons. them, 1,410 are females.

IT is reported by telegram from Nagasaki that Japanese servants employed by the East China Railway have all been discharged.

WAR began between Russia and Japan on the THREE German sailors were arrested on Feb.

BARON MITSUI on Feb. 3rd donated 75,000 dispute as to the fares.

Some Tokyo papers announce that an extraa lecture course with regard to Japanese Civi ordinary session of the Imperial Diet will be

Captain Akakura of the Thirty-first Regiment, Aomori, committed suicide on Feb. 6th at his dwelling. The cause is reported to be temporary

THE Russian Consulate at Yokohama on Feb. 9th did not hoist the national flag and removed the heraldic arms from the building. The Consul has left Japan.

THE Bank of Japan, states the Asahi, sent on Feb. 7th eighty cases containing notes to Shimo-noseki and some twelve tons of silver bullion to the Osaka Mint.

The death occurred in Kobe on Saturday of Tokyo.

Mr. Robert Hughes. He came to Japan in 1859, The Russian Minister and Baroness Rosen paid joining the firm of Glover & Co., later starting business in Kobe.

Okura, Yokoyama and other business-men in Tokyo.

The Russian Minister and Baroness Rosen paid a farewell visit on Feb. 9th to the Foreign Office, the Department of the Imperial Household, and

An official telegram from Formosa states that two cases of plague appeared in Taipeh, and one each in Kagi and Tainan on Feb 4th. Two of them proved fatal.

THE Central Tea Guild has received a telegram from its branch at New York to the effect that the tea market is very dull, and the retail price has a downward tendency.

A TELEGRAM from Sapporo states that the convicts in the Tokatsu jail broke out on Feb. 5th. Some of them were killed by the jailers, and three of the latter were injured.

DURING the month of January, the exports of specie from Yokohama amounted, in gold coin and bullion, to yen 7,206,330; and in silver coin and bullion to yen 13,729.

THE Italian Government has informed Japan that it intends to open an International Industrial Exhibition at Milan next year and has requested the latter to send exhibits.

YUAN, the former compradore of the Russo-Chinese Bank, who escaped arrest at Shanghai and returned to Kobe by the steamer *Hakuai Maru*, arrived at Tokyo on Feb. 8th.

A CASE of dysentery was reported on Feb. 7th A LANDSLIP occurred on the night of Feb. 8th at Kanazawa. This is its first appearance this at the Anahara hot spring, Fukushima Prefecture, at the Anabara hot spring, Fukushima Prefecture, the result being that two houses were destroyed and five persons were killed or injured.

yen 129,507 was brought by the steamer Iyo Maru to Kobe. It will be removed to the Osaka Mint for conversion into Japanese coin.

WITH regard to the accident on the railway on Feb. 2nd at a point between Oyama and Ashigara, Tokaido, it is reported by Tokyo papers that the damage is estimated at about yen 130,000.

Almost all Japanese at Vladivostock left there Out of on Feb. 13th or 14th accompanied by Mr. Kawa-kami, the Commercial Agent. The few remaining will be placed under the protection of a neutral Power.

H. MATSUI, the manager of the Toyohashi Bank, who embezzled yen 4,500 belonging to the Fr is semi-officially reported that the Russian bank and absconded, was arrested on Feb. 4th at warship Oslabva, which was undergoing repairs Yokosuka. It is added that the bank has closed at Suez, left there on Feb. 4th for the Far East. | business and is now in liquidation.

oth with the destruction of two Russian ships at 6th at Uchida-cho, Yokohama, where, it is said, admonished him when he asked for mone Chemulpo, which was followed by a torpedo they assaulted three jinrikisha coolies, inflicting seems at length to have exasperated him.

attack on the Russian fleet at Port Arthur and a injuries with the knives. The coolies carried the general engagement. The Russians retired heavy sailors from Chitose-cho to the Yokohama Dock Company where both parties entered upon a dispute as to the fares.

> ordinary session of the Imperiat Diet will be probably convened not later than the end of March. The general election is fixed to take place on the 1st of the same month.

THE automatic telephone apparatus at Nigiwaicho, Yokohama, was stolen on the morning of Feb. 4th and was later found along the canal at Sueyoshi-cho. The police believe that a thief took away the telephone with intent to steal the money in the box.

THE construction work on the bronze statue of Marquis Ito, being completed, it will shortly be established at Oiso. It is a statue attired in a frock-coat, and the height in sixty-five inches. It was presented by Count Katsura, and Messrs. Okura, Yokoyama and other business-men in

a farewell visit on Feb! 9th to the Foreign Office, the Department of the Imperial Household, and other offices. They left Shimbashi on Feb. 12th by the 8.30 a.m. train for Yokohama, whence they proceed by the French mail steamer Yarra

M. ISHIKE AND S. ASANO were arrested on Feb. 6th in Tokyo on a charge of fraud. It is reported by Tokyo papers that they established in August, 1902, a firm under the name of the Nippon Products Company with a capital of year to,000 at Kanda, Tokyo, and that they were carrying on an illegal business.

AT Bunder Abbas, Persia, the Russians are not making much headway with their efforts at competition. The Bombay Gazette's correspondent reports imports mainly British. The customs are collected now by Belgians, instead of Persians. An effort is to be made to establish connection with the Indo-European telegraph system.

By the Empress of Japan on Tuesday arrived. Professor Frederick Starr, of the University of Chicago, who has come to Japan to arrange an Ainu Exhibit at the World's Fair at St. Louis. He leaves Yokohama almost immediately for Hakodate, where he hopes to be able to obtain a small party of Ainu to exhibit in a native village at The Pike on the big Fair.

THE shareholders of the Hokkaido Colliery and Railway Company held a general meeting on Feb. 7th at the branch office in Tokyo and received the accounts of the last half year. The net profit was yen 864,681.82 to which a balance brought from the previous accounts yen 76,123.40 was added, making a total of yen 940,805.22. Of this yen 47,000 was set apart as reserve; yen 867,560 as interim dividend; and the remainder as a balance to be carried forward to the next account,

A DREADFUL tragedy took place on the night of Feb. 5th at the dwelling of S. Kobayashi, an assistant engineer of the Oji Paper Mill, Tokyo. The following morning when Mr. Kobayashi who had been absent returned, he found that who had been assent leturised, he folial that his wife, daughter, a female servant, and an old woman, one of his relatives, who was staying in the house had been murdered, and that the son of the old woman had committed suicide by cutting himself in the throat with a short swoad. He left a letter in which he described his purpose in committing the crime. It is reported by Tokyo papers that the murderer, who is thirty one years old, has led a profligate life, as to which the unfortunate family always admonished him when he asked for money. This

THE SITUATION.

Saturday, Pebruary 6.

The King's speech at the opening of Parliament seems to have been received with anything but unalloyed satisfaction in Japan. His Majesty's words appear to invite mediation, and mediation could scarcely lead to anything but a compromise. Japan is quite as desirous of peace as any Power can be, and would make all legitimate sacrifices to secure it. But she does not want peace which could be only temporary and which would entail protracted efforts more costly than war. Mediation would probably prehide such a peace. For the compromise suggested by the mediators—and accepted by the principals almost as a matter of necessity—would doubtless be on the basis of Korea for Japan, Manchuria for Russia, and if Russia were seated permanently in Manchuria, with plenty of leisure to develop its resources, organize its fighting material and prepare her own reserves of strength, a veritable sword of Arthur on the 4th instant, as already report-Damocles would be suspended over the ed in these columns. Evidently its short head of Japan in Korea. Russia in Manchuria as sovereign means Russia in all northern China ultimately. If other Western Powers think that such a result has tern Powers think that state and the state of the state o share their insouciance. thing for her, a very bitter thing, that formed by Russian and Chinese officials in she must step aside from her peaceful progress to engage in a life-and-death struggle with a nation having nothing at stake save Chinese troops shall cooperate to restore its own territorial aggrandisement. Still order; the third, that all appointments or the Japanese are far-sighted enough removals of Chinese officials shall have the to see that painful as war is, to shrink from it merely because it hurts may be to prepore an issue much more calamitous. by the Russian Government; and the Mediation, therefore, sounds unpleasant in their ears, and as they detect a tone of their ears, and as they detect a tone of their ears, and as they detect a tone of their ears, and as they detect a tone of their ears, and as they detect a tone of their ears, and as they detect a tone of their ears, and as they detect a tone of the safety their ears, and as they detect a tone of the safety their ears, and as they detect a tone of the safety their ears, and as they detect a tone of the safety their ears, and as they detect a tone of their ears, and the ears are mediation in King Edward's words, the of Russian subjects within his jurisdiction. Royal Speech distresses them. We are It would seem that these regulations have quite confident, however, that His Majesty had no such meaning. If his good offices fourth—as to the payment of salaries—are to be employed where his sympathies evidently superfluous to the point of are already enlisted, it will be on the basis of justice, not merely of a division of the spoils. No arrangement suggested by him the regulations be at all correctly stated, will be injurious to Japan's best interests. Intervention's uses at this stage would be limited, so far as we can see, to facilitating churia. concessions which, however reasonable in themselves, are difficult for either of the two Powers concerned to make to the other direct.

Nothing is definitely known about the result of the Council held in the Palace on the 4th instant, but the Tokyo press is persuaded that a decision was adopted with regard to steps which will be taken in a few days to bring to a final issue the present period of tension and uncertainty. In other words, a concise programme has been drawn of the course to be taken should Russia's answer prove unsatisfactory, and it must be added that not many hopes are now entertained of any other conjuncture. But the various measures contemplated in that event were long ago considered and determined, we believe, so that such a debate can scarcely have occupied the sole attention of the Council on the 3rd in the Premier's residence and that on the 4th in the Palace.

The High Martial Council met in the conclusion. We may add that all hopes Seoul to Song-chin is not in working order,

of a peaceful issue seem to have been now abandoned.

Monday, February 8. The Russians in Manchuria are evidently making every preparation for war. appears to be no doubt that the railway is fully occupied with the transport of military stores and troops and that the difficulties of Japanese residents desiring to withdraw from the interior are thus greatly accentuated.

Telegrams to the Jiji Shimpo indicate that

the movement of Russian forces in the direction of the Valu is an affair of some magnitude. The Russians themselves are represented as saying that ten thousand men have left Liaoyang for the northern frontier of Korea, and it is reported that a reinforcement of three thousand has already reached Feng-hwang-teng, while various bodies are arriving at Haicheng, which may be called the western terminus of the road from the Yalu to the Mukden-Liaotung line.

The Russian squadron did not proceed excursion was merely for the purpose of of dwellers in the suburbs.

exercise.

A telegram to the Asahi Shimbun from Peking says that the Russians in Manchuria have issued five regulations. The first is of disturbances by bandits, Russian and prior consent of Russia; the fourth, that the salaries of Russian officials shall be paid been somewhat mixed in transmission. The evidently superfluous to the point of ab-surdity, and the fifth is inconsistent with the first three. At any rate, if they show that the Russians are as-suming an unequivocal position in Man-churia. It must be confessed, however, that they did so long ago, and that, on the eve of almost certain war having for its issue the retention or abandoment of this very region, no administrative programme could be called too drastic.

From Shanghai it is reported that the Chinese are beginning to look askance at the Russo-Chinese Bank's paper and that transactions with the Bank are avoided. that owing to large purchases of provisions by the Russians for despatch northwards,

prices have risen appreciably.

The Nichi Nichi's Peking correspondent wires that the carriage of foreign subjects or citizêns by the Manchurian railway has been suspended, the line being required solely for military uses. It will be observed, however, that the carriage of mails for Europe has not yet been interrupted, inasmuch as the postoffice notifications appear as usual.

The Emperor of China has issued instruc-

tions to the various provincial authorities on the subject of preserving strict neutrality

Intimation was to have been given by the The High Martial Council life in the State Palace on Friday. Various other meetings Japanese consular authorities in the State Palace on Friday. Various other meetings that Japanese subjects in Song-chin should and exchanges of visits between leading that Japanese subjects in Song-chin should retire to Yuen-san, and that these in Wiju retire to Yuen-san, and that these in Wiju ported. Everything indicates that the and Autung should withdraw to Pyong-yang. ful whether even a vessel of a ner long period of waiting is on the verge of But it would appear that the telegraph from will be allowed to enter the port.

so that the forwarding of this intimation has been delayed. The number of Japanese subjects at Wiju is said to be about 66

Nagasaki announces that nearly all the Japanese residents of Vladivostock have taken ship and are about to return to Japan

The Chuo Shimbun has had its joke at the expense of the public. It issued on the evening of the 5th instant an extra on which were blazoned in large type the characters Dai-ni doin-rei; that is to say, "the second calling out of the reserves." But the buyers of the leaflet discovered, on perusing it, that the "reserves" related to the staff of the Chuo itself, numbers of which were about to be dismissed to various points in anticipation of war.

It is nevertheless certain that there has been a great access of activity in military quarters during the past three days. We may say now, and most reluctantly do we say it, that all hope of a pacific issue has been abandoned by the Japanese and that The Russian squadron did not proceed been abandoned up their loins vigorously farther than Dalny. It returned to Port they are girding up their loins vigorously farther than Dalny. It returned to Port they are girding up their loins vigorously farther than Dalny. for the struggle. War-songs are among the sounds that most frequently greet the ears

It is stated (Jiji Shimpo's telegrams) that the Russians have ordered the local officials to undertake the repair of the road from Liaoyang to Feng-hwang-teng, and that the work is being carried on by forced labour. The Chinese in Manchuria will probably henceforth have to contribute an unwilling share to the assistance of their country's invaders.

Viceroy Yuan has issued the necessary instructions relating to the maintenance of

strict neutrality by China

The Jiji Shimpo's Peking correspondent says that owing to an acute difference of opinion between M. Lessar and the Secretary of the Russian Legation in that city, the Secretary has taken his departure without saying farewell to his chief.

It is stated that the Russians have expelled from Newchwang the Chinese subject who was acting as commissioner of customs pending the arrival of Sir Robert Hart's new nominee. This is doubtless the incident concerning which an inquiry is said to have been addressed to Russia by the British Government.

The Russians are reported to have applied to the Chinese Government for the removal of the Vice-Governor of Tsitsihar, but the reply, given at the instance of Wu Ting-fang, was that China does not recognise the right of any foreign Power to interfere in matters relating to the appointment or removal of her officials.

Mr. Conger is said to be showing much activity in pressing for the operation of the new commercial treaty so far as concerns the opening of Manchuria. He has announced that whatever difficulties may be urged he intends to instruct the United States consuls to proceed to their posts.

A Russian steamer has reached Nagasaki carrying over a hundred Japanese fugitives from Vladivostock. She reports that an American steamer had left previously (15th instant) with three thousand Japanese and should have arrived at Tsuruga in Echizen on the 6th. There remain about a thousand Japanese subjects in Vladivostock and some two thousand more in the adjacent districts. The American vessel intends to return from Tsuruga for the purpose of carrying away these people, but as a state of siege has been proclaimed at Vladivostock it is doubtful whether even a vessel of a neutral Power

A Russian ship is reported to be loading

twenty thousand tons of Kaiping coal at ese still remaining at that port and in its for delays in the delivery of telegrams, inas-Ching-wan-tao. She must be a big ship.

Teh-ling, or at any rate a part of them, have reached Dalny en route for their native

country.
The Asahi Shimbun publishes a report compiled by its own special correspondent who seems to have been making a tour throughout Manchuria to investigate the number of Russian troops stationed at the various places. His figures, omitting details, are as follow:

Port Arthur	20,350
Dalay	2,000
Talien	4,400
Pasewo	400
Antung	550
Feng-hwang-teng	750
Kinchow	750
Yinkow	1,200
Haicheng	1,150
Liaovang	1,900
Mukden	550
Kirin	2,750
Ningtau	1,250
Harbin	4,550
Tsitsihar	1,990
Hailar	1,000

In addition to the above there are the Railway Guards, 55 companies, totalling 24,000; and there is also a Railway Corps consisting of 4 battalions, the strength of which this correspondent has not ascertained. He thus makes the grand total 69,500 of all arms, together with 4 battalions of the Railway Corps, or, say, 73,000 in all. It is difficult to believe that these figures are correct. They would mean that Russia is not in a position to put more than 30,000 men into the fighting line at any given point.

The Official Gazette announces that, in accordance with Art. VIII. of the International Postal and Telegraph Regulations, telegrams to and from Korea must not be written in cipher on and after the date (5th instant) of the announcement, but must be in either the English, the French or the Japanese language. Cipher telegrams will still be allowed from Yokohama, Tokyo and Kobe, to foreign countries (except Korea) but they must be accompanied by translations in one of the above languages and by a copy of the key. The prohibition applies to cipher telegrams handed in at an office by the Japanese authorities owing to under Korean control in Korea and thence conveyed to a Japanese office for transmission. Further, the Japanese Telegraph Authorities henceforth disavow all responsibility for errors or delays in the transmission of telegrams to and from Korea.

Detailed regulations have been published for the organization of military posts. It need scarcely be said that the regulations provide for the free carriage of letters sent by military or naval men from or to the front, but of course letters posted at this end by civilians must pay postage though addressed to persons on service. These regulations do not apply to letters transmitted to foreign countries under the provisions of treaties or conventions. The regulations went into force from the 5th instant.

Tuesday, February 9.
Mr. Segawa, the Japanese Consul in Newchwang, is said to have received instructions to withdraw.

The Afridi left Vladivostock on the 6th instant carrying three thousand Japanese fugitives. There is some confusion about this vessel. On the 6th it was announced that she had reached Tsuruga in Echizen, and diploma that, having disembarked her passengers Russia. The that, having disembarked her passengers Russia.

Russia.

Chefoo telegraphs that only 15 torpedothere, she would turn back at once to The Great Northern Railway Company hoats are in Port Arthur, the remainder Vladivostock to give transport to the Japan- has announced that it can not be responsible being at Vladivostock. From the same

vicinity. Probably the latest intelligence is much as the Japanese censorship is very The Japanese residents of Harbin and the more correct, namely, that she left Vladivostock on the 6th.

The Nichi Nichi has a report that 200 Russian soldiers are expected to enter Pe-king immediately. This sounds rather in-credible, seeing that Russia has of late been withdrawing all her garrison troops from

All the Tokyo newspapers publish a statement that a hundred Russian soldiers from Liaoyang reached Feng-hwang-teng on the 4th instant, Presumably this company is the van of the division said to have been put in motion for the Korean borders.

It is believed that the purpose of the Russian Squadron in emerging from Port Arthur on the 3rd instant was to escort two boats to Talien with the object of laying torpedoes. Doubtless the harbours of the Liaotung peninsula are pretty well furnished with that kind of defence by this time.

One trouble is that pending the removal

of the press censorate in Japan, Shanghai will get an innings. The great factory of bunders does not appear to have yet realized its opportunity, or, at any rate, has not yet begun to utilize it. But there is manifest danger that the world will presently be flooded with stories of wonderful patterns. Possibly the control of Korean telegraphs may pass into strong hands before the flight of canards get on the wing, but that is rather too much to hope for.

Another rumour from Seoul says that there is talk of the Emperor escaping to Pyong-yong and ultimately to Chhan-chhon in Kang-won-do. His Majesty has always had a penchant for Pyong-yang. It was with the object of establishing for himself there a retreat secure from the political gales raging in Seoul that he proposed, some time ago, to open Yong-Am-pho and Wiju provided Pyong-yang were closed.

The Nippon Yusen Kaisha and the Osaka Shosen Kaisha have discontinued their service of steamers to all Korean ports except Fusan.

It would seem that the Eastern Railway Company's steamers Manchuria and Shilka were temporarily detained in Nagasaki some suspicion as to their doings. Subsequently, however, they were released. On the other hand a Saseho telegram dated the 7th instant alleges that two other Russian vessels, the Noni (?) and the Mukden, have been seized by Japanese men-of-war in the seas between Quelpart and Masampo. The idea is that these vessels were acting as spies on the movements of Japanese war-ships.
All the Tokyo newspapers publish the story, and it was widely circulated in Yokohama on Sunday night, but a great deal of confirmation is needed.

The Jiji has news from Nagasaki that Port Arthur harbour is frozen over to a depth of two feet and that torpedo craft can

In the same message it is stated that the total force of Russian troops in Manchuria does not exceed 180,000, of whom 35,000 are cavalry. That, it will be observed, is more than twice the aggregate computed by the Asalii's special agent and published in our columns on the 8th.

Wednesday, February 10.
On the 7th Mr. Uchida officially reported to the Wai-wu-pu in Peking the rupture of destruction was particularly effective in the diplomatic relations between Japan and Chefor telegraphs that only 15 torpedo-

severe

On the evening of the 7th instant 50 Russian soldiers entered Peking from Newchwang.

An American military attaché who has just returned to Peking from a tour in Manchuria, reports that he did not observe any indications of special activity among the Russian troops, except that the 9th, 10th, 11th and 12th regiments of the East-Siberia Rifle Brigade had moved to Liaoyang, whence they were expected to proceed to

Feng-hwang-teng and the banks of the Yalu. The Russians are reported to be hiring coolies and buying oxen and pigs in the neighbourhood of Shanhaikwan. As this is an obvious breach of China's neutralityassuming the coolies and animals to be for military use, which they obviously are— Viceroy Yuan has notified the local officials that such transactions must be strictly interdicted. It is plain that incidents of this nature are not unlikely to produce many complications.

It is reported that the Japanese residents of Port Arthur, to the number of 400, and those of Dainy, to the number of 150, have retired to Chefoo by the steamer *Foochow*. The arrangements for this retreat seem to have been made by Mr. Consul Mizuno.

The Asahi Shimbun has a telegram from Tientsin saying that some eighteen thou-sand Russian troops have left Port Arthur and Dalny, heading for Antung. Their ultimate destination is supposed to be the Yalu, and they may even cross into Korea.

A vague report from Mukden says that the Japanese subjects employed there are receiving very harsh treatment at the hands of the Russians.

We hear, and have been hearing, a great deal about the withdrawal of Japanese subjects from Manchuria and Siberia, nor does it seem that their retreat is unjustified. But we hear nothing of any Russians leaving Japan, with the exception of the diplomatic and consular officials whose withdrawal is a matter of form.

A telegram from Shanghai, dated the 8th, says that Russia had it in contemplation to seize the Shan-hai-kwan railway and the port at Chin-wan-tao, since it is only må the littoral of the Gulf of Pechili that she can establish maritime communications with her troops in Manchuria. In order to effect that object she would fain have provoked China to some display of hostility. But China, acting at Japan's suggestion and with the endorsement of the British Minister in Per king, is observing strict neutrality, and England is scuding a detachment of 70 men to take their station at Chin-wan-tao. Seventy men are only a handful, but their presence will have an unequivocal meaning. What England can do with absolute propriety is to assist the Chinese in maintaining their neutrality. She used her fleet to constitute the Yangtse Valley a neutral zone at the time of the China-Japan war, and as Japan is now her ally, she may at least put forth the same strength in the same cause to-day.

It is stated in Tientsin that on the 8th, the mounted bandits in Manchuria broke the Russian lines of telegraph from Haicheng to Kaipin (or Gaipin, in the Liaotung Penin-

These people say that General children. Kuropatkin has arrived at Harbin. If so, Russia must have decided upon war long before Japan broke off the negotiations. That will be an interesting test.

These fugitives from Habarovsk and Nikolisk seem to have suffered greatly. They were obliged to sell off their possessions for a mere song, and many of their things were taken from them violently by Russian roughs. We shall have the Russian roughs. whole story by and by no doubt. The Afridi's parture caused great grief to parents and children and to the nurses themselves. The Jist's reporter states that all the washing, smith's work, carpentry, painting and wall-papering in Vladivostock were done by Japanese, and that their retreat will cause much inconvenience.

There are said to be signs that Russia is contemplating the seizure of the railway from Yingkow (Newchwang) to Shanhai-That would make a complication with England.

THE RUSSIAN FLEET.

Saturday, February 6.

Japanese journals conjecture that the object of the Russian fleet which left Port Arthur on the 3rd instant is to convoy transports carrying troops to Chemulpo. troops are supposed to number from two thousand to three thousand, and to be the result of Korea's alleged application to Russia for military protection. But there has not been any intelligence of Russian troops embarking at Port Arthur, and it is plain that conjecture figures largely in this con-struction of the fleet's purpose. Some commentators opine that the six companies of infantry which are reported to have left Liao-yang represent part of the force destined ultimately to enter Seoul at Korea's request, but we need scarcely point out that the dissuch a march at this season would be a stupendous undertaking. If the six companies are destined for Feng-hwang-cheng, that is about the limit of their movement, we imagine. It is quite plain that any enter-

source the fiji Shimpo learns that no attempt has been made to lay torpedoes in the harbour and that the Russian squadron has been outside since the 3rd instant.

The four Russian steamers temporarily detained in Nagasaki have been released, but it is stated that two others have been brought into Saseho by Japanese cruisers from the neighbourhood of Füsan. One is a vessel of the Volunteer Fleet, 6,000 tons, the other a ship of the East Asian vailway Company, 5,000 tons.

The four Russian squadron has been released, but it is stated that two others have been brought into Saseho by Japanese cruisers from the neighbourhood of Füsan. One is a vessel of the Volunteer Fleet, 6,000 tons, the other a ship of the East Asian vailway Company, 5,000 tons. Company, 5,000 tons.

The Afridi left Vladivostock on the 6th route for her crippled ships to leave the and reached Tsuruga on the 8th having on field of action. There is news from Seoul and reached Tsuruga on the 8th naving on held of action. There is not unnaturally associated and the fact is not unnaturally associated and the fact is not unnaturally associated. with the sudden emergence of the Russian city since the franchise was granted to squadron from its head-quarters and with the project of borrowing Russian troops said to have been entrusted for consummation to ing of the women's vote for the Federal Hyon Sang-kon. This theory appears to us to be pure sensation. No doubt the war ed the experience of going to the polling party in Russia—every country has its booth. It was amusing to watch the women-Jingoes-would be glad to see the Korean folk, some some anxious and nervous, others peninsula occupied by Russian troops in advance of Japanese, and in the eyes of the most aggressive as if they expected to have general public there is something very to fight for their rights. The little boxes general public there is something very whole story by and by no doubt. The Africas is whole story by and by no doubt. The Africas is whole story by and by no doubt. The Africas is whole story by and by no doubt. The Africas is whole story by and by no doubt. The Africas is whole story by and by no doubt. The Africas is people say that every possible obstacle was picturesque and attractive in the programme purpose of signing one's ballot paper were purpose of signing one's ballot paper were on stantly occupied by two or three women, who were excitedly whispering together over which at first was withheld when the presented if Russia has any grain of prudence in her if Russia has any grain of prudence i contend with quite sufficiently big difficulties men whose duty it was to receive their in being condemned to fight at an enormous votes. The womenfolk exerted themselves Russian military authorities showed much in being condemned to fight at an enormous votes. The womenfolk exerted themselves anxiety to keep them. There were also a distance from her base of supplies, and she number of children's nurses, and their departure caused great grief to parents and difficulty by going still farther afield, and difficulty by going still farther afield. attempting to maintain an army on Korean territory and a fleet on Korean shores. If she ever essay a military enterprise against taking one side rather than another. WOMEN'S VOTE FOR FEDERAL MEMBERS IN MELBOURNE.

A lady correspondent residing in Melbourne sends us the following account of the first election of federal members in that women :-

The last excitement has been the recordperplexed, others again very decided and alwhich one is supposed to enter alone for the voters, most of whom were able to give what seemed to them a good reason for weeks ago the seaward movement of the were in a great many cases quite indifferent Many of them would not take the troubl squagron would not have possessed any Many of them would not take the frouth special significance. Why should it create to go and vote in a nasty dirty polling so much comment to-day? If it move booth. Anyway the labour party wer southward, and if war be declared before thousands ahead of their opponents, an the Nisshin and the Kasuga are safe at business men are looking sad, and tell on Yokosuka, there may be some qualms of that the Colony will go to the dogs. On apprehension on account of the two cruisers. But does any one seriously imagine that a great upholder of the woman's franchise and the Nisshin the Russian fleet would but in spite of that, is a very charming are take the risk of having to fight its way back to Port Arthur? ners of the typical woman's rights woman a anything but attractive. Of course to Pina and all the comic papers the election h been a perfect God-send. I myself car quite see what good the women's voting w do, except in doubling the votes. It won help to govern the country any better, seems to me; for so few women take politics seriously. Then they usually quite unable to look at both siders and gi advice worth having. Most of them lea it to their men-folks while they mind

THE FIRST ACTS OF WAR.

Thursday, February 11. The first act of war took place on the oth instant at Chemulpo. It appears that on the 8th instant a Japanese squadron under Rear-Admiral Uryu reached that place escorting a number of transports with troops for Seoul. The troops were all put ashore safely in spite of the fact that two Russian vessels, the Varyag, a protected cruiser of 6,500 tons displacement and 23 knots speed, and the Koreets, a gunboat 23 knots speed, and the Abrees, a gundoat of 1,213 tons, were in the harbour where they had been lying for some time. There were also four other foreign warvessels in the harbour, namely the British ship Talbot, the American Vicksburg, the French Passal and the Italian Elba. Nothing further happened during that day, Nothing further happened during that day, but on the 9th instant at 9,30 a.m. some signals were exchanged by the Russian vessels and the warship of "a certain Power" whereupon the former at once made for the open sea. As they emerged from port they were attacked by the Japanese. Naturally the battle was never in any doubt. The Kortets, riddled with shot, fled back into the harbour and was there scuttled by here we have a supplementation of the season of the se crew. The dead and wounded seem to have gone down with the ship and the survivors took refuge at the Russian Consulate, some making their way to the Fascal. The former batch were taken prisoners by the Japanese, but the exact number is not yet known, further than that the crew of the gunboat originally numbered 100 including 12 officers. It would seem that the Varyag did not emerge from the harbour simultaneously with the Koreets; her exit was a little later, but her fate was the same. After sustaining a heavy fire she took fire, or was set on fire, and went down. Her complement numbered 450, including 21 officers, and how they fared we do not yet know, but it is to be feared that there was very heavy loss of life. The Japanese ships are said to have suffered no injury of any consequence. vessels were hopelessly over-powered, and Arthur on the 3rd and remained outside the that they fought bravely. The Varyag, however, should have effected something on the night of the 8th consisted of against her enemies, for she could fire a 11 vessels; namely 6 battle-ships, the of war he could send ships to any part of the Korean coast. If he did, it was a singular hallucination, for Japan's announcement of resolve to adopt independent action should not have left any room for doubt. The scene of the fight was the vicinity of Phalmi island, some four miles from Chemulpo.

The Kokumin Shimbun's Seoul correspondent wires that a report is current in that city to the effect that three Russian steamers of the Volunteer Fleet, with two thousand men on board, were captured by Japanese war-ships in Yashan (Asan) Bay. These troops are believed to have been those sent by the Viceroy in response to an application by the Korean Government. But our readers will observe that this is only a There is much talk of the capture of gun-protection and a broadside discharge of Russian merchant steamers. Apparently a speed of 18 knots, 11½ inches of gun-protection and a broadside discharge of Russian merchant steamers. Apparently a speed of 18 knots, 10½ inches of Russian merchant steamers. We can scarcely suppose that Vice-roy Alexieff adopted such a course, for the troops, in order to reach Yashan Bay on the 8th instant, must have embarked

follow that the presence of the Varyag and hama, having arrived from Hakodate carrythe Koreetz in Chemulpo had anything to do ing furs and seal skins.

with the despatch of Russlan troops to The Russlan ensign on the Kotik was with the despatch of Russlan troops to The Russlan ensign on the Kotik was Seoul: the ships had been lying there hauled down on Wednesday at 3.30 p.m. for some time. Further particulars will There seems to be some question of the throw light on these points.

Just as we write news arrives via the Jiji Shimpo that a battle has taken place at Port Arthur. There had been vague intimations of the heading of a Japanese squad-ron in that direction immediately after the official declaration on the 6th instant, and it would have been a natural act of strategy to send the main body of the fleet in search of the Russian squadron simultaneously with the despatch of transports carrying troops to Chemulpo. This theory would explain the facts now reported, namely that at 11 p.m. on the 8th instant, that is to say, on the evening of the day when the transports reached Chemulpo, a Japanese squadron, doubtless under Vice-Admiral Togo who commands the Standing Squadron, arrived off Port the Standing Squadron, arrived off Port Arthur and at once commenced an attack on the Russian ships which appear to have been lying outside ready for action, as had been previously reported. Details are still wanting, but after some hours' fighting two Russian battle-ships, attempting to escape into the harbour, were torpedeed and sunk by the Japanese. A cruiser—some authorities say an armoured A cruiser-some authorities say an armoured cruiser, others speak simply of a cruiser—shared the same fate. Trying to make the harbour she was torpedoed, and run aground by her crew. The battle was resumed at daybreak on the 9th but the result is not yet reported. No Japanese casualties have been announced up to the present, but of course that does not prove that none has taken place. At any rate it would seem that a very marked initial advantage rested with the Japanese, for the loss of two line-of-battle ships and one cruiser at the first shock very seriously weakens Russia's fighting force.

News coming via Chefoo says that It is evident, of course, that the Russian the Russian Squadron which left Port harbour until attacked by the Japanese on the night of the 8th consisted of 11 vessels; namely 6 battle-ships, the Pollava, the Petropavlovsk, the Peresviet, the against her enemies, for she could have heavy broadside. The two ships were fairly heavy broadside. The two ships were fairly heavy broadside. The two ships were fairly heavy broadside. Pobleda, the Retrisan (flag-ship) and the caught in a trap. Possibly Viceroy Alexieff hereigness, the could be received. Bayan; and four protected cruisers, the Bayan; and four protected crusers, the Askold, the Diana, the Pallada and the Novik, together with torpedo craft. This number tallies with intelligence received two days previously as to 11 Russian ships being outside the port. It is as yet uncertain whether the Japanese attack on the night of the 8th was delivered by torpedo craft. or by the war-ships of the squadron, which was under Admiral Togo. At all events the two best battle-ships and the *Pallada* were put hors de combat, so that in the battle on the ensuing day the Russians had only 4 battleships, one armoured cruiser and three protected cruisers. What the Japanese force consisted of we can not say accurately, but it may be assumed that Admiral Togo's squadron was re-inforced by the ships of Rear-Admiral Uryu from Chemulpo.

vessel's status.

Meantime residents of Yokohama see pro minent Russians going about under official protection. Bishop Nicolai, for one instance, is accompanied closely by a police constable.

THE OFFICIAL ACCOUNTS

The official accounts of the Chemulpo and Port Arthur affairs have been published. With regard to Chemulpo, the two Russian ships are said to have steamed out of har-bour at noon on the 9th instant heading for the Japanese Squadron under the command of Rear-Admiral Uryu. The Japanese opened fire and after a cannonade of 35 minutes the Russian vessels re-entered the harbour. At half-past four in the afternoon the Koreets blew up and went down, and the Varyag, together with a transport called the Sungari, were also sunk, but by what process the message does not state. The Japanese Squadron escaped absolutely without injury and without one killed or wounded. It seems strange that the Russian ships accomplished nothing, for the Varyag had a large battery of 6-pr. quick-firers and the *Koreetz*, though only a gun-boat, carried an 8-inch gun. It will be observed that there is a discrepancy of dates. The above telegram indicates the 9th as the day of the occurrence, but our previous news, now confirmed by a telegram from the Japanese Consul at Chemulpo, gave the 8th. We believe the latter to be the true date,

A telegram from the Japanese Consul at Chemulpo, dated 4.30 a.m. on the 10th, says that Captain Moriyama had just landed, and that no casualties whatever were suffered by

the Japanese ships.

It is alleged that the officers and crews of the Russian vessels took refuge on board the French frigate Pascal.

Mr. Mizuno, Japanese Consul at Chefoo, telegraphs intelligence, conveyed by the Chief Engineer of the British ship Colombia. Leaving Port Arthur at noon on the 9th the Colombia observed a squadron of the Japanese men of-war engaging the Russian fleet. The position was about 6 miles outside Port Arthur, and the Colombia's people observed that the Japanese bia's people observed that the Japanese vessels were in well-ordered array, and that they did not appear to have suffered any injury. The Chief Engineer reported further that during the night of the 8th the Japanese had torpedoed two Russian battle-ships and one cruiser.

Mr. Kurino telegraphs from Paris under date of the 9th instant, that according to an official report from Viceroy Alexieff, Japanese torpedo-craft attacked the Russian squadron lying outside Port Arthur during the night of the 8th instant, and injured the Cesarevitch, the Retvisan and the Pallada. The Viceroy adds that steps are being taken to ascertain the amount of the injury.

The Cesarevitch and the Retvisan are the two finest ships in the Russian Squadron. The former has a displacement of 13,000 tons, a speed of 18 knots, 111/2 inches of

torpedo-boats made a rush for the Russian squadron, which was lying some miles outside Port Arthur with steam up. officers of the torpedo craft probably aimed at the destruction of several ships, but their efforts seem to have been chiefly directed towards the two biggest iron-clads, and they sunk them both. Meanwhile the Japan-ese squadron under Admiral Togo got between the Russians and the entrance to Port Arthur, and in that position a general action commenced on the morning of the 9th. The result is not known yet (10 p.m. roth instant), but it would appear from the statement of the chief engineer of the

to be lying in that harbour. The incidents which occurred in connexion with this detachment need not be repeated. Admiral Togo himself pushed on for Port Arthur. In advance of his squadron were 4 torpedo-destroyers and a number of torpedo-craft. destroyers and a number of torpedo crait.

All II p.m. the scouts came into touch with the ships at the centre of the Russian line, nonading lasted for one hour. It is believed the Russian squadron. It consisted of and the two iron-clads, Cesarevitch and that four more ships were put out of action, eleven vessels, namely, six battle-ships, the Polician, Petropaulovsk, Peresviet, Pobieda, Retvisan and Cesarevitch; one armoured cruiser, the Bayan, and four protected cruisers, the Bayan, and four protected cruisers, the Askold, the Diana, the Pallada whether injuries received by the two battle-ships was not in any way white distributed this description or whether the substant squadron and the canterial the Russian squadron and the affair ended in the Russians returns and the affair ended in the Russians returns and the affair ended in the Russians returns.

Retvisan and Cesarevitch; one armoured for the canterial the russian squadron and the canterial the Russian squadron and the substance of the Russian squadron and the canterial the Russian squadron and the substance of the Russian squadron and the substan and the Novik. These vessels were lying ships dictated this departure, or whether—outside Port Arthur, and in advance of them, at a distance of 5 miles, was a squadron of torpedo craft. The Japanese near the shore-batteries, proceeded to carry resolved to come into action at once, and they did so at a range of 6 miles. After they did so at a range of 6 miles. After about three hours cannonading, it was observed that the Russian line showed signs of breaking. Already the Japanese torpedo craft had dashed in through the zone of fire, and reached a position in rear of the Russian fighting line and at the base of the celebrated hill called Kin-shan. Whether the presence of them caused a panic in the enemy's squadron, or whether some of the ships had suffered serious injury, the Retvisan, and Cesarevitch were seen to make for the harbour. The Japanese torpedo-boats immediately attacked them and sank them both. The same fate overtook the *Pallada* almost imfate overtook the Pallada almost immediately afterwards, and the account from which we quote alleges that the three vessels went down in the narrow fair-way at the entrance of the harbour, thus blocking all ingress or egress. On the following morning the fight was resumed, but there the record ceases.

Striking at any vessels that attempted to leave the Russian column and seek refuge inside the harbour. This theory fits well with the facts, but does not extend to the operations on the following day. What seems pretty certain, however, is that the all ingress or egress. On the following day is seems pretty certain, however, is that the south. The Russians had 2 officers and 51 men wounded, and 9 killed. In the forts on deprive the Russians of the assistance of the shore batteries during the fight.

Friday, February 11.

THE BATTLE OF PORT ARTHUR.

Colombia that up to noon on the 9th the Japanese had not suffered any serious damage and their sixteen ship were fighting in good order.

The above fiets were reported to the Empty and the suffered to the suf peror by Admiral Viscount Ito and Rear-Admiral Saito on the morning of the 10th covered by a line of torpedo craft at a dis-speaks of the torpedoing of the Russian ships tance of five miles. Whether the Russians having preceded the action, and says that were within such a distance from the forts on when he last saw the squadrons, the 16 Since writing the above, further details have come to hand and are published by the Nichi Nichi Shimban. We learn from the Nichi Shimban. We learn from the shore batteries, remains to be ascertained. The Japan-more or less crippled. them that the Squadrou under Admiral esesquadron approaching from the south-east, Togo included three divisions. There is also divergence in the columns of the Nichi Nichi Shimbun, the estimates of the Russian force, some

OFFICIAL ACCOUNT.

There was some little delay in the receipt impaired at the close of the action. The *Iwate's* top hamper suffered somewhat during the battle, but otherwise she has no casualty to report. The *Yakumo* was struck once, but with slight results. All the rest out the manoeuvre, but was not followed by of the squadron came out of the fight intact, the whole squadron. The sea seems to The total losses on the Japanese side were 4 killed and 54 wounded.

A TELEGRAM FROM ADMIRAL ALEXIEFF.

Admiral Alexieff has telegraphed to St. Petersburg that the three ships torpedoed by the Japanese are still affoat. He says that the *Csarevitch* was struck on the side; column, the gradual approach of the latter to the Hwan-kin-shan promotory that the Csarevitch was struck on the side; latter to the Hwan-kin-shan promotory that the Retvisan was hit near her pump which forms the eastern shore of the under the water line; and that the Pallada's harbour, would have brought the torpedoinjury was amidships near the machinery. There were few lost or injured, the list being

the water line.

These telegrams were sent from Paris on the 10th instant, and presumably Viceroy Alexieff despatched them on the 9th from Port Arthur. If his report be correct, it appears that the net result of the Japanese attack was to injure 3 line-of-battle ships and 4 cruisers. The Admiral says nothing at all about any losses on the Japanese side. From his account it would seem that the Russian ships lay under the protection of the forts all the while. It is evident that further particulars are needed.

There is a rumour that the Russian Admiral and several of the Captains of ships were witnessing theatricals on shore in Port Arthur on the night when the torpedo attack was made on the squadron.

THE CHEMULPO AFFAIR.

The Nichi Nichi Shimbun has a telegram from Saseho which throws new light on the fight at Chemulpo. According to this account Rear-Admiral Uryu's squadron anchored outside the port after escorting the transports thither. During the night of the 8th the Koreetz attempted to put out of the port and was followed by a Japanese torpedo-boat, upon which she opened fire. Apparently, however, she abandoned the idea of escaping. Admiral Uryu then sent word to the commanders of the French, British, Italian and American ships in the harbour that as his vessels had been fired on by the Koretts he purposed making reprisals, and he warned them of the danger. A similar message was sent to the Russian Consul, and the commander of the Varyag was informed that the Japanese squadron would wait for him outside the harbour. The Russians accepted the challenge with the results already known.

As to the composition of Admiral Uryu's squadron, accounts differ, but the balance of testimony goes to show that it included the first-class cruiser Asama, and that she had four consorts, the Nutaka, the Naniwa, the Chiyoda and the Suma. Of course the Russians were hopelessly out-numbered, but the brief duration of the combat and the fact that neither the 8-inch guns of the Koreets nor the 6-inch quick-firers of the Varyag inflicted any injury whatever on the Japanese, remain difficult to be understood.

The strangest point of all is that two Russian warships should have been found lying nonchalantly in a Korean port two days subsequently to the rupture of diplomatic relations. Viceroy Alexieff of diplomatic relations. Viceroy Alexieff must have known on the evening of the 6th at latest that a state of war had practically been declared. Had he then communicated with the commander of the Varyag or the Consul at Chemulpo, the two war-ships might have steamed leisurely across to Port Arthur on the 7th or even on the forenoon of the 8th. We are almost driven to complete the steamer to complete t the Viceroy was taken by surprise, though such a hypothesis involves the idea that he must have watched the course of diplomatic events very superficially. At all events his Tokyo under the presidency of Viscount naval dispositions indicated either complete confidence in his own ability to crush the Japanese at any moment, or total oblivion to the perils of the situation. His

fleet was weakened by quite useless division.

Four out of his eighteen strongest units

in Shanghai, and there was another unserviceable. cruiser or gunboat at Vladivostock. Such a dissipation of force on the very eve of a naval struggle is unaccountable. at Vladivostock were as useless for the purposes of the vital combat that impended as were the ships at Chemulpo. We can only suppose that the Viceroy expected the Japanese to fritter away a further interval of valuable time in receiving and exchanging notes which had ceased to be of the smallest practical value. It may reasonably be suspected, too, that he doubted Japan's resolution, and imagined that rather than cross swords with such a mighty Power as Russia, she would accept any, or almost any, compromise at the last moment. Neither is it unlikely that he counted on the efficiency of intervention even after diplomacy had failed. At all events he was caught unprepared so far as concerned the vital element of concentration. Military strategy has changed wonderfully little since the days of the phalanx and the pavise. Tactics are different now from what they were before the days of the breechloader but in good, "never separate your forces on the eve of combat." Of course to the Japanese belongs the credit of having struck at the right moment, and of having struck quickly and strongly. The troops for Chemulpo—we are not at liberty to mention the exact number but it was certainly several thousands-were all embarked and ready to set out within 30 hours of the there must be some error of name.

time when the rupture of negotiations was

The Russian gun-hoat Marion announced in Tokyo and St. Petersburg, and the whole of Japan's naval forces entered the field at the same time. Thereafter there was not a moment's hesitation. The main squadron under Admiral Togo steamed right across to Port Arthur and 30 hours later the two fleets were engaged.

A military attaché of one of the Peking Legations, who has just returned from a visit to Manchuria, says that Viceroy Alexieff has over-worked himself and is now laid up.

Mr. Kato, Japanese Consul at Chemulpo, telegraphs that the Russian killed and wounded were altogether about 100; that about 28 of the wounded are on board the Pascal, 30 are on the Talbot, and others the Elba, Mr. Kato received this information from an officer of the Pascal. The corpses of 6 were landed on the night of the ninth. Two officers are among the wounded. The of their visit to Dalny on the 3rd instant, commander of the Varyag seems to have and that several of them are in need of rebeen wounded but not seriously.

The ships engaged at Chemulpho on the Japanese side were the Tachachilio, the Nauiwa, the Suma, and the Akashi.

Viscount Hayashi telegraphs from London that large sums are being subscribed by English sympathisers on behalf of Japanese soldiers wounded in action, and for the families of the killed.

A high prize court has been organized in

The line of telegraphs from Nagasaki to Vladivostock has been severed. According to the Nichi Nichi Shimbun the Russian Authorities at Vladivostock refused to send Japanese messages after the 6th.

The protection of Russian subjects in Japan has been entrusted by Baron Rosen to the Legation of France.

The foreign residents of Kobe are raising funds for the Japanese Red Cross Society.

All accounts agree that five Russian steamers have been temporarily seized by Japanese men-of-war. These are steamers belonging to the Volunteer Fleet and the East Chinese Railway Company: that is say, ships presumably used for the transport of troops and munitions of war. They will not be permanently held, but are detained merely to check their operations in the fighting arena.

The Sungari (or Soongari), which is reported to have been scuttled and sunk in Chemulpo harbour by the Russians, belonged to the Chinese Eastern Railway Company. She was advertised to leave Shanghai on Saturday, 6th, at such time as the state of the tide might permit, and her destination was Port Arthur and Dalny. We fail to see how this vessel can have reached Chemulpo by the 9th instant. There appears to be no doubt that a steamer was sunk, and the official report calls her the Sungari, but

The Russian gun-boat Manjour, which has been for sometime at Shanghai and which was yesterday reported to have left that place, is now stated to be still lying there, and to have abandoned all intention of going out of the river. It will be remem-bered that the Manjour was lately spoken of as in dock at Nagasaki. Apparently this was a mistake, the vessel at Nagasaki being the Russian steamer Manchuria

The Mongolia, which should have reached Dalny on the 9th, had not made that port on the 10th, and there were many conjec-tures about her. The Mongolia belongs to the Chinese Eastern Railway Company. She left Shanghai on Sunday the 7th inst., at 2 p m., carrying mails and passengers.

A news agency reports that two of the Russian ships got aground on the occasion of their visit to Dalny on the 3rd instant, pairs to their machinery which can not be accomplished without access to Vladivostock dock. Such items are not particularly interesting at present.

The Emperor has conveyed to Rear-Admiral Uryu His Majesty's appreciation of the able manner in which that officer discharged his duties in safely conveying the Japanese transports to Chemulpo and in destroying the Russian war-vessels which he found at the place.

The Government announces that the Saikyo Maru, the Kobs Maru, the Hakuai Maru and the Kosai Maru are to used for the transport of sick and wounded and will rank as neutral vessels.

Shanghai wires that in view of extensive reparations for defence at Port Arthur, were segregated: the Varyag (6,500 tons) at Chemulpo; the Growoboi (12,338) at Vladivostock; the Resua (12,200 tons) at Vladivostock; the Resua (12,200 tons) at Vladivostock is saying that the ice is still 2 feet thick and getting ready for that eventuality.

KOREA.

Saturday, February 6.

The Kokumin has a telegram from Seoul saying that the number of Russian troops assembled on the northern bank of the Yalu aggregates twenty thousand and that some aggregates twenty thousand and that some five thousand have already crossed the river. This striking piece of news has the corollary that details are wanting. Something more is wanting, we suspect, namely, the troops. We are reminded of the Daily Mail's correspondent who saw no the corollary in collection. difficulty in collecting and quartering a hundred thousand Japanese soldiers in Hakodate. When twenty thousand Russian river, the event will not be announced in hole-and-corner whispers.

The insurgents or bandits in Chholiado are again giving trouble. Such disturbers of the peace generally show special activity in particularly cold winters like the present. That is doubtless why the mounted robbers is permitted to declare explicitly in Manchuria have been much heard of recently as well as those in Korea.

Monday, February 8.

It continues to be reported that much coming and going is taking place between Korean officials and the Russian Legation in Seoul, and that many of the former are watching every movement or indication on Russia's part with respectful solicitude.

The Tong-haks are said to be active among the mountains in the south of the Korean peninsisia, and there is even talk of Nothing human is more certain than that if their attacking Seoul. These Tong-haks partake of the nature of stormy petrels. They always appear on the eve of international trouble. It was they that caused in 1894 sufficient disturbance to induce the Korean monarch to summon military aid from China. Perhaps they will induce him to take a similar step now with regard to Russia. But the potentialities of the Tong-haks, like those of the Peddlers Guild, are greatly exaggerated. The Tai-won-kun knew how to utilize these factors in his day. Since his death they are insignificant. What a blessing it would nevertheless be to the Far East were Korean affairs efficiently administered!

The fiji Shimpo reports that the Emperor of Korea has lodged a sum of 600,000 yen with the First Bank and is taking measures for his own escape. Our contemporary says nothing about the monarch's intended refuge. The Russian Legation is not likely to tempt him again, we imagine. In the Cluo it is alleged that on the night of the 5th His Majesty's trepidation was so great that he obtained permission to have the Palace guarded by foreign troops.

The Japanese residents of Wiju have withdrawn to Seoul.

Tuesday, February 9. A news agency reports that two Russian war-ships are lying in Chemulpo, and sur-mises that they are prepared to land marines at any moment.

The Nichi Nichi says that Mr. Hyon's device for borrowing Russian troops to protect Korea has proved a failure and has been definitely abandoned. It never had any chance of success we imagine. And one may be permitted to hope that in the sequel of the present complications such measures will be taken as shall ensure the peace of the East against perpetual distur-bance from Korean intrigues and machinations

hyok have been advocating a triple alliance between Korea, China and Japan, but their project has not been taken seriously.

In spite of the above statement as to the abandonment of Hyon's Russo-phil scheme rumours come that a certain Mr. Kwak, formerly serving in the Russian Legation, has paid a visit to Port Arthur, and received from Viceroy Alexieff m message which greatly strengthens the back of the Korean monarch. But if the sovereign's back has been strengthened, he is said to be still in a state of great and not unnatural trepidation. All available guards are reported to have been marshalled for the protection of the Hakodate. When twenty thousand Russian Palace, and guns are in position at the gates troops congregate on the northern bank of the other hand, a majority of the lead-the Yalu and when five thousand cross the ing statesmen are alleged to be convinced that there is nothing for their country except to rely on Japan.

Meanwhile mysterious rumours circulate to the effect that something Japanese has arrived in Seoul and that the city's spirits are raised. What the something is no journal

Wednesday, February 10. Our readers are probably tired of hearing about the perturbation of the Korean Court. The latest news on this subject is more emphatic than ever. His Majesty is said to incline to the French Legation as a place of refuge. It does not seem to have occurred to him that the best plan of all would be to place himself and his belongings under Japanese protection. Japan is the one Power that sets store by the independence of Korea. Russia over-run Korea and drive out the Japanese, the Emperor's functions as a monarch will at once become things of the

Mr. Kwaku is said to have successfully completed his mission at Port Arthur and to have telegraphed to the Emperor the results of his reception by Viceroy Alexieff. The mission is understood to have been to obtain Russian troops. But the question of time is now embarrassing His Majesty. The Russians are not on the spot and the Japanese are. Unhappy monarch, he seems likely to fall between the two stools.

The immediate arrival of 20 Chinese soldiers to guard the Chinese Legation in Seoul is expected.

The latest news from Seoul is that the Emperor has made all preparations to fly to the French Legation, but that the newly made Empress does not want to move.

With regard to telegraphs, news has also been received that the Korean Government's lines between Seoul and Fusan as well as in other parts of the country, have been

Thursday, February 11.
Mr. Hayashi, Japanese Minister in Seoul, waited on the Korean Emperor on the morning of the 9th instant, and reported that as Korea seemed unable of her own strength to resist the aggression of Russia, Japan had resolved to help her, and that such and such steps had been taken, or were about to be taken, for the purpose. The

made many demonstrations of delight.

of coal, and that the quantity hitherto supplied by the mine has been only 40,000

A telegram from Seoul says that on the 9th instant Mr. Hayashi, Japanese Representative in Seoul, intimated to M. Pavlów, through the Legation of a neutral Power, that he was expected to withdraw from the Korean capital as expeditiously as possible. It was expected that M. Pavlow would leave on the 11th instant accompanied by the Legation staff and the guards, and that the party would embark on the French frigate

Mr. Consul Ijuin telegraphs from Tientsin that he has ascertained that orders have been received by the officer commanding the French troops in Tientsin to make arrangements for the despatch of 200 men as a Legation guard for Scoul. The detachment will embark at Chin-wan-tao

A telegram to the Asahi from Tientsin says that the Russian troops now on the Yalu are five regiments of infantry, six batteries of artillery and five or six thousand cavalry. The force moving towards the Yalu from Liaoyang is put by this authority at 40,000 men.

We note that the Manila Cablenews' Seoul correspondent sends his journal the following items of news :-

Seoul, January 23 A new and what is practically a war ministry and

The first act of the body was to authorize the purchase of ten thousand rifles with which to arm possible levies for the Korean army if it becomes necessary to increase its strength for purposes of defence.

Seoul, January 2

A bitter race war between the Koreans and the Japanese is raging throughout the country.

On all sides the Koreans have attacked the Japanese. The troops are out in the field and the prospects for bloodshed on a grand scale are favourable. No Japanese is safe unless escorted by armed guards in considerable numbers, and the cities are in a tunnult

a tunuit.

Grave fears are felt for the safety of the foreign legations, the guards of which have all been strengthened to a war footing within the past week or so, and the attitude of the people is so strongly anti-Japanese as to give rise to the gravest doubts as to the outcome of the present situation.

CHINA.

Some time ago the Chinese Court addressed to the Viceroy and Governors a series of questions bearing upon the situation. What these satraps were invited to decide was whether, in their opinion, the Chinese empire should draw the sword in the event of war between Russia and Japan, or whether it should remain neutral. It is stated that answers have now been received and that the great majority are in favour of fighting but a few give their votes in the opposite sense. We do not doubt that the latter have good reasons for their view. Indeed, it is very easy to conjecture their reasons. Since, however, some onlookers are pretty sure to adduce this as another illustration of China's pussillanimity, it is well to say that, according to information received from good sources, China was not only prepared to Emperor is said to have plainly showed his disposition to rely on the Japanese.

It need scarcely be said that the Japanese residents of Seoul are vastly pleased at the enter the struggle on Japan's side, but also set on foot preparations to do so. It was by Japan's advice and at Japan's request that she finally decided to adopt the policy entrance of their country's troops. They are reported to have hung out flags and nothing stranger than the spectacle of a great entries sitting quiet throughout a war of the structure of the great empire sitting quiet throughout a war It is stated that the Kaiping mine has which involves the fate of an extensive part Messrs. There seems to have been a journalistic storm of a small kind in Peking. Last month the publication commenced there of a French newspaper calling itself L'Echo de Peking. It appears to have been a hysterical sheet, some of its articles being devoted to denouncing the Manchu dynasty and incit-ing the people to its overthrow, others to calling Viceroy Yuan an assassin, and yet others to dubbing the Empress Dowager Complaint was made by the Chinese Authorities to the French Legation, and as M. Dubail is the last man in the world to countenance excesses of any kind, he summoned to his presence the editor, M. Damorin (?), and warned him that such a journal could not be tolerated. The editor is said to have behaved with defiant insolence, and to have subsequently circulated very garbled ac-counts of his interview with the Minister. The final upshot was his deportation from China, a well deserved fate, if the published accounts be correct. We commiserate with M. Dubail in having been obliged to meddle with such canaille, but his firmness is to be

That day, also, Baron Komura profound regret. The Prime Minister, conveyed a formal intimation to Baron Rosen speaking on behalf of the whole body of in the sense that whereas the Japanese Go-officials, echoed the same regret; and His vernment had made every effort to arrive at Excellency Baron d'Anethan, Doyen of the an amicable settlement of the Manchurian Corps Diplomatic, supplemented his conquestion with Russia, the latter had not gratulations by declaring that he and his evinced any disposition to reciprocate this colleagues sincerely lamented the unhappy peaceful purpose. Therefore Japan could not continue the diplomatic conferences.

THE RUPTURE OF NEGOTIATIONS.

Monday, February 8. It is confidently asserted that the Japanese Government has notified Russia of its intention to assume complete liberty of action. On the 6th instant Barons Komura and Rosen exchanged farewell visits. Baron Rosen is understood to have received instructions to make all preparations for departure at a moment's notice and Mr. Kurino in St. Petersburg has been similarly instructed. The care of such Russian subjects as may remain in Japan and of Russian affairs has been entrusted to His Excellency the Austro-Hungarian Minister.

Viceroy Alexieff on the 5th instant, but the Viceroy is believed to have been empowered to make such changes as the exigencies of the situation might seem in his judgment to

There is no prospect, however, of any reply such as can save the situation. Whatever concessions were at one time contemplated—and some were certainly contem-plated—the War Party gained the ascendancy at the last moment and the reply is expected A telegram to the Nichi Nichi from Peking far believing that the Russian Government says that the news of the doings of the Japhas earnestly sought an exit by the route a great effect on the Chieses Court of intervention, but no Power to the chieses Court of intervention, but no Power to the chieses Court of intervention. has earnestly sought an exit by the route day for Berlin where he will rem of intervention, but no Powers have been short time before starting for Japan. metamorphosis. After the war of 1894-5 Japan, at least to the extent of enforcing the St. Petersburg statesmen found no distruct neutrality in the district between the fficulty in inducing France and Germany to Great Wall and the Liao. his post to-day.

JAPANESE SECURITIES.

Japanese securities and English Consols have both felt the effect of the naval opera-tions at Port Arthur. They are reported to have risen appreciably, the Japanese four-per-cents by £2.10s., and the English Consols by £1.8s.9d.

Stocks in Tokyo have made a great leap. On the 10th instant transactions were very larger, much larger than the circumstances warranted. The Exchange shares leaped up 37 yen; the Densha, 12.80 yen; the Shigai,

9.20 yen, and so on.

BARON AND BARONESS ROSEN.

The Emperor and Empress despatched Baron Sannomiya, Grand Master of Cere-monies, and Miss Kagawa, Lady in Waiting, to the Russian Legation, carrying warm messages of farewell and conveying a silver vase, and a pair of lacquer boxes, various rolls of silks and other articles. The Japanese

PRESS CORRESPONDENT REGULATIONS.

明治计五单三月卅日第三種經營抽屉可

These long-expected regulations appeared in the Official Gazette on the 10th instant, The gist of them, so far as foreign correspondents are concerned, is as follows:-(1) Applications must come through a Consul or a Minister and the name of the paper must be stated. (2) Persons applying to accompany the troops must have been at least one year engaged in journalistic work.

(3) Correspondents that can not speak Japanese may take an interpreter, but must send in his name accompanied by a guarantee bearing the signature of his ployer, such guarantee to state the main facts relating to him. (4) Foreign correspondents may take a servant, but must observe the same preliminary routine as in the case of an interpreter. (5) Several newspapers may be required to have combined representation. (6) Each correspondent must carry a permit which will be furnished by the authorities. (7) Corres-pondents will be attached to the staffs of the Divisions. (8) Correspondents should wear foreign costume and should carry on the left shoulder a white badge with the name of their newspaper in red. (9) Correspondents should carry their permits and be prepared to show them whenever required. (10) Correspondents must observe all directions issued for their guidance by the staff to which they are attached. Any disobedience of such directions will expose a correspondent to be sent back. (11) All correspondence, epistolary or telegraphic, must be submitted for examination by the staff before being sent. All use of cipher will be unlawful. (12) All possible facilities will be afforded to correspondents, and provisions will be supplied it necessary in the field; also they will be allowed, on application, to share in the use of vehicles and vessels engaged for the public service. (13) Correspondsnts violating the military criminal code or the military intelligence regulations will be liable to be punished by court martial. (14) The above provisions from (6) to (13) inclusive shall be applicable to interpreters and servants of correspondents.

THE SPECTATOR.

Dr. J. N. Seymour, who is now in England, has written the following excellent letter to the Spectator :-

letter to the Spectator:—

Sir,—Mr. Norman's views about Japan's ideals (Spectator, December 12th) are in contradiction to my own experience, an experience including a residence of seventeen years in Japan, where I not only lived on terms of intimacy with the Japanese, but had also exceptionally close intercourse with foreigners who made it their business to study Japanese politics and the trend of modern thought. It is merely spreading "fancy and myth" to say that Japan has other than peaceful designs upon the integrity of Occidental influence throughout the whole continent of Asia, that all sorts of associations and societies have been formed with the avowed purpose of sweeping the induced throughout the whole continent of Asia, that all sorts of associations and societies have been formed with the avowed purpose of sweeping the people of the West from out of all countries and lands Asiatic, and that such are very favourite topics, among influential classes. It must be borne in mind that Japan is a country in which long-established, and the people feel that they must not be hasty in rejecting new ideas. It is inevitable that even silly suggestions should be sometimes gravely listened to, and even accepted, by some few. But the mass of intelligent people are not good soil for such seed; it may spring up, but it withers away. It is not difficult to cull from newspapers in Japan reports of sayings and doings which reflect little credit on the participatom. The same thing might be done in any country. But to consider these as typical of the state of Mr. Norman's views, many of your readers will doubtless think that the continent of Asia would be remainder by special subscription.

In the trum of the British Board of the Brit

A correspondent writes asking us to publish a word of warning with respect to any members of the crews of the Nisshin and the Kasuga who may be induced to remain in Japan with the hope of obtaining lucrative employment. When Japan bought the Esmeralda several of her people were so ill advised that they stayed in the country, with the result that they became objects of charity and some of them had eventually to find their way home as stowaways. The sumptuous welcome that is to be given to the officers and men of the two cruisers now on the way from Singapore, may prove misleading as to the opportunities of employment offering to foreigners in this country. There are practically no such opportunities, and, as our correspondent shrewdly remarks, the most charitable method would be to send the men's money to London or Genoa, according to the terms of the British Board of Trade Regulations, and let them follow it as speedily as possible. If they fall among the "sharks and pilot fish" in Yokohama, they are likely to fare ill.

It is stated that the crews of the Nisshin and Kasuga, for whom a welcone is being prepared, number 27 officers and 400 men.

An engagement having acquainted with the discussion should be to the effect that the discussion should be to the effect that the discussion should be to end the localities, the evident desire of the Russians to an examination of the localities, the evident desire of the Russians to make themselves possessors of the whole island and requested that some person who was well acquainted with the geography of the island should be sent to negotiate. The Bakufu although desirons of despatching a second mission—had so much on its hands during the five years which followed that it was unable to carry out its intention, and the Russians took advantage of this long interval to form extensive settlements in Sagalien, which followed that it was unable to carry out its intention, and the Russians taken and second the five several that the discussion should be sent to negotiate. The Rus

much benefited by the extension of Japanese inglence. By the way, was it not Mr. Norman himself, who introduced into India the Japanese system of horing artesian wells? As for the attack made on the Japanese character, and on the supposed relative frequency of murder and intigue, notwithstanding the doliousness of comparison, the only answer is: "Read again European history, including that of the British Isles." And finally, if the Japanese have some bitter feelings when they contemplate the work of the comparison by Russia of Port Arthur, and the Weshalswel by the British—against whom the properties of the reform of language (societies of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed), if they talk much of the blessings of peace, is notall this a proof that they are men of little influence, but to which simister objects are attributed, if they talk the play the proof that they are men of little influence, but to make the proof that they are men of little influence, but to make the proof that they are men of little influence, but to make the proof that they are men of little influence, bu

negotiators, sent in 1862 to discuss the question of Saghalien, proposed the fiftieth arallel of latitude as a boundary between Russian and Japanese dominions, and it will also be observed that the Russians rejected the proposal, asking how it was possible to accept it, declaring that there was nothing in the island by which a boundary could properly be laid down, and predicting that to insist upon laying one down would surely give rise subsequently to complications between the two Powers. Now it happens that to-day Russia proposes to divide Korea by an imaginary line coinciding with the thirty-ninth parallel of latitude, all the district northward of that line to be neutral territory and all the district southward of it to be under Japan's political influence. Japan might recall the Saghalien record and ask Russia, in her own words of 42 years ago, how it is possible to lay down such a boundary when there is nothing in the peninsula to indicate it, and might similarly remind Russia of her own prediction that to insist on laying downan unnatural boundary would surely give rise to subsequent complications. It will also be observed that Russia disputed Japan's claims to Saghalien on the ground that the island evidently belonged to Manchuria-a contention which cuts both ways it may be noted in parenthesis-, and it will occur to any observer of recent events that Russia is only too likely to come to this same conclusion about Korea by and by. Finally the Japanese lost Saghalien altogether by "putting off the negotiations too long" and they are in danger of losing Korea by protracting the negotiations too The whole story of Saghalien's alienadeserves re-perusal at this time, and we have to thank our anonymous correspondent for calling our attention to the fact.

A YEAR'S LYNCHING RECORD.

According to the Chicago Tribune's annual summary, the number of lynchings that occurred in the United States during 1903 aggregated 104, which was next to the smallest number for any year covered by the record, beginning with 1885, the one exception being 1902, during which eight less lynchings were counted than last year. The year having the next best record was 1899, when 107 mob executions took place, and the second best was 1900, when 115 occurred. Mississippi had more lynchings last year than any other state or territory, the number standing against it being 18. Louisiana was next with 14, Arkansas; third with 13, and Georgia fourth with 12. Florida and South Carolina each had eight lynchings; Texas had seven; Tennessee, five; Illinois, Missouri, Montana, and Wyoming, three each; Alabama and Kentucky, two each, and Delaware and Nevada one each. Ninety-two of the 104 lynchings occurred in the south. All the persons lynched were men, except in one instance in Mississippi and one in Louisiana. One Chinaman and seventeen white men were among the lynched. The crimes for which lynching was resorted to were: Murder, 47; criminal assault, 11; attempted criminal assault, 10; murderous assault, 7; unknown offenses, 5; race prejudice, 5; complicity in nurder, 5; arson, 4; suspicion of murder, 3; mistaken identity, 3; insults to whites, 2; making threats, 1; refusing to give information, 1. The months of June and July were the worst months for lynching, there being twenty such executions during the former and nineteen during the latter month. Twelve lynchings were listed in May.

MR. JACK LONDON.

We entirely agree with the Jiji Shimp that Mr. Jack London's punishment in the form of a fine of 5 yen and confiscation of his photographic apparatus, were examples of thoroughly misplaced official zeal. That he was guilty of a technical breach of the regulations which forbid the taking of photographs within the limits of zones of defence, is true, and the police did not exceed their duty in arresting him, for it is plainly impossible to estimate the degree of such an offence without examining the evidence, namely, the photograph itself, and that can not be done without some delay. But when the police magistrate discovered that the picture was simply one of coolies coaling a steamer, that Mr. London, being a total stranger to Japan, could not possibly have been familiar with the special regulations in force here, and that the error committed was not only quite harmless but quite inadvertent, the infliction of a fine and the confiscation of the apparatus assume the character of an We sincerely sympathise with Mr. London, and we trust that his estimate of the Japanese police will not be based on his most unfortunate experience at Bakan.

THE MOTHER OF WASHINGTON.

On Monday February 22nd the American community in Yokohama will celebrate the birthday of George Washington, their first President, with a grand ball at the Grand Hotel. In viewof this social function we think the following Academy review of a book just brought out by the MacMillan Company for Mrs. Roger A. Pryor, entitled "The Mother of Washington and Her Times," will possess more than ordinary interest:—

The author has brought a thorough knowledge of the line and much enthusiasm for her subject to this study of Washington's mother. But the material is scant for evolving a full biography of this colonial matron. She is portrayed less as an individual than as a type of the capable, housewifely women of the ante-Revolution period in Virginia, ruling wisely the complex household of those days. She is exceptional, however, in that much-marrying community, in having remained a widow, and managing alone her estate in behalf of her family of young children. In balance of character and serenity of nature we feet her spirit-motherhood to "the Father of his Country," nor was she less staunch in purpose nor less heroic in sacrifice than her patriot son in the time "which tried men's souls" and women's souls as well, though in ways less recognized in the records of history. The strongest interest of the bonk is in its graphic portrayal of colonial life in the Old Dominion. We have its features of likeness to the country life of England, for Virginia was, as is its boast, settled by English gentlemen, who brought across seas devotion to the soil, to out-of-door sports, to the Mother Country's traditions of hospitality, and loyalty to King and Church. With these inherited qualities we have the changes brought by new environment, the virgin country, the vast forests, the pioneer conditions, and the possession of slaves. Very pleasant was life in these old plantation homes, set in wide and fruilful acres, flanked by stables with goodly number of noble borses and ringed by the rows of negro "quarters." Slavery in Old Virginia was a survival of the patriarchal system, with most human relationship between the master and mistress and slaves born on the estate. With great houses far apart, rough roads and rivers to ford, travel by saddle-horses made visiting a pilgrimage, and justified the lavish hospitality of those broad-porticoed, many-chambered colonial mansions. The book traces with care the political relations of the nation. B

K. Sawa and seventeen others who are suspected of being spies in the service of Russia were ordered on Feb. 9th to leave Hakodate.

DECLARATION OF WAR.

OFFICIAL TRANSLATION.

The following is an official translation of an Imperial Proclamation issued late on Wednesday:—

We, by the Grace of Heaven, Emperor of Japan, scated on the Throne occupied by the same Dynasty from time immemorial, do hereby make Proclamation to all Our loyal and brave subjects as follows:—

We hereby declare war against Russia and We command Our Army and Navy to carry on hostilities against that Empire with all their strength, and We also command all Our competent authorities to make every effort, in pursuance of their duties and in accordance with their powers, to attain the national aim with all the means within the limits of the law of nations.

We have always deemed it essential to international relations and made it Our constant aim to promote the pacific progress of Our Empire in civilization, to strengthen Our friendly ties with other States, and to establish a state of things which would maintain enduring peace in the Extreme East and assure the future security of Our Dominion without injury to the rights and interests of other Powers. Our Competent Authorities have also performed their duties in obedience to Our will, so that Our relations with the Powers have been steadily growing in cordiality. It was thus entirely against Our expectation that We have unhappily come to open hostilities against Russia.

The integrity of Korea is a matter of constant concern to this Empire, not only because of Our traditional relations with that country, but because the separate existence of Korea is essential to the safety of Our Realm. Nevertheless Russia, in disregard of her solemn treaty pledges to China and her repeated assurances to other Powers, is still in occupation of Manchuria and has consolidated and strengthened her hold upon those provinces and is bent upon their final annexation. And since the absorption of Manchuria by Russia would render it impossible to maintain the integrity of Korea and would in addition compel the abandonment of all hope for peace in the Extreme East, We determined in those circumstances to settle the question by negotiation and to secure thereby permanent peace. With that object in view, Our Competent Authorities, by Our order, made proposals to Russia, and frequent conferences were held during the course of six months. Russia, however, never met such proposals in a spirit of conciliation, but by her wanton delays put off the settlement of the question, and by ostensibly advocating peace on the one hand while she was on the other extending her naval and military preparations, sought to accomplish her own selfish designs.

We can not in the least admit that Russia had from the first any serious or genuine desire for peace. She has rejected the proposals of Our Government; the safety of Korea is in danger; the vital interests of Our Empire are menaced. The guarantees for the future which We have failed to secure by peaceful negotiations, We can now only seek by an appeal to arms.

It is Our earnest wish that by the loyalty and valour of Our faithful subjects, peace may soon be permanently restored and the glory of Our Empire preserved.

FOREIGN SYMPATHY AND THE WAR.

There can be no mistaking the feeling of satisfaction which pervades the foreign residents of Japan at the news of the Japanese victories at Chemulpho and Port Arthur: it is deep and sincere and finds expression in many ways. In Yokohama on Tuesday a huge display of national flags was hung out, the streets being a blaze of colour. In Kobe the foreigners are raising subscriptions for the Red Cross Society, as the following letter printed in the Kobe Herald shows:—

letter printed in the Kobe Herald shows:—
Sir,—Hostilities having broken out, we are of opinion that foreigners desiring to show their sympathy with Japan at this, the greatest crisis in her modern history, cannot do so in a more practical manner than by subscribing to the Funds of her Red Cross Society, which must appeal to all nationalities, of whatsoever creed they may be.

We would therefore beg to suggest that you undertake the raising of a Fund for this purpose, towards the commencement of which we shall be pleased to subscribe Five hundred yen, to be equally divided between your own and your morning contemporary's

between your own and your morning contemporary's List, should you respectively consent to adopt our

DODWELL & Co., Ltd., GEO. J. MELHUISH, Manager. Yours faithfully,

Kobe, Feb. 9, 1904.

Mr. Oyama, Japanese Representative in Rome, telegraphs that the news of the successful Japanese attack at Port Arthur on the night of the 8th, having reached Italy via St. Petersburg on the following day, influenced public opinion greatly in Japan's favour. The Tribuna writes that Japan's procedure throughout has been altogether in accordance with right.

The Japanese Consul at Chemulpo telegraphs that the Rev. Mr. Turner, a British missionary, has offered the use of a hospital erected by his mission in Seoul, should any wounded Japanese or Russians need such accommodation. The Consul has replied in the sense that the offer would be gladly accepted should circumstances indicate the necessity.

The leading Chinese in Chefoo are subscribing largely, it is said, to a war fund for

We have received the following from Mr. J. E. de Becker with a request that it should receive the hospitality of our columns;—

de Becker with a request that it should receive the hospitality of our columns;—

A few days ago a time arrived in the history of this Island Empire when the country, as the result of profound conviction, was compelled to choose, most reductantly although deliberately, either to bravely stake its all to preserve its honourable position among the nations and maintain itself as an enlightening and civilising factor in Asia, or to shirk a plain duty, destroy its own destiny, and to sink into a position of miserable dependence and political insignificance.

The Japanese Government having published an official statement defining with admirable perspiculty the position of affairs, to recite in detail the numerous cogent reasons which have caused the unfortunate rupture of peaceful relations with Russia and a resort to the ordeal of battle would be mere verbiage: but all who have carefully followed the course of events during the past few months must admit and admire the great moderation, paience, and courtesy, manifested by the Japanese negotiators throughout, and regret that a corresponding attitude has been conspicuously lacking on the part of Russia.

Whatever may be the outcome of that tremendous struggle which must necessarily ensue (and which I believe has merely begun), the entire heart of the nation is emphatically with their Government, and in order to achieve their purposes the JJapanese people are determined to submit to any sacrifice either of blood or treasure, in their armed struggle with the government of the country whose very name is a synonym for mediaval depotism, detestable tyranny, and barbarous oppression—a government which has flouted nation after nation which studied insolence,

I employ the word "government" in speaking of the Russians, because the quarrel is not with the Russian people but with that wretched creation of paint, tinsel and the knout which has the audacity to pretend to represent them under that misnomer! In making this statement relative to the attitude and resolution of the Japanese people I do so deliberately and advisedly knowing it to be an absolute fact because, as a naturalized subject of this Empire, I have been brought into close touch with the bulk and file been brought into close touch with the bulk and file of the populace and both know and feel the prevail-ing sentiment which thrills the nation, and the intense patriotism which animates and nerves the country in

ing sentiment which thrills the nation, and the intense patriotism which animates and nerves the country in this hour of darkness and danger.

The struggle which is now taking place is one between darkness and light, civilization and barbarism, selfish shackling monopoly, isolation and land-grabbing, and the generous policy of securing a fair field and no favour for the commerce of all nations. Wherever the Japanese go they will be found ranged on the side of constitutionalism, freedom of speech and action, and acting as the vanguard of civilization and humanity; and for that reason alone this Empire deserves the utmost sympathy of all right-thinking persons in her brave efforts at this critical juncture.

While the sentiment and sympathy of the World should be, and is, strongly in favour of Japan, how much more keen should be the natural sympathy of the foreign residents in this country for the people among whom their lot is cast and with whom they are brought into personal and daily contact; and it appears desirable that some active steps should be taken to give practical expression of the genuine fellow-feeling which, without doubt, animates them almost to a man. The most vital interests of the majority of foreigners living in Japan are closely bound up with and concentrated in this country and even from a materialistic point of view quite apart from sentiment, it should not be lost sight of that in

bound up with and concentrated in this country and even from a materialistic point of view quite apart from sentiment, it should not be lost sight of that in protecting their own interests the Japanese Army and Navy are equally assisting to protect the interests of all foreigners domiciled in the Empire.

So far for facts:—the question arises as to what can and should be done to assist, in an acceptable and agreeable manner, our Japanese friends at this juncture; and I think it is best answered by pointing out that behind the "gtory" of the war will naturally follow incalculable suffering. There will be numbers of aged and helpless persons, widows and young children, reduced to a state of misery and desolation, and perhaps starvation, owing to the deaths of their children, reduced to a state of misery and desolation, and perhaps starvation, owing to the deaths of their natural protectors and bread-winners; moreover the military and naval hospitals will be filled with soldiers who, after having fought bravely for their Emperor, will be lying tossing in agony on their beds of sickness. The Red Cross Society will be in need of funds to carry on its work of charity and mercy and the soldiers and sailors at the front will be only too thankful for many little luxuries which in ordinary times would be acceptable, but without which, under such circumstances as the present, life becemes actually miserable.

nucler such circumstances as the present, the beceines actually miserable.

Now here is something which we can do and a work which lies at our very doors, and I venture to suggest that it is our duty as good neighbours and friends to do it.

I therefore propose :-

(t). That an independent foreign Association be formed forthwith to be called the Greatyn Juppei-Kvan (Soldiers' Benevolent Society of Foreign Friends);

Friends);

(2). That the Society make arrangements to open cosmopolitan subscription lists in all the foreign Newspapers, Banks, and Stores throughout Japan; and for this purpose to found branches in Tokyo, Kobe, Osaka, Nagasaki, and elsewere;

(3). That the monies so collected be paid into a common fund and handed to an elective and representative Committee and be devoted to the purposes of the following charities:

(a) One-third to the Red (one Society).

partment of the Navy for the benefit of the sailors.

The above is only an outline of what might be done, and can of course be modified to suit the wishes of subscribers expressed in public meeting; but at any rate it is a suggestion given for what it is worth

NOTES ON CURRENT EVENTS.

The Hiroshima Court of Appeal has admitted the justice of the Public Procurator's argument in the case of the Korean assassins. Ko Yong-Keun's death sentence has been commuted to imprisonment for life, and No Yun-myong's life sentence is changed to twelve years' imprisonment. Proed to twelve years' imprisonment. Pro-bably this action of the Appeal Court will provoke a great deal of criticism, for from one point of view it may be regarded as encouraging political assassinations. The general verdict, however, will be that these men scarcely deserved to rank with common

On the evening of the 4th instant the Prime Minister entertained at a banquet in his official residence the leaders of the six sections into which the House of Peers is politically divided. Baron Komura also was present, and it is believed that the guests were furnished with a tolerably clear insight into the diplomatic situation.

We note that Mr. Alfred Stead and Dr. J. N. Seymour have letters in the Spectator refuting Mr. F. J. Norman's recent remarkson Japanese ideals, etc. Mr. Seymour speaks as one having authority, having lived in Japan over seventeen years.

The death is announced of Dr. Taguchi, one of the most renowned surgeons in Japan. He has published several works on anatomy, especially with regard to the brain.

It will be remembered that a pest-infected rat was found last December in one of the Nippon Yusen Kwaisha's ware-houses at Kayaba-cho in Tokyo. Another has now been found, although most drastic measures of disinfection had been resorted to. Out of 180 rats killed on the Company's warehouses, six have showed pest bacilli. It is believed that the rat last found must have been newly imported from

It is announced that all time-expired men in the Navy must remain at their posts and not be released from service as usual. A similar announcement has been made with regard to the Army, the local militia alone being excepted.

A very interesting series of articles upon the Mosely Education Commission, which (a) One-third to the Read Cross Society:

(b) One-third to the Bureau which will be established in the War Department for receiving subscriptions for the amelioration of soldiers:

(c) One-third to a similar Bureau in the Device of the wifer that the concluding article the writer, dealing chiefly with the American was sent from England to the United States Universities, inclines to the view that the English may learn a good deal from the leading American foundations in regard to post-graduate study and research, but quotes with approval the remark of "a very up-to-date American educationist" a propos of Oxford and Cambridge:—"Do not alter them, or you will spoil them." This he interprets to mean, "Do not try to Germanuse or Americanise them," adding:—"An believe has merely begun), the entire heart of the nation is emphatically with their Government, and in order to achieve their purposes the Jlapanese people are determined to submit to any sacrifice either of idence that it will meet with a liberal and ready response from members of all nationalities, and synonymn for mediaval depotism, detestable tyranny, and barbarous oppression—a government which has flouted nation after nation which studied insolence, their very life blood to decide the fate of Asia for many a long year to come. It is not a time to stand proved itself absolutely devoid of political morality and look on either coldly or indifferently, and we and honour in its dealings with the World at large. tive address delivered by the Rev. T. L. Papil-Ion at Writtle, near Chelmsford, on the 18th December. Mr. Papillon, who had served on the Mosely Commission, while holding that education was only a contributory cause, and not the sole cause, of American prosperity, was much impressed by three facts. One was the readiness with which Americans consented to spare no expense on education. Another was the way in which their schools were used as a great engine for fusing the children of immigrants into the body politic of the United States. Thirdly, he noted the curious fact that in that home of democracy the system tended in the direction of the one-man management rather than of a School Board as a public institution. The Spectator commenting on this address, makes an interesting point. It says that Mr. Papillon fails to make reference to one of the finest of American products,- the "school marm," who serves, says our contemporary, as a standing rebuke to the popular misconception of the American woman as a selfish bird-of-paradise whose one aim is to have a "good time."

" Pavel Petrowich" sends us the following:—" Some of the leading members of the Nippon Seikiokwai (Greek Church) in Tokyo held a meeting on the 7th inst. and discussed whether Bishop Nicolai should remain in Japan or not in case of a Russo-Japanese war. The meeting unanimously decided to request Bishop Nicolai not to return to Russia, in the event of war, for the reason that although a Russian he had no relation with the war and his only mission is to propagate the Master's Gospel. Bishop Nicolai afterwards received the meeting and agreed to the petition. He said he would remain in Japan and labour for his mission; as for his personal safety he was not at all anxious for the Japanese Government would protect him; moreover all thinking Japanese would not fail to recognize the singleness of his aim in this country as missionary of the Gospel of Life. It might be mentioned in this connection that recently an English gentleman sent a letter of sympathy to the mission with regard to the strained relations between Russia and Japan, in which occur-red the following sentence:—"..... if war should break out between the two countries, which if not in the same sense yet in a very real sense are both alike your own and both alike deeply loved by you, the sadness of it is emphasized."

The rumour that Baron Suyematsu is about to receive the portfolio of Home Affairs which Baron Kodama now holds in conjunction with the direction of the Head Quarter Staff, has been contradicted. What is now said is that Baron Kaneko and Baron Suyematsu are about to proceed abroad, the former to the United States and the latter to England.

There are signs that France is growing a little weary of the alliance with Russia and many French journals of recent date contain articles drawing attention to what they consider the one-sidedness of the arrangement. The Times translates the following article from the Petit Parisien, in which questions of tariff and trade are discussed in relation to this subject :-

It is known that the trade between France and Russia does not quite correspond with the cordiality that characterises the relations of the two countries in the field of diplomacy. The exchange of produce scarcely exceeds 250,000,000f, whereas that between Germany and Russia amounts to one milliard, and that of England and Russia amounts to one milliard, and that of England and Russia to 600,000,000f, and yet we only sell to our ally a quarter of the amount we buy from her. The convention of 1893 stimulated

of the most recent statements concerning Mascagni was to the effect that he accepted an offer to take the directorship of a Conservatoire in San Francisco in connection with a model university which a very wealthy American lady, Mrs. Febea Hearst, is founding at a cost, so it has been said, of £8,000,000." The University of California with which Mrs. Phoebe Hearst's name will be ever associated is now thoroughly wellestablished.

The Canadian Pacific mail steamer Empress of Japan, which arrived at Yokohama on Ing with the liquidation, in Yokohama, Kobe Tuesday, brought another batch of war corrand Nagasaki, of outstanding business. respondents, who, doubtless, congratulate themselves upon arriving in the very nick of time. Probably the name best known to our readers will be that of Mr. Melton Prior, the veteran artist of the Illustrated London News. Mr. Prior has a right to be heard about wars and war topics but, unless News, Mr. W. Maxwell and Mr. C. J. Brownell of the Standard, and Mr. R. T. MacHugh of the Daily Telegraph were also among the liner's passengers.

The Trans-Siberian railway, which still lacks the circum Baikal loop and the Khingan tunnel, has cost 99 ½ millions of pounds sterling. In that total are included special outlays on account of the Manchurian section-outlays caused by Boxer outragesand expenses of protection, which figures aggregate 43/4 millions. Hence the actual cost of construction has been 9434 millions, and as the total mileage is 5,992, this works out at £16,812 per mile. Considering that the land and the timber were given, that convict labour was largely available, and that there were no engineering difficulties, this outlay baffles comprehension

Mr. J. Scott Harston, Chairman of the Board of Directors of the National Bank of China, Ltd., speaking at the annual meeting of shareholders, alluded to the danger which threatened Hongkong as a commercial centre

those relations, but they are far from realising the progress in considerable proportion. It is not a producing centre. It is a junction for the progress in considerable proportion. It is not a producing centre. It is a junction for the edistribution of trade and cargo traffic in general and its stability entirely depends upon its ability on attract commerce. In that respect it has a very that affect them. . . . It will be understood that this system makes it difficult for the Russians to purchase from us. It was aggravated after the campaign in the badly treated. The present moment is, perhaps, well studed to obtain a less rigorous tariff from Russia. The protectionist duties adopted in Germany, the pretensions of the Agrarians across the Rhine to pretensions of the Agrarians across the Rhine to pretensions of the agrarians across the Rhine to pretensions of the respective of the canton-Hankow railway, which will place it in a fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to fail to induce the Government of St. Petersburg to the fail to induce the Government of St. Petersburg to the sexual produce of a more extensive market in the Russian Empire.

Russia would give the Dual Alliance a very substantial consecration if she reduced the barriers which it is rather surprising to find a Londont of the standing of the Academy printing such a paragraph as this:—"One of the most recent statements concerning to Mascagni was to the effect that he accepted by the fact, that, in fifty years time China will when we take into account what will undoubtedly be the fact, that, in fifty years time China will be the best market outlet for Great Britain's trade portant when we take into account what will undoubtedly be the fact, that, in fifty years time Chipa will be the best market outlet for Great Britain's trade and commerce. It may seem to you that in making these remarks I am going a little out of the way but I have made these remarks because I think they should be made and ought to receive careful consideration, and be dealt with.

> We hear from authoritative sources, that the Russo-Chinese Bank has decided to cease doing business in Japan, and con-sequently the Bank has already sold the land and buildings in Yokohama, and paid most of its deposits. The Bank is proceedand Nagasaki, of outstanding business

Count Inouye, who is nothing if not practical, observes that it is easy to come to a decision but difficult to put it into practice. Thus the Government have decided to enter upon a contest costing hundreds of millions, heard about wars and war topics but, unless and have resolved to raise the necessary misreported, he seems to have been speaking funds by means of loans and taxes, but the a little at random when he told a Canadian actual operation of floating bonds or interviewer that "When war does begin, augmenting imposts, is not an easy matter. the United States will be the first to step in, What must be done, in the Count's opinion, Great Britain will follow, and then hostilities is to take such preliminary steps as shall will be waged on a large scale, the equal of which the world has never seen." Messrs.

T. F. Bass and R. H. Little of the Chicago itself is that every member of a household News, Mr. W. Maxwell and Mr. C. J. should set aside ten, fifteen or twenty per cent, of his or her income, and every tradesman dealing with the house should do the same, and that the funds thus accumulated should be applied to the purchase of warbonds. Count Inouye has inaugurated that plan in his own household, and the Mitsui Family have agreed to adopt his method throughout all the establishments controlled by them. It is expected that the Mitsu Bishi will follow, and that the device will become generally popular.

> The school of the Greek Church is showing its patriotism—a quality sometimes regarded as doubtful—by compiling and publishing a manual of Russo-Japanese conversation, fifty thousand copies of which will be distributed gratis among the soldiers of the Japanese army. It is fashlonable in some quarters to say that adherence to the tenets of the Greek Church involves weakening of home ties, and the students and faculty of the school think the present a good opportunity to refute that calumny.

rise in the largest and best known of the Bath springs-the King's bath-and the result of his analysis revealed the fact that the rare element helium existed in the Bath The existence of helium led to the belief that something more of scientific interest might be found in the deposits which collect in the tanks and pipes at the three springs, and of which no knowledge exists. A quantity of deposit from the new royal spring was obtained, and was sent to the Hon. R. J. Strutt, son of Lord Rayleigh, who commenced a careful investigation, with the results which he had just communicated. The Hon. R. J. Strutt in his letter said he had found the deposits left by the water of the hot springs contained radium in appreciable quantities, though he was sorry to say not enough to pay for extraction. It would not enough to pay for extraction. It would be remembered that the gas which bubbled up from the springs contained a small pro-portion of helium. Sir Wm. Ramsay had recently made the most important discovery family, in which the little Princess Elizabeth of that radium slowly evolved helium by a Hesse-Darmstadt lost her life, did much to add to spontaneous change. He thought there his melancholy. spontaneous change. He thought there could be little doubt that the helium of Bath owed its origin to large quantities of radium at a great depth below the earth's surface. A little of this radium was carried up by the rush of hot water, and was found in the

We take the following from an exchange: A remarkably rare postage stamp, one specimen in a small collection belonging to a British Government officer, will early this month be offered for sale by auction in London. It consists of a very scarce twopenny blue Mauritius stamp devised in 1847 by the Post Office authorities, but the mistake of printing. Post Office "on one side instead of "Postage stamp" ensured its withdrwal. This stamp is one of a very few specimens made for issue and was never circulated for use. It is a good stamp, with a mistake which rendered it not appropriate for ordinary use. This stamp has never been used on account of the mistake on it, but it is certain that it will be greatly sought after by some of the best collectors of very rare unissued stamps. An offer of £1,000 for it has already been mentioned, probably on behalf of one of the most noted of princely collectors. We take the following from an exchange:

Could a craze be carried to wilder extremes? A thousand pounds, ten thousand yen, a small fortune, for a postage stamp which has no "feature," except that owing to an erroneous superscription it could never be used! There is no room to boast of Occidental sanity after that.

contains various instructions relating to coast defence. Maps are given of the places concerned, namely, Tokyo, Hakodate, Otaru, Saseho, Takeshiki, and Maizuru. The maps show the limits of the zones of defence, and the regulations direct that ships entering these limits must seek directions from the naval authorities.

Mr. Kawakami, Japanese Commercial Agent at Vladivostock, is to leave that place on the 15th instant, by the German steamer Batavia. The remaining Japanese population, numbering some 1,500, are expected to accompany him.

The Foreign Office in Tokyo publishes a telegram from the Japanese Representative in Paris saying that the Russian Government is reported to be about to place a loan of 750 millions of francs through a syndicate headed by the Credit Lyonnais. The bonds will be issued in two weeks.

he met with the greatest civility and assist-

the Royal Society collected the gases that ance from the Russian Authorities. About And yet he knew, would rise again Because the life was in it—lo! 30 Japanese subjects decided to remain, relying fully on the efficiency of Russian

> In the light of the recent telegram sent across the wires by Reuter, the following cablegram which appears in American papers is of interest :-

> Sa. Petersburg, January 12.
> That the Czar will abdicate next June, should the runoured in St. Petersburg. The general impression is that he will leave the throne in favour of his brother, who will become regent until his nephew reaches his majority.

> While it is not definitely known, except perhaps in the highest official circles, that the Russian ruler has actually declared his intention to lay down the burden of government, there is no doubt that he has long been weary of the intrigues and bickerings of the court.

> The troubles arising recently in connection the Far Eastern complications have added to his distaste for his present life. His health is said to be exceedingly poor, and the alleged attempt to poison inimself, the Czarina, and other members of the royal

> nts meanchory.
>
> Since the little Princess expired in his arms His Majesty has devoted himself more than ever to his religious duties. He has always been deeply religious, but now he spends hours at his devotions and in writing prayers in Russian for the imperial family.

The Mitsui Family have presented seventy-five thousand francs to the Paris University in connexion with the class established in the University for the study of Japanese civilization.

Four more steamers of the Russian Volunteer Fleet are said to have been captured by Japanese cruisers, two at the Goto Islands off Hizen, and two in Omura Bay near Nagasaki. Of these vessels one is said to be a ship of ten thousand tons, the others are small vessels of a few hundred tons each.

The Russian Consul at Nagasaki and 18 of his nationals, are to leave Nagasaki on the 15th instant.

THE MAN WHO HAD FAITH.

I knew a man, he wore a beard, At least he'd like to if he could, His forehead was so high, I heard. The top of it was made of wood! His cheek was of the hue of brass, The Official Gazette of the 11th instant His jaw was of the same. Alas! That bears could never bear it. No! Well, as I said, this man had found A fearful power in the word:
You'd never guess, I will be bound,
He'd imitate the song of bird!

He'd many tricks that I could tell, And often off his head would go With ecstacies of sight or smell As well as sound, both high and low.

His power over word was such He'd try the very war to stop; And sometimes he would prompt the Dutch, And sometimes Jo himself make hop.

Tis said indeed he stopped the war At last, by very force of wit, Because he told them all, before, To shout together—think of it!

But no one would believe that he Had done all that he said he did. He never minded this, you see, Because he'd done as he was bid.

The Muse came to him night and morn, When Mr. Mizuno, Japanese Consul at Chefoo, went to Port Arthur and Dalny to arrange for the withdrawal of his nationals, He eared the earth and sowed the grain, But worked like farmer with his plough,-And saw it die and rotten grow;

Now once again this man of faith Goes forth (together with his wife) Into the very land of death, To finish off the earthly strife.

The war that threatened he could stay By just one word applied aright, And this he did; until one day They found they could no longer fight!

How this same came I'll tell you now, (If you believe you shall be saved),

And there are many scribes who'd vow He is a poet, of him raved.

It isn't poetry, but faith, That makes his words so welcome to The world of letters. Every breath Might say the same of me or you.

One day he saw, upon his bed; A wondrous sight, of human form, And found that Soul (as poets said) Itself was pivot of the storm.

With words he got from human frame He wrote a line or two with wit. And sent the editor. His name He signed, but never printed it.

In this he spoke of telegrams And messages sent on by code And how to make the most of shams Until the real episode

Could be arranged and made to come True as the writer's wit had thought; Just as the rolling of the drum Bursts on the ear when drummer's caught.

The sign from master hand to give The first grand crash before the charge; But he, he wrought that man should live His sign, he wrote it fine and large.

Others may sing the songs of war,
Others may chant the joy of fight,
But he, he does as one before
Told how men should do. He was right!

Just as he said, the action came Just as he said, the nations felt, And so we praise his sounding name And worship love when we have knelt.

Love's face is golden, golden too The poetry that he can make: I hope Love pleases yours and you; And that you're happy-for Love's sake!

And thus I end as I began Love is an image in the heart, Of old of wood; but now each man Vows 'tis an editor's best art.

So if you'll try you'll find it true We can escape from war and death If each will do what he can do, And, like that other, act with faith!

H.S.

RUSSIAN MERCHANT VESSELS.

According to an extra of the Official Gasette, an Imperial Ordinance with regard to the capture of Russian merchant vessels in Japanese waters was promulgated on Feb. 9th, to be enforced from the date of issue. The edict provides that Russian ships lying in ports in the Japanese Empire shall be allowed to leave after dis-Empire shall be allowed to leave after discharging or shipping their cargo not later than Feb. 16th. Such Russian vessels as may have left foreign ports before Feb. 16th and arrived at any ports of Japan after the foregoing date will be permitted to leave that port after discharging or shipping cargo; and Russian vessels which can show documents issued by Japanese local authorities certifying that they are on anese local authorities certifying that they are on their way from Japan which they had left within the proper time shall not be captured. Russian ships carrying contraband goods or persons shall not enjoy the benefits of this ordinance.

Hackenschmidt, the German, has defeated Madrasi, the Turk, in the Graco-Roman wrestl-ing championship of the world in London, winning £1,100.

RUSSIA'S EXPLANATION.

THE Russian Government, as stated by Reuter's telegram of this morning, has availed itself of the sole pretext that offers for placing some part of the responsibility on Japan. It claims that this Empire broke off diplomatic relations without even awaiting the arrival of Russia's third reply. But the fact is that Japan waited from the 13th of January until the 5th of February. She waited 23 days, and during that long interval she again and again instructed her Minister in St. Petersburg to press the Russian Government for a reply, on the ground that delay tended to greatly accentuate the situation. To these representations Russia paid no practical attention. Her answer was uniformly unchanged :- " The matter is under consideration." If, now, she wishes to justify herself on this ground, if she sincerely intends to claim that the nondelivered reply would have averted a rupture of friendly relations, her plain path is to publish this reply and to let the world judge the reality of her pacific purpose. From first to last throughout the negotiations she never gave the faintest indication of any disposition to entertain Japan's just proposals. The answer she handed in on the 6th of January was even less conciliatory than her previous reply, for so far from guaranteeing the sovereignty of China in Manchuria and equality of commercial privileges for all the Powers, it actually arrogated to Russia the right to deprive Japan of a part of the privileges actually acquired by her in her latest treaty with China. In a word, what Russia has done throughout has been, not to listen to Japan's remonstrances, not to show any intention of loosening her grip upon Manchuria, but to utilize Japanese intervention as a means of legalizing her own usurpations. With regard to the pretense that the Tokyo Government did not await the receipt of Russia's last reply, while it is technically true so far as the document itself is concerned, it is false in the matter of the document's contents, for the nature of the reply was well known, and it was well understood to be nothing more than an attempt, not even a specious attempt, to gain time for further warlike preparations. Moreover history will never agree that Japan was not in receipt of Russia's reply. She was in receipt of it from the moment that the great Northern Power began to utilize all its vast resources by way of getting ready to fight. Had Japan's proposals been in any way unreasonable, Russia might have been justified in distrusting her ultimate intention, and therefore in making preparations for the worst. But Japan's proposals, now before the world, did not contain one word inconsistent with or in excess of the pledges openly and solemnly made by Russia herself within the past two years. If Russia's attitude towards those pledges had any shadow of sincerity, she would not have

the interests of peace and of her own Czar's trip abroad and for several other reasons, it was unavoidably decided to conduct the reputation. Instead of doing so she impegatiations in Tokyo. And it was not until mediately began, and she never ceased, to the 3rd October last that the Russian Governprepare for perpetuating by force of arms ment presented their counterproposals; and her gross breach of faith. It is a wretched sovereignty and territorial integrity of China and record, and when she attempts to convict to stipulate for the maintenance of the prin-Japan of want of patience, she ignores the ciple of equal opportunities for the commerce and industry of all nations in China, and request-fact that the world has already pronounced ed Japan to declare Manchuria and its littoral as Japan's patience to have been exemplary being entirely outside her sphere of interest. They and even excessive. Nothing but an extraordinary plenitude of faith in the ultimate-freedom of action in Korea; for instance, while traordinary plenitude of faith in the ultimatetraordinary plenitude of faith in the ultimate-ly pacific potentiality of the Tsar and his best advisers justified the Japanese in hesitating in Korea, Russia refused to allow her to use any while Russia strengthened her destructive portion of Korean territory for strategical purposes. In fact, Russia went so far as to propose to capacities, and it needed only this paltry excuse on the part of St. Petersburg to of the 39th parallel.

The Japanese Government utterly failed to see complete one of the most discreditable chapters in the history of civilized inter-

JAPAN'S STATEMENT OF HER CASE.

ON the evening of the 8th instant the Imperial Foreign Office in Tokyo published the following statement of Japan's

It being indispensable for the welfare and safety of Japan to maintain the independence and territorial integrity of Korea and to safeguard her paramount interests therein, the Japanese Government find it impossible to view with in-difference any action endangering the position of Korea; whereas Russia, notwithstanding her solemn treaty with China and her repeated as-surances to the Powers, not only continues in occupation of Manchuria but has even taken aggressive measures on Korean territory. Should Manchuria be annexed to Russia, the independence of Korea would naturally be impossible

The Japanese Government, therefore, being desirous of securing permanent peace for East Asia by means of direct negotiations with Russia with a view to arriving at a friendly adjustment of mutual interests in both Manchuria and Korea, where their interests meet, communicated towards the end of July last such desire to the Russian Government and invited their adherence. To this the Russian Government expressed willing assent. Accordingly, on the 12th of August last, the Japanese Government proposed to the Government of Russia, through their Representative in St. Petersburg, a basis of agreement which was substantially as follows:--

r.—Mutual engagement to respect the in-dependence and territorial integrity of the Chinese and Korean Empires.

2.-Mutual engagement to maintain the principle of equal opportunity for the commerce and industry of all nations in those

-Reciprocal recognition of Japan's preponderating interests in Korea and Russia's special interests in railway enterprises in Manchuria, and mutual recognition of the respective rights of Japan and Russia to take measures necessary for the protection of the above mentioned interests in so far as the principles of Article I. are not infringed.
4.—Recognition by Russia of the exclusive

right of Japan to give advice and assistance to Korea in the interest of reform and good gov-

to impede the eventual extension of the Korean railway into southern Manchuria so as to connect with the East China and the Shanhaikwan-Niuchwang lines.

It was the intention of the Japanese Government originally that the conference should take place directly between their representative and the Russian authorities at St. Petersburg so as to non-employment of Korean territory and non-employment of Korean territory for strate-facilitate the progress of the negotiations and expedite as much as possible the solution of the slibility of accepting had already been fully extincted. hesitated to explain the postponement of situation. But as the Russian Government plained to Russia.

their fulfillment and to renew them in absolutely refused to do so on the plea of the poses. In fact, Russia went so tar an to propose te establish a neutral zone in Korean territory north

why Russia, who professed to have no intention of absorbing Manchuria, should be disinclined to insert in the Convention a clause in complete harmony with her own repeatedly declared prin-ciple of respecting the sovereignty and territorial integrity of China. Furthermore, this refusal of the Russian Government has impressed the Japanese Government all the more with the necessity of the insertion of that clause. Japan has important commercial interests in Manchuria and entertains no small hopes of their further development, and politically she has even greater interests there by reason of its relations with Korea, so that she could not possibly recognize Manchuria as being entirely outside her sphere of interest.

These reasons decided Japan to absolutely reject the Russian proposal in this respect. Ac-cordingly the Japanese Government explained the above views to the Russian Government and at the same time introduced other necessary amendments in the Russian counter-proposals.

They further proposed, with regard to a neutral zone, that if one was to be created, it should be established on both sides of the boundary line between Manchuria and Korea with an equal width, say, of fifty kilometres. After repeated discussions at Tokyo the Japanese Government finally presented to the Russian Government their definitive amendments on the 30th Oct. last. The Japanese Government then frequently urged the Russian Government for a reply, which was again delayed and was only delivered on the 11th December. In that reply, Russia suppressed the clauses relating to Manchuria so as to make the proposed convention entirely Korean; and maintained her original demand in regard to the non-employment of Korean territory for strategical purposes as well as in regard to the neutral zone. But the exclusion of Manchuria from the proposed convention being contrary to the original object of these negotiations, which was to remove the causes of conflict between the two countries by a friendly arrangement of their interests in both Manchuria and Korea, the Japanese Government asked the Russian Government to reconsider the question and again proposed the removal of re-strictions as to the use of Korean territory and the entire suppression of the neutral zone on the ground that if Russia was opposed to have it established in Manchuria, it should no more be established in Korea.

The last reply of Russia was received in Tokyo on the 6th January. In this reply, it is true, Russia proposed to agree to insert the following

clause in the projected agreements:

Recognition by Japan of Manchuria and its littoral as being outside her sphere of interest whilst Russia, within the limits of that province, will not impede Japan or other Powers in the enjoyment of rights and privileges acquired by them under existing treaties with China, exclusive of the establishment of settlements.

It should further be observed that no mention and other Powers in Manchuria under existwas made at all of the territorial integrity of China in Manchuria, and it must be self-evident China in Manchuria, and it must be sen-evident to everybody that the engagement as now proposed by Russia would be of no practical value so long as it is not accompanied by a definite stipulation regarding the territorial integrity of China in Manchuria, since treaty rights being only co-existent with sovereignty, the eventual absorption of Manchuria by Russia would annul at once all rights and privileges acquired by the Powers in Manchuria by virtue of treaties with

Therefore the Japanese Government deemed it indispensable to obtain Russia's agreement to the territorial integrity of China in Manchuria; and decided upon suppression of the restriction as to the establishment of settlements, which restriction conflicts with a supplementary treaty of Commerce and Navigation between Japan and China. They further decided with regard to Korea to adhere to their amendments as there was absolutely no room for concessions

On these lines they, on the 13th January last, renewed their request to the Russian Government to reconsider the question and have since frequently urged them for a reply. But the Russian Government, so far from forwarding it, did not even indicate any date for it.

The Japanese Government have throughout been actuated by principles of moderation and impartiality and have demanded from the Russian Government no more than the recognition of a principle which has been repeatedly and volun-tarily announced by Russia herself, whereas the Russian Government have persistently refused to accede thereto and, while unduly delaying on the one hand their replies whenever they had to make one, have on the other hand augmented their military and naval preparations. In fact a large Russian force is already on the Korean frontier.

The Japanese Government animated by a sincere desire for peace, have exercised the utmost degree of patience, but now they are reluctantly compelled by the action of Russia to give up all hopes of reconciliation and break off the nego-

It appears to us that comment could not strengthen this presentment. We doubt whether the history of civilized intercourse contains any plainer instance of violated engagements than that exhibited by Russia's conduct. Had she persistently denied Japan's right to interfere in the fate of the three provinces there would at least have been no palpable evidence of breach of faith, though such a denial could not possibly have been such a denial could not possibly have been the service at the Church by the Rt. Rev. reconciled with the reasons she herself alleged Bishop Foss. There was a full choir, and the for driving Japan from Liaotung in 1895. There was a full choir, and the for driving Japan from Liaotung in 1895. for driving Japan from Liaotung in 1895. Those reasons were that the tenure of Liaotung by a foreign Power would the choir of All Saints' Church also attended at menace the Chinese capital, would render the independence of Korea illusory and would constitute an obstacle to the preservation of peace in the Far East. Obviously the same arguments apply with redoubled force to the tenure of the whole of Manchuria by Russia in 1904. If the security of the Chinese capital, the independence of Korea and the preservation of peace in the Far East have any concern for Japan, the validity of her title to object to the absorption of all Manchuria into Russia's dominions is quite beyoud dispute. In denying that title, then, Russia committed an act of most flagrant injustice. But she did not constructively admit the total worthlessness of her own pledges about the ultimate restoration of Manchuria to China. That admission came when she endeavoured to impose restrictions on the privileges acquired by Japan

ing treaties with China; when she essayed to elide one clause of the treaties, namely, the Church congregation was held in Van Scharck clause providing for the establishment of Hall on February 5th at 8 o'clock, the Rev. E. settlements at the newly opened marts of S. Booth occupying the chair. The meeting Mukden, Ta-tung and An-tung. The Ladies' Auxiliary, Treasurer's report for

Special mention may be made of the report of the Superintendent of Sabbath School, Mr. C. have no respect for the opinion of the nations, Griffin. He reported an increase in attendance of or else they have allowed themselves to be about 50 per cent. during the year; a keener momentarily carried away by a party which interest had been maintained by the children than momentarily carried away by a party which values international obligations only so long as they do not impede aggressive ambition. It is hard to believe that Russia intended this to be the end of the negotiations. She must have imagined that the bargaining could be made to the imagined that the bargaining could be made to the magnification of the children than the refers had been marked by the children than the refers had been marked by the children than the refers had been marked by the children than the refers had been marked by the children than the refers had been marked by a large spiritual growth on the part of the little folks. The music was bright and the finances in a favourable condition, while the teaching staff were to be the end of the negotiations. She must be the marked by a large spiritual growth on the part of the little folks. The music was bright and the finances in a favourable condition, while the teaching staff were to be the end of the negotiations. She must be the marked that the bargaining could be the marked that the bargaining could be the caching the formation of the little folks. The music was bright and the finances in a favourable condition, while the teaching staff were to be the end of the negotiations. She must be a subject to the little folks.

But she would never have treated a Western that he could not continue his relations with Power as she has treated Japan, for she the Church as pastor. He said: "It is with knows that no Western Power would have mingled emotion that I offer this last message. shown the patience Japan has shown. It is already known to some of you that my acceptance, a year ago, of your unanimous invitation to be your pastor for another year was first to last so far as Russia is concerned, not acceptable to the committee of the board and its evil consequences will not be limited of foreign missions in New York. I received definite instructions from the Secretary directing me to the terrible conflict now in sight: they not to enter into a similar relationship for another will extend to Russia's relations with the period without first obtaining the consent of the committee in New York. I have not felt I could ask for such permission, even when I felt sure that the Church at its meeting might desire to continue the relationship, because the reasons given for the committee's action were undeniably well taken; and I would be made to urge the needs of the Union Church at the cost of the claim upon me and my time of my mission." After speaking of the needs of the Church, financially and spiritually, and the probable future policy of the Church, Mr. Booth said: "I cannot close this report without referring in the most close this report without referring in the most appreciative terms to the very pleasant and sympathetic relations that have existed between us, during the five years I have had the honour and the privilege of being your Pastor. Accept therefore the labours of your Pastor. Accept therefore the labours of the past in the spirit in which they have been rendered, and do not place me in a position which will hinder the reaping by one who III able to put the sickle into the barvest that is ready to be garnered. I do thank God for the privilege of being instrumental in the formation of some organizations in connection with the Church which, if they are properly directed, will inevitably produce fruit for God and the Church."

The Rev. J. L. DEARING and Mr. C. GRIFFIN spoke in appreciative terms of the good work done by the retiring pastor during his pastorate of five years. The meeting was asked to pass a vote of thanks to him for the diligence and faithfulness with which he had discharged his duties, which

rish which he had vote.

Mr. G. Hoorh in the name of the consistory Mr. G. Hoorh and expressed his thanked the retiring pastor and expres appreciation of the good relations that had always

existed between them.

An animated discussion took place regarding a suitable pastor for the coming year. It was eventually decided to leave the matter for the present in the hands of the consistory with the recommendation that they secure the temporary services of a suitable person to conduct Divine Service for the period of a few months.

The following officers for the ensuing year were elected: Elders: Rev. E. S. Hooth, Mr. I. Bunting, Rev. H. Loomis, Mr. G. Booth, Rev. J. W. Frank and Mr. L. Pollard. Deacons: Mr. Wallace, Mr. J. Macbeth and Mr. E. I. Bunting. Trustees: Mr. G. Booth, Rev. J. L. Dearing, Mr. N. A. Vilondaki, Mr. C. Griffin, Mr. W. Harris, Mr. J. Macbeth and Mr. E. I. Bunting. Sabbath

School Superintendent: Mr. C. Griffin. Ushers: Mr. J. E. Gray, Mr. F. Bunting, Mr. F. S. Booth and Mr. A. Nicolle.

The office of organist was left open for the

Mr. J. Macbeth was reappointed Hon. Secretary and Treasurer.

A vote of thanks was accorded Mr. W. K. E. Vincent for his services as organist on several occasions during the past year, notably at Christmas time.

A vote of thanks to the Chairman closed the

Yokohama, February 1st, 1904.

HELM BROS. LIMITED.

The annual general meeting of shareholders of Helm Bros. & Co., Ld., was held on Monday in the Masonic rooms, No. 78. Mr. E. W. Frazar presided and there was a very small attendance of shareholders.

The notice calling the meeting having been read, the minutes of last meeting were taken as

read, the minutes of last meeting were taken as read.

The Charronan then said: They had received copies and had no doubt familarized themselves with the various items of the report and accounts, and he would content himself with calling attention to what the Board of Directors considered a very satisfactory showing, taking into consideration the rather trying business conditions of 1903. They would notice from the statement of accounts that the item of goodwill had been completely written off and the fleet account reduced by a considerable amount. Besides those they had deemed it wise to write off fair-sized amounts from the landing gear, horses, drays etc., the book values of which where now well on the safe.

side. In addition to writing off yen 5,000 from the fleet a sum of more than 10 per cent. of its value had been expended in up-keep, it being the policy of the company to maintain all its lighters and launches in thorough repair. The year's working had resulted in a net profit of yen 21,957.83
which with the balance brought forward from last year's account, made a total balance of yen 25,033.89 and the directors had pleasure in recommending a final dividend of 10 per cent. to be declared at that meeting. That would absorb yen 18,600 and leave yen 6,433.89 to be That would carried forward to next year's account. A large measure of the success was due to the untiring zeal and careful attention of Mr. Julius Helm and his son Charles, under whose management the office staff and routine work had been placed on a very business-like basis.

The CHAIRMAN moved the adoption of the report and accounts with the declaration of a dividend.

Mr. Dodds said be thought the statement of accounts placed before the shareholders and introduced by the Chairman was a very statisfactory one. There was a very substantial writing-off, although he thought he should have liked to see a little more, notwithstanding the item as to upkeep and repairs. He should have liked to see something more taken off the boats, which were getting old and must be deteriorating, and writing-off from which would deteriorating, and writing-off from which would on the boats, which were getting oid and must be deteriorating, and writing-off from which would not have affected the dividend. He thought the most satisfactory writing-off had been the goodwill, which had been wery bad asset for some years past.

The CHAIRMAN said that matter was taken into consideration by the directors, but as the sum of over yes 10,000 had been expended upon the boats, that should be taken as the equivalent of writing-off.

Mr. Dodds said he had not lost sight of that.
The CHAIRMAN pointed out that plant and stock was also put below its valuation and more over it was well to carry over a large amount to the next year.

Mr. Dodds asked, as to the item "house property," whether it included land or only house property? He thought that land and buildings should be distinguished.

The CHAIRMAN expressed the opinion that in

future that might be done.

After some discussion as to the nature of the property owned by the company,

Mr. Donns seconded the motion for the adop tion of the report and accounts, and this was carried.

The Directors were re-elected, the nomination of Messrs. Harmssen and Schimdt-Scharff, being

approved of.

Messrs. W. Y. Showler and F. J. Hall, were elected auditors at a remuneration of yen 600.

Mr. Doops directed attention to the necessity of revising the Articles of Association.

The CHAIRMAN said the suggestion would be

acted upon by the now board.

On the motion of Mr. Dodds a vote of thanks

was accorded to the Chairman and the board of directors, the former of whom in replying said they seemed to have a prosperous season before them in consequence of the war, but what should take place afterwards they did not know. Their bank balance was yen 33,537, of which the dividend would absorb about one-half.

This was all the business and the proceedings closed.

The Directors have the pleasure to submit to the Shareholders the Balance Sheet and Profit and Loss

leave and the Board thus reduced to two members, which is not in accordance with the Articles of Association, it was decided to invite Mr. Schmidt-Scharff to join. It is hoped the shareholders will confirm his appointment. Mr. Harmssen retires from the Board but offers himself for re-election. Auditors.—Mr. N. B. Morton having resigned in May on account of leaving Japan, Mr. W. Y. Showler

was appointed to take his place. The accounts have been audited by Messrs. Hall and Showler, and their re-election is recommended.

YOKOHAMA YACHI CLUB.

明指计五年三月時日第三世鄉伊物部可

The annual general meeting of members of the Yokohama Yacht Club was held on Wednesday at No. 78, Mr. G. H. Scidmore, Commodore of the Club, in the chair.

The CHAIRMAN laid the report and accounts

before the meeting and invited discussion.

The Hon. Treasurer explained that the small balance in hand was largely due to the amount

expended on record flags.

The Chairman called attention to the services of the outgoing Committee, and especially to those of Mr. F. T. Leak, the Hon. Secretary and Treasurer. He also referred to the loss the Club had sustained in the wreck of the Golden Hind, and to the long connection Mr. A. Owston, her owner, had had with the Club. He trusted that they would again see Mr. Owston's flag displayed in the harbour and on a craft which would make Mr. Laffin and the other owners of the

owners sit up.

Mr. Oldis (on half of Surprise) called attention to events that took place in connexion with a race during the last season. He moved that the report and accounts be adopted except with reference to the race of July 25th, as to which the error then made by the Chinaman acting as officer of the day should, he thought, be rectified by the incoming Committee.

This motion was not seconded.

On the motion of Mr. Tucker seconded by Mr. Catto the report and accounts were adopted.

The Chairman spoke of the loss about to be sustained by the departure of Mr. Leak. He remarked regretfully upon the lack of interest shown by the Japanese in the sport of yachting and referred also to the challenge brought from Hawaii and to Mr. Laffin's readiness to meet it. The "Lark" class he spoke of as a distinct acquisition to the Club.

Messrs. G. H. Scidmore (Commodore), Alan Owston (Vice-Commodore) and G. W. Brockhurst (Hon. Secretary) were then elected. The ballot for the election of members of the General Committee was announced to have resulted as follows: Messrs. T. M. Laffin, and F. J. Hall.

The Racing Committee was elected to consist of A. R. Catto, R. Boyes and C. S. Averill.

On the motion of Mr. Leak a hearty vote of thanks was passed by the Commodore, who in return expressed the thanks of the Club to Mr.

This was all the business.

ANNUAL REPORT.

The Committee beg to submit their report for the season of 1903, the seventeenth year of the Club's existence.

existence.

The great feature of the past season has been the racing of the new 12 foot "Lark" class. 15 of this unique craft were built at an expense of not quite yen 100 each. They have proved to be very able in all kinds of weather, both in and outside the break-water, and afforded good sport not only to their enthusiastic crews, but to the retired navigators of the verandah; every inducement should be offered to keep up the interest in this class in the future. 62 races have been sailed during the season; of this number 24 go to the credit of the "Larks."

39 Raters.—The result of the racing in this class shows Mary to be in first place for nearly every race sailed. The owners of Haidee and Maid Marion are to be commended for entering their yachts and thus making races possible.

are to be commended for entering their yachts and thus making races possible.

Cruising Class.—Enthusiasm in this class does not die out, on the contrary the addition of Spray and Wanderer adds new interest. Asagao has this year carried off the record prize from the larger boats, although Dainyo under new ownership has given her a hard chase.

her a hard chase.

21 Raters.—Vixen has taken her old place at the head of the class in the record, her victories early in the season giving her a lead that the newer boats were never able to overcome. Pete and Winsome are tied for second place in the record. Sinbeam, a new Starling Burgess model, has shown great speed at times and will no doubt be a dangerous competition in the reging next year.

tor in the racing next year.

The Y. Y. C. has suffered a severe loss to its fleet of 39 raters. The Golden Hind was most unfortunately wrecked on No. 2 fort on a stormy night in

Several changes of ownership of yachts have taken place, and we are pleased to see the interest taken by new owners in the racing.

The additions to the fleet during the past season have been 15 "Larks" one 21 Rater owned by Mr. F. J. Hall and Mr. E. R. Thompson and built from designs of Mr. Starling Burgess, and the fine auxiliary schooner Towny Atkins.

A new boat is in course of construction for the 21 Raters and there are rumours of still another boat

Raters and there are rumours of still another boat for this popular class.

A report of the season's racing would be incomplete without mention of the historic contest between the Tommy Atkins and our flagship the Yamato Damash. Several of Yokohama's deep-sea sailors took part in this race and we are assured that the fastest boat

The Club is indebted to the donors of many handsome prizes during the season, and also wishes to express its thanks to the local press for many favours.

G. H. SCIDMORE. ALAN OWSTON. T. M. LAFFIN. F. T. LEAK, Hon. Sec. R. BOYES C. S. AVERILL RACING COMMITTEE.

RICHARD ROVES		

THE LAW COURTS.

RICHARD BOYES,

CLAIM ON AN ACCIDENT.

The hearing of a case filed by K. Kiyofuji, on behalf of an old woman, Masa Makino, against Marchioness Oyama, claiming yen 156.40 began in the Tokyo District Court before Judge Yokota, on Feb. 6th.

According to the complaint, states the Asahi, the carriage of defendant ran over the old woman on November 8th last inflicting severe injuries, for which she was removed to the Red Cross

SENTENCE ON A MURDERER.

S. Sakurai, who murdered on Nov. 14th last Nobu, the wife of S. Watanabe, living at Reiganiima. Tokyo, was sentenced in the Tokyo District Court on Feb. 5th, to 13 years' penal servitude. It may be remembered that the murderer in committing this crime attacked a person other than the individual whom he intended to murder.

CLAIM AGAINST A SURETY.

Judgment was given in the Kobe Chiho Sai-Judgment was given in the Kobe Clinto Sat-bansho before Judge Tanaka and two Associates on Feb. 4th in an action brought by Mr. Adolf Gysin, of the firm of Gysin and Schoeninger, 81, Kobe, against Matsuki Bunkyo, a merchant of Kano-cho, Kobe. The claim in the case was for the recovery of yen 260.44, which sum the plaintiff alleged was lost through the action of a batto in his employ, for whom the defendant became surety when the banto, was engaged by Messrs. Gysin and Schoeninger. The plaintiff did not appear, nor was he represented, and the case was dismissed with costs against him.

THE GOLD MINE CASE.

The hearing of this case, instituted by Mr. J. Helm against J. Fujita, claiming yen 3,955.74 with interest, for loss in mining work, began on Feb. 8th in the Yokohama District Court before Judge Hasegawa.

Mr S. Sawada was present for plaintiff and

Mr. H. Sato for defendant.

Plaintiff's counsel stated that plaintiff made a contract in 1901 with his predecessor to jointly undertake work in the Maruo gold mine, Kaga province. The principal point of the contract stipulated that if the analysis of minerals showed stipulated that if the analysis of minerals showed little prospectof good results, plaintiff would cancel the contract; that plaintiff, however, would invest the money necessary for the trial excavations. Subsequently plaintiff furnished money for the purchase of an engine boiler, etc., amounting in all to the sum claimed. Although the defendant had reported in favourable terms upon the mine, the analysis proved very bad. Plaintiff consequently sent a notice in March 1902 cancelling the contract and a formal notice in July in the same month, with the same object. Defendant's Counsel contended that Mr. T. Sato, a civil engineer, attended to the mining work, and his analysis showed good prospects. As evidence, plaintiff's Counsel put before the Court the contract, six receipts, estimates of engine boiler, machines, &c.

engine boiler, machines, &c.
The case was adjourned till Feb. 22nd at x p.m.

BATCHELOR v. THWAITES.

On Feb. 6th, the Yokohama District Court delivered a formal judgment in this case, verbal judgment having been given on Jan. 22nd. The important points are summarized as

THE GIST OF JUDGMENT. — Defendant is ordered to pay plaintiff yen 2,500 and interest from September 18th, 1902, to the execution of this judgment, at the rate of 5 per cent. per annum, and defendant was also ordered to bear three-fifths

of costs; plaintiff to bear two-fifths.

FACT.—Plaintiff claimed yen 2,500 which he invested in an exhibition of illusions and yen 2,400 estimated loss caused by the failure of the performance. Plaintiff stated that on September 18th, 1901, he made a contract with defendant, who invited him to invest money for the purpose of giving performances at the Fith Domestic Industrial Exhibition at Osaka. Plaintiff promised to invest ven 3,000, for which he was to get one-third of the profits, and he further agreed to forego his share upon paymonths. ment of yen 4,500 nine months after the performance was commenced. The illusion performance commenced at first in Tokyo, but with bad result, and subsequently it was removed to Shanghai, on October 17th or 18th, 1902. Plaintiff thus lost the profit anticipated to be made at Osaka. Plaintiff then cancelled, on Oct. of 39 raters. The Golden Hind was most unfortunately weeked on No. 2 fort on a stormy night in October.

The Club also regrets the departure of Mr. Keswick and his fine yacht for Hongkong. Mr. Keswick has acted on our Committee for the past two years and we are sorry to lose his valuable services.

The Society's hospital, the expenses incurred amount:

Indeed, The Golden Hind was most unfortune amount:

Society's hospital, the expenses incurred amount:

After discussion, the Court rejected the claim and ordered plaintiff to bear costs, on the ground back the invested money with interest, and asked defendant to pay the past two years and that plaintiff's representative was not properly authorized to appear in Court.

Defendant contended that a third person was to perform the illusion, in which defendant simply held a share. Plaintiff invested pen 2,500 under a promise to have one-third of the profits. The performer of the illusion commenced the exhibition in October but proved to be unsuccessful, incurring much loss, and he was compelled to remove the exhibition to China.

REASON—Under the statements of both parties it is well understood that defendant misled plaintiff about the profit to be made by performing at Osaka during the period of the Domestic Industrial Exhibition, and that plaintiff was led to invest yen 2,500. The claim of defendant for the estimated profit of yen 2,400 was rejected on the ground that in the event of loss, plaintiff agreed to have no claim against defendant with regerd to interest on the invested money.

CLAIM ON BREACH OF CONTRACT.

The Tokyo Appeal Court, gave formal judgment on Feb. 3rd in the case appealed by K. Yamada, sugar dealer, against Messrs. Simon, Evers and Company, the verbal judgment having

Evers and Company, the verbal judgment having been delivered on Jan. 21st.

It may be remembered that on June 15th, 1903, judgment was given in the Yokohama: District Court ordering the appellant to pay yen 1,597.17 for loss caused by breach of contract and interest till the execution of judgment. The Tokyo Appeal Court now quashed this judgment, disallowing the claim of the foreign firm.

The principal reason for the judgment given at

disallowing the claim of the foreign firm.

The principal reason for the judgment given at the Tokyo Appeal Court is as follows:

According to the 3rd item of the contract (Exhibit No. A-1) concluded by both parties, it is stipulated that in case of dispute as to the quality of goods, the purchaser could not refuse to take delivery of merchandise.

THE NAIGAI BOYEKI KAISHA v. J. L. O. EYTON.

This case, in which the plaintiff firm claims yen 523, loss arising out of a transaction in percussion those gentlemen who acted as stewards of the cours, came up again in the Yokohama District Court on Feb. 9th.

The statement of plaintiffs' counsel showed that plaintiffs purchased on May 15th, 1902, from defendant at auction 100,000 No. 320 brass percussion caps and 33,500 No. 380 caps for yen 52 in all but the anctioneer did not deliver the goods. Plaintiffs it is alleged thus sustained

damage in the business.

Defendant's counsel held that plaintiffs did not make a promise with defendant to purchase the goods, though a representative of plaintiff's firm was present in the auction room when the sale of the goods took place. Counsel asked the Court for leave to examine K. Mitamura as a witness. The Court granted leave to do so.

The witness was then examined. He stated that Ikeda, a merchant, purchased on May 15th

Having introduced two of the percussion caps, defendant's counsel asked the Court to ascertain whether those were the goods in dispute. The

witness replied that they were the same.

The case was adjourned till Feb. 18th at

CROSS COUNTRY RACE.

This event took place on Saturday afternoon in weather which left nothing to be desired. It was one of those rare mid-winter afternoons when the air is perfectly still and the sun shines out from a deep blue sky speckled with a few fleecy clouds of white; when the eye can travel over immense distances and the sea looks as tranquil as a mountain lake in summer. A contranquil as a mountain lake in summer. A con-siderable number of spectators, including many ladies, were gathered at the Grand Stand on the Race Course and evinced much interest in the race, the greater part of which could be witnessed only the clothes he stood in.

period of the Osaka Exhibition from April 1st to from the first floor. Fight competitors faced the June 30th. H. W. Kilby, W. B. Mason, W. Graham, R. C. Bowden and J. L. Graham: a smaller number than we expected. Surely such an event should have attracted a score of runners. The course first lay along the Race Course to the bungalows at the far end and when the runners turned off to the right, Irwine was seen to be in front of the bunch. A few hundred yards sufficed to change the bunch into a string and passing the second flag the order was Kilby, followed by Irwine, while the The third mark, half a mile further on, saw
Mason, Irwine and Kilby leading by 30 yards.
This order was maintained, although each of the three leaders went to the front in turn all the way back to the Race Course, the others gradually falling more and more to the rear. Mason made use of a short cut unknown to the others which brought him first on to the Race Course. From here the runners were well in view of the spectators as they crossed the fields inside the Race Course and slowly climbed the further side. The run was next to the old fort overlooking Honmoku, haif way to which Irwine fell out. From there to the Snake Lake, Kilby and Mason were well in front, the former leadand Mason were well in front, the former leading, passing the flag about two yards apart; Bowden 500 yards behind—300 in front of J. L. Graham, who was followed by Hayward. Mason's knowledge of the ground gained him Mason's knowledge of the ground gained him some 30 yards near the new Ceinetery and he reached the flag on the Race Course well ahead, the order of the others remaining the same. The winners were thus: ist, W. B. Mason, Jr.; 2nd H. W. Kilby; while Bowden, J. L. Graham, Hayward and W. Graham finished in the order named—Irwine and Ford being the only two starters to drop out. The course was between seven and eight miles and the winner covered the seven and eight miles and the winner covered the distance in 42 minutes.

The thanks of the Club are due to Mr. Bladwho gave the prizes, and to Mrs. Blad, who gracefully presented them to the winners, and also to

WRECKED IN SIGHT OF HOME.

The circumstances of the loss of the White Star sailer Orontes are peculiar in several respects, remarks the S.-C. Morning Post. The Orontes had arrived in the Channel from Caleta Colosa, with a cargo of nitrate, and engaged the twinscrew tug Oceana to towher to Dunkirk. Whilst endeavouring to get fast to her prospective tow, the Oceana struck the Orontes with her port propeller and knocked a hole in her side, stripping all the blades of the propeller. Unfortunately neither the tug nor the sailing ship crew knew that the latter had received a mortal blow, as the absorbent nature of the cargo pre-vented the inflow of water being noticed until the ship began to settle down. At the Marine Court of Inquiry the Judge experienced some diffi-culty in arriving at a just decision as to whom was to blame for the disaster. An unpleasant feature of the case was that allegations were made, leature of the case was that allegations were made, and found by the learned judge to have been substantiated, that the captain of the *Orontes* had celebrated his homecoming by an undue indulgence in intoxicating liquors. In the opinion of the Judge, this circumstance was not the cause of the er, and that too much importance should not be attached to it, as the captain had just come from a long voyage and bore an excellent reputation for nearly forty years under the same ownership. It was also said that the *Orontes* was unseaworthy because hes pumps were out of order. The judge, however, found the disaster was caused by the bungling of those in command of the tree. of the tug.

LITERARY GOSSIP.

The Queen of Roumania has just given another to the many proofs already known of her good-ness of heart and sympathy for the afflicted. Her Majesty is having fitted up, at her own expense, in Bucharest, a printing establishment especially for the production of books in raised type for the blind. The books are to be distributed to institutions throughout Roumania, where there are blind persons.

Professor Skeat is attempting the task of modernising Chaucer for the benefit of those students who find the Old English too difficult. "The Knight's Tale; or the story of Palamon and Arcite" will be published in a few days as a volume of the "King's Classics," by Alexander Moring (Limited.) Among other volumes in the series the first of the "King's Letters," edited by Mr. Robert Steele, will also be published shortly.

Mr. John Bach McMaster, professor of Ameri-Mr. John Bach McMaster, professor of American history at the University of Pennsylvania, is reading the proofs for the sixth volume of his "History of the People of the United States," which, beginning publication in 1883, reached its fifth volume three years ago. The forthcoming volume deals with the period between 1822 and 1845, and is said to be particularly rich in contemporaneous material, including long-forgotten pamphlets. campaign documents and private pamphlets, campaign documents, and private

Mrs. Katherine Cecil Thurston, author of "The Circle," whose new novel, "The Masquerader," Circle," whose new novel, "The Masquerader," began its first installment in the January number of Harper's Bazar, was born in Cork, in the south of Ireland. She was an only child, educated at home and much given to reading. Strangely enough, in view of the success of her first novel, Mrs. Thurston avers that the thought of writing never came to her until it was suggested by her lustband who is himself an author. husband, who is himself an author.

Mr. Henry Haynie, author of "Paris, Past and Present," has completed a volume of reminis-cences which he calls, "Celebrities in Slippers." Among the personages that figure in this volume are Frederick III., Edward VII., Francis Joseph, Dom Pedro, the Orleans princes and the ex-Khedive of Egypt, Gladstone, Jules Ferry, Alexander Ribot, Lord Randolph Churchill, Bismarck, Pasteur, Renan, Sardou, Daudet, Verdi, Gounod, Massenet, Liszt, Leo XIII., Pius IX., Bougereau and Missenets. and Meissonier

The production of "Parsifal" in New York has led to a Wagner craze in that city and it is therefore not strange to hear that Mr. Henry Krehbiel's volume, "Studies in the Wagnerian Drama," is in great demand at present because of its scholarly account of "Parsifal." Mr. Krehbiel its scholarly account of "Parsifal." Mr. Krehbiel inquires into the origin of the opera, and shows that it was an offspring of two previous dramas by Wagner, one of which was entitled "Jesus of Nazareth," the other "The Victors." In his analysis of the latter and greater opera Mr. Krehbiel says "The fundamental elements of the music of 'Parsifal' are suffering and aspiration. When they are apprehended the ethical purpose of the drama becomes plain, but not till then."

By the death of Mr. Clifford Harrison the English public loses one of its most gifted enter-tainers, although failing health had compelled his retirement some time ago. Author, actor, musician, reciter, artist—for during a long period of ill-health Mr. Harrison developed a remarkable talent for sketching in black and white-Mr. Harrison was one of the most versatile men of of his time, while his gifts as an elocutionist were of the highest order. It was Mr. Harrison's brother—the late Rev. William Harrison—who married Charles Kingsley's daughter "Lucas Malet." Among Mr. Clifford Harrison's own of the tug.

We (Japan Mail) might add that a son of Capt. W. Townsend, late of the N.Y.K. steamer Sanuki Maru, and now in command of the Ceylon Maru, building at Nagasaki, was on the Orontes at the time she sank. He reached Dunkirk with only the clothes he stood in. Down," and "Of All the Tribe of Teguman," are dainty melodies such as may well appeal to older vocalists, and can not fail to charm, the last-named being particularly pleasing. All the music is well adapted to the words, and the two combined form a delightful little volume which will be much appreciated by young and old.

Professor Masson, whom The Times has been consigning prematurely to another world, is happily still in the land of living. It is now eight years since the genial and learned professor, whose outward resemblance to Thomas Carlyle grows more and more remarkable with the flight of time, retired from the Chair in the University of Edinburgh of which Hugh Blair was the first occupant. During the thirty years in which Professor Masson taught English literature and rhetoric at Edinburgh thousands of pupils now scattered throughout the world sat under him, while among the Edinburgh men who have since obtained distinction in literature may be included Stevenson, Conan Doyle, Barrie, and Watson. But it would take much space to enumerate all Professor Masson's claims to distinction. Lord Rosebery called him not many years ago the "Grand Old Man of Edinburgh," and certainly since Professor Blackie ceased to walk in Princes-street, Dr. Masson has been the most picturesque and characteristic figure in the streets of the Northern capital.

Dr. F. J. Furnivall, who has a breezy letter in *The Times* on the subject of the Milton MSS., which he calls a mere scrivener's copy of no value whatever as a curiosity, is an old controversialist in matters of this sort. It was only the other day that he was conducting a lively discussion in the same organ respecting the copyright claimed by Judge Parry in his edition of the "Love Letters of Dorothy Osborne." Dr. Furnivall, Letters of Dorothy Osborne." Dr. Furnivall, who never calls a spade an agricultural implement, has no words strong enough to express his contempt for the Baconians. "If you study Shakespeare chronologically," he observed not long since, "all the Bacon rot and stuff of that sort drops off your back like water." Another of Dr. Furnivall's hobbies besides old English texts and MSS, is sculling—a branch of oarsmanship to which he was devoted so long ago as 184x, when, with John Beesley, he built the ago as 1845, when, with John Beesley, he built the first two narrow rowing-boats in England. Later he introduced the first sculling-four and scullingeight races, while a big three-sculling boat was one of the gifts presented to him by his many friends in celebration of his seventy-fifth birthday three

In the Life of Commissioner Kerr, the famous Judge of the city of London Court, who passed away a year ago, is told a good story of Lord

The poems in Rudyard Kipling's "Just So Stories," already so popular with children, have now an added charm in the delightful music to which they have been set by Edward German. These songs possess decided originality, and are extremely varied in style. Several of them, notably "The Camel's Hump," "I Keep Six Honest Serving Men," and "The First Friend," have simple tuneful airs, easily learned by a child. Others, again, have cleverly written accompaniments of a descriptive character, particularly attractive to young folk, such as "Kangoroo and Dingo," and "When the Cabin Portholes"; though possibly the difficulty of some of the music may detract slightly from the general usefulness of the volume. "Merrow Down," and "Of All the Tribe of Tegumai," are dainty metodies such as may well appeal to older used in the room that they had refused bail by his advice, admit that they had refused bail by his advice, admit that they had refused bail by his advice, and that a Judge at Chambers had afterwards problems had afterwards and that a Judge at Chambers had afterwards and that they had refused bail by his advice, and that they had enterwards the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose the way to London from the country to oppose this induced in their minds made them acquit the prisoner. Leaving the Court that day, the prisoner's Counsel asked his opponent, 'Why did you object to that question?' The latter indignantly protested that his adversary, when he asked it, must have known that it could not be put. 'Yes, I did,' was the answer; 'but I knew you, too, and felt sure you would object at the right time. But you should have waited for the answer, as it would have been "No!"'"

FUNCTIONS AT THE SECOND HIGH SCHOOL.

The Second High School during the past few weeks have held meetings of various kinds in its capacious Lecture Hall. Some of these have been thrown open to the outside public; others have been hald for the school of the school. have been held for the sake of the students and teachers of the school only. It is customary with such schools to take a very formal leave of teachers who are going away. On these occasions farewell addresses are delivered by the Director, and a number of other office-bearers in the school, and the gentlemen leaving are expected to reply. Usually such functions descend to the level of tedious conventional formality, but when a teacher of some standing and character happens to be bidding farewell to the institution he not in-frequently utilizes the occasion for ventilating his Brampton, which though often related has pro-bably not before been in print. The story is told a propos of the Commissioner's advice to let evidence of prejudice be put in ment schools freedom of speech on almost every without objection, as it generally injures the subject is now allowed to an extent undreamt of person who imports it. Mr. Henry Hawkins is ten years ago. The old notion was that the said to have described how,—"When still a students should only he allowed to listen to the

school. Mr. Muko has considerable linguistic ability. He studied under Mr. Spinner, ar ability. eminent German missionary, many years ago, and he speaks both German and English with more than ordinary facility. But being entirely ou of sympathy with the whole of the Mombusho sys tem of education and being very sick of the narrow minded, unpractical, idle-theory-spinning typ of school teacher and all his ways, and seeing in future career worth waiting for in the Japanes educational world, some months ago he re solved that he would plunge into busines and endeavour to confer some lasting benefi on his fellow-countrymen by striking on in a new line. In his opinion the rice growin industry in Texas is going, if properly utilized, topen up a new era to Japanese rice growers. The seed cultivated in Texas is Japanese see and many Japanese are engaged in farming there Mr. Mukō's idea is to go at once to Texas, stud the methods followed there with such wonders success and then come back to Japan and set th Texas, or similar, machinery in motion here. M Mukō says that if once America begins to expor Japanese rice by the million koku, as within the next to years she is likely to do, the rice industr in this country, dependent as it is solely on han labour, will be irretrievably ruined. Japan only hold her own in the markets of the world by the use of labour-saving appliances of various kinds. The cost of these appliances is no long beyond the purchasing ability of Japan's large farmers. But these men need guidance ar stimulation. This guidance and stimulation M Mukō hopes to furnish. In his speech at th school he confessed that the scheme might protoo great to be put into operation at once within his lifetime, but he added that it was a object worth working for and helping forwar What he had to say about the inefficiency the teaching in all Government schools has be the teaching in an Government schools have be said many times before. For the past 10 yea the Japanese press, as may be seen by t translations which have appeared in the columns, has perpetually dwelt on this su ject. What is wanted by the Education I partment is a new set of teachers in the Element and Middle Schools West Middle Fight. ary and Middle Schools. Mr. Muko righ observed that there is no subject that ce be named on which the instruction giv in the Middle Schools is either thorou or satisfactory. "I have asked" "teachers mathematics, teachers of chemistry, teachers Coreign languages whether the students." foreign languages whether the students whave entered the High Schools have been p perly taught in the lower schools said Mr. Mu and the answer is invariably a decided, 'x 'We would rather,' say all the teacht have students who know nothing of a subj than those who have been misguided the Chūgakkō.' The English teachers in school spend most of their time in untea ing, in correcting the mispronunciation and of mistakes for which the Chugakko are responsib Our education is all wrong, contended !
Mukö. Neither our High Schools nor
Universities are on the right track. It is
new rules as much as men of real teaching abil said to have described how,—"When still a young man at Sessions, with a serious case to defend, yet having no defence, he once, on a purely technical ground, while ever on the looknown of a 'break down,' forced a Magistrate's clerk to be put into the witness-box by the prosecution, to prove a purely formal matter; how, having got him there, he cross-examined him, and made him practically admit that he stidents should only he allowed to listen to the propounding of carefully selected theories and doctrines and the subjects marked "Dangerous!" new rules as much as men of real teaching abil men with ideas, men of character, men who qualified to lead their fellow-men that are no ous. It was supposed that the students did not possess sufficient knowledge, insight and common sense to prove all things and to hold fast that which is good. Though most of them are grown-up, they were treated like children going to the dogs." Japanese students the

through hear so much said in praise of their through hear so much said in praise of their country and the progress it has made that it may be a wholesome corrective for them occasionally to listen to the speech of an extremely earnest and patriotic gentleman like Mr. Mukō, on whose mind Japan's defects and failings have made a far deeper impression than the mast achievements. all her past achievements. As an antidote to national variety Mr. Muko's speech, though condemned by many who listened to it, has its who do not shrink from telling us of our faults. The Japanese, as a people, it has always seemed to us, turn aside with disgust from fulsome flattery while they listen with wonderful equanimity to a perfect diatribe against existing modes of thought, policies, and institutions. But the educational world has unmistakably gone ahead. Fifteen years ago no body of students would have listened quietly to such an exposure of weaknesses as that to which Mr. Mukô treated the students of the Second High School last month. without saying that in some parts of his speech Mr. Muko indulged in hyperbole, making things out to be far worse than they are and there was no attempt throughout to balance the account for and against modern Japan by placing on one side of the ledger her moral assets and on the other her moral defects. That was a weak point connected with the speech, which detracted much from its value in the minds of discerning students and in those of the teachers. But a speech like that will not easily be forgotten and Mr. Muko's future career will be watched with keen interest not only by all the students of the Second High School, but by the whole of the Senda community, Japanese and foreign, among whom Mr. Muko enjoyed quite exceptional popularity on account of his being a living embodiment of the motto, Suaviter in modo fortiter in re. A man of broad views, of charming manners, warmhearted, thoroughly sincere, energetic even be-yond his physical strength, of which he has a very limited stock, and blessed with a rare openness and receptivity of mind which made him ready to learn something from everybody he met, Mr. Muko will be missed in Sendai by a wide circle of friends and acquaintances.

On the 29th ult. at 5.30 p.m. the Literary Department of the Shōshikai held a Mock Parliament in the School Hall, which was very largely attended by students and their friends. It was not such a success as was achieved some five or six years ago in the same hall. On that occasion the teachers took part in the proceedings, forming a Cabinet and replying to questions put by the members. That entertainment, for such it was regarded, was described fully in these columns at the time. The description was subsequently translated into French and published in the Paris Matin. The subject discussed then was "The advisability of abolishing examinations," a subject which naturally awakened tremendous interest among the students and called forth all their argumentative capabilities, and a subject on which the school authorities felt it to be their duty to take a very decided line. Many of the speeches made on that occasion were brilliant orations for young hands at public speaking. This year there were two bills brought forward. One on religion, introduced by the Government, and the other a private bill in favour of amending the law relating to active military service. The wording of the Government Bill, which was presented by the Minister-President,

said one speaker. The Bill provided for a Divinity School to be conducted by the Mombusho project which the members found it hard to take project which he head seriously. The second Bill was introduced by one of the German students, Mr. Takahashi Yökichi, who made an excellent speech, full of facts which he had carefully collated, to show that the two years of active service advocated, instead of the three now enforced, would prove adequate for the training of soldiers and would save the country a large amount of money annually. The Bill proposed that to make up for the year taken off the time of active service a year should be added to the time spent in the reserve force, that being increased to 5 years and 5 months, instead of 4 years 5 months as at present. The Government of course opposed this Bill, maintaining that efficient troops could not be turned out in the time proposed, and the like. But the Bill was carried in the teeth of the Government, and after an appeal to the Throne had been made, an Imperial order suspending the sitting was solemnly read and the members dispersed. The contest was a somewhat unequal one; for the Government delegates and the Ministers of State were no match for the members who attacked them and with one exception the support they received in the Diet was lacking in ability. The interruptions, urgency motions, and repeated attempts to apply the closure when the debate was still at its height, and the witty comments shouted out by certain members, each contributed its quota of amusement and so the three hours which the sitting lasted passed off merrily, as it was intended that they should.

On Jan. 30th, in the forenoon, and on Jan. 31st, in the afternoon, a recently formed society called the Chogyükai held meetings at the school, which were larged attended by Sendai residents. The Chogyükai is a society founded by Dr. Anezaki Seiji, Messrs. Tobari Shinichirō, Fujii Kenjirō, Kuroyanagi Kunitarō and two other gentlemen in honour of the late Dr. Takayama, whose posthumous name is Chogyū. The Society is supported by many of the leading professors of the Imperial University. It proposes the holding of memorial meetings in various parts of the country periodically and hopes to be able to erect a building at Kamakura or elsewhere in honour of the deceased scholar in addition to putting up a lecture hall and library &c. in Tōkyō, which the Society will make its headquarters. Speeches on literature, ethics and religion were delivered in Sendai on the two successive days mentioned above by Dr. Auezaki, Mr. Tobari and Mr. Kuroyanagi; and the teachers of the Second High School have since all been asked to become members of the Society. The Society aims at encouraging the free discussion of those subjects which were so dear to the heart the late Doctor—literature, ethics and religion—and it will endeavour to deepenand extend the impression made by Dr. Takayama's writings throughout the country. Both the Doctors Inoue, Messrs. Ueda Bin, Ueda Mannen and Dr. Tsubouchi Yuzō are among the supporters of the movement.

MONTHLY SUMMARY OF THE RELIGIOUS PRESS.

of mending the law relating to active military service. The wording of the Government Bill, which was presented by the Minister-President, the Home Minister, and the Minister of Education, became the text for a whole volley of questions, as for the main principle of the bill, it met with a storm of well sustained of the book. The first edition of this work was neviewed by us at considerable length in these reviewed by us at considerable length in the think that they know all that is necessary about the home Minister, and the Minister of Education, became the text for a whole volley of questions, as for the main principle of the bill, it met with a storm of well sustained of the book. The first edition of this work was reviewed by us at considerable length in these reviewed by the think that they know all that is necessary about Christianity thus they know all that is necessary about the strain to columns tree and a half years ago (vide Weekly Spencer, Max Miller and Herbart have said decreptively we all western thinkers like Bentham, Mill, Spencer, who at the age of seventy years or thereas on the search of the weekly search the search and the lieuter of the time of the weekly search the search and the lieuter of the weekly search the search that the principal object was the curtain the search that the principal object

studies as by his investigation of Occidental thought. The result is that Dr. Katō is a new and original type of philosopher, and as such forms an interesting subject of study." To ■ large extent Dr. Katō has followed in the wake of our English Dr. Katō has followed in the wake of our English Utilitarians whose contributions to the repertory of philosophic thought were a few years ago stated in lucid detail by Sir Leslie Stephen. ("The English Utilitarians," 1900). Dr. Katō has steered clear of abstruse German metaphysics and mysticism. And, thanks to a clear arrangement of ideas and to a facile pen, his system of philosophy and ethics may be comprehended by any educated reader. In the preface to the new edition 13r. Katō informs us that he is a Utilitarian, an Evolutionist a Moniet that he is a Utilitarian, an Evolutionist, a Monist and that his system of philosophy rests on a variety of other principles, materialistic, egoistic causative and empirical. The present work is nearly double the size of the first edition. Some passages have been altered or rewritten in a fuller manner, and in the last chapter about 50 pages are devoted to answering the adverse criticism aroused by the original work. The arguments of Doctors Inoue Tetsujirō, Motora Yujirō and Messrs, Nakajima Tokurō and Kumagaye Goro are fully stated and discussed. Dr. Inoue and Dr. Kato are at variance all along Inoue and Dr. Kato are at variance all along the line, Dr. Inoue being an intuitionalist and Dr. Katô an empiricist. Dr. Katô maintains that Dr. Inoue has entirely misunderstood and misinterpreted the central principle of Utilitarianism. But the subject is too big to be dealt with here. Dr. Kato's work covers 399 large-sized pages. It is undoubtedly the most learned and the completest of his books. His other works are:—Kyōsha no Kenri no Kyōsō (The Contest for Supremacy among the Strong); Tensoku Hyaku-wa (A Hundred Short Essays on Nature's Laws and Principles) and A Volume of Rature's Laws and Principles) and A Volume of Lectures and Speeches entitled Katō Hiroyuki Kōyen Zenshū. Dr. Katō is at present engaged in writing a work entitled 自然造化の三大矛盾と進化。Shizen zōkwa no san dai-mujun to shinkwa (Three Great Contradictions in Nature aud Evolution).

In the Scikyō Shimpō (Greek Church) under the title of "Current Abuses in the World of Thought," Mr. Ishikawa Kisaburō contends that one of the greatest defects of modern Japanese scholars is a certain readiness to study subjects negatively, instead of positively, to pay especial attention only to points in which one system of thought differs from another. Too many Japanese, says Mr. Kisaburō, when they have finished the consideration of the negative side of a subject are apt to fancy that they know it thoroughly. People, to quote one instance, rave about the advantages of representative government and the possession of a constitution, but when asked to specify in what respects these are advantageous begin to talk about the terrors of despotism, and so on. In religion it is the same, says Mr. Kisaburō. Most of the scholars who object to Christianity and to Theistic teaching are profoundly ignorant of what the actual doctrines objected to are. Destructive criticism is all the rage in this country to-day. To pull down, to deny, to object—these mental occupations find far more favour than the more laborious process of constructing a system of thought and belief in which a man can trust. There are not a few scholars in this country who think that they know all that is necessary about Christianity when they have read what certain great Western thinkers like Bentham, Mill, Spencer, Max Müller and Herbart have said about it. There are not a few educated Japanese who know no more about Christianity than what Tolstoi has told them when writing of it under the title of "My Religion." Well may he describe Christianity thus, for the views that he champions are mostly entirely lacking in authority and consist of his personal antipathies to certain existing institutions and doctrines of Christianity without going back to the cred of Christendom. There is no getting at the real doctrines of Christianity without going back to

the negative criticism of such writers as Harnack and consult those positive sources of information which the Church of Christ possesses.

* * *
The Seikyō Shimpō has much to say on the Okuda case and the scurrilous comments and un-worthy slanders which several of the second rate papers published in connection with it. Mr. Ishikawa says that 20 or 30 years ago nothing was more common than for Greek Christians to find themselves regarded as Russian spies and their beloved pastor as a Russian political agent, but that they had supposed that they had outlived such slanders and that in the minds of all sensible people their loyalty and patriotism were never questioned for a moment. When the case of Okuda Kumatarō first came up no care was taken by the newspapers to get hold of the facts and the attempt of this fanatic to compass his ends by means of Greek Church Christians-an attempt which received not the slightest encouragement from the firstwas twisted into a story that went to prove the Greek Church to be a harbourer of traitors. It is true, says Mr. Ishikawa, that Okuda Kumatarō did send no less than three letters to our office in Surugadai, dated Nov. 24th, Nov. 27th and no Surugadat, dated Prov. 24th, Prov. 27th and Nov. 30th. These letters were opened and perused by one of our business agents and they appeared to him so wildly fanatical that he concluded that the writer rough he almost one concluded that the writer must be a lunatic or bordering thereon. He thought the letters quite unworthy of any notice. It goes without saying that Bishop Nicolai was unaware of their arrival, for not one of the staff of this magazine even knew The Police, however, having heard of the of it. The Fonce, nowever, naving near of the arrival of the letters, came to inquire into the facts of the case. It was then that we found out what had happened. The letters were handed over to the police and the case was then reported for the first time to Bishop Nicolai. The fact that he was not made acquainted with the he was not made acquainted with the matter earlier is easily explained. We Japanese loyal subjects were naturally very much ashamed to find that a man who had acted as a Local Government School inspector should have developed into a Russian spy, and no right-thinking person is anxious to make known to foreigners conduct which he blushes to think of. The incident, concludes Mr. Ishikawa, is instructive, in that it shows us into what these religion less, professedly loyal educationists may develop. secularists have repeatedly accused us of harbouring traitors in our camp, and now out of their own midst has emerged a man who is prepared to sell his country for a few thousand yen.

How is it, asks the Rikugo Zasshi, that the whole of our Japanese religious world is in favour of war? Taken in the abstract religion is the enemy of war and yet here we see a whole nation, Buddhists, Christians, Shintoists, all alike advoca-Buddinsis, Onewspaper, no magazine, not even a woman's organ like the *Fujo Shimbun*, ventures to utter any but war notes. What is the explanation of this phenomenon? Is it not this, that we Japanese have not sufficient faith in religion and sufficient moral courage to isolate ourselves on such occasions as the present? And are we not as a nation extremely fond of war? But, continues the Rikugo, while the whole religious world may be said to be drunk with the war subject, there are, we are glad to observe, socialists who are bold enough to champion an unpopular cause—the cause of peace. Last October they held two meetings, one on the 8th and the other on the 20th in the Kanda Young Men's Society Hall and in the Hongō Central Taberards. nacle. Both these meetings were packed with eager listeners and, although all the speeches were anti-war orations, there was no serious interruption and no violence of any kind was attempt-This shows how much more liberal-minded

The Koye (Roman Catholic) has an editorial entitled "Our Views on Japanese Socialism," which is permeated with common-sense and shows much insight into the real character of a movement that seems to be making a great stirthroughout the country. In the West, says the Koje, socialism may be said to have had a natural origin. It grew out of a state of excessive compactition among versions of the contractions of the contraction of the contracti natural origin. It grew out of a state of excessive competition among various classes of society. It is an attempt to alleviate the distress caused by conditions which do not exist in this country and which may not exist here for many years to come. It is the lack of the raison d être that come. It is the lack of the ratson a erre that makes Japanese Socialism look somewhat ridiculous, says the Kope. To attempt to apply a remedy before a disease has made its appearance is surely very foolish. In the organ of the Socialists, the Heimin Shimbun, the following appreciation of principles will be found. following enunciation of principles will be found.
(4) Liberty, equality and love are the three great principles which give to human life special significance. (2) In order to insure full liberty for mankind we are advocates of plebeianism, (Hei-min Shugi). Hence we aim at removing entirely all inequalities, namely, class inequalities, inequalities in the owning of property, and inequalities between the sexes; and further we aim at freeing mankind from oppression and thraldom of every kind. (3) For the sake of enabling men to re ceive an equal amount of happiness and profit we champion Socialistic principles. We advocate the partition of property, the granting of equal rights to all in the matter of facilities for com-munication and travel; which facilities should be devised and maintained for the sake of society as a whole. (4) Believing that love for each other is what all human beings should cultivate and desire, we are opposed to war, and we aim at the abolition of armaments in every country, among all races of men and under every form of Government. (5) Already the number of persons who make perfect liberty, equality and love their ideal is very large. In order that this ideal may be put into practice it is desirable that as far as the law of the land allows those whose views agree on this question should work unitedly. We denounce unequivocally all appeals to physical force, despite the temporary gratification that the adoption of such a course may give. It is quite plain to us that the Japanese nation as a whole will pay no heed to such doctrines, says a whole will pay no heed to such doctrines, says the Koye. Even though the promoters of this movement were men of far greater calibre than they are, the whole scheme would be rightly regarded as wildly utopian. Japanese socialists would do far better to be preachers and practisers of morality instead of spending their time in sowing the seeds of discontent and trying to alkolish distinctions which have their sources in the very tinctions which have their sources in the very constitution of human society.

In another article appearing in No. 300 of the Koye, signed Moan Sanshi (an assumed name) complaint is made that a number of University professors in this country are in the habit of sneering at natural law as being subjective only in character and as not possessing any real authority. It only exists, say they, in the imaginations of certain persons. These professors, in assuming this attitude, fancy that they are displaying great enlightenment, says the Kope, but in reality, they only reveal their ignorance of the relation of natural law to all national law. Some of these professors seem not to recognize the fact that the rights and privileges, the duties and the obligations protected or enforced by national law are not created by this law. They exist subject to a higher law, namely natural law. Take the chief things which the Law protects, a man's life, property and reputation. Whence comes the obligation to protect these, if not from man's place in the world of nature? Ordinary animals receive no such protection. National law simply Alliance was almost universally assented to but recognizes and defends rights and privileges secured. This shows now much more interal-minded receive no such protection. Pational law simply years ago. At 19 the Creed protects to but the Japanese public has become since the China-recognizes and defends rights and privileges secur. Alliance was almost universally assented to but Japan war nine years ago. At that time no anti-war meeting could have been held in Tökyö without risk to life and limb. But, continues opponents will say, "In different countries notions of the Japanese Evangelical Alliance there having

ing what was written then. Many of the modern as well as the mediæval accretions to Christianity are not really Christian at all. much about the evils of war which was quite new were so inclined, and the Roman slave was no treally wish to find out what Christianity teaches will do to well to turn aside from the parattive criticism of such writers as Harnack can be placed on human conceptions of what is natural?" In reply to this we say, observes the Koye, that the fact that in certain countries and certain ages there have been grave misconceptions on the subject of natural law does not prove that it possesses no authority. In moral conceptions as in other lines of thought the world progresses, and in these modern times the inherent rights of human beings as human beings are in all the most advanced countries clearly recognized, Because the Romans extended the rights of fathers even to the right to murder, we cannot argue that fathers have no natural rights and no natural duties in relation to their effection. argue that lathers have no natural rights and no natural duties in relation to their offspring. If the authority of natural law be denied, then national law is robbed of half of its authority. All national law assumes that there is a standard of right and wrong, that some conduct is just and some most unjust, and on examination it is found that in a very large number of cases the criterion by which actions are judged is no more than an appeal to what is called natural law.

> The Shinjin (New Man), No. 12, contains an article entitled Shimpo-teki Shin-fukuin-shugi no kwakucho wo nozomu (We look for the develop-ment of the advanced New Gospel Principles) Protestantism, says the writer, Mr. Ebina Danjō, is founded on the principle of individual liberty of thought and the deference paid to the reasoning faculties. So that continual progress of though on religious subjects in this body may be reasonably looked for. Since the days of Lessing, Herder and Schleiermacher the Protestant Church may be said to have split up into two great sections, consisting of men of the old school and men of the new. The Gospel is explained in a different manner by members of these two bodies of Pro-testant Christians. Lut though they differ on many points, the particulars in which they agree are by no means few, and mutual recrimination is in all cases to be condemaed. The members of the party known as evangelicals are not means invariably ultraconservative and narrow-minded. They approve of the development of reason and recognize that even in religion evolution is always going on. We recommend any one who wishes to see how thought has progressed in the ranks of the evange-licals to turn their attention to the revision of the articles of belief professed by members of the Evangelical Alliance during the past fifty years. When the Alliance was formed in 1848 there were 9 articles of faith. But it cannot be said that o arncies of faith. But it cannot be said that even then they were accepted in their entirety by all the members. In Art. 5 belief in the fall of man and in the doctrine of original sin was declared. This doctrine of original sin is one of the essential doctrines of the old school of Protestants; to whom man's nature on this account amounts to be necessarily nature on this account appears to be necessarily evil. But the new school of Protestants object to the tracing of such evil as there is in man to Adam's fall, to which they attribute no such dire consequences as are perpetually dwelt on by the orthodox section of the church. Article 8 of the confession of faith drawn up by the Alliance asserted the resurrection of the body and everlast-ing punishment. Now there are not many theologians of the new school of Protestant thought who accept either of these doctrines. This is not surprising, as we find a great theologian like Schleiermacher rejected them. Art. 5 decided that there are three distinct persons in one God. Now, since those days the meaning attached to the Now, since those days the meaning attached to the term person has undergone any number of changes, and we find such a genius as Horace Bushnell (1802—1876) refusing to accept the destripte of the three persons in one God. To

been articles of faith which had fallen into disuse, the year before last it was decided to draw up a fresh confession of faith. From this confession the doctrines of the resurrection of the body, the eternal punishment of the wicked, original sin and the Trinity were omitted. (Shikamo sono Shinjō (信 條) chũ ni wa, nikutai (Shikamo sono Shinjō () chā ni wa, nikutai no fukhwatsu mo, akunin no eibatsu mo, genzaizetsu mo, san person setsu mo miezaru nari). But a majority voted in favour of retaining the doctrine of the Divinity of Christ. We doubt whether this doctrine is capable of being developed from the fundamental principles of the new school of evangelicals. The Nihon Seinen Dömei (Japanese Young Men's Alliance) in explaining the Christian belief of the alliance says: "The Evangelical Church recognized by this alliance make belief in the Bible and good conduct their standard and they believe in the Divine alliance make belief in the Bible and good conduct their standard and they believe in the Divine Christ as their Saviour." There is considerable difference between this confession of faith and that of the Evangelical Alliance. The latter body asserts the Divinity of Christ in a clear manner, while the Young Men's Alliance does so only in an obscure manner. In the latter part while the Young Men's Athance does so only in an obscure manner. In the latter part of his article Mr. Ebina affirms that among the young men who belong to the allove-named alliance there are those who believe in the Divinity of Christ and those who reject the doctrine, and the thinks that it is impossible for them to work harmoniously together. Some he says are for passing over this discrepancy as a matter of no passing over this discrepancy as a matter of no importance, but to him the attitude taken to such a cardinal doctrine as the Divinity of Christ is very important. He believes in no vague Cospel. The new Protestants had better separate themselves from those who hold narrow, traditional views and stand before the world as prescher of a Count which reaches the world as preachers of a Gospel which rests on an indestructible, rational basis.

The Shinjin publishes a long unsigned article written by a Christian pastor entitled "Japanese Mission Work and American Mission Boards." The article opens with an account of how mission funds are collected in most of the American It says that in America the Methodists and the Baptists are the most prosperous Protestant churches, and that next stand the Presbyterians and the Congregationalists. It states that it is customary among some of the churches for Mission Boards to make estimates of the sums required for the course and foreign maintaining. quired for the carrying on of foreign mission work and to inform the various congregations belong-ing to their denomination as to what proportion of the required sum they are expected to provide. The writer then passes on to discuss the methods of spending the money collected. The gist of his remarks on this subject is that the Mission Boards exercise too exclusive and too direct a control over the funds they distribute, often objecting on over the funds they distribute, often objecting on insufficient grounds to recommendations made by the missionaries in the field. The persons who constitute the Managing Committees of these Boards are, says this writer, often lamentably ignorant of the real situation in remote parts of the globe and hence they are not qualified to control the administration of the funds entrusted to them. It is customary with these Boards, continues the article we are quoting, to expect the missionaries employed by them to carefully refrain from entrusting the administration of mission funds at a static property. funds to native workers. Financial power in the churches is kept in the hands of foreigners. This is one of the universally observed principles among the missionaries. It is this fact that makes it so desirable that our languages. Churches shall be financially independent. Japanese Churches shall be financially independent of foreign mission boards. The general estimate of Japanese character and capabilities in the United States is quite a mistaken one, says the Shinjin. The article then goes on to show how in this country bit by bit power has been passing over from the foreign missionary to the native churches. So much so that in many places the services of missionaries for preaching purposes are no longer required and the missionaries are beginning to complain that they have no chance beginning to complain that they have no chance with foreign missionary societies altogether. The Asahi reports that of gaining proficiency as speakers for want of Keiser, which came into existence just three years telegraphic communication between Seoul, Ysten-of gaining proficiency as speakers for want of Keiser, which came into existence just three years telegraphic communication between Seoul, Ysten-of-practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, has perpetually criticised the methods of san and Masampho, and over the marine cable practice, in some few cases not being required to ago, and a san adolescent the marine

shiite wakaranu Seiyöjin no hanashi wo kiku hitsuyo mo nai, karera no uchi de hanahadashii no wa nen ni nikwai kurai shika sekkyo wo shinai mono aru sō da.) The writer adds the remark that the complaint of the foreign missionary that he can't get sufficient practice in the language is a testimony to the success of Japanese evangelists. (Gwaikoku senkyöshi no Nihongo gakushū no konnan to iu koye sono mono ga, Nihon dendo no seikō to iu kolo wo shō shilt oru de wa nai ka?) The article next takes up the subject of the salaries and general expenses of misssonaries as compared with those of Japanese evangelists. It argues that, even allowing for the different rate of living in the East and the West, the discrepancy is greater than ought to exist in the case of fellowworkers in the same cause. There is no denying, says the anonymous writer we are quoting, that the chief part of the work in each mission is done by native evangelists, yet in the annual reports sent home and published, the missionary in charge is credited with the success achieved. It would be within the mark to say that each Japanese evangelist employed costs only one hundreth of the annual amount paid to a foreign missionary in the form of salary, house rent, missionary in the form of salary, house rent, travelling and other allowances, and yet the native evangelist does more work than the foreign missionary. The article continues thus:—Some of my friends say to me, "If you attack the foreign missionaries so persistently, you may drive them out of the country and then the money that we receive from them would be withdrawn." I reply that there is no fear of my doing that, since as long as there are large sums of money collectas long as there are large sums of money collected in America for foreign missions, missionaries will continue to flock to these shores. It is the state of things over there rather than our situa-tion here that leads to the constant increase in the import of missionaries (Gwaikoku senkyōshi ga Nihon ye kilaru no wa kono hō de nyuyō (入用) na wake de naku, mushivo kano hō (方) de hilsuyō jō dete-kilaru no da to itte mo ii). The Protestant bodies in Japan which are independent are the Nihon Kirisutokyōkai (Presbyterian) and the Kumiai Kyōkai (Congregational). With the Methodists and the Episcopalians, the source of authority is the Episcopate, which is foreign. As long as this lasts thorough independence is out of the question, says the Shingin. In order to strengthen the basis of our independence we should like to see the union of the Presbyterian and the Congregational churches. There seems to us to be no serious obstacle to that union. The liberty allowed to separate churches by the Congregationalists would, within certain reasonable limits, be allowed by the Presbyterians. Many of the ministers of the latter Church hold precisely the same views as the majority of the Congregational ministers. Were the two Churches to combine their funds and all their evangelistic and other agencies, they would form a very powerful body and would be in a position to undertake a great deal more work than they are undertake a great deal more work than they are now doing and, what is more, then they could be independent not in name only but in reality. As things are to-day there is no Japanese denomination which receives no money whatever in any form from foreigners. Grants-in-aid, subscrip-tions, or what not, are received either towards the support of theological colleges, or towards the

support of theological colleges, support of evangelists and teachers.

In a note to this article the editor of the magazine, Mr. Ebina, states that the writer is mistaken in asserting that all Japanese Missionary Societies are dependent to a certain supergritions: for two such

with foreign missionary societies altogether. The

a recent issue it says that except in barbarian countries, where the teaching of the mission-aries has a civilizing influence, missionary work has been unsuccessful in recent years and it calls on its readers not to mourn over the failure of mission work in this country when carried on by means of foreign money, as this failure is itself a good omen. (Gwaikoku dendō kaisha no hogo ni yoru dendō no furuwazaru wo tanzuru nakare; sono furuwazaru wa Nihon ni seimei aru shoko to shite mushiro oi ni yorokobubeshi.) The Keisei then proceeds to argue that fine types of character are not to be formed by the methods now pursued in most of the Christian missions in this country. It urges young men to give up receiving money from foreign missionaries and so selling their independence.

To the January number of the Taiyō Dr. Anezaki Seiji contributes a very long article entitled Tatakae, Oini tatakae (Fight a big fight); which is extremely pessimistic throughout. There are few subjects connected with politics, literature, philosophy, religion and ethics not touched on in this essay, but the tone throughout is one of philosophy, religion and ethics not touched on in this essay, but the tone throughout is one of deep dissatisfaction with the existing state of things. Dr. Anezaki's visit to Europe has been a disappointment to him. He thought to have found things different there—the birthplace of the civilisation which Japan has been so eagerly adopting. He went as a student of religion and the civilisation which Japan has been so eagerly adopting. He went as student of religion, and it is on this subject that he gives expression to the bitterness of his soul. His remarks on Protestant Christianity in Europe begin on p. 80 of the magazine with the words Kirisulokyō, koto mi Shinkyō ni ittate wa, mata holondo iu ni shinobinai "In reference to Christianity, and specially to Protestantism, its state is such that one can scarcely bear to speak of it." He then goes on to say that while professing belief in the Divine nature of Christ and of the power of his religion, the nations of Europe are each pursuing selfish interests and are all intensely materialistic. Prointerests and are all intensely materialistic. Professing Christians have neither the courage to battle against the foes of their creed nor to relinquish it and join hands with the ordinary worldling. Religion may be said to be dead in the hearts of the great majority of European Protestants. Where now is the Church militant? Where the sword of which Christ spoke when he said, "Think not that I am come to send peace on the earth: I came not to send to send peace on the earth: I came not to send peace but a sword." The gist of Dr. Anezaki's long essay is that the majority of Europeans and Americans, like the majority of Japanese, are entirely without high ideals; are grovelling along in the low-class world of material interests and self-gratification of one kind or another. Dr. Anezaki is an idealist and longs to see his fellowcountrymen adopting some kind of an ideal. But he despairs of Japanese Buddhists and Christians alike. His strictures on the Buddhists are very severe. Religious faith is dead among them, according to Dr. Anezaki. The old school of Buddhists has no influence whatever. The so-Buddhists has no influence whatever. The so-called new Buddhists are not Buddhists at all, but mere trimmers to the times without any deep convictions of their own. What is true of the professors of religion in this country is true to a still great extent of the nation as a whole. It is without high ideals. It is indifferent to the great issues of human life. In order to effect great things in the world men must have deep-seated faith in principles of some kind or other. seated faith in principles of some kind or other. To blindly follow custom, to bend to every pass-sing emotional breeze and never to look beyond extent on foreign subscriptions; for two such Societies, the Nihon Kirisutokyō Dendō Kaisha and the Kumiai Kyōkai Dendō Kaisha are now financially and in every other respect absolutely independent.

* * *

The Keisei, of which Mr. Matsumura Kaiseki is the editor, like the Shinjin is a most earnest advocate of making all Christian churches entirely self-supporting and of severing their connection with foreign missionary societies altogether. The

FIRES.

Early on the morning of Feb. 7th, fire broke out, in the dwelling of R. Kuroda living at Sannomachi, Yokosuka. A northerly wind prevailed and the flames spread, the result being that two hundred aud three buildings were destroyed. Kuroda's mother, wife and three children and a female servant were killed. female servant were killed.

A telegram from Wakayama reports that an outbreak of fire occurred on the night of Feb. 6th at the village of Miwasaki, burning down sixty-six buildings.

On Dec. 10th fire broke out in a large school On Dec. roth fire broke out in a large school in Thomson-street, Glasgow. The school contained a thousand children. The first intimation they got was smoke coming in at the windows. The male and female teachers behaved with great coolness. The older children were commanded to get out smartly, the teachers standing at the to get out smartly, the teachers standing at the doors to prevent a rush. In the infant department, where 350 very young children were, the lady teachers marched them out to a tune on the piano. All the youngsters, although much alarmed, were got out safely. The damage is estimated at several thousands of pounds.

The Tarukawa School, Sapporo, was destroyed by fire which occurred on the night of Feb. 4th Mr. Morita, principal of the institution, was killed.

Fire broke out on the night of Feb. 9th at Omori destroying six houses, the cause being a paper lantern in which a burning candle had been left. A shed in the compound of the Railway Industry Bureau, Shimbashi, was burned down by the which occurred on the following day at a reason. fire which occurred on the following day at 1 p.m. The cause is not yet known.

NEWS OF THE WEEK.

Mr. Iijima, Japanese Consul at Odessa, was expected to leave there on Feb. 10th.

Mr. Shimoyama, police-inspector, and forty-nine police, left Tokyo on Feb. 8th for Korea.

A telegram from London was received on Feb. A telegram from London was the control of the authorities. The nominal editors we shall be an bands went down again, the quotation on Feb. 8th in the Tokyo District Court. being £,67.

Major General Fukushima, Director of the Second Section of the General Staff Office; who had been staying at his country villa for the sake of his health is reported to have resumed his

Mr. R. Okabe, a member of the Mito Prefectural Assembly, and two others were arrested on Feb. 8th. The charge is reported to be con-nected with the bribery case now undergoing preliminary trial.

According to the Official Gazette, the Minister of State for Home Affairs issued on Feb. 9th a warning to local Governors and to the Governor-General of Formosa as to the protection of Russian subjects residing in the Empire.

It is stated by the Nichi Nicht that the committee of the Tairo Doshi-kai met on Feb. 4th, when they compiled a manifesto with regard to the situation. At the same time, they elected an executive committee of six members

The Niroku and Chuo have been prosecuted on a charge of having published reports with regard to military movements without the sanction of the authorities. The nominal editors were tried

Mr. S. Fujita, President of the Kyoto Silk Yarn Company, lodged on Feb. 8th an action against the Councillors' Assembly of Kyoto in the Administrative Litigation Court petitioning for the cancellation of an improper imposition of tax.

A well-dressed man was arrested on Feb. 6th by the Kanda police, Tokyo. The charge is reported to be that he sold forged ten yen notes in Gumma, Saitama and other prefectures. He was in possession of sheets of counterfeited notes when arrested,

Lieutenant T. Hirano, of the Imperial Body Guard infantry, is reported to have committed suicide on Feb. roth in the dwelling of Prince Shimadzu, by cutting himself in the throat with a sword. Temporary insanity is said to have been the cause

A telegram from London has been received in Tokyo to the effect that the Times, Slandard, Daily Telegraph and Morning Post agree in stating that the responsibility for the present situation rests upon Russia alone, and are unanimous in extending sympathy towards Japan.

The troubles in Mindanao do not appear to be nearing a cessation. The latest news is that Lieut. Campbell W. Flake has been killed, and Lieut. William E. Roberts and private Foy seriously wounded, in a conflict with the Moros. They all belong to the 22nd U.S. Infantry.

Two men armed with swords and revolvers entered on the night of Feb. 5th the dwelling of a wealthy farmer, R. Kaneko, living at the village of Fuchu, Minami adachi, near Tokyo. Having rewell visit on Feb. 9th to Baron Rosen, the inflicted injuries on the farmer and his mother, the frontier of Korea in order to deal with the enemy men stole yen 70. Early on the morning of the who is expected to advance on Yin-kow by land following day, another man with a cooking knife from the Yalu, and Russia also plans the sending

broke into a house at Asakusa, Tokyo, and tool away a small amount of money

The game of football played in Yokohama on Thursday (Bank Holiday) under Association rules, was between Whites and Colours, and resulted in favour of the latter by three goals to

Herrmann, the notorious pirate of Manila, who escaped from the gaol at Cebu, has been re-captured, and is now awaiting trial on the extra charge of gaol-breaking. His sentence on the other charge already amounted to 13 years' imprisonment and a large fine.

From the Bombay Gazette we learn that there was an unprecedented import of gold into India was an unprecedented import of gold into India last year, and that the gold currency reserve of the Government is now nearly ten millions sterling, exclusive of £300,000 in the Presidency banks, and the four millions in Consols.

Vice-Admiral Sir Gerard Noel has just resigned his seat on the Food Commission, in view of his departure for the Far East, where he is to relieve Admiral Sir Cyprian Bridge, who will be com-pulsorily retired on March 15 next, on attaining his sixty-fifth year. Sir Gerard Noel is fifty-nine years of age.

Y. Takakawa, a director of the Nippon Tobacco Company, and former manager of the Noge Savings Bank, Yokohama, has been arrested on a charge of having stolen yen 100 from the bank. It is said that he broke into the bank office on the night of Feb. 4th, and took the money from an iron safe.

The committee of a Iapanese club that it is proposed to found in London, consisting of proposed to round in Lordon, consisting of Captain T. Matsuo, I.J.N., Messrs. S. Komuro (Mitsui and Co.) and T. Yoshii, have issued an appeal to Japanese residents for contributions to a special fund. It is hoped to raise at least £600, when the club would be founded.

The following Russian steamers have been captured by the Japanese up to the present:—
The Volunteer ship Ekaterinoslav (5,627 tons)
East-China Railway's steamers Mukden (881 tons) and Aigun (1,397 tons), Russian Trade Navigation Co.'s steamer Rossia (3,952 tons), the whalling ship Alexander the whaling ship Alexander.

A squad of bluejackets from the Japanese gunboat Amugi has gone on board the German steamer Emma (the Yokohama Agents of which are Messrs. Grosser and Company), which arrived in Yokohama on Feb. 7th from Hamburg having on board, it is alleged, military stores for Port Arthur. It is not yet officially reported what further steps it is intended to take.

According to latest official investigations, Russian residents in the Empire number: Tokyo 6 (excluding members of Legation); Kanagawa prefecture, 19; Hyogo prefecture, 4; Nagasaki prefecture, 141; Aomori prefecture, 141; and Hokkaido, 4. These total 176, males nuembering 104 and females 72.

A proposal is on foot to establish a Japanese Club in London. The committee, consisting of Captain T. Matsuo, I. J. N., Messrs. S. Konuro (Mitsui and Co.), and T. Yoshii, have issued an appeal to Japanese residents for contributions to a special fund. It is hoped to raise at least £600, when the club will be founded.

Lieutenant Charles Henry Bowden-Smith, who has just been killed in Somaliland, was the younger son of Mr. Wm. Bowden-Smith, the well-known Ceylon planter, visiting agent, mer-chant, and M. L. C., who died in October, 1898. Lieut. Bowden-Smith's elder brother was on the China station as flag-lieutenant to Admiral Fitzgerald.

According to information from Port Arthur, states the Jiji's Nagasaki correspondent, Russia intends to despatch troops from Liao-yang to the

of fifty thousand soldiers from Possiet Bay in order to attack the frontier of Korea and to advance to Fen-Huan-Cheng and intercept the Japanese. It is runnoured that Viceroy Alexieff

Preparations are being already begun for the commemoration by the Shanghai Volunteers of the jubilee of the Battle of Muddyflat, which took place on the 4th of April, 1854. It is proposed to organise a Great Military Tournament account.

Shanghai papers note with regret the death of Mr. H. F. Limby at the age of 63. He died of poeumonia after a short illness. Coming to the East originally at the end of the fifties, he has

Great difficulties are being encountered in the boring of the Simplon tunnel on the northern side. The work has been interrupted by floods for four weeks. If the spring whence the water emanates cannot be discovered, or if water from fresh springs appear (which seems probable from the disposition of the geological strata), the boring works will have to be completely suspended on the northern side, and the tunnel cannot be finished before next August at the earliest.

Four = hospital cars," specially built by a firm at Reval, were sent out recently for use on the Manchurian Railway. Six more cars are in readiness, and the Russian Government has ordered on more to be built. These "ambulance cars" consist of two cars with first and secondclass compartments, one luggage-van, and a chospital car" with the usual surgical fittings, and eight beds and a disinfecting apparatus. The new cars are also to be sent out to the Far

Capt. P. Molloy, Royal Marine Light Infantry, who recently completed his term of service on the Glory, flagship of Admiral Sir Cyprian Bridge, Commander-in-Chief on the China station, has been granted permission to remain in Japan to study the Japanese language. He will be granted six months' full pay if he intends only to obtain a colloquial knowledge of the language. a colloquial knowledge of the language, or twelve months for a higher standard, including some knowledge of writing.

Viscountess N. Matsudaira and Mrs. Hamao left Tokyo on Feb. 4th by the 6 p.m. train for Saseho, to convey on behalf of Princess Kan-in, President of Aikoku Fujinkai (Patriotic Ladies Society), the comforting courtesy of the Society to the Naval officers and bluejackets at the naval to the Paval officers and bluepackets at the naval station. The ladies will pay visits to the warships on the 7th. Mrs. Arakawa (wife of the governor of Nagsaski) and Mrs. Midzukami (wife of the Public Procurator-in-Chief of the Nagsaski Appeal Court) will proceed to Saseho to welcome the representatives of the Society. representatives of the Society.

An English paper reports that a fatal accident occurred on Dec. 26th on Scawfell, but, unlike the party of four who were killed on the mountain the party of four who were killed on the mountain last September, the victim of this mishap, Mr. A. Goodall, of Keswick, was not at the time engaged in a difficult climb. Mr. Goodall was attempting to glissade down Deep Ghyll, which was filled with snow. On the sight of difficulties in front he stopped himself dead with his ice-axe, but lost hold of the handle and slid several hundred feet further, until he struck some rocks with his head and was instantly killed.

Japanese. It is rumoured and remainder of the Young Men's hama Commercial School, the Young Men's Association of the Yokohama Import Merchants (Guild, and the Gunyu Kai (Soldiers' Friends Association) came off on Thursday evening in Association) came off on Thursday evening in Association) came off on Thursday evening in January (1997)

he was, says the 10.-0. Duty was, a condition of very artistic tastes, a good husband and father, and a good friend, and in his earlier years a lover of sport, while he always took the keenest interest in the fortunes of his adopted home. The sympathy felt for his widow, whom he married in Shanghai, and for his children, is very deep and

A Johannesburg correspondent, reviewing the situation in the Transvaal, says that not only has situation in the Transvaal, says that not only has the revenue received a great set-back, so that there will probably be a serious deficit at the end of the financial year, but as regards labour the country has failed to reach a return to the condition of things existing in 1898. The opinion is growing that the Transvaal will be unable to take up its share of the war debt, 10,000,000, due next February. The stagnation of the mining industry, in fact, entails a loss to the country which cannot be disregarded. Nobody denies that the root of the evil is the scarcity of labour, and a large part of the population have pinned their faith to the importation of Chinese labour.

The death is announced of Madame Antoinette Sterling. The deceased was one of the finest of ballad singers. In the opinion of the British public, Madame Sterling's singing of "The Lost Chord," "The Better Land," "Love's Old Sweet Song" or "Caller Herrin" was second only to Madame Patti's interpretation of "Coming through the Rye" and "Home, Sweet Home." Madame Sterling was an American, having been born in Sterlingville, Jefferson County, N.V. fifty-three years ago. The merits of her beautiful contralto voice were soon discovered, and she studied under Marchesi, Viadot, Garcia, and others of worldwide renown. She married in 1875, Mr. J. Mackinlay, who died in 1893 when The death is announced of Madame Antoinette

in a difficult climb. Mr. Goodall was attempting to glissade down Deep Gbyll, which was filled with snow. On the sight of difficulties in front he stopped himself dead with his ice-axe, but lost hold of the handle and slid several hundred feet further, until he struck some rocks with his head and was instantly killed.

Active preparations are in progress for the tenancy of 11, Downing-street, by Mr. Austen Chamberlain, the new Chancellor of the Exchequer. When the work has been completed the right hon, gentleman will go into residence, and the struck some rocks with his head and was instantly killed.

A report has reached Culcutta of a murderous in Australia with his accomplished wife.

A report has reached Culcutta of a murderous assault made upon Bishop Whitley by some tenancy of 11, Downing-street, by Mr. Austen Chamberlain, the new Chancellor of the Exchequer has no recent preceived for him. The position of having a bachelor for Chancellor of the Exchequer has no recent preceived.

The Church to clear off this small remaining portion of the debt.

The Church to clear off this small remaining portion of the debt.

The Church to clear off this small remaining portion of the debt.

The Church property has during the year beautiful and convolved in 1893 when in the struck some rocks with his accomplished wife.

A report has reached Culcutta of a murderous assault made upon Bishop Whitley by some Kumhars in the village of Bamnia, Chota Nagpur, to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom he had gone out on his bicycle with to whom

dent, while it is absolutely unique to find the First Lord and the Chancellor living in bachelor-lagain to his feet, and the villagers then desisted, hood in the adjoining residences—10 and 11, Downing-street—each with a sister presiding over the domestic part of the establishment. galow where he lay for some hours exhausted, but is now recovering. He is sixty-seven years of age and his escape is remarkable. He has masty scalp wound which bled profusely and a score of contusions on his arms which he raised to save

The many gentlemen and the few ladies who have reached that certain age which tends to baldness may be interested to know that the chemical noistrums of our own day had their forechemical nostrains of our own day nat their ore-runners even in the remote days of the Pharaohs. A French Egyptologist has recently unearthed a papyrus giving a recipe for what must in those times have been a Royal remedy against baldness, saccount.

Shanghai papers note with regret the death of Mr. H. F. Limby at the age of 63. He died of poeumonia after a short illness. Coming to the East originally at the end of the fifties, he has been a resident of Shanghai for some forty-two years. A man who worked hard from the first, he was, says the N-C. Daily News, a cultured man of very artistic tastes, a good husband and father, and a good friend, and in his activities.

The funeral of the late Mr. T. Kondo, chancellor of the Japanese Consulate at Shanghai, took place on January 29th, reports the Shanghai Mercury. The deceased was only 27 years of age, and was a very promising member of the Consular Service; he was a Lieutenant in the Japanese Co., S. V. C. and was very popular in the Corps. The funeral cortege started from the Symaphai, and for his children, is very deep and wide-spread.

Denmark suffers from a quite mediæval paucity of surnames, and so inconvenient is this fact becoming that the Government has announced its intention of presenting a Bill to the Legislature sanctioning and encouraging the adoption of new surnames. Such names as Hansen, Petersen, and Sverensen are overwhelmingly frequent. It is even as and that there are towns of 30,000 inhabitants among whom there will not be more than twenty different surnames. In these days of records and various registrations, to say nothing of business relations, the comedies of error arising from such a state of things must be numerous.

A Johannesburg correspondent, reviewing the situation in the Transvaal, says that not only has the respect. respect.

CHRIST CHURCH, YOKOHAMA.

Annual Report and Accounts, 1903.

ANNUAL REPORT AND ACCOUNTS, 1903.

The Accounts for the past year, which are submitted herewith, make a satisfactory showing, the debit balance having been decreased from yen 2,408.16 to yen 1,397.16. This is chiefly due to the fact that only a small amount of special expenditure was incurred during the year under review. From the result attained it may be said that the Church has now become self-supporting. Pew rents have been practically maintained, and so have the Offertories for General Purposes, while those for Special purposes have markedly increased. The Special Offertories are detailed in the accounts.

The Special Offertories have included yen 119.39 for the Building Fund, yen 183.49 for St. Andrew's Mission, and yen 192.91 as the Easter offerfory, which, as customary, was given to the Chaplain.

The Rebuilding Fund accounts, which are also attached to this Report, are equally gratifying, the debt having been reduced from yen 2,708.30 to yen 1,584.86. The Committee appeal strongly to Seath-holders, Subscribers and others interested in the Church to clear off this small remaining portion of the debt.

The Church property has during the year been

going community for his special exertions in connection with the Building Fund.

Counsel's opinion has been obtained as the scope of the Trust Deed and a Digest of same has been already circulated. In accordance with the recommendation therein contained the Committee will submit the following Resolution at the General Meeting on 15th February.

"The the general management of affairs be vested in a Committee of seven, of whom the permanent Trustees shall ex officio form part and the three members be elected annually."

If this is passed it will then be for the meeting to elect a Trustee in place of Mr. Dodds and 3 members of Committee to make up the number to 7.

THE MILITARY SITUATION IN 1HE FAR EAST

THE SEA FORCES.

In view of the position in the Far East, a tabula-tion and description of the respective naval strength of Japan and Russia is given below. Apart from other considerations, it is obvious that we could not other considerations, it is obvious that we could not fail to be deeply sirred by the submission of modern naval material to the test of actual warfare. Both nation possess in Far Eastern water squadrons of modern vessels supplied with the latest appliances which science and ingenuity have devised. To the people of this Empire, whose security rests mainly on its Fleet, anything which can add to our knowledge in this connexion is of the greatest moment. The only three great sea-fights of latter days—Lissa, the Va-iu, and Santiago—were full of lessons to naval officers and naval architects. And it cannot be doubted that a naval action fought under such conditions as might arise in the Far East might well add to our knowledge and modify our views on many dations as might arise in the Far Last might well add to our knowledge and modify our views on many points at present more or less undefined. In the tables which follow some of the elements and attributes we find in the ships on either side are grouped together as a basis for forming an estimate of their comparative strength. But such an estimate must be incomplete; for, and naval students are aware, there are factors which must come into play

of which we can at present form no definite estimate.

The following is a tabular statement of the principal vessels in the Japanese Navy:—

BATTLESHIPS.

Name.	Displace ment. Tons.	1.H.P.	Nominal Speed, Knots.	Gun Pro- tection	of Broad side Fire. Lb.

as Organist towards the end of the year, and desire to express their appreciation of his past services. The duties have since been kindly and successfully undertaken by Mrs. Field to whom the cordial thanks of the congregation are due.

At the General Meeting it will be necessary to elect a new Committee. Two vacancies on the old Committee—those of the late Mr. Kilby and of Mr. C. V. Sale who is absent from Japan, have not yet been filled and Messrs. Dodds and Suart being about to leave Yokohama, will no longer be able to serve on the Committee.

The Accounts have been audited by Mr. S. E. Unite and the Committee cannot close this report without recording their sorrow at the death of the late Mr. E. The Committee cannot close this report without recording their sorrow at the death of the late Mr. E. The Committee and their sympathy with his family in their bereavement. They particularly wish to record their gratitude in name of the churchgoing community for his special exertions in connection with the Building Fund.

THE MILITARY SITUATION IN THE

The Account with Hon. Treasurer. Can be charactered to be correct.

The Committee cannot close this report without recording their sorrow at the death of the late Mr. E. The Committee and their sympathy with his family in their bereavement. They particularly wish to record their gratitude in name of the churchgoing community for his special exertions in connection with the Building Fund.

THE MILITARY SITUATION IN THE

THE HONORARY TREASURER IN Account with Horse Part Prent Fund For The YEAR of less displacement, not quite so well protected, but the speed is similar to that of the earlier as healing to get similar and the speed to all ideas of meet leading. There are some older battless in selling to the same the calibre. There are some older battless in the vessels would be opposed to all ideas of meet protected, but the speed is all ideas of meet protected, but the speed is all ideas of meet protected, but the speed is all ideas of meet protected, but the speed is m

These include the vessels which fought the battle of the Ya-lu against ships protected by vertical armour, and, by virtue of higher speed, more modern guns, and superior tactical ability on the part of the Japanese commanders, came off victorious. The still smaller vessels do not call for special mention, but Japan has a torpedo flotilla which may be expected to emulate the conspicuous part which the vessels of this class played in the war with China. There are sixteen 30-knot destroyers built in this country, and four have been constructed in Japan. The more modern torpedo-boats number at least a score. Japan has the great advantage of being able to

modern torpedo-boats number at least a score. Japan has the great advantage of being able to use her own tortified ports as naval bases. There are four dockyards well equipped with modern plant and quite capable both of constructing and of repairing vessels of any class. At present Japan has not her own armour-plate factories or steel works, but it is intended to provide these, so that she may be able to undertake the construction and entire equipment of her vessels of war. In the mercavitie

able to undertake the construction and entire equipment of her vessels of war. In the mercantile marine, which has increased enormously of recent years, she will find all she may require for the purposes of transport and auxiliaries to the war fleet. To turn to the persaunel, the judgment which the Japanese officers displayed in the conduct of the war with China won the admiration of all seamen. It was marked by courage, capacity, and admirable resourcefulness. The standard of discipline on board the ships is that of the British Navy; their officers have received their training on board our ships and British naval officers have acted as their instructors. They have a naval college which is a model of everything such an institution should be. The ships are constantly exercised, and their crews are inspired everything such an institution should be. The ships are constantly exercised, and their crews are inspired by the keenest spirit of real and patriotism; moreover, they possess that mutual confidence which is bred of successful experience under the stern test of battle. As Sir William White recently said:—"They have shown themselves fully equal to the great responsibilities involved in using during war as well as peace a fleet replete with every modern improvement in machinery, guns, and equipment."

The following are the principal Russian ships at present in the Far East, or on their way there:—

Seyne. She has just arrived at Port Arthur. The Cesarevitch is very French in appearance, with "tumble home" sides and heavy topworks. She carvies her four 12in. guns in turrets, one pair forward and one pair aft, and her 6in. guns also in turrets, three pairs on each broad-side. But neither in weight of broadside nor in gun protection does she come up to the standard of the Japanese vessels. The Relvisan, the second battleship in point of size, was built in Philadelphia. She carries the same armament as the Cesarevitch, but the guns are disposed and protected in a different manner. The next class consists of the Perevicel and Puble.'a, and would have included the Osladia had she already arrived. Their principal armament consists of four 10in., 12 6in., and 20 3in. guns. This armament, again, is placed in a different way from that of the other ships, and the vessels have a very large expanse of unprotected side. Lastly, there are three of the Pollava class—the Pollava, Petropavlovsk, and Sevastafpel. These vessels are of about 11,000 tons, and their principal armament consists of four 12in. and 12 6in. guns. As regards protection and speed these vessels compare unfavourably with the Japanese battleships, and in manceuving the speed of

and 12 bin, guns. As regards protection and speed these vessels compare unfavourably with the Japanese battleships, and in manceuvring the speed of the slowest must be the speed of the squadrom. To turn to the cruisers, although for many years the Russians have given their vessels of this type belts of vertical armour at the water-line, they cannot be said to have more than three ships which should be classed as modern armoured cruisers. The latest and best, although not the heaviest, is the Bayon, built at La Seyne and having a speed of from 21 to 22 knots. She has an 8in, belt at the Bayon, built at La Seyne and having a speed of from 21 to 22 knots. She has an 8in, belt at the attending the seven inches of armour. Her secondary battery, too, is in a casemate and well placed. But, good as the Hayan is, taken altogether she is inferior to the Japanese armoured cruisers in every respect, with the possible exception of speed. The Gromobol, the heaviest Russian cruiser, and the Russia, a similar vessel, although they carry guns almost as heavy as those in the Japanese cruisers, yet, owing to faulty disposition, have a weight of broadside fire which is very much less. Moreover, the Elswick 8in, gun throws a heavier projectile than the Russian piece of similar calibre. The Rossia, also, has very inferior protection. In many tables the Rinrik and Dmitri Donskoi are classed as armoured cruisers, but they do not really deserve this distinction. Russia has some quite new and useful protected cruisers in the Far East, as will be seen by the tabular statement above, and these should be useful as scouts. Of the smaller classes of vessels, gunboats, &c., it is unnecessary to take special notice, as their value is chiefly for harbour defence. There is, however, a strong torpedo flotilla, including from 18 to 20 destroyers and a number of torpedo-boats, some of which are being convoyed to the station by the Dnutri Donskoi. The principal contrast which the Russian squadron presents to the Japanese is in lack of homogeneity, i

they will certainly after and improve their relative position.

In another respect the Russians are faced by a serious difficulty. The plant, machinery, and docking facilities are entirely inadequate for the ordinary repair and maintenance of their fleet, and there are altogether insufficient resources for making good damages that would certainly occur in action with an enemay. The docks at Port Arthur are not yet fully complete, and those at Vladivostock will be shut in by ice during the winter. In their well-equipped naval bases the Japanese possess a factor which must be of great importance in a naval war.

Of the personnel of the Russian fleet it can only be said for certain that it is entirely lacking in experience of war, and that, its training having being been mainly carried out in the Haltic, the conditions cannot have been entirely favourable. The discipline on board Russian ships is reported to be good and the men are said to be tolerable marksmen. The officers are very keen about their work, but the sentiments

Of the personnel of the Russian fleet it can only be said for certain that it is entirely lacking in experience of war, and that, its training having being been mainly carried out in the Baltic, the conditions cannot have been entirely favourable. The discipline on board Russian ships is reported to be good and the men are said to be tolerable marksmen. The officers are very keen about their work, but the sentiments they inspire in their men are not entirely conducive to that mutual confidence which should exist between the forecastle and the quarter deck. Altogether, while it may be said that the stuff of which the Russian sailor is made is excellent, it must lack both training and experience. It is unwise to prophesy before the event, but it wouldnot come as a great surprise to students of naval affairs if the Russians were in withdraw their ships into the Gulf of Pechili, rather than force a fleet action. For in the latter event, even if they were partially successful, they would be unable to replace the damaged ships or adequately repair and make good their losses. With a hostile fleet behind the guns at Port Arthur the Japanese could hardly venture to sends troops into the Yellow Sea, and would be obliged to land on the eastern coast of Korea with long land communica-

tions to maintain before they could strike and endeayour to inflict a crushing blow upon the enemy. THE LAND FORCES.

It may be definitely understood that, in the event of a rupture between Russia and Japan, no military operations will be undertaken by either Power until the naval situation has been sufficiently cleared, either by \(\extbf{\extit} \) decisive naval engagement, or by the refusal of one Power to risk the issue of a naval conflict and the withdrawal of its vessels from beyond the sphere of probable contact. Whatever the immediate naval programme may be, it is unlikely that the final settlement of the present difficulties, if it should come to the arbitrament of war, will be found upon the sea; therefore it will be interesting to study the military strength in the Far East of the two rival Powers.

study the military strength in the Far East of the two rival Powers.
